---

HOPE, IND., July 15, 1901.

*Editor American Poultry Journal.*

I have this day sold to Mr. J. C. Hubinger of Keokuk, Iowa, my prize winning cock bird "Fishel's Ideal II.," winner of first prize at the great Chicago show for $200, and six hens at same show for $300, making $500 for the breeding pen of seven birds. This is without doubt the longest price ever received for a breeding pen of birds and shows what can be done with "Fishel's White Plymouth Rocks." Mr. Hubinger believes in having the "Best in the World" in poultry as well as anything else. One thing sure he has it in this pen of White Plymouth Rocks. The prospect for a large trade the coming season is very bright and I am glad to see White Plymouth Rocks taking the front rank in the Fancy. Yours respectfully,

*U. R. Fishel.*

---

A. D. Coleman, the Brown Leghorn specialist of Belding, Mich., finds it necessary to sell his birds at an early date. Mr. Coleman has some excellent specimens of this variety and this sale provides a good opportunity for some one to get some choice birds at low prices. prices.

**Winners of 75 Ribbons this Winter.**

Cheap to make room. Barred and White Plymouth Rocks and S L. Wyandottes. Stock scored by Hewes. Belgian Hares and Fancy Pigeons. Agents wanted to sell Lightning Lice Killer. Kills quick as lightning.

**J. N. HUTTON & SON, R. R. No. 2, La Porte, Ind.**

## Partridge Cochins, Barred Plymouth Rocks.

Bred by the single mating plan—the only correct way, Also Buff Cochins. Light Brahmas and Bronze Turkeys. Stock and eggs at reasonable prices. Send for illustrated catalogue. Sharpest and best grit 150 lbs. for 50 cents. Agent for Cyphers Incubator. Stock carried.

**O. E. SKINNER, Columbus, Kas.**

## White Rocks.

If you want White Rocks that are white and birds which you will be proud of send me your order for stock or eggs. Look at the last record made last month at Carey, O: 1st cock, 1st hen, 1st pullet, 1st pen, 2d ckl. and other prizes. Birds scored as high as 95½ points. All correspondence promptly answered.

**GRANT W. KINLEY, Upper Sandusky, Ohio.**

## Barred Ply. Rocks and Buff Pekin Bantams

of the highest excellence, bred from winning birds. Fruit trees for the poultry yard and ornamental shrubbery. Correspondence solicited.

**B. H. PAYNE, Painesville, Ohio.**

**Purity Strain White Plymouth Rocks.**

Bred for egg production. Eggs and stock in season.

**PURITY POULTRY YARDS, NILES, ILL.**

**1883 White and Buff Wyandottes, 1901**

**BARRED ROCKS.**

Choice young stock, bred from prize winning matings, scoring to 96 by Hewes, for sale after Sept. 1st at reasonable prices. Send for circular of winnings &c.

**S. F. FLINT & SON, Peoria, Ill.**

**Does Your Lamp Smoke?**

That means uneven heat and danger of explosion. Don't run any risk. Put a

**Hydro-Safety Lamp**

on your Incubator and Brooder and save oil, attention and avoid all danger. Water jacket keeps burner cool. Price, 75c. to $2.70. Catalogue of all incubator supplies **FREE.**

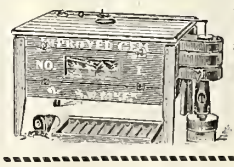
**L. R. OAKES, Mfr. No. 6 6th St., Bloomington, Ind.**

**"Poultry for Profit"**

is the title of our new year book. It probably gives more exact information drawn from actual experience than any book of its size now issued. Tells all about how to breed, grow, feed and market fowls of all kinds. Tells incidentally all about the Famous Millhook Poultry Farm, the largest pure bred poultry establishment in the country. Finely illustrated with cuts from life. Mailed anywhere for 10c. Send for a copy and be entertained and informed.

**THE J. W. MILLER CO., Box 444 Freeport, Ill.**

**A 60-EGG INCUBATOR COMPLETE $5.00.**



Four sizes. Self-regulation, ventilation and moisture. Brooders $3 and up. Warranted. Catalogue and testimonials with Special Offer for July and August, FREE.

**J. W. SAUER, Trotwood, Ohio.**

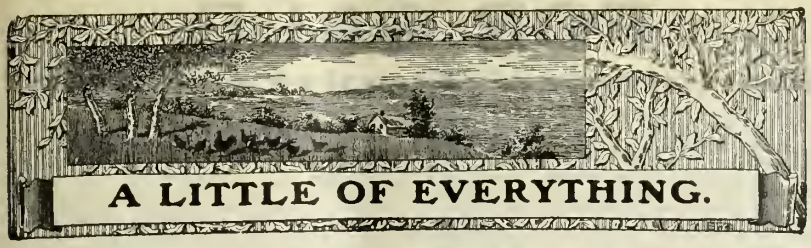
## White-ROCKS-Buff.

**Buy Eggs**

that will hatch you prize winners,

**Eggs $3 per 15.**

**FRANCIS C. BREWER, Jacksonville, Ill.**



# A LITTLE OF EVERYTHING.

*Just a Few Hens for Breeding.*

In the early spring I added the White Wyandottes in connection with my Silvers and sent to Duston for the best pen he had for sale. As they came high, I could not get a very great number, so thought I would see how many chicks I could raise from twelve hens. I now have 500 as fine white chicks as I ever saw. This convinces me that one can do better with a few by taking extra care of them than by so many and not having the time to look after them so well. Eggs have hatched well for me this spring; could not have 1,000 chicks if they had not. Next year am only going to use six females in each pen, both Silver and White. *Mrs. Geo. Hanly.*

*Hoopeston, Ill.*

*Young Stock.*

During the hot August days and nights special attention should be given the young growing stock. See that they are not crowded in small brood coops. Give them plenty of room and fresh air at night. Many a fine show bird is ruined during August and September by being crowded and kept too hot at night.

*Camp Point, Ill.* *Henry T. Reed.*

*Vigor and Pure White Color.*

We have bred White Rocks and White Wyandottes for sixteen years and are well satisfied that it does not pay to breed too close to the "dead white" line for utility. Our most vigorous and best laying stock has a tinge of yellow in under color. All weakly chicks are pure white with whitish legs.

*De Ruyter, N. Y.* *D. F. Taylor.*

*Breeding.*

I find that I have better birds by keeping with one strain and only getting new stock every two years. I get a good cockerel or cock of the strain that I have and use him, and the next year use his cockerel, and my birds get better every year. Don't forget size in your breeding. My breeders this year weigh over nine to ten pounds and are not fat.

*Oxford, Ohio.* *I. T. Bryant.*

*Feeding Young Chicks.*

We are constantly learning something. We have recently learned something of value. The cause of bowel trouble so common in young chicks is indigestion. Indigestion is the result of overfeeding. It is better to err on the other side. We now do not feed anything till chick is 48 hours old. Then grit is the first thing. After that we begin with chick manna, but only a very few crumbs at a time, five times a day. We keep them hungry and scratching. The liveliest lot we ever had. *Henry M. Ladd.*

*Cleveland, Ohio.*

**Every person entering our prize article contest, and whose article is worth publishing, will be given a copy of the latest Standard and two year's subscription to A. P. J. Your article does not have to be better than any other one. See the offer elsewhere in this issue.**

*To Make a Handy Chicken-Run.*

Drive small stakes from six to eight feet apart, outlining the shape the run is to be. Then fasten the wire netting to one stake nearest the brooder or coop and draw it around the outside of the other stakes and fasten again to the last stake. Cut a number of laths slightly longer than the width of the netting, notch the ends; then, by placing one end over the lower cable and the other end under the top cable, the netting can be stretched into shape and will hold up without fastening to the intermediate stakes. Such a run can be easily and quickly put up and taken down and is therefore very handy when moving to fresh ground. *F. O. Wellcome.*

*Yarmouth, Me.*

*Lice on Little Chicks.*

This is the season when little chicks hatched and brooded by the hen get infested with lice. My hens seemed free from lice. Frequent and careful examination of them revealed no lice. Yet within two weeks after hatching I find my chicks heads full of nits and quite a liberal supply of lice. Mr. Geo. W. Brown, of Arkansas, recommends greasing the chicks' heads. We find no better remedy. Mix a little kerosene and salt grease. Give them a careful greasing and in a day or two they brighten up as though they enjoyed life again.

*Lemont, Ill.* *Jesse E. Morgan.*

*How to Hatch Chicks.*

This question has frequently been asked me. My experience has taught me to hatch with hens. Use hens in colonies of five or six. Place each colony in a separate room or small shed built for the purpose. Place the broody hens in their little house and try them for a day or two on infertile eggs for the sake of education; then set all at once. Give them each a separate nest box. They will exchange nests, but leave none uncovered. They will all hatch at once, and no hen that is to hatch later will be disturbed. Test on the seventh day and you may be able to shift a hen to another colony. *Ed. McCulloch.*

*New Albany, Ind.*

*Items to Remember.*

Unless birds have free range they should have cooked meat twice a week during the hot term, instead of green bone. It should be chopped fine and mixed with boiled potatoes or a little meal. In mating Houdans, for best results the male should be very dark and above standard weight, otherwise the chicks will be small and too light color, etc. We should endeavor to keep all promises made to our patrons and if possible give a little more than even measure. It pays both parties.

*Wauseon, Ohio.* *Flora A. Waddell.*

*Success in Raising Pigeons.*

This is the best season I have ever had in breeding fancy pigeons. I have raised

**Kills** all lice or mites on chickens and hogs by simply painting or sprinkling on roosts—for poultry; on bedding for hogs. **Sample free.** Be sure to get Lee's, in yellow cans, with trademark. Not sold in bulk.
**GEO. H. LEE CO.,**
or No. 8 Park Place, New York. **Omaha, Neb.**

**YOUNG STOCK NOW READY TO SHIP.**

I have 500 to select from. Will sell a part of this year's breeders and guarantee satisfaction. White, Barred and Buff Rocks, White and Buff Wyandottes. My birds are winners.
**MRS. J. H. OREBAUGH, Batavia, Ohio.**

**The Smith Sealed Leg Bands**
Nothing like them. Best out. You must see them before buying others. Free samples and illustrated price list. Mention A. P. J.
**W. H. Smith & Co., Blythedale, Mo.**

**Black Langshans.**

Illinois State Show winners and Danville, Ill., winners. Eggs the same old price, $2 per 15. Can spare a few more sittings of eggs from my winners.
**W. M. MAYER, 824 E. Main st., Danville, Ill.**

**Arnold's White Wyandottes**

Prize winners at Chicago, Peoria, Danville, Springfield, Bloomington, Rockford, Streator and Princeton. Always winning where competition was strongest. Scores as high is 96¼. Have a few more good females for sale. Circular free for the asking.
**CHAS. G. ARNOLD, Box 45, Leland, Ill**

**Buff Rocks.**

Three fine pens, Burdick's thoroughbreds; line bred for six years. Headed by such birds as Gold King, Gold Prince and Pure Gold.

**Eggs For Hatching,**

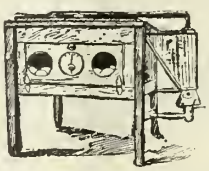
$2 for 15; $3.50 for 30. Satisfaction guaranteed.
**J. H. GEIDNER, Rock Falls, Ill.**

**Eggs for Hatching**

—FROM—

**Maish's Barred P. Rocks.**

I have 4 breeding pens of B. P. Rocks, containing all my prize winners at last winter's shows. Birds score from 91 to 93½ points. 15 eggs $3; 30 eggs $5. I guarantee satisfaction. B. P. Rocks exclusively.
**ED. N. MAISH, Frankfort, Ind. R. R. No. 1**



**$4.00 UP**
**RAZEE Non-Moisture INCUBATORS.**

Are are self regulating. Eggs turned automatically. Have a special moisture connection with the heater. Send for our new circular.
**WM. RAZEE 1488 Tripp Ave., Chicago**

**Rippley's Fly Remover**

instantly removes all flies, mosquitoes, lice and other insects from cattle, horses and other animals sprayed with it. It is healing to any sore. Animals rest easy and feed quietly all day. Cows give ¼ more milk, which is a big saving. 1 gal. will protect 500 cows. Money refunded if animals are not protected. Endorsed by the best class of people. Order at once and s cure agency, you can sell hundreds of gallons. 1 gal. $1.10; 2 gal., $2.10; 5 gal., $4.50; 10 gal., $9.00. **Rippley's Special Sprayer** for applying same, $1.; **5 gal. Compressed Air Sprayer** for applying same on large herds, $6.25.

The Rippley Hardware Co.,
Gentlemen:— For three years I have been experimenting with different things to keep flies off my cows, but not until I tried your Fly Remover and Compressed Air Sprayer was I successful. I used this last year and found that it cost less than one cent per week per cow. With your Compressed Air Sprayer it takes but a few minutes to put it on, and the result has been that my cows were free from flies, and during the year gave 6400 pounds of milk each, which made 324 pounds of butter per cow. I can heartily recommend it to all stock owners.—JOHN ARMSTRONG, Prest. State Board of Agriculture, De Smet, S. D., June 4, 1901.

**RIPPLEY HARDWARE CO., Box 11, GRAFTON, ILL.**
Branch Offices { 8 Park Place, N. Y. City, N. Y.
{ 34 Merchants' Row, Boston, Mass.

over 150 fine youngsters. I attribute my success to cleanliness of the loft, lots of fresh water and sound wheat and corn. I buy dry bread from the bakery cheap. It is pie to them for a change. I feed no cheap screenings at all. The lofts should be looked over every day and the eggs and young ones replaced, which have rolled out of the nest. Where there is one strong and one weak, they should be separated and mated to others having the same strength. Good ventilation should be provided and the place kept clear of rats and cats. *P. Newcomb.*

*Cedar Rapids, Ia.*

*Roosting Coops for Chicks.*

If you want to be successful, you must provide open wire front coops. Twenty-five chicks in one coop is sufficient. If you crowd them in a box without roosts, you must look for roupy, consumptive pullets, etc., because when crowded in coops, with no air and no roosts, they perspire all night and in the morning catch colds. It would be far better to allow them to roost in trees and on fences, etc., in accordance with nature, but fall rains will injure them. The rainproof front coop should be provided.

*St. Charles, Ill.* *Charles M. Sontag.*

*Experience.*

It is an old saying that experience is a dear teacher. Though old, it is true as can be. It takes years of experience to learn how to feed and care for little chicks, so one can raise all that are hatched and to make old biddy lay eggs whether she wants to or not. Yet with years of experimenting and study these things have been accomplished, but not without an expenditure of money and time. *A. J. Webster.*

*Columbia City, Ind.*

*Scratching Beds.*

If it is possible, do not keep laying hens or raise young chicks without this very necessary article, even on the farm. Place your coops for the little ones near some shady place and there scatter coarse strawy manure about three inches deep; then keep it moist at the bottom, if there is no rain, and watch the little fellows go down after the angleworms that flourish at the bottom, and you will see your chicks flourish also. The currant brush is a good place. *A. J. Webster.*

*Columbia City, Ind.*

*Feeding Young Stock.*

Feed often, but don't overfeed. I have found dry food to be the best. I consider millet one of the best grains for young chicks. Oatmeal, hulled oats, wheat and cracked corn are also good.

*Ferguson, Iowa.* *J. W. Malloy.*

*Feather Eating.*

Find out which is the guilty bird. Take a pair of sharp shears and cut the upper beak about one-eighth of an inch and then feed meat scraps. This will not hurt the bird and the beak will soon grow out again to its natural size. Then, if the fowls have been fed plenty of meat, they will not again take up the habit of feather eating. *John P. Peterson.*

*St. Paul, Minn.*

*The Plymouth Rocks.*

History needs no constantly reclothing for the sake of variety of expression. The fact remains: At Worcester, in 1869, the present Plymouth Rock was exhibited for the first time. For the next fifteen months came claimants for the honor of producing them. The Essex, Randall, Drake and Gray all had their adherents, but the Black Spanish, Black Java, Buff Shanghai, White Birmingham and Dominique breeds are their ancestors.

*Natick, Mass.* *I. K. Felch.*

*Some Old Hens Lay.*

I have a line-bred Plymouth Rock hen three years old that laid sixty-three eggs between February 20 and June 20, when I quit using the trap nests. From the sixty-three I set forty-eight, and forty-three hatched healthy chicks. The other fifteen I shipped to southwest Missouri and have a report of thirteen chicks. This hen is still laying (July 10) and has never shown any inclination to set and yet some one will say, "Just common chickens" will lay more eggs.

*Whitefield, Ill.* *J. N. Young.*

*Incompetent Judges.*

A man announces to the poultry world that he is an expert poultry judge. How are we to know of his qualifications? What is needed is for the American Poultry Association to adopt some law governing the matter and enforce it. All judges should pass a rigid examination before a man or men appointed by the American Poultry Association and no local association should employ a judge who has not passed this examination. There would then be fewer complaints of incompetent judging. When this rule is established, I, for one, am ready to take the examination. The American Poultry Association can set a time twice a year for such a school. Our idea is that this should apply to new judges only and not ones who have shown their ability.

*R. S. Franklin.*

*Urbana, Ill.*

*Feeding Young Chicks.*

When little chicks are first hatched they should not be given any feed. After they are twenty-four hours old they should be given dry food of some kind. When they are four or five days old they may be fed scalded meal, cooked wheat and soaked bread. After they are a week old whole wheat may be given with good results. *C. L. Hogue.*

*Battle Creek, Mich.*

*Lice and Mites.*

Now is the time, today, not tomorrow, to go over your entire flock and be sure not to forget the little chicks. Look

# FOR SALE,

## Densmore Poultry Farm,

### Atlanta, Ga.

Because of lack of necessary time to devote to the business, I feel constrained to offer this excellent property for sale.

Farm consists of 60 acres, improved land, on Ga. R. R., in DeKalb Co., ten miles from Atlanta and one-half mile from Clarkston; three trains each way stop daily in front of property and three others each way daily at Clarkston; three street car lines run within four miles of the property and almost certain one will reach Densmore in the near future. Have 18 breeding yards and houses; water-works system, putting fresh water in each yard; hundreds assorted fruit trees, asparagus beds, strawberries, raspberries, scuppernongs, mulberries, etc., etc. Fine place for fish ponds. Am breeding B. P. Rocks, Black Langshans, S. C. Brown Leghorns, B. C. Bantams, Pekin Ducks, White Guines. Catalogue for the asking. Fine patronage built up and place and quality of stock will be maintained until sold. Prefer to sell the property with name, good will, mules, cows, wagon, harrows, rakes and all implements, poultry, incubators, brooders, etc., etc. Property must be seen to be appreciated. Further details on application. Is an ideal location for some Northern or Western party coming South for health or business or both.

**J. D. McCARTY, Box 450, Atlanta, Ga.**

If interested, write for catalogue and other detailed information.

# Rhode Island Reds.

### The General Utility Fowl of the Twentieth Century.

Our WINNINGS the PRESENT year demonstrate without a doubt that we have MORE PRIZE WINNERS than any breeeer in the country. Having won in 1900, nine firsts and sweepstakes for best male, Concord State Fair, Concord, N. H. Eight first and and second, nine entries, at Brockton Show. Two firsts and special for best R. I. Red male birdin Fall River. Six first prizes, six entries, Malden, Mass. Forty-two prizes Philadelphia, including the special offers of $50 in gold and $25 in gold; also including nine firsts and nine secouds out of a possible ten each.

**1901**

Boston Show in the hottest competition, forty-eight prizes, including four firsts, three seconds and eighteen specials. At New York, seven firsts, five seconds. Which is a result unequalled by any breeder of any variety of any fowl. If you desire to obtain stock from the very best that there is, state what you want and write us for quotations.

### HOUSE ROCK POULTRY FARM, Wollaston, Mass.

## George's WHITE ROCKS.

Stand at the head, as our record at America's largest show, **BOSTON,** proves. If you want the **BEST** and **HONEST** dealings write to

**E. H. & S. H. GEORGE, Box 31, Groveland, Mass.**

## Barred Plymouth Rocks and S. C. White Leghorns.

Barred Plymouth Rocks (Montauks) —3 pens mated by 1st prize cocks, 92, 93, 93½ by Hewes, S. C. White Leghorns—2 pens mated with extra large size 1st prize cocks, 95 and 95½ by Pierce. Eggs from all pens $1.50 straight. My stock is bred in line and are good winter layers.

**MEDINS POULTRY FARM, FRED. A. ULRICH, Prop., Mossville, Ill.**

## EGGS! EGGS!! EGGS!!!

We are ready to fill your order for eggs from our prize winning Stay White Plymouth Rocks and Buff Cochin Bantams. No better stock in America. Eggs $2.00 per sitting.

**J. A. BABCOCK & SON, Goshen, Ind.**

for lice and mites, the poultry raisers' worst enemy. Use a guaranteed lice powder. Dust your hens and little chicks thoroughly; also put a little in nests, and your hens will lay and your chicks grow. *Edw. W. Brink.*

*Delavan, Wis.*

*Pointers.*

I have had better success this season with brooder chicks than heretofore. The cause is having kept cold water away the first five days. I find that a great variety of feeds with a nicely balanced mash at night makes them grow like weeds. That plenty of exercise makes finer chicks than close confinement and a great amount of feed. *J. S. Piper.*

*Hannibal, Mo.*

*Bowel Diseases.*

As a preventive use unslacked lime in the drinking water. White oak bark tea is also excellent. Give a bountiful supply of grit and fresh water. For fowls that are affected with bowel trouble give a teaspoonful of salts once a day and feed bread soaked in sweet milk. Give them as much as they will eat. Remove the fowls to separate coops.

*Mrs. A. J. Colvin.*

*Milton, Ill.*

*Give Them a Rest.*

Take the males out of the breeding pens next month, if you desire no more eggs for hatching, and give both males and females a much needed rest during the hot spell. Let the hens sit during August, if you would have them molt early. Use plenty of air-slacked lime now. *H. P. Mason.*

*Fayette, Mo.*

*Chicks Killed and Weakened by Early Feeding.*

We so often hear it said that incubator chicks should be kept off feed 24 to 36 hours after hatching. I do not believe they should be allowed any feed for 48 to 56 hours, except water and grit, which they may be allowed to enjoy after 24 hours. We find that incubator chicks treated this way, even the weaklings, overcome any tendency to bowel trouble, and the very puniest when fed the first week on hard feed, such as oatmeal millet, cracked wheat, or rice, develop into specimens of fairly strong constitution. Try it. *H. E. Rinchart.*

*Mgr. O. K. White Plymouth Rock Farm.*

*West Cairo, Ohio.*

*Eternal Vigilance.*

This is the season when lice get in their deadly work on the growing chicks, especially if old biddy does the incubating. Look well on their heads and keep the lice killer and insect powder constantly on hand and don't forget that mites are just as bad. Look under the roosts where they rest on their supports. And then if you want to make the little fellows grow feed green cut bone two or three times a week. *Geo. Hamilton.*

739 *Raymer St., Toledo, Ohio.*

*Pekin Ducks.*

There seems to be much prejudice among farmers in regard to ducks. Not long ago I was trying to interest a farmer in ducks and he informed me he would not have one on his farm just because his father before him would not permit one on the place. When properly handled the Pekin duck is a money maker and requires but little care. Farmers give the Pekin a chance.

*B. Howard Whitcomb.*

*Terre Haute, Ind.*

*Range for Chicks.*

An old orchard well set in clover is an ideal range for chicks. Keep a cup or tin can fastened to brood coop, which should be kept well filled with cracked corn and wheat. Don't confine chicks at any time; they will find all the water they need. *L. H. Edwards.*

*Mulberry, Ind.*

*Lice! Lice! Lice!*

The cause of two-thirds of all ailments in chicks and poultry is lice. I use lard under the old hen's wings; also a little under the chick's wings, and on top of their heads. I find this beats all lice powders and lice formulas and is the quickest and safest remedy. We use Dr. Ward's liniment in the drinking water to cure gapes in chicks.

*Ira Gregory.*

*Lexington, Ill.*

*Care of Chicks.*

If you want large, healthy chicks don't crowd more than twenty-five in one coop. Feed for growing pullets and cockerels should consist largely of cracked oats with the hull removed. Oats are the best feed for growing bone and large frame. Cracked corn is also good if fed once a day, but oats are not heating, like corn. *Jno. M. Sontag.*

*St. Charles, Ill.*

CURE FOR GAPES.

As an experiment for gapes I took a small chick about two weeks old that was nearly dead and dropped two drops of crude petroleum at the juncture of windpipe and found it to be a quick and sure cure. This is a very simple remedy and easily administered by using a very small oil can such as a sewing machine oil can. *H. A. Emmel.*

*Ogle, Pa.*

The best and most satisfactory results with chicks are obtained with good breeding stock, good judgment in mating it and good, clean and unrestricted range for the chicks to roam at will. Don't expect many winners to grow in close and filthy quarters on the best feed you can furnish them. *R. W. Duryea.*

*Great River, Long Island, N. Y.*

Feathers do not make the bird, but feathers of the right sort on the right body make the bird a show-winner.

**It is Your Cake**

Next season if you place your order for stock or eggs with Duston. My

**White Wyandottes**

Have won more prizes the past show season than any other strain in the country. I challenge any one to show a strain that has won the prizes mine has in the past five years. Regards practicability reminds me that my pullet sent an Experiment Station laid 23 eggs in January. My matings consist of the finest pens I ever owned. You have the same chance to raise prize winners that I have. Order at once and get your chicks out for the early winter shows. Eggs $5.00 per sit; two sits $8.90; three sits $10.00; five sits $15.00. or $20.00 in hundred lots. Catalogue 2 cents for mailing.

Winning sweepstakes at Chicago's great shows three years in succession. Show birds a specialty. Stamp if convenient.

**S. H. TAYLOR, Sibley, Ill.**
President National Bronze Turkey Club. (Poultry Judge,)

## SPREADING EASTWARD.

The Sure Hatch Incubator Company, of Clay Center, Neb., an institution largely advertised in our columns and well and favorably known to our readers, have just established a large house at Columbus, Ohio. They have found it necessary to do this in order to take better care of their largely increased and rapidly developing eastern trade.

This new arrangement will enable the Sure Hatch people to supply the wants of all eastern customers with their machines at the minimum cost for freight and will, at the same time, greatly facilitate prompt shipment. We congratulate our eastern readers upon this change, which is quite materially to their advantage. We wish also to congratulate the Sure Hatch Incubator Co. upon the enterprise and business judgment shown by their new movement. In the future those of our readers who seek information covering the Sure Hatch machines should address the office of the company nearest to them.

## VERY CHEAP RATES TO COLORADO.

On special days this summer the rates for round trip tickets over the Burlington Route from Chicago, Peoria, and St. Louis to Colorado will be more than cut in half, and on other days about half rates will apply. Then, since we put our fast trains on, it takes only one night on the road to get there.

We are doing everything possible this year to make it convenient and not too expensive for people of moderate means to spend their vacation in the Colorado mountains. There is no country in the world like Colorado for invalids and others in search of rest and pleasure. The pure, dry climate has the most astonishing permanent effect on the health and spirits of visitors, and especially is this so in the case of those from that part of the country near to the level of the sea.

Write TODAY inclosing 6c in postage for our beautifully illustrated book on Colorado, and with it, if requested, I will send also our Handbook of the state, giving information about the different places, hotels, ranches, etc., and the prices charged for board.

P. S. Eustis, General Passenger Agent C. B. & Q. R. R., Chicago.

Mrs. J. H. Orebaugh of Batavia, Ohio, writes that business has kept her rushing almost day and night this season. She says: "I want to explain to the people that the name of my plant as the "Phœnix Poultry Yard" does not imply that I am cramped for quarters, but rather I have one of the finest locations on the East fork of the Little Miami river. My fowls have the range of acres and a large flouring mill (of which my husband is propriector) to resort to for feed. There is no need that my fowls be stunted and starved, but rather that they come out plump and vigorous."

From recent tests the Cleveland Poultry Co., of Plattsburgh, N. Y., reports the La Porte's Lice Powder not only to have no superiors as a lice killer but to have no equals as a fly bouncer for cows, and by far the cheapest, as a 30-cent package will keep the flies from annoying five or six cows the entire season, thus enabling the Bovines to do their prettiest as milk givers.

# News and Announcements of Poultry Associations and Specialty Clubs.

## BLACK MINORCA SPECIALS AT PHILADELPHIA.

The Black Minorca alley at the coming Philadelphia show promises to break the record so far as entries go. Members from Iowa, Missouri, Illinois, Michigan, Ohio, Pennsylvania, New Jersey, New York, Vermont, Connecticut, Massachusetts, Maryland, District of Columbia and North Carolina have signified their intention of sending entries.

In the way of specials, in addition to the cash given by the Philadelphia management (which they promise to be very liberal with), the following have been offered, with many to hear from:

Wm. J. Boyd, Glenville, Ohio; $5 cash for best cock, hen, cockerel and pullet, bred, owned and exhibited by club member.

Charles L. Blanton, Falls Church, Va.; $5 cash for second best cock, hen, cockerel and pullet, bred, owned and exhibited by club member.

Mrs. George E. Monroe, Dryden, N. Y.; $5 cash for four best pullets, bred, owned and exhibited by club member, pullets in pen eligible to compete.

H. W. Billard, Brooklyn, N. Y.; $10 cup for heaviest cock and hen (not disqualified). Open to all exhibitors.

Jos. P. Hilldorfer, Allegheny, Pa.; fine silver trophy cup for best cock, hen, cockerel and pullet owned by exhibitor. Open to all exhibitors.

Miss Marie Hilldorfer, Allegheny, Pa.; setting Buff Cochin bantam eggs valued at $5 for best Black Minorca pen. Eggs from first pen at Boston.

B. C. Nichols, Bernardsville, N. J.; silver cup for club member winning most points.

W. G. Ruckenbrod, Burlington, Iowa; membership fee and dues for one year to lady making first entry at the Philadelphia show in Black Minorca class.

Rowland Story, Brooklyn, N. Y.; $2 cash for third cock; $2 cash for fourth cock; $1 cash for fifth cock.

B. F. Palmer, Akron, Ohio; $2 cash for third hen; $2 cash for fourth hen; $1 cash for fifth hen.

S. Champion, Cass City, Mich.; silver cup for best hen, bred, owned and exhibited by club member.

A. Trethaway, Wilkes Barre, Pa.; $2.50 in gold for best male and $2.50 in gold for best female, Anthracite strain. Donor not to compete.

H. L. Coe, Springfield, Mass.; $1 cash for best shaped female, bred, owned and exhibited by club member.

F. Schroeder, Newark, N. J.; $5 cash for member of club winning most points.

Geo. H. Northup, Raceville, N. Y.; silver cup valued at $15 for best cock, hen, cockerel and pullet, S. C. B. Minorcas, exhibited by any Minorca breeder who has not exhibited at a Minorca club meeting before; one silver cup valued at $15 for best cock, hen, cockerel and pullet and pen, Rose or single comb Black Minorcas, exhibited by any Minorca breeder.

Klee Brothers, Blauvelt, N. Y.; $1 cash for best male; $1 cash for best colored male; $1 cash for best colored female.

Geo. E. Howard & Co., "The Feather," Washington, D. C.; one inch ad. for one year to club member winning most points.

R. L. Simmons, Hillsboro, N. C., editor "Tar Heel Poultryman," $1 cash for best cockerel; one-inch ad. 12 months, value $6, for best cock; one-inch ad. 12 months for best hen; one-inch ad. 12 months for best pullet and three-inch ad. for four months for best pen, all for North Carolina exhibitors. Also 12 subscriptions to "Tar Heel Poultryman" to be placed later.

*Falls Church, Va.*

## GRAND INTERNATIONAL POULTRY SHOW.

MIDDLETON HALL, BRENTWOOD, ENG.
*Editor American Poultry Journal.*

DEAR SIR: I shall be obliged if you will allow me through the medium of your columns to again notify your readers of the fact that we are going to hold a Grand International Show of Poultry at the Alexandra Palace on Dec, 18, 19 and 20 in this year. We are already promised birds from France and Germany; Russia, Denmark and Belgium have been communicated with; we hope that American fanciers will see their way clear to send over a large consignment. If we receive promises of sufficient support we shall be prepared to grant silver and bronze medals and diplomas for the American section, and there will, I think, be no difficulty in raising a fund for a trophy, value £10, to be awarded to the best bird sent from America. For the American section we should hope that you would secure the services of an American judge, but of course the birds could be entered in the open classes at the usual fee, viz., $5. There would be no fee for the American section. The birds would be no expense to their owners while here, as Mr. Colt, managing director of Robt. A. Colt, Limited, of Waltham Cross, London, N., has very kindly offered to meet the birds at the Albert docks, and also to pen and feed them and get them ready for the show. The birds should be sent from America on November 30 and would arrive in England about December 11.

The Alexandra Palace is well adapted for a show; the Central Hall, lighted through a glass roof, is capable of holding 3,500 birds in a single tier; it can be reached from the center of the city in half an hour by two lines of rail; the grounds have lately been made over to the public and on Whit Monday over 200,000 persons visited the place.

The show is being run by a committee of practical fanciers, drawn from the leading Specialist clubs; our president is Viscount Deerhurst, and our vice-presidents are Captain Heaton and F. W. Smith. The show is receiving the support of the Poultry club, and the following societies are holding their club shows in conjunction with this fixture, thereby assuring it a thoroughly representative collection of birds: The Plymouth Rock and Andalusian Club, the Langshan Club, the Old English Game Club, the Orpington Club, the Buff Orpington

**White P. Rocks, Pekin Ducks and Toulouse Geese.**

A few old breeders for sale. Young stock after Oct. 1st. Price and quality right. 80-egg incubator almost new, cheap.

HARVEY H. HUGGETT, Fall River, Wis.

**Originated by E. O. THIEM**
**13 Eggs, $3.00 .....Denison, Iowa**

Club, the United Wyandotte Club, the Leghorn Club and the Campine Club, while several other clubs are considering the matter.

From the information I have been able to obtain I should say that the following would sell well here: Barred and Buff Rocks, Buff, White and Partridge Wyandottes, Langshans, Light and Dark Brahmas, Brown and Buff Leghorns, Houdans, Andalusians, Rhode Island Reds, Turkeys, Pekin Ducks, Bantams generally and any new and striking variety; anything really good will, I feel assured, meet with a ready sale.

Mr. Robert A. Colt, who is known to fanciers on your side, will be pleased to answer any inquiries and to give any information, while my own services are quite at the disposal of American fanciers, who will meet with a very cordial reception, if they can see their way clear to come over and see their birds win.

In the event of the American fanciers sending over birds, I do not think there will be much difficulty in arranging a return visit of English fanciers either in this year or the following.

Although time is not absolutely pressing, yet I would beg any intending exhibitor to write me promptly, and it would be well if a competent and reliable gentleman could be appointed on your side who would make any necessary arrangements, and with whom I could communicate direct. He should preferably be appointed by some central authority, hut in any case be well known to and enjoy the confidence of American fanciers and exhibitors. Yours truly,

*R. T. Thornton, Secretary.*

## THE BUFF WYANDOTTE CLUB CATALOGUE.

The new catalogue of the American Buff Wyandotte Club is ready for distribution. A copy will he mailed promptly to each club member and to all others interested. To all admirers of the Buff Wyandotte it will prove to be exceedingly interesting reading matter. Many things in connection with the variety, including its history are given in it. If you have not already received a copy and desire one, write W. R. Wooden, secretary, Battle Creek, Mich.

## UNION BUFF ORPINGTON CLUB.

Every one interested in this grand new breed should join this club. Its object is to promote the breeding of the Buff Orpington, to urge the adoption of the true type and color by breeders, exhibitors and judges, to advance the interest of the hreed and get them admitted to the American Standard of perfection. Send in your name and membership fee of $1 without further solicitation, as it will be of equal benefit to all. Let us make it a club true to name. In union there is strength. England and America is a grand union and should accomplish much. *Mrs. W. N. Marshall, Secy.*
*Lisbon, Ohio.*

## INDIANAPOLIS, 1901, SHOW.

The annual poultry, pigeon, dog and pet stock show will be held in Tomlinson Hall December 11 to 17. The Fanciers Association of Indiana are working to make this the score card show of 1901. The show will begin in the middle of the week, giving exhibitors a chance to get their stock to the show without shipping on Sunday. It is a well-known fact that Indianapolis is one of the best shows in the country to sell stock, being one of the first shows. Many buyers are there looking for winners for other shows. There will be cash prizes and many specials in every department. The awards will be made by some of the best judges in the country and exhibitors will know who will pass on their birds before they come. The show will he cooped in the best of shape. Put down Indianapolis on your list and you will not make a mistake. If you have any doubt write to any one who showed at Indianapolis last year. The committee will announce the judges and prizes later. *Wm. Tobin, Pres.*

## THE AMERICAN POLISH CLUB CATALOGUE.

I wish to state through the columns of the American Poultry Journal that the first annual catalogue of the American Polish Club is now ready for mailing and a copy will be sent free for the asking. All breeders of the Polish fowls should secure a copy of the same, as it contains much information on the Polish fowls. All breeders who are not members are invited to join at once. Membership fee $1, which shall be paid at time of joining the club.

*M. V. Caldwell, Secy. and Treas.*
*Leetonia, Ohio.*

## INDIAN GAME CLUB SPECIALS.

The American Indian Game Club will offer the following special prizes at the poultry show to he held in connection with the Pan-American Exposition October 21 to 31, 1901:

1. Sweepstake cup for the best cock, hen, cockerel, pullet and pen, value $100.
2. Bicknell and Whiting, for most typical cock and hen, cup, value $25.
3. Club, for most typical cockerel and pullet, cup, value $25.
4. J. S. Cleveland, Fox Lake, Ill., pen and ink sketch of the four winners in the open single hird class.
5. H. M. Carpenter, Sing Sing, N. Y., for best cockerel, cash $5.
6. Club, for best pullet, cash, $5.
7. John Skinner, Herman, Neb., for cock or cockerel with purest yellow legs (must win in open class), cash $5.
8. H. A. Kirby, Providence, R. I., offers silver cup for best pullet hatched from eggs purchased from him. Value $25. Also $10 gold additional if she wins first in open class.
9. Grant M. Curtis, for best exhibit, cash, $10.
10. Poultry Monthly, Albany, N. Y., offers advertising space as follows: One-eighth page one month for most typical male or female (perfection of color not to count); one-eighth page one month, to exhibitor coming the longest distance who does not win higher than fourth prize. One-eighth page one month to exhibitor winning least number of firsts.
11. American Poultry Journal, Chicago, twelve inches advertising space, to he used in any three months, to the largest exhibitor from west of Ohio and east of the Mississippi river.

Tbe above specials should be very tempting to breeders of C. I. games, and I trust we shall have the largest exhibit of these birds ever seen in America. Come out and bring your hest. You will be well used and your favorites will be taken care of.

Persuant to an order from President

Richardson, I hereby appoint a special meeting of tbe club, to be held October 25, at 2 p. m., in exhibitors' club room, Agriculture building, Pan-American Exposition. Many points of vital interest to all breeders of Indian games will be discussed, and points taken up that will be a benefit to all. I wish to urge every member to be present and especially invite all interested in the Indian Game Cornish to meet with us. Hoping to meet you soon, I am, yours fraternally,

*C. S. Whiting, Secy.-Treas.*
*Darien, N. Y.*

## DARK BRAHMA CLUB CATALOGUE.

The first annual catalogue of the American Dark Brabma Club is ready for mailing and a copy will be sent to any applicant if request is forwarded to the secretary, Clark E. Adams, Racine, Wis. The Dark Brahma possesses undoubted merit, which does not seem to be appreciated by poultrymen generally, and tbe club will find ample opportunity for missionary work. The catalogue contains much information which will be of value to breeders of this variety.

Officers of the American Leghorn Club, elected at Boston, Mass, January, 1901: President, W. E. Bright; vice presidents, Jas. Forsyth, Ezra Cornell, W. W. Harrington and F. O. Grosbeck; secretary-treasurer, Geo. H. Burgott, Lawton Station, Erie County, N. Y.; executive committee, Geo. H. Morris, Harry Lamon, W. H. Wiebke, W. H. Barksdale, H. W. Weeks, W. G. Vought, J. Emlen Smitb, C. I. Root, W. A. Gibson, D. L. Quirk.

I beg to say that Mr. J. Emlen Smith, F. O. Grosbeck, H. Lamon and G. H. Burgott at Boston agreed to donate $5 each to the club and Mr. W. E. Bright $10. Mr. Smith's donation was paid there. I trust that this amount will help our club. Yours truly,

GEO. H. BURGOTT, Sec.

TO THE POULTRYMEN OF THE STATE OF NEW YORK:

Arrangements have been made by Superintendent Converse, of the Division of Live Stock, Pan-American Exposition, with the New York State Commission, whereby all prizes won by New York State Breeders in the Live Stock Division will be duplicated by them to the amount of $5,000.00. It is estimated that this amount will double the cash winnings of every exhibitor from New York. *George H. Burgott,*
*Supt. of Poultry, Pan-American Exposition.*

The second annual show of the Oakland City Poultry and Pet Stock Association will be held Dec. 9 to 14, 1901. Our association is in good shape and we anticipate a grand time at our meeting the present year. O. P. Greer, of Bourbon, Ind., has been engaged as judge. Premium lists will be issued in September, and all interested parties are invited to send for a copy.

*L. B. Oursler, Sec'y.*
*Oakland City, Ind.*

The National Bronze Turkey Club has issued a handsome catalogue this season containing by-laws, etc., of club; also a number of valuable articles on mating, rearing the young, preparing for show room, etc., etc. A book worth many dollars to the amateur breeder as well as a source of information for all.

The book is free to all breeders of this handsome and profitable fowl. Write for a copy to Mrs. B. F. Hislop, Sec'y., Milford, Ill.

The second annual sbow of the Randolph County Poultry and Pet Stock Association will be held at Red Bud, Ill., December 17, 18 and 19, 1901. Full information regarding premiums, etc., can be obtained by addressing Mrs. Altha Smith, secretary-treasurer, Red Bud, Ill.

*Editor American Poultry Journal:*

DEAR SIR: The Logan County Poultry Association will hold their annual show December 23 to 28, 1901. Here is a chance for the exhibition of No. 1 stock, as we have a great many budding poultrymen in this vicinity. Stock will be given as good care as we would wish others to give ours. Good cash prizes. Ribbons hung and cash paid at same time. *J. M. Rapp, Judge.*
*Henry Stringer, Sec'y., Lincoln, Ill.*

The Northeast Missouri Poultry Association has been re-organized for 1901 and will hold its second annual show at Bowling Green, Mo., December 3 to 6, inclusive. The first show was a decided success and after paying all premiums in full they found the treasury in a good condition. This year they will offer some very attractive specials and sweepstakes, which will bring the best breeders of the Central West to the show. Ben S. Myers, of Crawfordsville, Ind., and D. T. Heimlich, of Jacksonville, Ill., will judge tbe poultry. The following officials have been re-elected: John Hettich, president, J. S. Fitzgerrell, vice president; L. T. Banderson, secretary and treasurer; V. S. Smith, superintendent.

The Plow City Poultry and Pet Stock Association will hold their second annual show November 26 to December 2, 1901. Mr. F. H. Shellabarger, West Liberty, Iowa, has been engaged to place the awards, which is an assurance that the work will be done in an intelligent and painstaking manner. Premium list and full information may be had by addressing Oscar Hogberg, Secretary, 1409 Fourteenth street, Moline, Ill.

The Bates County Poultry and Pet Stock Association will hold its second annual show at Butler, Mo., December 13 to January 3. Thos. W. Southard, judge of poultry, and Reed Storms, judge of Belgian Hares. Liberal premiums. Send to secretary for premium list, which will be out soon. *W. W. Graves, Pres.*
*C. A. Allen, Secy.*

# World-wide Studies of Accuracy and Profitable Originality by Dr. Earl M. Pratt.

(Copyright 1901. G. G. Bates)

## Look Over the Map.

How many cities could you mark on the Mercator map of the world at the top of this column? What do you know about the desirable personal forces of the different nationalities? We are more likely to hear of their undesirable tendencies than otherwise in our every day reading. Are you acquainted with any one in the different continents? My work is to coax you and some one ten thousand miles away from you to both send me useful local observations of general interest, and get both of you to working with me on this page.

*Have you ever made a list of reasons for your own private study and benefit, why some succeed and why some fail in the work you are in? It is a daylight-bringer to do so.*

## Ingenuity and Resourcefulness.

One of my friends, an intelligent old Englishman, told me about how his predecessor and himself had fixed up the little house in which he works. He makes me think that useful little schemes around one for convenience and comfort are a part of one's life. He is a gateman on a railroad in a suburb. He works fifteen hours a day, seven days a week for thirty-five dollars a month, without any holidays. He is happy and would not lose his position for a double gold eagle. My collection contains some written observations he has made.

*What are you doing to help improve the public schools near you? Helpers gain mentally when they help others to gain mentally. Real mental gain increases ability.*

## Ten Years From Now.

While studying a boy, who was standing in the car aisle with his mother waiting for the gatemen to put another coach on the train, I wondered what our boys and girls must know in order to make themselves useful ten to twenty years from now. Some educators think higher education unfits women for their best sphere, and we all know that some kinds of schooling—excessive education—unfits men for any kind of useful work. But true education never injures any one—it helps every one. Over education is like running too far before you jump—it hinders you from doing that for which you are running. Some wise men are advising students to cut off one of their four years on their books and invest it in some practical line of work. A banker told me it was easier to find new ideas than it was to get executive ability to promote the ideas. One of the best terms of schooling I have had was in a wrench factory, for money, taken between high school and a technical college.

*On account of a solution for a spontaneous perplexity we get excited and thus increase complications. Study ahead of necessity.*

## Opportunities for Betterment.

After a sickness we have a chance to put to use the good resolutions made during sickness and improve our methods. We can seek better food and use greater care in eating. A dime's worth of food well eaten does more good than a dollar's worth carelessly consumed. Pleasure in eating is a good condiment, but studied pleasure just for pleasure alone leads us into all kinds of trouble.

*You know the eggs are there and that the hens want to lay them—when you fail to get results you know that there is something wrong in the management of them.*

## How Foreknowledge Helps.

Mr. Bates tells me I must not forget that I am writing for poultrymen. He is wise to prompt me, because I might write for months and not mention chickens if left to myself. For fear of disobeying him I will tell a chicken story the first thing.

When a boy I had a pet Brahma pullet, plump and good looking, of two or three pounds weight. One day I entered the hen park and on coming out could not close the gate. There was a rubbery-spring of a resistance as the gate came within a foot of the post. As I opened the gate to investigate, my pet pullet ran out a yard and dropped dead. She

throngh June, from prize pens, Chicago and State Show winners, $2.50; auy other pen $1. Send for circular.

JOHN COOLIDGE,
Galesburg, Ill.

had run in between the gate and the building under the lower hinge. That lesson in accuracy regarding gates and chickens gave my affections a hard pull. If my pet had been alive and my father's hens all dead I would have suffered less. That was expensive experience—I never killed another chicken by that gate—it made me think, look, know more, and it increased my accuracy. Why could not I have learned by observation what I learned by expensive experience? I could have done so had I had my observation trained and I have done so many times since that event. An old German friend told me that we stopped growing when we stopped making mistakes, and I must be growing every day because I am making mistakes right along, but there are many kinds of mistakes and I want to grow by making those which do not kill "pet pullets" if possible. A Pennsylvania girl told me she did not think it necessary to be poor in order to be happy and I am trying to see if we cannot learn by the valuable experiences of others and lessen the necessity of errors and mistakes on our part. We should become more accurate and grow faster than we do and good reading is one way to do it.

You know more about poultry than I do, but I am trying to know more about you than you do—thus helping you to help yourself improve your work.

———o———

### Enjoying Your Employment.

In love with your work is one of the sources—daily sources—of profitable originality. Though very few get a living doing just what they want to do, yet many succeed and improve their world of work, leaving their subject in better shape than they found it. Desire to do something well helps people succeed though working at their second or third choice of employment. A Chicago man with a national reputation told me he had never done the work he always wanted to do. The work he wanted to do may have been some youthful fancy. He is a great success in the work he has done. Interest in your work brightens your eye, sharpens your thought and quickens your ear. We are continually walking over good things—better things—profitable opportunities. While waiting with friends for a belated train I placed a coin on the walk to see how many would walk over it. We got the value of the coin in entertainment, as dozens of people walked over it. Then we got the value of the coin again when we saw the joyful face of the old lady with a basket who found the coin, but did not see us. Greater interest in our work lessens the number of good things walked over—it helps us keep awake and thinking straight. A short-sighted person could see a dime on a high hitching post, yet be blind to a gold eagle on the ground. Greater interest in our work lengthens our sight without injuring its quality. Some of the things I tell you in these letters may help you most though they are the greatest distance from the subject you are interested in. You never know what is going to help you see something new and useful to you in your work. The art of picking up useful ideas in other lines of work and twisting them into usefulness in your work is a splendid art to acquire.

Your chickens will do better by you just as soon as you learn to do better by them, and a grocer in Austin or a florist in Maine may know of something which would be immediately useful to you. I interview all classes for useful hints for you.

Here's Your Chance.

Prize winning Barred Plymouth Rocks. We will not set any more eggs this season so will sell all the eggs from our hest pens at half price—$1.50 per 15. No discount for large orders. Birds from our yards have won for our customers at some of the largest shows the past season. Order a sitting or two of eggs now and have your birds iu the winnlug class next seasou.

# Classified Ads.

Under this heading ads will be inserted for three cents per word each month. Numbers and initials count as words. All ads will be classified under their proper headings, thus enabling the buyer to readily find the breed he wishes to purchase. No ad accepted for less than 50c per insertion. Terms, cash with each ad. Count the words carefully to avoid delay in publishing. Copy for classified ads should reach us by 19th of month preceding date of issue. Write your copy plainly, as upon this the correctness of your ads largely depends. AMERICAN POULTRY JOURNAL is furnished every advertiser during the time his ad is running. **Thirty thousand per month.** We guarantee an average monthly circulation of 30,000 copies of AMERICAN POULTRY JOURNAL. When placing your ads remember that advertisers of classified ads get better returns from AMERICAN POULTRY JOURNAL than from any other poultry journal—none excepted.

***On writing any of these advertisers mention A. P. J. It helps you and doesn't hurt us.***

***All Copy for Classified Ads Must Reach us by the 19th of the month.***

BERT H. WHITE, Prop., Box 2415, Battle Creek, Mich.

## 1882 Union Poultry Yards. 1901

Line Bred

Barred Ply. Rocks, White Wyandottes and Bronze Turkeys.

A SPECIALTY FOR 19 YEARS.

Also a breeder of up-to-date Pedigreed Belgian Hares for 14 years.
Eggs for hatching, $3.00 per 15; $5.00 per 30 of Rocks and White Wyandottes. No Turkey eggs for sale.

D. J. KOHLI, Lock Box 588, Bluffton, Ohio.

## JUST THINK OF IT!

For the balance of the season we are going to offer, honestly and truly, the one grand chance of a lifetime to get the very choicest and best line-bred prize stock and eggs. So just for your own sake we urge you not to let this chance slip. We have 40 choice select breeding pens, and from these pens we are going to select and mate up only two pens each of our specialties, which will contain the very cream of all our most noted prize birds, scoring from 94 to 96 points, from which we will furnish eggs at $3, or two sittings for $5. All other choice breeders we are going to close out, to make room, at from $2 to $3. Brother, you may hunt the world over, but never again will you find such a bargain in Barred Rocks, Silver Wyandottes, I. Games, Buff Cochins, Light Brahmas, Pit Games, Pekin Ducks, Wild and Bronze Turkeys. Don't wait, send now.

OUACHITA VALLEY POULTRY FARM, G. W. BROWN, Prop., Camden, Ark.

## Barred Plymouth Rocks.

50 choice breeding hens for sale cheap. Also fine young stock.

**F. B. SCHLOTTER, Keokuk, Iowa.**

## FOR 30 DAYS ONLY

We will make you a special offer on Humphrey Green Bone and Vegetable Cutters which will pay you to investigate by writing at once to **D. E. & A. J. BLICK, Galesburg, Ill.**

Circular free. Also Buff and White Rocks. We will close out our White Rocks at great bargains to make room for the Buffs.

## Nuggets! Nuggets! Nuggets!

The greatest prize-winning strain of Buff Plymouth Rocks in the world. Their record is sufficient proof. Stock from our yards won highest honors at the largest shows in America past season in hands of customers. Our matings produced the best lot of young birds we have ever seen. We have them up in size, fit to win in hot company. If you are looking for prize winners for the early shows, remember we never exhibit, so are not afraid to sell good stuff.

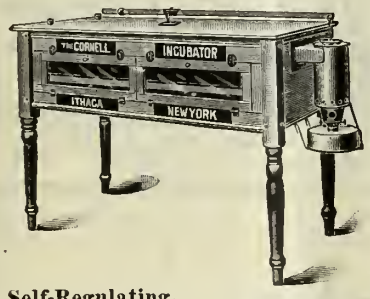
**W. H. OVERBAUGH, Hanover, Pa.**
**Successor to H. S. BURDICK.**

## Want to Win on Silver Wyandottes NEXT SEASON?

You can do it by sending me your order now for eggs from my prize winners. They are line bred and the eggs will not disappoint you. I have won more prizes during the last four years at the Illinois State, Indiana State and Chicago Shows than any Wyandotte breeder in the country. My birds score as high as 94 by prominent judges. I have a phenomenal English cock bird mated to some elegant open laced pullets, and expect grand results from this mating. Eggs $3 per 15; $5 per 30. Mention A. P. J.

**MRS. GEO. M. HANLEY, Hoopeston, Ill.**

## Cornell Incubators and Brooders



are the latest and most modern inventions for artificial hatching and rearing chickens.

The great superiority of the Cornell Incubators and Brooders is due to the regulation of ventilation and heating.

No fowl air or poisonous gases can accumulate in the egg chamber to poison or destroy the germ as in the case of nearly all other makes.

Our new improved Brooders are also automatically heated and ventilated. You can keep the heat at a constant temperature, with no cold corners nor hot spots in which the chicks will crowd.

Send for free descriptive catalogue. If the machines do not please you send them back. We will refund the money.

**Buy the Cornell and Get the Best Hot-Air Incubator & Brooder ever put on the market.**

Write to-day.

**Self-Regulating, Self-Ventilating, Neat Appearing, Simple in Construction, Reasonable in Price.**

**THE CORNELL INCUBATOR MFG. CO.,**

# Interesting Reminiscences.

## *Wholesome Advice to All Beginners and Hints to those who have taken up the business as a means of Livelihood.*

By J. W. MORSE.

IT is almost 30 years since I first contracted the chicken fever, and I still have it.

During those thirty years what great changes have taken place in the poultry industry in the United States!

Incuhators were then hardly known, and poultry papers were few and far between. The Poultry World (monthly) and Poultry Yard (weekly) were puhlished hy H. H. Stoddard at Hartford, Conn., and the Poultry and Pet Stock Bulletin was published hy John J. Berry in New York City, and there were some others I helieve, hut few whose names I don't remember.

The fanciers of those days, where are they? I. K. Felch, H. B. May, Philander Williams and V. C. Gilman and some few others are still on deck. E. C. Comey, W. H. Todd and A. C. Aldrich and a host of others have gone heyond.

The hreeds, the light and dark Brahmas, Houdans, Single Comh, White and Brown Leghorns, and the American Dominique were the leaders, the Barred P. Rocks were just showing their noses to the front. Some one was trying to introduce the Silver Wyandotte under the name of Sehright Cochin. The old favorites have heen pushed oneside by the splendid American hreeds—the Plymouth Rocks and Wyandottes.

Shows were then held in some of our larger cities. Now, shows are held all over the country in large and small cities and I am taking five poultry papers and pay less for the five than I paid then for three, and the good Lord only knows how many are puhlished in the United States.

Incubators have hecome so common and cheap that most every small country town has a dozen or more.

Every town now has its poultry cranks, and even the old slow-going New England farmer is waking to the fact that thoroughhred poultry is best after all. Then if we wanted early chicks we had to drive miles to find setting hens. Now, we just pull out the incubator and set it going, and in three weeks out come the little downy heauties.

Then, a man was doing well if he got out one or two hundred chicks hy July. Now, he will raise thousands and raise them all the year round—and the poultry industry has hecome one of the leading industries of the country, and I claim it is still in its infancy and that it will keep on growing until we supply our own markets—a thing we have not yet done.

Then, a poultry fancier was looked on as a crank. Now, as a necessary part of the poultry industry. No young man then thought of choosing poultry as a means of ohtaining a living and something for his old age—any old place was by most people considered good enough for hens then.

Now, we huild nice comfortahle houses and hestow much time and thought on them, and find it pays.

There are thousands of young men scattered all over the United States whose health will not permit them to hear the confinement of the shop, store or factory the year round and who cannot perform heavy outdoor work. To these men the poultry industry offers a fine chance not only to ohtain a living for wife and little ones, but to lay hy that little something for that rainy day for which we are all looking (old age), and, hesides, he his own hoss, and will not have to ohey the hell or whistle of shop or factory.

It does not require large capital to start in the poultry husiness on a small scale and climh up, and I would caution a new heginner not to run in deht if he can avoid doing so. He should go slow and try to pay as he goes. It is just here that a good wife comes in handy, as he can, when starting, leave the poultry in her care while he works and earns a little to keep the pot hoiling. Especially if she is a woman who loves pets—and what woman does not—it is her nature to love and pet something.

If he is poor he must start small. Let him rent or, if possible, purchase, a place near some good market, or at least on the line of some railroad, or electric road.

If he purchases he must he careful not to go in too steep. He must hear in mind that a pay day is coming, and that interest money has sent many a man to the poor house. But I would advise him to purchase, even if it does run him in deht. He had better he paying his money in towards a home than be paying rent, and besides he can make improvements and feel that he will get the benefit from them, and his wife will feel that way. And it is surprising sometimes how a good wife will manage to make ends meet when she knows she is getting a little home for herself and little ones. She is quite certain to keep her end up. That's her nature. God made her for just that very purpose, to he a helpmate and mother.

Having found the little home in as good location as possible, comes the selection of stock or purchasing of eggs, choosing the variety, and I hope he has been wise and has hought his standard and has also heen a suhscriher and reader of one or more good poultry papers, and when so many of them offer such low cluhhing rates and he can get four for the price of one, really and just here let me say I never in thirty years have seen a poultry paper so poor that I could not get my money's worth out of it in one year.

Now comes the anxious time purchasing stock or eggs. I would advise the purchase of stock if possihle, and he must not he foolish and try and start in with more than one variety, and that should he the one he loves hest or the one his wife loves hest (hetter the one she loves, hecause she will feel more pride in it), and he wants to keep on her right side for if he is poor he needs her help.

Time enough to add another hreed when he is well on his feet. I advise the purchase of thoroughhreds, hecause it gives him two strings to his how—practical and fancy. Would also suggest the purchasing of the very hest for the very hest is never any too good. Costs more, to he sure, hut is cheaper in the end, and he must purchase from a good reliahle breeder who will ship his stock on approval. My preference would he for year old hens mated to a fine vigorous cockerel and the size of the pen must he governed by his pockethook. I would purchase at least four females and male, hecause if the cockerel is a good vigorous one he will be liahle to tear the hens hacks if he has too few mates.

Having ohtained my pen I would be

careful not to get them too fat. Fat hens' eggs as a rule don't hatch. I would be sure and not try to raise more chicks than I could give the very best of care. Twenty-five vigorous chicks are better than 100 poor stunted chicks.

If his pen is small perhaps it would be advisable to purchase a good incubator if he can afford it, and then his wife can, if she is smart, run the incubator and save expense by raising the chicks with hot water jugs. In this way take a box of good size, cover the bottom with cloth, or chaff is better, line the sides with cloth, make bags, fill two jugs with hot water, put them in the bags, tie top of bags, place in box, put in the chicks, cover the whole with cloth. Now, his wife has the idea she can be trusted to save the chicks. He will need a box of sand for them to run out in in the day time. My wife has raised a great many in this way in years long gone by, but a good brooder is less trouble and better.

If he purchases eggs he should first see that his setting hens are all right. Take boxes, fill them half full of dirt, make nest of fine hay, place the hens on the nests and leave them to come off and go on. Keep food and water by them. Order eggs while training your hens. Order of some good reliable breeder. Thirty eggs is the least he should order. He should let the eggs rest twelve hours after receiving them. After giving the hen a good dusting with some good lice powder, give her the eggs. Leave whole corn and water by her and let her alone. Many poor hatches are caused by fussing with hens. If he has a good tester it would be well to test on the 7th day and to remove all unfertile eggs, as it gives the good eggs more room and chicks are less liable to be killed when hatching. Especially let the hen alone while hatching.

When chicks are hatched leave them 24 hours, feeding and watering her. Give her rolled oats, and if any of the chicks need food she will feed them. Nature teaches her. At the end of 24 hours take her and chicks off the nest. Give hen and chicks a good dusting with lice powder and then remove them to coop or dry goods box with yard attached. Give chicks grit. Keep it by them. Feed five times a day with rolled oats, bits of bread and scratching food. When two weeks old let them run, giving food three times daily. Johnny cake made of corn meal and bran and scratching food. Keep pure water where they can get at it. Give green bone (sweet) three times a week, and let them have a good grass run. It is more than half the fight, but if he has not the grass run, he must supply good green food daily.

Having raised his chicks, if he wishes to be a fancier he should enter his best at the nearest good local poultry show and should ship them in good neat coops with his name and address plainly printed on them, and he should go with them, if possible, to look out for them, to learn and to compare them with birds in competition, especially the winners. He should note the defects in his stock, for the purpose of mating his pens. If the defects are in his females, the male he mates them to should not have those same defects, and if he should purchase a male he should be careful to get one without the same faults which his females have, for like begets like as a rule, and if both males and females have the same defects, the chicks will most surely have those same defects. If he should purchase a male I would advise getting one from the same strain, as crossing two different strains sometimes spoils a whole season's work.

Having got his birds well mated, he should insert a yearly adv. in some good poultry paper, telling the people what he has got to sell and all about his stock, making his adv. short, sweet, but plain even to the dullest intellect, for not all the readers of poultry papers are bright, I should say, judging by some of the letters I receive every year. When answering letters of inquiry he should give truthful description of the stock he wishes to sell, sending featbers from breast hackle saddle fluff and cushion of males and females (cushion in female, male has no cushion). He should do just as he agrees. He should look beyond just that one trade, remembering that his stock will be his best or poorest adv., according to the quality of the birds sold. He should have one price for all; ship in light coops; watch the interest of his customers. That is the idea, and never sell poor stock unless he informs tbe customer just what it is. If a customer wants cbeap stock and purchases it with that understanding, that is all right. He should keep coops, houses and runs clean and sweet, fowls and chicks free from lice. Be vigilant and prudent and make every cent count. Never try to save a very sick chicken. The hatchet is the nicest and safest chicken doctor. He should be careful and feed none but good sweet bone, meat or grain. Give pure water once a day, and twice is better, placing it in the shade.

In short, Mr. Editor, if you should publish the above and some poor working man who has hard times to hold his job and keep the pot boiling, if it should benefit him (and I am sure it will not hurt him) because it is a positive fact that a poor man can start in a very small way and work up till he has a good paying business by combining market purpose with fancy, leaving both strings to his bow, and then this article shall benefit some poor man, the object I have had in view writing it will be accomplished.

# AMERICAN BREEDS.

## Various Matings we Have Seen this Season. The Influence of the Male. The Boom in White Plymouth Rocks.

### How to Produce and Maintain White. How to Produce Good Buff.

By T. F. McGREW.

FOLLOWING the promise made we shall tell of a few matings we bave seen this season. In the line of single mating we saw in the yards of two wbo claim to follow this method, three shades of color upon males mated to from seven to nine females, the females varying in color from too light to the darkest that are ever used for producing males. Such we could not call single matings, but should term them mixed matings for the production of medium quality; in but one yard have we seen what might be called single matings of high quality, and even these did not show the concise markings of those used by others under the double method.

We have seen double matings with medium colored males and females ranging from Standard color to so very light in shade as to cause comment. Standard colored females with very thin colored males so pale in hackle as to look white. We have also seen some superb colored show females, witb males that were very ligbt in color, but one even shade of same and the barring though pale most regular and distinct. This we should call a model mating for females under the double mating method.

We have seen a number of yards containing superb exhibition males of the higbest character, mated with females of several shades of color, all the females darker in color than the Standard shade, but what we should call the most likely to succeed as producers of exhibition males, is several yards, tbe males in these, most wonderful in shape and color, the females with all, uniform in size, shape and color, all bred in line from matings formerly made for males, all darker in shade than the males, all both males and females uniformly barred in tbe most approved fashion. Such give promise of the best results. Having been invited to return this fall and inspect the offspring from these many matings, tbe accomplishing of which will give me proof of the best metbod and enable me to transmit the result to your readers.

THE INFLUENCE OF THE MALE.

The natural influence of the male is greatest over the form and color of tbe offspring, the female having more to do with size and egg producing qualities, but we must not forget that it calls for the union of perfection and true bred qualities to succeed. With these facts before us we sball consider the influence of tbe male over above matings, also all barred Plymouth Rock matings of tbe same character. It is an admitted fact that all colors naturally lose in strength from the parent fowl to the offspring. For this we must provide in our matings. It is also true that some fowls grow darker with maturity or advanced years, while others grow lighter in color. All these conditions must be understood. We should also discover whether the cockerel or the matured male of a strain gives the best results.

When fully informed upon these points we may proceed with better judgment in our matings, as we all know the natural tendency of all barred Plymouth

Rocks is to produce males from all matings that are lighter in color than the females. This might be called an unnatural result. If so, it can be remedied. If, however, like with the red bird, nature commands such to be, we must work against or contend with nature to change these conditions, for if natural to this fowl it will be the work of generations to change them. If simply of recent training it may easily be guided into proper color lines of producing.

Now we must gain future knowledge of them by close study of what they have done. To have this knowledge of benefit, we will be compelled to line breed, and keep our records, so as to overcome or change the results. In all of this we must admit that with the Plymouth Rock the influence of the male is not in accord with the natural law. When this is admitted with it must go the admission that we in the handling of them have so changed the natural law, or rather changed natural condition in them, so as to entirely take from them the influence that belongs to them by right that gives the male the greater influence over color.

"Detroit Boy" and "Purity I" and "II." Score 95, 96½, 96; winners of 1st cockerel, 1st hen and 2d pullet at great Detroit Show, 1900. Owned by Grover & Grover, Concord, Mich.

To return to them the natural power over color, must prove a long continuous labor. For this reason the task of training them into a line where equal quality of color can be produced from the one mating, promises a labor of love rather than profit, the accomplishing of which will demand years of care and study, a task that must be perfectly done to assure success, at the same time one that may never bring with it either praise or profit. In the face of all this, can it be wondered at that no one attempts its full completion?

THE WHITE PLYMOUTH ROCK.

We hardly believe that the most enthusiastic admirer of the White Plymouth Rock fully realizes the near at hand overpowering boom that awaits them. Those who keep close watch upon the signs of the times feel assured that they are soon to enjoy an enviable position, for surely they are destined to be the most popular of all white fowls. So far as our observation goes this promised position is well deserved, for they have the qualities to maintain the position. They are a beautiful fowl for exhibiting. They reproduce of their kind under fair conditions. They do not demand years of experience backed up by expert ability to successfully mate them. They are or should be true Plymouth Rock in form. They are true blood descendants of the original of all American breeds. They naturally follow all the good traits of the breed. They are producers of eggs that are larger than medium in size. As to number produced, the records prove them to be among the largest producers in open contest.

In the farm poultry annual test they graded as one of the three best out of many hundred; up to April 1, 1900, the highest record for a pullet at experimental farms of *"A Few Hens"* was gained by a White Plymouth Rock pullet. For the month of April, 1901, the Barred Rocks averaged the highest, the White Plymouth Rocks third, place. In addition to this they have the advantage of laying eggs of good size that have strong, firm shells. These tests are quite interesting, carried on as they are under the personal management of Mr. Boyer, who allows none but good quality to come under his guidance, and he has enough of each to demonstrate beyond question the ability of numbers to do good work, grading them as individuals also on the average of the lot.

These are the natural advantages that belong to this variety. In addition to these they have the advantage of being a solid colored white fowl, that to be correct must have perfection of Plymouth Rock shape, and good generous size. All of these combine in them advantages that attract consideration, the outcome of which is assurance of profitable utility and fancy qualities. They are well suited for the farm, the city home, town lot or the yards of the extreme fancier. They will undergo culture for extreme fancy points under the Standard. They will give good returns when pushed for extra egg yield, and respond readily to the requirements of the fattening pen. All these good qualities only need reasonable fostering to gain for them first position among white fowls.

WHITE AS A COLOR.

White as applied to the plumage of fowls is a graded term of distinction that covers about as much scope as does the same when applied to the white goods department of our modern stores. True, white but few of us have ever seen, and we presume the only sample we could refer to would be the mass for white paper as it comes from the bleaching process, and even this is not all of it always true white. With this guide before us we should fully realize the path we must follow if we hope to gain pure white plumage for our fowls, a task that in reality we shall never complete.

There is at present three grades of white prevalent among the American breeds—the chalk white, yellowish white and pinkish white. In addition to these we have the bluish white of the Brahma that is caused by the influence or reflection of the under color of the light Brahma upon the surface plumage. In the same way the rich color of skin has more or less influence over the plumage of all fowls that have the golden yellow as its color. We prefer as a people the yellow skin upon our fowls. This being the rule, we must do the best we can to maintain both it and white plumage.

The chalk white plumage is least seen and most admired. Its presence in the exhibition pen or breeding yard always commands attention. In its presence we fail to comment upon the pale colored shank that usually accompanies it. This clearer white fits rather better with the bleached shanks. We are quite apt to say, Yes, the shanks do look a little pale in color, but they were all right. No, no, this is not the case. This attractive white looks the better with the pale colored shank, and we have never seen many so pure and true in color as to attract admiration for their chalk white plumage that had rich yellow shanks. The two do not seem to thrive together. When the beak and shank are of such rich golden yellow as to first attract the eye, you need not expect to have the chalk white plumage. White Cochin Bantams had formerly white beak and shanks with it very white plumage. Now, white shanks is a disqualification with them. Shanks must be yellow and plumage is not so white.

The yellowish white is most prevalent. When we say this we wish to have the term understood properly. So soon as you depart in the least from the *pure white* you must have present some slight tint of some kind, and nine times out of ten, or oftener, this tint is yellow. In many cases there is but the slightest trace of same, and these would pass uncut for color. From this we find the grade of color goes on till too yellow for consideration. If all were pure white they would become so common as not to have much value. The impure color of the white variety ranks with the bad color and barring of the barred variety. It makes more easy the culling system. Many fowls when gaining their new plumage show very strong indications of the yellow. This will disappear to a large extent. We should avoid feeding yellow corn at any time to white fowls. White corn can always be had

about as plentiful and cheap, so why not use it and gain the advantage, if any is to he had, in this way.

There is less of the pinkish shade of white than of the others. The presence of same is so slight that one might think it almost imagination to call it pinkish white, hut having seen some of them in which no mistake could be made, it has convinced us, also others with whom we have spoken on the suhject, of the actual presence of a pinkish cast in some of our white fowls. This we feel should be discouraged and drawn out.

TO PRODUCE AND MAINTAIN WHITE.

When selecting your hreeding stock, try and have their plumage white to the skin, including the shaft of the feather. Have the least indication of cream, straw or yellow that it is possible to have. Try to secure a male that is chalk white, no matter if his shanks are pale in color. Better this than too much yellow. Select from his product the chalk white females you get, and continue to use only this clear white chalk color in both males and females. In this way you will secure pure white plumage, but understand that in obtaining it you must lose more or less of the yellow in shank. The question is, shall we stand the cut on shank for lack of color, or take scattered cuts for color in all sections.

When asked how shall we mate our white fowls, so as to obtain and maintain chalk white plumage and rich yellow beak, shank and skin, we must answer hy asking how many have you seen that have the true yellow in shank and the chalk white plumage. So very few are seen that their presence is sounded afar when they do come. In our mind we class them as chance shots; always pair together the purest color of plumage you can possibly find, and have with them the best colored shanks you can have. If the shade of shank color grows thin or pale, build it up by using a female or two that have good colored shanks. Look out for a male that has bad color of plumage. Do not make use of such under any conditions, for they will surely destroy color qualities.

SHAPE.

The demand for hetter shape in all solid colored fowls grows year hy year. It is quite natural that it should be so, for while it is just as difficult to ohtain the proper shape in them as with the parti colored fowls, there is hut one color to contend with, and for this reason we have the right to expect and demand that the white and huff Plymouth Rock shall have hetter shape throughout their classes than is found with the barred variety. For this reason it is well to hegin to discard all poor and medium shaped white or huff Plymouth Rocks as soon as they develop in your yards, and before you are tempted to ship them to a customer, who has the right to expect you to send him as good as you hope to get when you huy.

It is ahsolutely demanded at this time that both the white and the huff Plymouth Rocks shall have the three qualities of *Form, Size and Color* to perfection. The country is entirely too well supplied with medium and poor grades. We might say the woods are full of them. The market is overcrowded with them. They should he sent where they helong—to the butcher block, and their room and your attention devoted to hetter quality, in the production of which a profit can be made.

THE BUFF PLYMOUTH ROCK.

The Buff Plymouth Rock is hy adoption one of the family, but having been made from the union of other hreeds, and not in line from the Plymouth Rocks, brought with them bad shape as well as poor color, both of which had to be guided into line so as to conform with Standard demands for shape and color. No matter how discouraging the heginning may have been, they are at this time a credit to those who cared for their improvement, as well as to the Plymouth Rock family. Long strides forward have heen made with them within a few years. There can not he any excuse at this time for having Buff Plymouth Rocks of poor quality. When such are seen the fault can be laid against the breeder and not the breed.

One fault that must he overcome in them is under-size. Entirely too many small females are seen among them. Unless the size of the females is increased we shall see early deterioration, for good generous size, vigor and constitution cannot he maintained in any breed when size of females is allowed to grow less rather than increased. Shape, size and vigor must be constantly improved in any breed or its varieties, that must be close bred, line hred, or inhred for color qualities. As it is essential to success that all buff fowls be closely bred to hold and improve color, constant watch must he kept or size will dwindle.

To hold the size and vigor, large, well built females must be used, for in this way only can it be assured. The big hen usually lays the largest eggs, another point in her favor and to the henefit of the chick. Over-size hens do not influence for poor form near so much as an over-sized, ill-shaped male. Size and vigor depends largely upon the female, form, color and head points upon the male. All these have heen continually mentioned, hut not properly heeded or there would he less complaint as to size and color.

BUFF COLOR.

No color is more heautiful when of the proper shade than golden buff. No color is less understood and in no color are there so many poor or inferior specimens produced as in huff. And the great trouble is and always has been, that people will mate light and dark shades together, when they should always mate even colors, or nearly so, together. There is hut one way to succeed in the production of good clear golden buffs, and that is to have good even color in hoth male and female, and the color of each alike, only that the breast color of the male should be one or two shades darker than the hreast of the female, while the top color of the male shall be as much darker than the female as would be natural when we consider the metallic luster that is natural to the male. The shade of color of hoth must be very even all over.

There is one fault above all others that should be rooted out in all buff fowls. That is, a preference that is shown for this very thin surface color that looks as if it was ticked with lighter shade of the same color. The real heauty of buff is to have it close and compact so as to have a smooth, clear appearance as if the whole weh of the feather was a rich dense color and not so thin as to look transparent. When this close laid color is of the proper shade good undercolor is usually present. Good undercolor is seldom found upon these washy looking specimens. It is quite as easy to have too much under-color as surface color. Bad color in either is equally harmful. We may contend for undercolor all we will, at the same time no one has ever produced a good clear golden huff surface color from any huff fowl that has the deep buff under color to the skin.

The Standard calls for rich golden buff free from shafting or mealy appearance, under color a lighter shade than surface color. This is proper and right for good color, and by adhering to same we can have good clean color, hut so sure as we encourage red or reddish buff or brown or the too deep shade of under color, we are bound to have bad wings and tails. Always hold on to the true buff as called for in the Standard.

## Time to Sow Alfalfa.

Instructions on growing this Crop for Poultry.

Poultrymen who wish to grow alfalfa as a grass or hay crop for fowls should do their seeding now, says Prof. H. M. Cottrell, of the Kansas experiment station. A letter on the suhject has been given to the press as follows:

Experiment Station, Manhattan, Kan., Aug. 1.—Alfalfa may be sown hetween Aug. 15 and Sept. 15. Alfalfa sowed at this time under favorahle conditions will furnish a good cutting of hay next May, and with ordinary conditions will yield three to four cuttings of hay next summer.

The ground for alfalfa should be well settled before seeding and only the surface made loose. Alfalfa will usually fail if seeded in the fall on freshly plowed ground. Well cultivated cornfields, with the stalks cut and drawn off, give ideal conditions. Such fields should not he plowed, hut harrowed only before seeding. Wheat, oats, flax and millet stubble ground plowed shallow, harrowed thoroughly and allowed to settle before seeding, furnishes good conditions for alfalfa. If such ground is mellow, plowing may not he necessary as the land will only need to be disced and cross-disced.

The best time to sow is in the last half of August. It is safe to sow as late as Sept. 15 if conditions are good. The ground must be well settled, with a loose mulch on top and well saturated with moisture so as to bring up the seed quickly and force the fall growth. If either of these conditions are lacking it will not pay to sow.

The best way to sow is with a press drill, using twenty pounds of seed per acre. Mix the seed with equal parts, by measure, of coarse corn-chop or hran. Drill half the seed one way and cross-drill the other half. If necessary to sow hroadcast use twenty-five to thirty pounds seed per acre, cover with a harrow and roll unless there is danger from hlowing. It is much better to seed with a drill. Alfalfa should he sown alone.

The best quality of seed will give the hest stand and the most vigorous growth and is always the most profitable to use, although it costs the most.

Alfalfa will grow on any well-drained bottom lands that do not overflow, but in the eastern half of Kansas, when properly handled, is a profitahle crop on upland. Alfalfa seeded last fall on upland in Shawnee and Riley counties gave two good cuttings this summer hefore July 5, while tame meadows and prairie grass on adjoining lands only half a ton of hay per acre.

# SOME REASONS WHY.

## Drawbacks of Too Close Confinement.

IN the August issue of A. P. J., under the head of "The Need of Reliable Information," we notice an editorial that is "our sentiments." The idea that the writer expressed in "We can give chickens the roup by feeding them mash for ten days," is all trash, absolute trash. We see and hear of thousands of poulterers who feed soft mash every day of winter and most of the breeding season, and how many would still be at it if this soft food would give their fowls a good case of roup? When fowls are fed in troughs which are allowed to become filthy, (by letting the hens roost on them) and are never cleansed or scalded out, there is more or less danger of disease germs accumulating therein. We often visit a "crank's" yard and houses who lets things go on after the aforementioned fashion, and in some places we reprimand the evil-doer. These disease germs are very sure to make trouble if the fowls using the troughs catch severe colds. If there be any germs near that will develop roup, the fowls with colds will come in contact with them soonest. We know a fancier who moved, into new quarters, about 390 head of chicks, that contracted fearful colds, which developed into the worst forms of roup because of eating from *filthy* troughs. Nothing else could have done it as every appliance about the yards was clean except the mash troughs. Colds need *more* attention than roup, and should be faithfully guarded against. Prevent sweating and crowding among the chicks when they are moved from coops to winter or fall houses. It saves labor and a lot of fooling with the medicine chest.

How often there comes to one's notice, a cry from the city fancier, of his slow-growing stock, infertile eggs and the general restlessness of the breeders. They sit around a great deal and are lazy, etc.; are fence inspectors as it were.

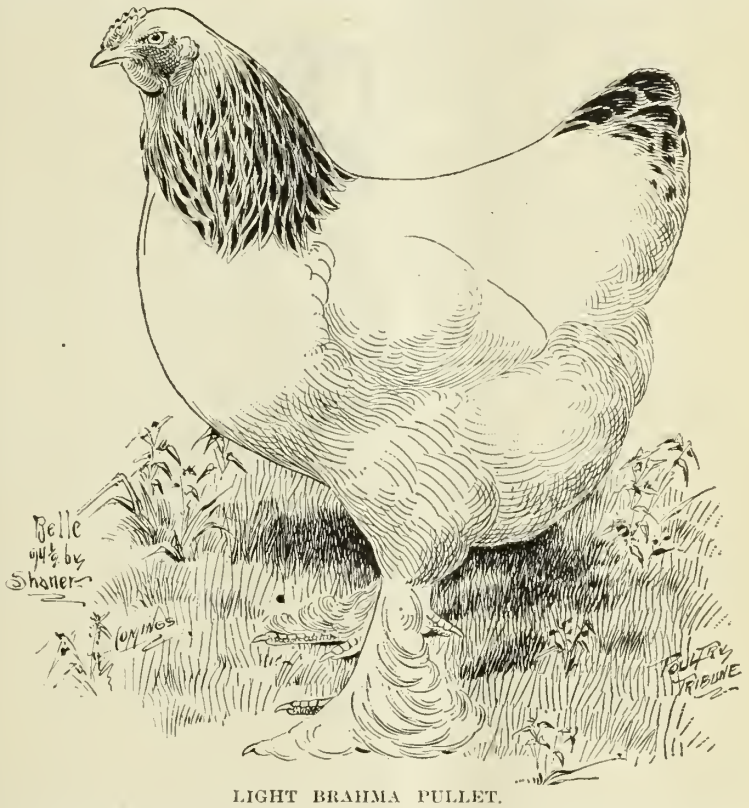
Darwin tells us in his greatest works, "The Origin of Species" and the "Descent of Man," that species whose habits are of a wild nature are not liable to breed and rear their young in confinement and that some groups of different species will not even breed, say nothing of trying to rear young.

In looking over the journals that come to my desk I find the following from a fancier who stumbled on to a good thing, so to speak: "We will never turn out the scrubs and keep the best breeding pen enclosed in a 'bantam' yard; but on the contrary, we find that there is a greater per cent of fertility, a larger hatch of strong, vigorous chicks by allowing the best breeders their liberty and freedom to roam around the homestead." This last spring we concluded to try some experiments along this line and we gave the range of the orchard and meadow adjoining, to a partridge Wyandotte cock and hens. Four in number. At night we fed them a bit of wheat, but they rustled their remaining bill of fare. All day long these five birds would hunt in the grass and tall weeds for the same kind of insect life which the wild partridge and prairie hen thrive on, and at laying time the hens would come to their shed coop (if no one was near) and deposit their eggs. These hens tried roosting outside and we put a stop to that as varmints were liable to catch them. No further trouble was experienced after a few days' confinement to the roost shed.

These hens laid the smallest eggs of any Wyandottes I ever saw, and I was sadly disappointed, but when the first hatch came off, the joy that was mine fully compensated for the disappointment. The largest chicks that I ever saw greeted my eyes when we removed the incubator. The mother was confined to a coop that was large and roomy and which we placed under some shady bushes on quite well drained ground. Cool water was placed in their reach and various grains were scattered in the dead leaves and twigs for them until they could follow their mother without becoming fatigued; then they were given their liberty with the hen. A box of mixed grains was within their reach at all times after they were liberated and the coop left open for them to roost in. You couldn't find them in the day time if you looked for some time, but at night they would generally be close to the coop and if one went near, the old hen gave the signal and every one fled and hid among the many nooks and tufts of wild grass. They grew faster than any other chicks for many reasons. Nature was imitated as near as was possible and the essential hugs and hoppers were theirs. We tried this method of rearing many of our later hatches and they were all successful. No chicks were lost except a few which were weaklings and could not have been raised under any circumstances.

The old or breeding fowls laid the most fertile eggs that were my luck to handle. Every sitting hatched excellent, while the hens had almost no inclination toward incubation. In the near future at least one breeder will arrange the different pens of breeding fowls so they may all have full range.

Away down in Arkansas there was a woman who told the wielder of this pen that she never paid any attention to her turkeys (they were the White Hollands) and that every fall the hens came around with a goodly flock of youngsters. We believed her, for we saw one of the handsomest sights of our lives; about one hundred and fifty head of healthy, robust young pullets and toms, all raised from ten or eleven hens and a pair of toms. In the winter they were tamed by feeding corn in abundance. This feeding tended to encourage the flock to roost near the barns and outbuildings where the surplus could be easily caught and sold. The owner informed us that there were wild turkeys near but the tame hens would not mate with any of the wild males. She says the wild ones are afraid of their white cousins and vice versa. Roup, lice and swelled head were unknown quantities, for the trees afforded protection from the little chilling wind in that climate



LIGHT BRAHMA PULLET.

Bred and owned by H. W. Halbach, Waterford, Wis. This bird was not cut for color of wing at the Milwaukee show and is fit to win in strongest competition. Mr. Halbach now has a number of her progeny for sale that are the equal of this bird in every respect.

and the branches over their bodies broke to a great extent the force of the falling rain. One might say they were wild turkeys; at least when compared to the latter as to vigor and stamina and fecundity. We know of a few, very few eastern breeders who practice this mode of raising poults to a greater or less extent.

A pair of white ducks once roamed away from their home and when fall came they hurried back to their old shed near the farmhouse with fourteen youngsters to their credit.

When fowls are cared for to produce the best results, nature must be imitated. Mr. Sontag tells, in the June AMERICAN POULTRY JOURNAL, of four hens hatching fifty-six chicks out of hidden nests and furthermore that he did not water or feed them for four weeks and that every chick was raised as well as a goodly flock of poults hatched in a like manner. Numberless incidents go to prove that domestication has deteriorated the vigor of our fowls. Glossiness of plumage is one of the most apparent effects of free range. Flocks which have unlimited range need no food in the breeding and summer season; the grain picked up around the outbuildings being sufficient for their needs.

An eastern breeder of Brown Leghorns sold to a working man a sitting of fifteen eggs. In due time the eggs hatched eight or nine chicks, which, when old enough, were given the entire range of an old orchard. No one doubts that the chicks prospered when it is said that the seller of the eggs offered ten times the price of the sitting for his pick of the clutch. Nature has laws which are made plain when one reads her statutes and the sooner obeyed the quicker and the better the results in breeding domestic fowls. A great awakening will some day take place that will drive the man from the business who told the lady that "chicks could easily be raised in a back yard." I can show to the readers a man not far from my sanctum sanctorum, who is an experienced breeder on free range and who can not as yet raise and breed a few hens on his two lots. He tells us that, "You can't disobey nature."

When Uncle Mike Boyer says, "You can hatch only one-half the eggs you set and only raise half the chicks," you may count on it that a fact has made its way into the fancy. Do the wild birds, quails, pheasants and grouse only perform by the "one-half" method? One seldom finds a nest with a remaining egg or dead chick after the hatch, and the reason seems quite apparent. It has been observed that the efforts of pheasant fanciers to breed their hobbies in close confinement have failed and yet if pheasants are allowed their freedom they will show great powers of fecundity. Canaries, so an old fancier told me, could only be inbred to a limited extent when confined to breeding cages but when given the liberty of a large breeding park or fly they can be inbred very closely.

The few thoughts above stated can only give one a general idea of the real value the breeding fowls would be if given plenty of range. Number of females in the breeding season could be profitably reduced to those females which possess quality. Their eggs are more fertile and the chicks from same grow and prosper enough to give one a much greater success in working with the fowls. The great hindrance of the fancier is the idea that he has to raise a thousand chicks to get a few prize winners, and *they do* when they work against the laws of reproduction. Quality in the breeding pairs, trios and pens is better than *fair* stuff. English fanciers have, in a few instances, practiced free range and freedom for their stock and have mated fewer fowls in the breeding pens (*but more quality*) with surprising results. Take time by the forelock; *success* justifies it.

When a poultry journal has a question and answer department we generally suppose that the head of the same is abundantly able to give advice on questions which naturally arise. But our astonishment was immense when we discovered that an editor of such department in a certain journal did not know what to do for fowls and chicks that were infected with gape-worms. "No known cure," according to the oracle, but nevertheless we use a few drops of carbolic acid in the drinking water and find that it will prevent and cure to a certainty. THEO COIN.

# JUDGE AND EXHIBITOR.

## The Relation of One to the Other.

### By D. T. HEIMLICH.

THE relations that the poultry judge holds to the exhibitors are well defined and should be well understood and adhered to. First, he should be qualified through a wide experience as breeder and student in all lines of poultry culture. He must have given thorough study to what the Standard of perfection contains, memorizing the disqualifications of all the breeds and varieties contained therein. He must have a love for the work, be ever on the alert to learn and fully comprehend many of the varyings of form, shape and color met in the show room. This knowledge comes from close observation, study and experience, by personal contact with conditions that cause these results. His inquiries for wider knowledge must ever keep him gathering information for his own use, and the enlightenment of others that he constantly meets in the show room and the homes. Honesty must be the foundation of his general character, otherwise his career will be short and of a constant reactionary tendency detrimental to his good or the upbuilding of the poultry industry. Conscientiousness will make him fearless, firm and positive when in the right.

He must be an artist of no mean ability, to keep in mind the perfection of parts and each breed as a whole, so that he can show by demonstration with pencil or the living specimen wherein each section is faulty or perfect.

He must be impartial and have real love for the work, otherwise he will become slovenly and indifferent and his popularity will wane. He should never work hurriedly, as such work is seldom well done. His relations to the exhibitor should be frank, cordial and positive to the degree of highest self-respect, firmness and dignity. Every season brings to the ranks of breeders and fanciers men and women who find occupation, pleasure and profit in the culture of poultry, but who will not tolerate characters loose in morals and habits unbecoming gentlemen in the highest sense. He should talk, work, uphold and be a member of the American Poultry Association, for it will be through this legislative body and its actions that we maintain the greatest advancement of the standard breeds and draw into the fraternity the most desirable elements of all poultrydom. On the other hand, the exhibitors owe something to the judge. They should treat him with the same fairness and honesty that they expect from him. Conditions in the show room should be made as pleasant and convenient as possible. He should be allowed to work uninterruptedly and be given efficient help, that the work may be accomplished expeditiously and correctly. A judge's clerk should be one familiar with figures, whose training and ability are along the line of concentration. If experienced in this work, well and good. If entirely disinterested as exhibitor, breeder or student, with the above mentioned ability, all the better, for then he gives his entire attention to the work in hand. No exhibitor should trim or fake fowls if disqualified, trusting to chance in the hope of a judge overlooking such faults, for should such specimens win it is no credit to the exhibitor, the judge or owner, and often causes ill-feeling and disgust with many who only want justice and fair treatment. The aim of every honest exhibitor is to get what is due him. It is a pleasure to note that this sentiment and demand is becoming more prevalent all through the western and southern states. Exhibitors never gain anything by fault finding. It is their privilege and duty to accept pointers, how to succeed best, work together, ask questions after the judging is done and learn why their birds were defeated or proved winners. By the cultivation of the fraternal spirit all are benefited and helped in their progress to more and better standard poultry.

---

Don't believe the fairy tales you read relative to heavy egg records and the alleged great difference between various breeds. One breed will lay about as well as another unless you select individuals from a flock which has been specially bred for heavy egg production. The 200-egg-per-year hen has practically not yet arrived.

---

The poultry business is not one for the man who has failed at everything else he has undertaken. Many of this class rush in only to add another failure to the list.

# Success With Turkeys.

*By S. B. Johnston, Boggstown, Ind.*

September is here and brings with it the fall fairs and is also one month nearer the Pan-American Show. September is one of the best months in the year for growing stock, for there is an abundance of insects of various kinds, which the poults may procure when given range. The exercise they get in this manner is also very beneficial. Poultrymen are now looking over their flocks, pointing out the most promising birds and can ascertain with some certainty how many winners they will have in their flocks. This makes it a very pleasant season, but no less a busy one, as it is a time that we should take advantage of and prepare for the winter months, which are just ahead of us. It is also a time to prepare for the show season and to make arrangements to buy winners for the shows and stock for the next breeding season, if we are not absolutely sure that we can successfully withstand the competition.

I expect to see the grandest display of Bronze turkeys at the Pan-American Exposition this season that has ever been seen both in quality and number, but we believe that the National strain will not have to take a back seat, as they have never been compelled to do this before. This year has been a little rough on the breeder who has been compelled to buy all his feed and especially the one who uses corn to a great extent, because the drouth has cut the corn crop very short. It will very likely be the means of forcing a great many turkeys on the market for Thanksgiving, and I predict that trade for Christmas will be very slim and prices will be strong. Those who need breeding birds for next season probably will be disappointed in getting them if they do not order their stock early in the season. I think that breeders generally realize these conditions, as I have never before seen the mail roll in at this time of the year, as it is doing now and it seems that customers invariably want the best to be had. I have been asked if there is any money in turkeys and if they are not so hard to raise that few can succeed with them. I always answer this question in a very positive manner, as I know what I am talking about. There is more money for the farmer in a flock of good Bronze turkeys than anything he can raise in the live stock line. I told in the last number of A. P. J. of one way in which they were so much more profiable than other fowls, provided a strain of layers are bred.

In California breeders rent large flocks of turkeys to parties who have vineyards and fields of grain. The turkeys destroy insects that are detrimental to the fruit and grain. They will do the same for farmers in this part of the country when allowed to run in the wheat and corn fields, but it is very seldom that the farmer gives the turkeys credit for destroying the thousands of flies and chinch bugs, which they do every day and thereby save hundreds of bushels of grain for the farmer who has good flocks. In addition to this, turkeys hunt their own living and pick up the lost and wasted grain. They seldom do any harm to the grain in the shock and it never amounts to anything compared with what they save. I have never found that a turkey will eat as much food in a year as a Plymouth Rock or a Wyandotte for the reason, as said before, that they hunt most of their own food and they eat so little more, even when more food is furnished them. When you put them on the market you get twice to three times as much meat as you do in any other fowls and at generally two or three cents more per pound, all from practically the same amount of feed. From this it will readily be seen how much more profitable they are than chickens. I have found by experience also that turkeys are no harder to raise than chickens, if they are rightly managed, and there is no occasion for managing them otherwise. No breeder will make mistakes, if he uses ordinary common sense in the care and management of the poults. There are a few common rules which should be followed, and with which everyone is familiar who knows anything about poultry. They are as follows: Poults should not get wet when very young. Keep a constant lookout for lice and especially when the birds are raised near a house with chickens. Do not feed sloppy, musty feed. Put them on a grain food as soon as possible. Do not feed too much corn as it is too fattening. Oats are better with a change of wheat and millet seed is very good. I have found that corn-fed birds do not grow as large as birds which have had free range and corn-fed only when they are to be fattened for market. Poultry of all kinds to do best must not be kept too fat when they are growing, but must be in moderately good flesh. They grow much faster and are more vigorous and healthy. An over-fat bird is a fowl without vigor and a bird that is too poor is in want of strength. There is a happy medium and every poultryman should make an effort to strike it.

I have an inquiry from a gentleman in Pennsylvania, wanting to know what is the matter with his turkeys, stating that they have a yellowish discharge and die in a very few days. This discharge is a very serious symptom and should be checked as soon as possible. In mild cases a lump of hyposulphite of soda about the size of a hazelnut put down their throats morning and evening will do the work, but in extreme cases a better remedy is five or six drops of laudanum or ten or fifteen drops of paregoric in a teaspoonful of water five or six times a day. This is for an adult fowl and the quantity should be varied according to the size of the bird. It can be mixed with feed and fed to them.

Boggstown, Ind.

---

The floor of the poultry house should be of earth and dry. If built in a damp location, fill it in a foot above the outside. Cement floors are a fruitful source of bumble foot and board floors are not much better.

---

You cannot rush into the poultry business on a large scale and make an immediate success of it. The smaller the start the greater the chances of success.

## Brooders and Brooder Chicks.

This is the season when the majority of those who are engaged in raising poultry are laying the brooder aside. Having hatched all the chicks they desire, they have given them the run of the place and thus have no further use for the brooders this season.

I once heard a prominent manufacturer of incubators and brooders assert that nine-tenths of those who bought brooders only used them for two or three months, then threw them aside and for this reason it was useless to make certain improvements in their brooder that had been suggested.

Personally I think the assertion is too strong; that there are some who only use a machine for a short time and then discard it, I know is true, but that is the case with everything. Some men are like children with a new toy, soon tire of it and throw it away. This is nature. Then again a great many put away the brooders they have bought for the good and sufficient reason that they have bought something that does not fill the bill. The brooders being represented to the purchaser as being just the thing, that all that is necessary to do is to put the chicks in the brooder, light the lamp and let her go. The brooder is supposed to do the balance and there is no limit to the number of chicks it can take care of. Now it is just this sort of talk on the part of the manufacturers that makes so many persons discard their brooders. The operators follow the advice of the maker or selling agent and the result is dissatisfaction, and the same thing will continue until the maker recommends his machine to be just what it is and gets down to a practical basis as to the capacity and efficiency of the brooder as well as the incubator.

Of the two machines, the incubator or the brooder, I firmly believe the brooder bears the more important relation to the poultry raiser. There is not an incubator on the market but what will hatch a greater or less per cent of the fertile eggs, but there are a number of brooders that will not raise ten per cent of the chicks put in them. The average poultryman does not care so much for the loss of the unhatched egg as he does for the chick that dies after it has been placed in the brooder, as it is an acknowledged fact that it is not the eggs that don't hatch but the chicks that die after being hatched that is so discouraging, and for this reason alone those who use brooders should make every effort to secure a brooder that is known to be strictly first class in every respect, for by doing so the operator will save the price of the brooder many times in a season.

When a brooder that meets the requirements of the operator has been secured it should be cared for in a proper manner. When the chicks have been taken from the brooder for the last time in the fall it should be thoroughly cleaned and disinfected with some good lice killer, especially if chicks that have been hatched by hens have been brooded in it.

The lamp should be emptied and thoroughly cleaned and the entire brooder should be put under shelter and cared for as though it were of some value which is surely the case with those that have given entire satisfaction during the season just past.

## Crangle on Faverolles.

The Queens of Utility Poultry.

The recent importations of Faverolles by Mr. Joseph B. Thomas, Jr., for his Valley Farm at Simsbury, Conn., has brought into prominence this new French breed.

The Faverolles have the advantage over others in being prolific layers of beautiful sized eggs, which average twenty-four ounces to the dozen. The color of the shell would be classed as pale, or very light brown, and in addition to this they are handsome eggs. The fowls are large in size, heavy and plump, with very long, full breast, which carries considerable of white meat.

There are several types as well as color. The Faverolle-Concon, like the colored Dominque, Faverolle Dorking and the Faverolle-Brahma. Each of these are colored like the fowls whose names they bear. Those selected by Mr. Thomas are known in England as Salmon Faverolles.

The male resembles the Silver Grey Dorking in color, sbape and size.

Faverolles have five toes, short legs, shanks of a pinkish white color, much like the Houdans and Dorkings; low set, very heavy bodies. They are active foragers and give good return for food fed.

Having been formed by the union of Houdans, Dorkings and Asiatics, they combine the good qualities of all these, gained under the careful guidance of those who originated them, whose sole object in their production is for gain.

The Salmon Faverolles at Valley Farm have established themselves as par excellence as egg producers. Soon after making their long voyage they settled to work and the hens have layed continually. The eggs are proving to be fully up to the average of others in fertility and the chicks are strong and vigorous.

Mr. Thomas has other importations on the way and will continue to import from time to time, as many good specimens as he can secure.

Those already sent to Mr. Thomas' Valley Farm have in their number: First cockerel at Paris, first cock at Crystal Palace, London; first and third hens at Crystal Palace, London. In these, as with all other stock at Valley Farm, quality stands above all.

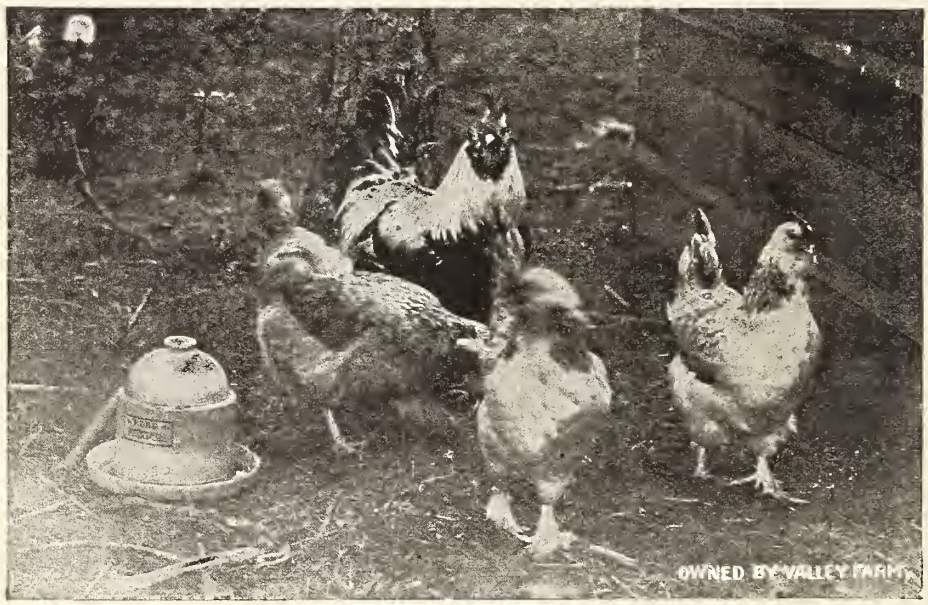
J. F. CRANGLE, Manager.

Since writing the above, Mr. T. F. McGrew of New York city has spent several days at Valley Farm. Below is given his opinion of the Faverolles:

*Mr. J. B. Thomas, Jr.*

Dear Sir—You are certainly very fortunate in securing such quality in Faverolles. It is quite unusual for one to obtain birds of such note as those I saw at Valley Farm; above all this to me is the fact, that while I was there each hen laid an egg every one of the three days, twelve of these eggs weighing twenty-four ounces. In handling the fowls I was wonderfully pleased with size, shape and beauty of skin and flesh. No one who understands poultry can have any possible doubt as to their taking a strong position among the most popular fowls of the day. Respectfully,

(Signed) T. F. McGREW.



FAVOR ELLES.

The French utility breed of fowls being introduced into this country by Valley Farm, Simsbury, Conn.

## Size and Weight of White Plymouth Rocks.

I have been deeply interested in the recent discussion of the size and weight of White Plymouth Rocks, and the various questions thereon depending; and I wish to add my evidence in favor of the size indicated by the Standard weight, as well as to protest against tbe preference for the over-large specimen apparent in the awards at some of our largest shows last season.

Whatever reputation as a breeder I may have has been made with White Rocks; and it is not surprising therefore that I am always concerned for the welfare of the variety and anxious to guard against whatever may appear detrimental to it.

I thoroughly believe that an attempt to breed Plymouth Rocks to a weight two or three pounds in excess of the Staudard would be—and certainly now is—attended by a decided loss of Plymouth Rock character generally. Moreover, it appears to me that correct conformation and fine grain cannot be successfully incorporated in an abnormal specimen.

The market poultry faction certainly is not catering to the entbuisasm for extra weight, but are as a rule arrayed against it. Therefore, if it be a misfortune, the fancy must bear the brunt of it, and the decisions of our judges cannot escape the responsibility for the greater share.

There can be no question but that color and size determined the awards last winter at at least one of our largest shows, and we found the winners merely large white birds, having little of the true Rock shape. It behooves the associations and exhibitors, therefore, to select judges who can be depended upon to faithfully apply the Standard requirements. It is evident that we cannot discount a specimen for weight in excess of that required, and it is equally apparent that *we can give no credit for the excess* except in case of a tie when both birds are up to weight. Therefore, given two birds up to standard weight, equal in color, the one nearest to the correct shape must win, however large the other may be.

When judging by tbe score card, the actual weight determines the cut; but in a comparison show where no weight is taken, the size necessary to carry the required weight when the bird is in good flesh, should be taken as the standard and should govern accordingly.

Standard weight may mean much or little as determining the proper size of a bird, and is sometimes misleading; an undersized bird may, in an abnormal condition of flesh, weigh iu at standard, or a specimen of abnormal size being thin in flesh may carry the same weight, but neither is of the desirable size and neither should be taken as an ideal.

Let us be careful first to preserve the true shape and size of the Plymouth Rock, and the Whites will continue to win popularity as they have in the past.

H. A. NOURSE, Mngr.,
Fishers Island Farm, N. Y.

## One View of Low Prices.

The world is said to be full of cranks, but, in my opinion, the most interesting and enthusiastic crank is the chicken crank. I plead guilty to being one of them, not that I wish you to believe I am interesting; however, I do not care if you believe me enthusiastic. I take several poultry journals, as all well regulated chicken cranks do, and the matter contained in their interesting pages, even all the ads, furnish me much food for thought. I see no earthly reason why all well established poultry journals should not be paying investments. The reason I say this is because the chicken fancier is a great advertiser—believes in printer's ink, and spreads it on thick. That is the way he sells his eggs and stock. Page after page of advertisements! Astonishing! Chickens and eggs, cats and dogs, swine and pigeons, world without end.

I have noticed, too, that every fancier can say something mighty interesting about his chickens and methods—a sort of soul to soul communion, brother with brother—the sort of talk that teaches us something, which is positive proof that they are intelligent and good judges of feathers, and men as well.

Did you ever carefully read the different advertisements in a poultry journal and notice how many tip-top, up-to-date, fancy, prize-winning chickens there are in the country? If every one of the advertisements be true there is not a fancier or poultry man in the United States who has not winning stock. Who will say that each man has not? Excuse me, not I. It is undoubtedly a fact that each advertiser has fine stock and a novice would hardly make a mistake from purchasing from any of them. Such is the case, because competition all over the country runs high, as each man takes a pardonable pride in buying and breeding the best fowls to be found; and, besides, the poultry shows bar mongrels and birds not up to a high degree of excellence. They have set the gait and all fanciers must keep it or drop out of the ring. That is the reason there are so many fine birds in the country and the mongrel stock fast disappearing. Go into a neighborhood where some man has got to breeding standard bred poultry and notice how many have caught the fever. The pretty sight they see in his yards makes them envious. The chances are they will not buy his eggs or stock at all, but hunt up a first class poultry journal and send off for eggs or stock no better than his, simply to beat him at his own game.

This is one of the ways that standard bred poultry gets scattered over the country, and after a time it will become so general that mongrels will become a thing of the past. Speed the time, say I. It is "a consummation devoutly to be wished."

Adverting to the advertisements again, there is one thing I wish to express myself about. A first class article brings a good price the world over. It cannot be sold cheap at a profit. That is true, is it not? Then why do fanciers, or those advertising themselves as such, offer the best chickens and eggs on the market at cheap rates? Have they an idea that $1 for 15" will sell more eggs than $3 for the same number. In my candid opinion they are sadly and wofully mistaken. I do not say they will not find customers, but will they find that class who will appreciate a good thing for nothing? Not so. The man with good judgment, and who intends to obtain the best, will not patronize a "cheap John" fancier, although his stock may really be as good as those priced higher.

I judge other men by myself, in a measure. When I see a fancier advertising "I have no cheap stock or eggs; I do not have to sell my stock to make room for the youngsters," you can set that man down as having what he advertises and being a fancier on whom you can rely. There may be exceptions to this rule, but the chances are you would not go wrong to try his goods. What is worth having is worth a good price, and the right kind of a man does not object to paying for a first class article. What is the legitimate conclusion? That no fancier should sell eggs from blooded strains for less than $2 per setting, and no hen for less than $2 and no cock for less than $5, the latter being for fair breeding stock. From these prices the maximum may be reached, according to birds. If every fancier followed these rules it would redound to the best interests of poultry culture throughout the country. Am I not right?

I have noticed what seems to me to be an anomaly. A man gets the chicken fever. He sends off and pays $5 for a setting of eggs, and possilby $25 for a trio of birds. Those are good prices and should put him in possession of the best in the market. Now mark the result: In a couple of years we find him advertising and selling eggs at from $1 to $1.50 per 15, sometimes stretching it to 18, and a trio of birds for $5 from that very strain, and using the name of the original breeder who worked years to perfect his fowls and make a name for himself. I emphatically say this: If the eggs and stock he purchased in the first instance were worth the price paid, he should hold up the price, thereby holding up the standard, in justice to himself and the original breeder. Am I not right again?

Some few do this, but the great majority follow the cheap John method. I do not say they follow this practice to injure themselves, or the original breeder, purposely. It is simply a mistaken idea of correct business principles—the idea that most people are looking out for bargains—something for nothing, or next to it.

Gentlemen, such practices may do for the merchants who are always having bargain days six days in the week, and would have one on Sunday if they were allowed to advertise and sell their goods on that day. But standard bred poultry is worth good prices the world over, and a man who is going to lower the prices and standard never should enter the business. As the saying goes, "Them are my sentiments." If I am wrong, the editor will allow you to call me down.

I throw out these ideas for what they are worth, and I do not desire any poultryman to imagine I am firing hot shot at him, as I have no one in particular in mind. It is principles, not persons, I am attacking. *Charles M. Brown.*

*Fort Worth, Tex.*

**Every person entering our prize article contest, and whose article is worth publishing, will be given a copy of the latest Standard and two year's subscription to A. P. J. Your article does not have to be better than any other one. See the offer elsewhere in this issue.**

---

The fancier on a town lot may not be able to raise as large a number of fowls as his farmer friend, but there is no discount on the quality.

D. F. TAYLOR,
THE WHITE ROCK MAN,
Has bred White Plymouth Rocks and White Wyandottes for twelve years. Winners at the World's Fair and many shows since. My birds are good size, color and shape. I have 250 chicks hatched from March 1st to May 1st now ready to ship.
D. F. TAYLOR, DeRuyter, N. Y.

1882 19
Grand Stock For Sale.
Light Brahmas, Black Laugshans, Barred Plymouth Rocks, S. L. Wyandottes. These birds are winners and will do you good. Parent stock scores 90 to 95. Prices right. Satisfaction or your money back. Circular of breeding yards free. Write me.
HENRY T. REED, Camp Point, Ill.

WYANDOTTES.
White—600—Silver
Young and old; score from 90 to 93¾. Don't buy until you hear from me.
OLD HOMESTEAD POULTRY YARDS,
W. F. COATS, Columbus, Ind.

Congdon's Barred Rocks,
BRED FOR
Utility and Beauty.
Our new catalogue will be issued Nov. 1st. Send for a copy.
W. A. CONGDON, Waterman, Ill.

Black Langshans.
50 fine young hens. Some of my prize winners. They go from $1.50 to $3 each. You can't find them any better. Will be pleased to hear from you. Try me
L. E. MEYER,
Bowling Green, Mo.

300 FOR SALE 300
Rhode Island Reds, Houdans, Light Brahmas. All of my breeding birds to make room for chicks, from $2 to $10 each. Also Belgian Hares and Homing Pigeons at fair prices for quality; some grand ones. Send for circular.
DANIEL P. SHOVE,
Box 688, Fall River, Mass.

**MRS. E. I. REYNOLDS, Haskells, Ind.**
Breeder High Class, Pure Nugget strain

**Buff Plymouth Rocks Only.**

Winners at Indianapolis, LaPorte, Ind., and Chicago, Jan. 1901. Some elegant breeding birds for sale, if you want the kind bred as H. S. Burdick bred them. Write me, State Vice-Pres. American Buff P. Rock Club.

**REV. JOHN HUGHES**
**Table Grove, Ill.,**

**White Plymouth Rocks.**

Stock, young and old, for sale at low prices if taken soon. Now is your chance.

**GONE.**

That will be the verdict if you put off ordering some of those Golden Wyandottes or S. C. B. Orpingtons. They are cheap in price, good in stock and worth double the money we ask for them. Don't write after Sept. 7th.

***SUNNYSIDE POULTRY FARM,***
***East Lewistown, Ohio.***

**PRICES GO TO PIECES!**

But quality remains firm. Barred Rocks and Silver Wyandottes. My choicest breeders will be sold to give room for growing stock. Buff Rock male birds $1 each. Satisfaction guaranteed. Correspondence solicited.

***GEO. J. GLEASON,***

# THE FANCIER IN THE POULTRY YARD

THOS. F. RIGG, Iowa Falls, Iowa.

MR. A. L. MARCH a fancier who has worked along scientific lines in the poultry yard for many years, in a personal letter to the writer says:

"I will be 83 years old the 20th of this month (August) and must soon lay down all work. * * * I wish some young man would take up the work of breeding superior layers—establish a strain of fowls that would lay well because *it has been bred in them to lay.*"

Our good old friend has repeatedly said to me that the system now practiced, in efforts to increase the laying powers of fowls, is not the one best calculated to bring success. And in this we think he is right.

Fanciers have developed the early layer and for years the best efforts had been in this direction. We now have pullets of several breeds and varieties which begin to lay when less than five months old. But the constant layer, the one which lays well the year around because it is her nature so to do, is not yet with us.

How best to produce such a fowl? Well, that is a question not to be hurriedly answered. I have had a plan in operation for a number of years and can state that good progress has been made.

Some of our fancier friends in New England have been working for years to produce the 200-egg-a-year hen, and have not succeeded; that is, but few hens have been produced that will give the desired results. But let us take the 200-egg-a-year hen as the best so far produced and we find that she is a very defective egg machine. She is idle 165 days in the year. Let it be understood, however, that no man either in America or England has ever produced a flock of fowls that will average 200 eggs each a year.

Now, the question we are to discuss is not how to get the greatest egg production out of a given flock for a year, but how to breed fowls so that they will have a natural tendency to produce two eggs where but one is produced now—that food consumed will be naturally turned into eggs. The Jersey cow has been so bred that she converts a large per cent of food consumed into milk. The Shorthorn converts her food into flesh. It has been, with these breeds, largely a matter of "man's manipulation." So it must be in this case with our fowls.

Let us see what could be done. We select a flock of fowls, healthy specimens and alike as to breed or variety. We are now engaged in the work of constructing egg machines. That is our sole purpose. It is the nature of the fowls to produce eggs in abundance during the spring months, and this, almost regardless of the manner in which they are fed and cared for; to produce a few eggs during another period, and to produce no eggs during a given period. We fanciers have been able by scientific feeding to change the nature of fowls so as to greatly increase the egg yield, but this can only be done where we feed special rations and at the expense of form and feather. That is, we fanciers cannot have our best show specimens constant layers, could not afford to if we could, because the condition of a show bird and the condition of a laying fowl are two different things. I maintain that there is but one way in which to produce a strain of constant and permanent layers, and that is by systematic feeding. We must start in with the flock, as above noted, and with the sole purpose to produce egg machines. We must have learned the chemical properties of various foods and give only such foods as will promote laying. The upbuilding will be slow, but it will be sure. We will finally reach the desired end, in how long a time no one can tell on the start. We will develop the nature to lay and year after year we will increase this element of nature in the hen. The hen of this year will transmit this quality to her chicks. The chicks, from the moment they leave the shell, will be fed only on such foods as will tend to develop the laying instinct. This matter of inheritance—of each generation stamping the next generation with the instinct to lay—is the one important matter we must keep in view. Also the fact that we can develop the laying instinct of feeding chicks *from the start* is very important. This is a matter overlooked by poultry breeders, but a principle well known and recognized by breeders of dairy cattle. Mr. Packard, who has given to the world some of the champion butter producers, says:

"The successful breeder of dairy cows of today begins feeding the calf from birth so as to bring the highest development of the milk organs. He feeds only such materials as will produce the result."

That is the idea exactly that I wish here to convey. It is a principle that we poultry breeders must recognize and the sooner we do so the better it will be.

It is of little importance that we achieve a wonderful record for a year or a season by artificial feeding. That amounts to nothing, except perhaps to give us light as to the possibility of the hen as an egg producer.

*Thos. F. Rigg.*

---

The young birds in any one coop or house should be as near the same age as possible. The advantages in having them so are many. They will all have an equal chance at the feed. There will be no stunted specimens as the result of life being made miserable by older domineering birds. Many a promising chick has developed into a cull because it was forced to battle for life and food with older birds.

---

The hen that molts early is the one that will make the best winter layer. This is a desirable trait and such birds should be bred from and encouraged in early molting by giving food best suited to the purpose. Linseed meal in the mash food is excellent for this purpose. Sunflower seeds are also valuable, but are expensive unless the poultryman raises them himself.

## Elm Poultry Yards.

*Sixty Acres to Poultry and Fruit. Sterling Quality, Good Health and Vigor Combined.*

At Vernon, Conn., just out of the city of Hartford, are located the farms of Elm Poultry Yards.

Here we saw the most healthful accommodations for poultry that it has yet been our fortune to see. The exhibition yards that have been located at West Hartford will be removed early in October to a new addition to the Vernon Plant, Mr. Grosebeck having purchased twelve acres of beautiful rolling land adjoining the other plant. On this new purchase, which has never been used for poultry, will soon be built a most completely arranged lot of houses for the sole use of the high-class exhibition stock.

The varieties bred at Vernon are among the most popular of all fowls. The hundreds of prizes won on White Leghorns, White Wyandottes, White Plymouth Rocks, Barred Plymouth Rocks, Black Minorcas and Light Brahmas tell of their superiority in the keenest competition, a result that owes much of its success to the constitutional vigor which comes through the methods applied in these yards, where the very best to be obtained will be found. Here they have almost unlimited range under the most invigorating conditions.

The colony plan of housing is largely in use, each variety having its own section of the farm, which is divided from the balance by high wire fencing, which runs down the hillside to a running stream which furnishes an endless supply of water the year round. In addition to this there are a number of springs on the farm, all of which run to this stream, furnishing a plentiful supply of water in all the parks used for the growing stock. Not for several years has the stock which occupy these yards been supplied with water other than which the springs and streams furnish for them.

Each set of yards is planted with fruit trees that are well cultivated. These yards are plowed, harrowed and leveled about these trees and each hundred fowls is allotted about an acre, which assures a continuous range over untainted ground. We cannot see how it could be possible to improve these conditions or to add to the excellent management of the place.

The enviable reputation which has come to Elm Poultry Yards is a deserving return for quality sent out and fair treatment to its customers. No one has cause to find fault with either, for no reasonable demand has ever gone unheeded at these yards. Nowhere can be found better quality than here, and all are served from the stock on hand.

On the side hill south of the Station is located the White Leghorn quarters; large, roomy colony houses for each flock of fifty. A splendid lot of fine, large, elegant Leghorns have the range of this park, that is planted to an orchard of apple and peach trees. Perfect freedom of this unlimited range assures strength and vigor that is seldom found.

Eggs sold from these Leghorns have produced winners in almost every state in the Union; there is no selecting or sending of better quality to one patron than another; all are served from the same collection, which he has sent forth to the world so much of the highest quality in White Leghorns.

These hens are never confined a single day in the year. Each house has a roosting department and a large scratching room enclosed, but the small door for exit is always open. No record has been kept of the average egg yield of the whole thousand hens, but many of the birds have made phenomenal records.

Each variety kept is handled the same as the Leghorns. Each have equal room, quarters and care; none are pushed for egg yield; all are under the most watchful care as to health. A fowl that shows the slightest ailment at any time is removed to the hospital yard; absolute health all along the line is prominently present.

For years the fowls on the farm have only been fed once a week, the year round. Thus have all rules of feeding been overrun and the fowls of the farm taught to get their own breakfast. Plainly do we hear the cry of "nonsense!" loud and clear it comes, but with no more vehemence than I used myself when first told of the methods used. But after a thorough investigation I am now fully satisfied as to the facts and good results obtained.

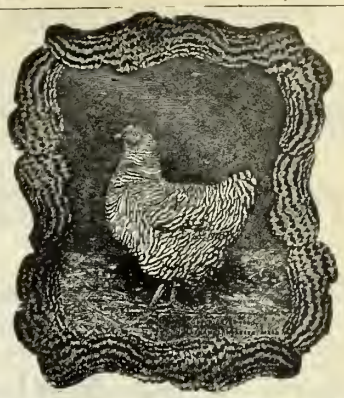
Within each house is a large feed hopper that holds two bushels or more; the wagon goes over the farm with sacks of feed once a week, with which each hopper is filled, and from these the fowls help themselves at will. I examined many of the fowls; none was poor, none was over fat; all in good condition; a result which scatters the fondest theories and heralds abroad the good sense of the hen when able to feed themselves at will.

All the fowls, young and old, are in fine health, a good paying egg yield; the handling of thousands with the least possible labor, and the cheapest ration per head that I have ever known in the hen business; and to my astonishment I found the young stock was fed in the same way. All over the place, under cover, are the same style hopper full of feed, to which the chicks of all ages have full freedom; only the very young chicks with hens and in the brooder houses are fed in any other way.

The only grain fed on the farm is wheat screenings of the best quality that I have ever seen. It is almost entirely free from chaff or dirt, and comes in car-loads from the northwest. This is the only food that has been fed on the farm for years, the large extended range furnishing an endless supply of natural food, including worms, bugs and berries of all kinds, the greater part of the year. The fowls, old and young, are large and vigorous. The young chicks show fully the equal of any I have ever seen, under the most approved methods of feeding at the same age.

At the plant in West Hartford are bred pens, pairs and single matings. Some of all the kinds bred at the farm. All this stock has been bred in line for nine years, for the purpose of having true, distinct line bred males for all the matings at the farm. In this way new, pure blood of the highest quality is continually infused into the farm flocks, giving them direct advantage of true line breeding as a top cross, each season, without any of the dangers that will come from line breeding.

*T. F. McElroy.*



**2d Pullet at Boston, 1899; 2d Hen at Philadelphia, 1900; dam of 1st hen and Champion Female at Philadelphia, 1900. Bred from 1st pullet and champion at Boston, 1898.**

**Beauty and Utility Strain.**

**Barred Plymouth Rocks.**

**C. H. LATHAM, Box F, Lancaster, Mass.**

**High Scoring**

**Barred P. Rocks.**

Two yards of high scoring birds. Rapp strain. Eggs $1.50 per 15. Satisfaction guaranteed.

**C. H. SIDDLE, Bowling Green, Mo.**

**Eggs For Hatching.**

From my great laying strain of S. C. White Leghorns. Plenty of range makes them large, hardy and vigorous. Egg record kept so we know that we are breeding from the very best. Also Rhode Island Reds, without doubt the best general purpose fowl known; best winter layers on earth. Eggs $1,50 per 15.

**WOODSTOCK POULTRY FARM, J. W. Mick, Prop. Woodstock, Wis.**

**Young Birds at a Bargain.**

In order to reduce my stock before winter sets in, I will sell some of my high grade **White Wyandottes and Barred Rocks** cheap. These birds are not only right themselves but are bred right. Your money back if they don't suit you. Write for prices to

**J. N. YOUNG, Box 209, Whitefield, Ill.**

I offer eggs from my winners at Cleveland, Columbus and Chicago.

**White Wyandottes.**

Bred for the show room, also for utility. No one can furnish better. Eggs, 15, $3; 30, $5.50.

**FRED E. PILE, Cleveland, Ohio.**

**Hanchett's Unmatchable**

**Buff Cochins.**

A magnificent lot of early young stock ready for you—also a few fine cocks and hens. Here's the quality that will place you in the front ranks. Short, round, fluffy, loosefeathered and clear, rich, even buff to the skin. New booklet is ready. Money back if the birds don't suit.

**H. N. HANCHETT, Box A, Jackson, Mich.**

"No Cochins like Hanchett's."

**PRINTING FOR POULTRYMEN**

**Noteheads, Letterheads, Envelopes, Baskets Labels, Score Cards, Business Cards, Circulars, Catalogues, etc. Finest work done. Large line** up-to-date cuts. Send for list of cuts and samples. We make a specialty of Printing for Poultry Associations, and are already booking orders for the winter shows. Secretaries send for prices,

**Woodbine Press, Box 130, BROCKTON, MASS.**

**PRINTING.**

All kinds at reasonable prices. Full line up-to-date cuts. Send for list and samples,

# Standard Breeds vs. Mongrels.

NEARLY sixty years ago I began to make trouble in this world. My father was a farmer, kept bees, raised stock and poultry, and never was guilty of keeping cows that gave milk or hens that laid eggs more than six months in each and every year, the winter season being set apart for recreation, rest and recuperation for man, fowl and beast.

The breed of fowls was usually known by the name of "dunghill," because it was there they gained a livelihood by scratching for a living from rise of morn till set of sun. They lived to a ripe old age unless caught by a wily fox, mink or weasel, or were run down and decapitated when, perchance, the circuit rider put in a sudden appearance and the supply of meat had run low. The "dunghill" was a long lived, vigorous and tough bird; the male could crow all night and fight all day without succumbing to exhaustion, while the hen could cackle longer and louder over a small egg than does a Buff Cochin over a double yolk custard pearl.

This introduction is to assure you, Mr. Editor, that I know what I am talking about and to prepare you to accept what is to follow without the least doubt as to my sincerity and capability of handling the subject properly. From an editorial experience of thirty-three years I have learned to mistrust amateurs and to handle with care the essays of writers who lack experience and think they know it all.

In order to supply deficiencies in my sinking fund as publisher of a country journal, I have dabbled in bees and poultry, lo, these many years—I taking the stings and flops, my wife taking the money, whenever there was a balance in my favor.

The bee business I mastered so thoroughly that now I take no back seat for the best bee keeper in Europe, Asia, Africa, America or the islands of the sea, and this delightful state of affairs was brought about by strictly following instruction imparted by men who had taken cognizance of the bees' unvarying habits, traits of conduct under changing conditions and circumstances, verified by actual test and experience.

An editorial, recently published, lamenting this lack of reliability and accord on the part of alleged experienced poultry raising experts induced me to pen a few lines for the benefit of whomsoever it may or may not concern.

It is said that a very bright Japanese young man came to this country to learn the English language, that he made such rapid progress as to astound the natives, and that, at the end of six months, he declared he was ready to go onto the "scaffold!" I have been raising "fancy" poultry about the same length of time and occasionally feel like going onto a scaffold and ending at once the pangs which come from disappointment and vexation of spirit; but the various journals, thanks to the publishers' foresight, have prevailed upon me not to commit the rash act, but rather to write an article for publication and impart useful hints for the guidance of rising and risen generations.

Silver cup won by Grover & Grover, Concord, Mich., for the ten highest scoring White Plymouth Rocks at the Chicago Show, 1899. They also won 1st cock, 1st, 2d, 3d hen and 4th pen.

The word "fancy," applied to poultry, reminds me of the young man's trousers when a snug fit was ultra-fashionable. He gave his tailor explicit instructions, saying: "Make them (the legs) tight—very tight; if I can put them on I won't take them."

Real fancy poultry never lays many fertile eggs, being too fat, too lazy, too high bred to reproduce its species, having had all the procreative vim, vigor and vitality bred out of it. In this city reside a number of "fanciers" who help maintain the numerous fancy poultry farms scattered from Portland, Me., to Portland, Oregon. We have donated liberally this summer, investing from $2 to $5 for a single setting of eggs. The extra fancy was determined by actual test of fertility. Some of us had to throw away every egg; others gloated over one, two or three sickly chicks, while a lucky few were elated to count ten healthy little ones, but these proved to be off color, off grade, and not the least bit fancy. But we are not dis-

couraged, because the journalists say we shouldn't be, but try again. We are trying.

I have learned that poultry shows are great institutions and a splendid place to exhibit monstrosities of size and freaks of perfection. A man once hit the bull's eye by merest chance at first attempt. Natives gazed in astonishment and requested the marksman to "do it again." He refused, saying: "Beat that first and then I'll do some shooting what is shooting." Poultry exhibits are mostly comprised of "chance shots," and are not a fair representation of the average grade raised by the exhibitor.

Eggs from these perfect specimens are sold to amateurs all over the country. Perchance they are White Wyandottes, and, marvel of marvels, they produce chicks of various colors, shapes and marks of deformity—wry bills, crooked necks, weak legs and four or five different diseases. Instead of rose combs, single combs crown the heads of the most perfect chicks, so that from a most approved strain he gets White Rocks and White Dottes. Marvelous are the operations of nature and fancy chicken raisers.

But poultry shows are beneficial and add to one's stock of practical knowledge. They gave poultry interests a push forward that nothing else could have accomplished. The exhibits are somewhat deceptive, and so is a congregation of well dressed people rigged up for exhibition purposes.

Poultry judges and journals do not always agree in essentials and hardly ever in non-essentials. Their suggestions confuse the novice and make failure almost certain. Neither do the judges of state and nation agree on the plain statements found in statutory law. One of them says a thing is white, the other black; the weather vane pointed north, says one; it pointed south, says the other, and the one having the legal right to guess last is taken as authority whether he be correct or erroneous.

But poultry journals must be maintained and that this may be done it behooves our best men to give us the benefit of their best thoughts and ripest experience. In my next—should I be so fortunate as to have a next—I purpose giving you facts that are facts, incontrovertible, indisputable, solid facts, which will be helpful to men and women born free and equal, but who have lapsed into a state of poultry servitude from which they are yearning to be released.

I am loth to quit, but stop I must, and close with this remarkable incident which can be substantiated by several credible witnesses who stand five feet ten in the best society and love their neighbors no better than they love themselves. This is the postscriptum: One of our most reliable chicken men sent far away for a setting of extra fancy eggs. They came by express in a fancy box properly labeled and decorated with the breeder's coat of arms. Each egg was carefully wrapped in tissue paper and excelsior. They were in par excellent condition, and immediately placed in a carefully prepared nest and upon them sat a hen so broody that she squatted instantly, gave the eggs a few instructive manipulations, and began the incubatory process. Great were the owners' expectations and poignant his grief when one day, long before the peeping moment arrived, Biddy was found stone dead in her nest. She was a common hen; the eggs were fancy—too rich, rare and racy for her plebeian blood and she succumbed to the pressure of their accumulated superiority. D. B. GIVLER.

---

The object of our correspondent in the above communication is not perfectly clear. There is a moral or two, however, to be observed, and we cannot resist the temptation to call attention to them. There is both a humorous and a serious tone to be noted and a few inconsistencies which should be commented upon. The writer states that his father (sixty years ago) was never guilty of keeping cows that gave milk, or hens that laid eggs, more than six months in each year, the winter season being set apart for recreation, etc. His further remarks in condemnation of standard bred fowls would indicate that in his opinion the methods in vogue and the fowls as bred sixty years ago were about the proper thing. This belief is, strange to say, held by some persons although the advantages of progress along these lines are as great in proportion as in any other line of endeavor. Sixty years ago we had no electric lights, mile-a-minute railroad trains, elaborate telegraph systems nor the present high standard of excellence in live stock, the latter as much to be desired as the former when considered in their separate spheres. The people who do things because their fathers before them did the same are not the people who make things go and win the admiration of their fellowmen. We note the very positive, and we may say reckless, statement that "real fancy poultry never lays many fertile eggs, being too fat, too lazy, too high bred to reproduce its species," etc. Such assertions hardly need denials. It is only necessary to ask that if these birds cannot reproduce themselves, where do they come from each season? There are some poor hatches and culls, but eggs from scrub hens also fail to hatch at times, and if they were worth shipping and were shipped as are eggs of valuable birds the percentage of hatchable eggs would not be greater in one case than the other. To the breeder who is not contented with less than hundred per cent hatches we would suggest the breeding of lice, flies or mosquitos. There are certain varieties of standard bred poultry which will produce 75 per cent of high grade specimens. The fact that standard bred birds produce culls is not an argument against them nor one favorable to the mongrel hen. There are culls in all animal life, from the human family down to the lowest, except amongst mongrel or "common" chickens. They are culls themselves. They are the lowest grade and constitute the tail end of the race they represent. It is therefore impossible for them to produce anything worse than themselves. To use a slang expression—"They are IT." The closing remarks to the effect that in the case referred to, the common hen died upon the nest because the fancy eggs were too "rich, rare and racy for her plebeian blood," furnishes an illustration of the character of the argument (?) used by the champions of the mongrel hen. Those who will not be serious and advance reasonable argument we leave to their idols. Life is too short and space is too valuable to waste in a one-sided discussion.—[EDITOR.]

---

Too many windows in a poultry house are detrimental. In cold weather they make the house too cold at night.

**I STILL HAVE**

some of the choicest specimens left from my closing out sale of Cornish Indians. You positively cannot get the same quality again for twice the money. Write me to-day.

FRANK H. THOMAS, Jacksonville, Ill.

**Bronze Turkeys.**

Large bone and fine marked birds. Yard No. 1 headed by yearling tom weighing 32 lbs. at 9 mos. old, winning first at Toledo and Fremont. Stock for sale from him after Nov. 1st at fair prices.

AMERICAN POULTRY JOURNAL

Published the first of each month by
GEO. G. BATES, Editor and Proprietor.

FRANK HECK, Associate Editor.

Subscription price 50 cents a year in advance.

When delivered by carrier in Chicago 60 cents a year in advance.

Payment for AMERICAN POULTRY JOURNAL, when sent by mail, should be made by money order, registered letter or stamps.

Write name and address plainly, and if JOURNAL does not come regularly and promptly, write us at once

In requesting change of address, be sure to give the old address as well as the new one. This is important.

Advertising rates will be furnished on application.

The reliability of new advertisers must be ascertained before an insertion of an ad in the columns of AMERICAN POULTRY JOURNAL can be made. This is a business matter, the justice of which is readily seen, as protection to the readers who answer advertisements.

Alway say when writing advertisers, that you saw it in the AMERICAN POULTRY JOURNAL.

All copy for advertising and manuscripts for publication should reach us not later than the 20th of the month preceding the date of issue.

## Prize Article Contest.

We have received a large number of inquiries relative to the conditions and rules governing the $50 prize contest which closes Oct. 1 and for the benefit of those who may not have noticed the announcement in July number we print it again this issue. This is a contest in which all can participate with the assurance of getting a reward. All who send in articles worthy of being published will receive two years' subscription to A. P. J. and a copy of the Standard of Perfection if they do not win one of the three cash prizes. There is a month yet in which to send in your copy. Prepare something and send it at once.

## Let Us Talk It Over.

We take it that the readers of AMERICAN POULTRY JOURNAL are sufficiently interested in standard bred poultry to give more than a passing thought to the character of the reading matter placed before them in these columns. This must be the case or they would not part with their half dollar for a year's subscription. This suggests the additional assumption that a renewal of the subscription is dependent largely upon our success in publishing a journal of real value and one that conforms to the ideal of those interested. When we take into consideration the fact that we are able to get these renewals year after year and hold our subscribers as long as they are interested in poultry, also that we are getting thousands of new subscribers each season, we are led to believe that we are in a measure successful in pleasing those whom the JOURNAL is supposed to benefit. We believe that each succeeding number of AMERICAN POULTRY JOURNAL is better than its predecessor, and we know beyond all doubt that future issues are going to show improvement in various ways, because time brings changes and suggests new ideas. The point we wish to make now is that if our subscribers would take a little time to write to us and offer suggestions relative to these contemplated improvements we could much more intelligently cater to their wants. With this end in view, we urge our readers to let us hear from them and that they feel free to offer criticisms. What changes would you make if you were publishing the JOURNAL and what are the features which meet with your approval? We would like to receive a personal letter from each one of our subscribers and trust that every one who reads this will comply with our request. If you have not time to write a letter, drop us a postal card.

## Mr. Weir's Protest.

The writer knows that both Mr. Weir and Mr. Tegetmeier have placed confidence in the Burnham origin of Brahmas; at the same time did not think it possible that anyone should be so ill informed as to distrust the origin of the socalled Cornish Chamberlain strain of Brahmas. We do not believe that there is in the whole of New England a strain of light Brahmas other than the descendants from the Chamberlain stock. Nor do we believe that anyone ever cultivated the Burnham line after seeing the Chamberlain type of bird.

As to Mr. Burnham he was fully able to care for himself; he was about the most competent man of his time at pushing to the front his belongings, and the persecution, if any, was the result of fair contention in a war of words, in which Mr. Burnham was fully able to hit back; seldom if ever did any one get the better of him. But in the face of all this Mr. Weir will find from careful investigation that the Chamberlain strain of Brahmas did exist and that from them has come the Brahmas as bred in America today.

*New York City.* *T. F. McGrew.*

At the request of Mr. McGrew we give the above equal prominence with Mr. Weir's remarks. This incident only emphasizes the fact that the origin of the Brahma is more or less shrouded in mystery and that it is a hopeless task to prove much that is conclusive. These conditions are the same with many other breeds and it is to be regretted that in the early history of the poultry industry there were not publications devoted to it with enterprise enough to record the events of this nature for the benefit of future breeders.

## A Common Complaint.

*Battle Creek, Mich.*

*Editor American Poultry Journal:*

DEAR SIR:

We believe in the poultry industry, and have confidence in its prosperity for the future. We also believe that the crying need of the poultry business today is better judging; not better judges, but better judging.

It is neither fair nor right for a judge to rush through a show in as short a time as possible and on to the next show, judging by poor or artificial light and in any way to get through and make all fees he can in one week.

It seems as though something *must* be done, and done right away to bring the judges together. We think there are too many incompetent judges springing up all over the country, and we would like very much to know how a breeder is to know when they are qualified to judge a specimen. In most professions a professor is compelled to pass an examination of something to show that he is qualified to hold a certain position. Why could not the poultry judges be governed in the same way? We ask this question in the name of the future maintenance and support of the poultry industry. For example, as matters now stand all one breeder has to do is to exhibit under some particular judge in order to get what he calls a fair deal. We have heard old and prominent breeders say: "There is no use in my showing under such and such a judge; he has a grudge against me, and just last week a breeder called at our place and in talking over a certain show remarked that if a certain judge placed the awards upon a certain breed at this same show he would not exhibit. Of course, these are only personal grudges, but it shows very plain which way the wind is blowing.

Every breeder in this country is and has been building up his or her poultry each year, and improving and upbuilding their flock each succeeding season to the best of their knowledge. But what is being done to upbuild the judges, and how are we going to get after the judges and get more careful judging? We would like to see influential breeders take this question up and agitate it until we get a better system of judging. We well know that this is a very small voice and perhaps it will not be heard, but we would like to see the good work go on, and we believe something must be done to save the fancy poultry industry.

*Mrs. B. H. White,*
*White's Feathered Stock Farm.*

We publish the above communication because it voices the sentiments of thousands of exhibitors and we believe in a discussion of those matters which are of vital interest to breeders generally. Mr. and Mrs. White, of White's Feathered Stock Farm, are well known and have been prominent winning exhibitors for years. The above remarks are not the thoughtless statements of some amateur, neither are they made without a thorough familiarity with existing conditions. They are worthy the thought and attention of all interested parties, both judges and exhibitors, and especially judges. We have no criticism to make of the judges individually except that each one should be sufficiently interested to take steps toward inducing his colleagues to join him in perfecting an organization with a view to giving more satisfactory work as a whole, to the breeders who provide them with their employment. More uniformity and a better system of placing the awards under present methods is a reform due exhibitors and none should be more anxious to inaugurate it than the judges themselves.

## The American Poultry Association.

Editor Robinson, of *Farm Poultry*, has the following to say in August 1 number of that publication relative to the American Poultry Association:

"The American idea of organization for general mutual benefit is that it shall be representative of all whose interests are concerned. A condition in which a self-constituted and irresponsible body of men legislates for an industry at large is un-American and intolerable, and so long as it continues is a standing disgrace to

those who thus allow themselves to be imposed upon.

"For more than a quarter of a century we have had in this country an organization calling itself the 'American' Poultry Association, organized and conducted on a basis utterly antagonistic to the spirit of American institutions. It is claimed for this association that to it is due most of the credit for the wonderful progress made in the poultry industry since its establishment. Such a claim we do not think any thoughtful student of the history and conditions of poultry culture in this country would concede—not in a calm moment. As a central organizing force, the American Poultry Association has been entirely impotent. The sum total of its influence amounted to no more than a general acceptance of the standard descriptions of the breeds which it prepared and published, and this it held as much through disinclination of poultrymen to plunge the industry into the confusion which for a time would result from rival standards, as because of any excellence of the work itself. Indeed, so bunglingly has the work of standard making been done, so frequent have been the revisions, so uncertain the stability of standards, and often, so vague the descriptions and so full of inexcusable errors, and thus in one way or another causing so much controversy and confusion that it is open to question whether a rival standard could have caused more confusion than there has been.

* * *

"The result of this has been to limit the attendance at any meeting to those living near enough to attend it without great expense, and to those who as judges at the show in connection with which the there were not enough old members in atmeeting was held might be able to attend without expense to themselves; and hence it has come about that not infrequently tendance to transact the business of a meeting intelligently, and a large proportion of the legislation of the association has been illegal according to parliamentary usage and fair construction of its constitution and by-laws. Indeed under these conditions but a small proportion of the members are ever able to attend and take part in enough meetings to make them useful members, and it follows naturally that the proceedings at a meeting of this association are too often so confused that no one knows accurately what has and what has not been done—the official stenographer's notes being useful only to show the extent of the confusion, and of little value for anything else.

Another vicious feature attributable to the evils growing out of the conditions described has been the frequent election to the two important offices—president and secretary-treasurer—of men possessing no qualifications for the duties required of them. This is something that may occur under any conditions, but hardly we think as often as it has in this association. Those who have had to do business with the secretary of the American Poultry Association know how few of its secretaries have been possessed of even the most ordinary business qualifications. In the case of the presidency it has almost become the rule to elect some one of local popularity at the place where the meeting is held, and on several recent occasions men have been chosen who would never have been thought of for the office if reputation and merits were considered in naming candidates, men whose names were utterly unfamiliar to ninety-nine out of every hundred well informed poultrymen in the country at large.

"We have elaborated upon these matters because a reorganized association to gain standing, influence and permanence, must avoid them—must provide against them in the scheme of reorganization."

The above remarks are occasioned by the agitation at present of a scheme to reorganize the association upon a basis which will make it representative of the poultry industry. It is to be regretted that such statements cannot be successfully refuted. No one will accuse Mr. Robinson of insincerity of purpose nor for that matter any of the prominent members of the association who have repeatedly said practically the same thing. Some day someone with the time, ability and inclination will come upon the scene and start a movement that will accomplish the desired result. Mr. W. R. Wooden, who introduced the resolution which is responsible for the present interest in the matter, possesses the ability and inclination, but we doubt if he has the time. He is approaching dangerously near the mark, however.

—o—

## Agricultural Advertising.

The last number of *Agricultural Advertising* was a Pan-American special, although the usual amount of interesting and instructive matter relative to advertising was to be found in its pages. For the information of those who may not be familiar with this publication we wish to say that it is issued monthly by the Frank B. White Co., of Chicago and New York. The White Co. is one of the most prominent advertising agencies in the country and have built up a business in the placing of agricultural advertising that makes them a leader in their line. They design and place advertisements for their clients and they have done this so well that many of the successful poultrymen entrust their entire advertising business with the company. Their publication above referred to is issued in the interest of their business and for the purpose of enlightening the general advertiser in the best methods of making his advertising pay. The subscription price is $1 per year and all advertisers will find it worth many times that amount to them. A sample copy will be sent to all who request it and those of our readers who are spending money for advertising should not fail to send for a copy.

—o—

Some people can raise fine birds but make an utter failure when they try to dispose of them. These are two branches of the business, and a breeder needs to study both. He can become proficient in both, if he is really anxious to learn.

# We Want to Make Room for Small Fry.

To do this we will sell some fine breeding birds at prices which are far below their real worth. Special low prices on **PEKIN DUCKS.** As you doubtless know,

***Our Pekin Ducks, White Wyandottes and White P. Rocks***

are unexcelled by any flock to be found. Tell us what you want, and let us quote prices.

**POLLARD'S POULTRY FARM, South Attleboro, Mass.**

F. M. POLLARD. GEO. H. POLLARD.

Die by being lousy than from any other cause. You can talk about improper care and feed, lack of green food and grit, but, when looking for the root of the trouble, look for lice, and when you find them, look into the merits of Lambert's Death to Lice Remedies.

Rev. H. H. Purrington, Mt. Vernon, Maine, writes: "We all use Death to Lice and find it most satisfactory."

The Norton Poultry Yards, Dallas, Texas, writes: We have been using your Death to Lice for the past four years and it has given entire satisfaction."

**More Chickens**

have head lice than most poultry keepers realize. Some think that these little pests are pin feathers on the top of a chickens head and do not take the trouble to examine them closely until the broods begin to die off. One Massachusetts fancier says that it cost him hundreds of dollars to learn this. Death to Lice Ointment is made especially for the extermination of these little blood suckers, without injury to the little chicks. 100 doses 10c, postpaid.

**More Chickens**

than should go into two coops are often crowded into one. The lice will then crowd into these small quarters and assist to make the nights long, hot and miserable. The little mites or spider lice crawl out of the cracks and crevices and extract more blood from the chicks than they can make during the day.

Chas. L. Evans, Wood River, Neb., writes: "I have given your "'Special'" a thorough trial. I had a hen-house that was polluted with mites. I mixed 4-oz. box of Special to one gallon of white-wash and gave it a thorough white-washing. I now defy anyone to find a louse about my hen house."

**More Chickens**

properly cared for, mean more money. Proper care means a liberal use of Lambert's Death to Lice Remedies as well as suitable food and housing. No poultry keeper ever failed because he put too much money into Death to Lice. Many fail because they do not keep their flocks free from vermin. The most successful, money-making poulterers are those who use the most Lamberts. We have remedies for all kinds of lice, on anything and everything. We put it up in all sizes of packages to suit all kinds of people. We have all kinds of good testimonials as to its efficacy.

**PRICE LIST:**

Death to Lice Powder, 10c and 40c by mail; large sizes, 50c and $1, by express from here or nearest agency.

Death to Lice Ointment, 10c and 25c, by mail.

Death to Lice Special, 10c and 40c, by mail.

Sample of one each of the above 10c sizes at one time 25c.

Death to Lice Liquid, 1-qt. 35c; 2-qt. 60c; 4-qt. $1, from here or from nearest distributing point.

A 64-page illustrated book mailed free.

**D. J. LAMBERT, Box 308, Apponaug, R. I.**

**The Brown Hatcher**

New System Hot Water Incubator, 66, 100, 150, 200 & 242 egg sizes. My new booklet tells how made and how to operate my machines. Only incubator on the market telling this in descriptive book. My machines peers of them all; prices lowest. No book sent without 10c on account of instructions how to operate.

CHARLES M. BROWN,
706½ Main, Fort Worth, Tex.

The National Fanciers' Association is considering the advisability of incorporating the organization. The Chicago shows have been successes and the prospects for the future are brighter than ever before. It is thought by many that by incorporating the association the affairs could be managed in such manner as to increase the power of the association to benefit exhibitors.

The revised Standard of Perfection is now ready for distribution and every breeder who is anxious to improve his stock and learn the standard requirements of his fowls should have a copy of the book. We will give it and a one-year subscription to A. P. J. for $1, the regular price of the Standard alone.

The breeder whose fowls run from him when he goes amongst them does not understand his business. Under proper care hens will become docile and will be easily handled. This condition adds many eggs to the basket.

**CHANCES** to get the best at little cost are not offered every day, but Oaklyn Place is giving that opportunity to every fancier **NOW.** Write for special list **QUICK** and get some of America's best blood. Champions of the West, winners of the East. Winners at New York, Boston, Chicago and scores of other shows. Nice catalogue free. Partridge Cochins, Buff Plymouth Rocks, B. B. R. Game Bantams.

**OAKLYN PLACE,**

**S. A. NOFTZGER, NOrth Manchester, Ind.**

Grant Mott
THE MOTT WHITE WYANDOTTES

**AN OPPORTUNITY**

TO GET OLD OR YOUNG STOCK AT SPECIAL LOW PRICES FOR A SHORT TIME ONLY.

PRIZE WINNERS CEDAR RAPIDS AND ST. PAUL.

***Box 029, Austin, Minn.***

**RED GOLD.**

***Wayne's Golden Wyandottes.***

Have won at Boston, New York, Hartford and other large shows. If you want to be in the win, this stock will do it for you. It is for sale—winners and all, to make room for hundreds of young chicks. A rare chance to obtain some of the best Golden in the U S. Blue Andalusians of same quality. Eggs, balance of season, half price—$1.50 per 15, Ship in Eyrie Egg Boxes.

**E S. WAYNE, Poquonock, Conn.**

**THE CYPHERS INCUBATORS**

***Short-Horn Cattle,***

***Poland-China Swine,***

***Fancy Poultry.***

We are now breeding our sows for fall litters and will breed a few to suit our customers upon request. Prices right, quality and breeding considered. Write for catalogue and prices.

**R. D. BURNHAM,**

**Champaign, Ill.**

## From Over the Border.

TAKING advantage of a cheap excursion rate to London, Canada, this summer, I decided to visit that very warm chicken town in order to see what Andalusians my esteemed friends across the line had to show. On the way out I fell in with a very pleasant set of American-Canadians or Canadian-Americans, whatever they may call themselves, and was persuaded to join the order of "London Old Boys." I assured them that I was merely a plain Yank with no British blood in me, but that I would buy a badge and march with them, if they would bail me out if I was arrested for an impostor; which they agreed to do. There was another Chicago man, a plain Yank like myself, who did the same, and we kept close together. The bluff went.

Well, we marched and countermarched, and opened out and closed up and were speechified to and cheered and hurrahed at till we were dead tired. Then some other things were opened up till the shop closed, and our money was no good that night. The "London Old Boys" are all right.

The next morning I started out to find Mr. Newton Cosh, the breeder of Blue Andalusians with the best show record in America (United States and Canada). I was assured by a man who claimed to know all about it that the ranch was one mile out of town on such and such a road. Feeling pretty brisky, I thought I would walk it; so I walked and walked till the sidewalk gave out and then I took the "middle of the road," like our Populist friends, and like them, I failed to "arrive." A passing farmer kindly took pity on me and gave me a lift back to town. Later I discovered that the learned gentleman who first directed me forgot to tell me about the "jog" in the road to the left. Moral: In hunting up chicken ranches, don't depend on one man's directions, however learned looking.

Arriving finally at Mr. Cosh's place. I found a strictly up-to-date plant, brand new, with all modern improvements; twelve acres carefully cultivated and used entirely for chickens. He keeps three breeds: Barred Rocks, Buff Wyandottes and Blue Andalusians. Rocks have become very popular with Canadian farmers and fanciers; Buff, or, for that matter, all kinds of Wyandottes are just making their way into public favor; and Andalusians have been known and appreciated for many years—in fact, much more than we on this side of the line have any idea of. Not pretending to know much about Rocks and Wyandottes, I will simply say that I think they will give a good account of themselves at the "Pan" this fall.

In Andalusians I had expected, of course, to see some good ones, but, frankly, I was not prepared for the beauties I saw. There was one cockerel—he is not for sale and money won't buy him—that had just come out in his new feathers and was the most perfect Andalusian I ever saw. Laced from comb to fluff, feathers a clear sky blue; lacing sharp and distinct; carriage and symmetry perfect, and with that indescribable "style" and "tone" that characterizes the thoroughbred Andalusian—something

that must be seen to be appreciated.

Comfortably seated in the shade, Mr. Cosh with a handful of corn would call up his birds to illustrate a point, and like the true fancier, knew the pedigree of nearly every bird on his place. It would be impossible without the use of forty or fifty photographs to make plain to the reader the principles of mating and breeding Andalusians, but the gentleman demonstrated what every breeder well knows, that show birds mated to show birds do not necessarily produce show birds. If one knows his birds' ancestry perfectly, it is possible to produce show birds with tolerable certainty from birds that to the uninitiated look like very ordinary specimens. In fact, the breeder's art consists largely in retaining his best breeders—which often are not show birds. But he must know to whom to mate whom. A certain hen mated to a certain cock, both very ordinary looking birds apparently, will produce exhibition birds. Mismated, they will produce scrubs. Why? Simply because the breeder knows from acquaintance with their pedigree just what qualities each excels in and is deficient in. His art consists in making up the proper combination for a show bird. A mismating, and all goes wrong. The problem is exceedingly complicated and exceedingly interesting, but you must know your blood thoroughly and must exercise good judgment. This astute Canadian breeder keeps many types of Andalusian hens, light, dark, native and imported English; but this hen here must be mated to that cock there, and not, decidedly not, to such and such other mate. He sells his exhibition birds regularly to the best fanciers and shows in the same shows, Boston and New York, and beats the very men he sold his best birds to the year before. How? Because he knows how to breed and they haven't mastered the problem. But it took years and infinite patience to learn the trick.

Space fails me to do adequate justice to the rest of this Andalusian flock and other flocks I saw while in London; suffice to say that if any one thinks the Canadians don't understand chicken raising, he makes a mistake of huge dimensions.

While there, of course I had to visit "Billy" McNeil's place, but the genial William was not at home. However, we got a squint, surveyed carefully the meantime by Billy's vigilant dog, of some very rare and handsome birds. The place was situated within the city limits and was, I should say at a guess, about 100 feet front and perhaps 400 feet deep. The houses were not especially fine, but everything was neat and clean. I was told that from this little plant the owner cleared about $2,000 per annum—thus furnishing an illustration of the fact that for a poultryman to succeed, he must either equip an immense plant and handle the common breeds, or he must handle fancy breeds on a small scale and stand at the head of the list. The former requires capital chiefly; and the latter, brains and a peculiar aptitude for the work.

At Mr. Richard Oke's place I found every evidence of thrift and prosperity. Houses, modern, neat and ample; everything in applepie order. Besides the numerous Bantams, my attention was attracted to a number of Fleches, Creve Coeurs and Sultans. The proprietor told me that there was considerable demand for Sultans from the "States" this year, at $6.00 per setting! Some Mottled Javas struck me as uncommonly fine, and one Black Hamburg pullet without exception was the handsomest black bird I ever set eyes on. At the conclusion of my visit Mr. Oke took me into the house and showed me a table loaded with trophies and cups he had won. Unless I am much mistaken there will be additions to that collection by the time the show season is over this fall and winter.

I was fortunate enough to find Mr. Sharpe Butterfield at home and had the pleasure (and profit) of spending an afternoon and evening discussing poultry with him—or rather, he did the talking and I did the listening. In my case speech was silver, but silence golden in discussing poultry with a man who has judged twenty-eight years and is known and admired from Maine to California, and from Manitoba to Texas.

As near as I could make out, the fanciers of London, a town of only some 40,000 inhabitants, could without going outside of their own limits, set up an exhibition of nearly every, if not every, chicken catalogued in the Standard. And what struck me as admirable and worthy of imitation, was the extremely friendly and amiable spirit, true sportsman's spirit, which prevailed among the fraternity. There was the keenest rivalry to produce the best birds and at the same time a spirit of gentlemanly consideration and mutual esteem that was refreshing to behold. It was fair field, no favors, may the best man win, and better luck next time for the losers.

Perhaps one explanation for this friendly feeling among London fanciers may be found in the fact that they have a particularly active and progressive poultry club that meets monthly. At these meetings, if I am correctly informed, a chicken is brought into the meeting and is scored by some amateur; the score is then discussed by the members, and finally a competent judge rescores the bird and explains his scoring. Questions of construction of houses, of feed, of disease, of mating, etc., are discussed and each man gets the benefit of the other's experience in that line. It is true that there are similar organizations in American towns, but there should be more of them. It occurs to me that a certain poultry organization not a thousand miles from Chicago might well copy a few of the excellent features of this Canadian poultry club in London.

*E. L. C. Morse, Chicago.*
*President of the Blue Andalusian Club of America.*

**B. P. ROCK MALES GIVEN AWAY.**

MRS. A. J. COLVIN, Milton, Ill. To reduce my flock and further introduce my stock I will give one B. P. Rock male free with every order for B. P. Rocks amountiug to $5 or more, before Oct. 1st. During which time I will sell B. P. Rocks, breeding stock or youngsters, (Hawkins or Bradley strain) at $5 per 6, or $8 per doz. Pekin Ducks (Rankin strain) $5 per 6; will spare a few out of eggs bought of Rankin in spring. White Holland or Bronze Turkeys. Order from ad or write, with stamp.

**Shaw's Winners**

are laying eggs now at half price—$1 per 15. Barred, White and Buff Rocks, Light Brahmas and Toulouse Geese of highest merit. Will sell a number of my best breeders at half price. Satisfaction is guaranteed. See my large ad in May issue. Agent for Cyphers Incubators and Brooders.

**DUANE SHAW, Palestine, Ill.**

**KEEP YOUR LOUSIEST HENS**

They will be Worth Two Dollars ($2) Each to the Agents of

**ORR'S LIQUID LICE KILLER.**

Just to prove to you and your neighbors that it will rid your birds and houses of lice. It is easily applied with a brush to the roosts, or with a sprayer may be blown into every crack and corner. There are many poor lice remedies; a few good ones,

**ONLY ONE BEST—THAT IS ORR'S.**

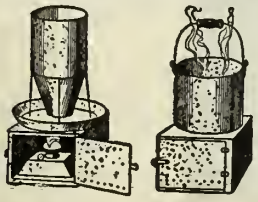
**TO INTRODUCE IT INTO NEW SECTIONS:**

we will send a1 gallon can, a brush and a Keystone Sprayer—**A $2 OUTFIT—EXPRESS PREPAID FOR $2.** A 5 gallon can, freight prepaid, for $4. Order to-day. Agents wanted,

**ORR & COOPER, 558 Liberty St., Pittsburg, Pa.**



*The Poultry Fountain that is Different.*

**The "All Right" Drinking Fountain and Feed Cooker**

The only fountain that keeps clean, fresh water at the right temperature before the poultry the year round. Fully nine-tenths of the diseases of poultry arise from foul drinking water in the summer and lack of fresh water in winter. The All Right overcomes all these difficulties and saves much trouble, time and labor. You cannot make a success of raising poultry without the use of these fountains. Pronounced by the leading poultrymen and judges to be the most complete aparatus of the kind on the market. Special sale on this month. Now is the time to buy. Send for particulars and prices. Ask for prices on young stock of Buff Rocks, Buff Cochins and Buff Leghorns. 2 pens Buff Rocks for sale at a bargain.

Patent applied for.

Address I. E. BEVER, Keithsburg, Ill.

## MEETINGS OF AMERICAN POULTRY ASSOCIATION.

The following communications have been sent out by Secretary Bridge, the first one to all members of the association and the second to the members of the executive committee:

COLUMBUS, OHIO, Aug. 7, 1901.

*To Members of the American Poultry Association:*

Having received the requests of five or more members of the Executive Committee of the American Poultry Association to call an extra meeting of the association at Buffalo, N. Y., in connection with and at the time of the holding of the Pan-American Exposition, to be held Oct. 21-31, 1901.

In pursuance of said requests and in accordance with article 1 of the by-laws of said association such extra meeting is hereby called to meet at Buffalo, N. Y., in the New York State building, Pan-American Exposition, Oct. 25, A. D. 1901, at 8 o'clock p. m.

*Fred L. Kimmey, President.*
*H. A. Bridge, Secretary & Treasurer.*

COLUMBUS, OHIO, Aug. 7, 1901.

DEAR SIR: By direction of our president, Fred L. Kimmey, the vote of the Executive Committee of the American Poultry Association on the place for the twenty-sixth annual meeting is called. Invitations have been received from:

The Keystone Poultry, Pigeon & Pet Stock Association, of Philadelphia, to meet at Philadelphia, Pa., Dec. 28, 1901, to Jan. 2, 1902.

The South Carolina Poultry Association and the South Carolina Interstate and West Indian Exposition Company, to meet at Charleston, S. C., during their poultry show, Jan. 20-29, 1902.

The Cleveland Poultry & Pet Stock Company and the Ohio State Poultry Association to meet at Cleveland, Ohio, during their annual meeting, Dec. 4 to 10, inclusive, 1901.

The vote will be closed and counted Aug. 31, 1901. Please write your choice on the enclosed postal card and mail to the secretary. Respectfully yours,

*H. A. Bridge, Secretary & Treasurer.*

## A SEALED LEG BAND.

The Smith sealed leg band for poultry, manufactured by W. H. Smith & Co., Blythedale, Mo., was used on all prize winners at the state fair held at Des Moines, Ia., Aug. 23 to 30. This band really fills a want. It is having a large sale and meets with the approval of breeders everywhere. It has been patented by Mr. W. H. Smith and is made from specially rolled metal. There are no duplicate numbers made and when a band is once placed upon a fowl's leg it cannot be removed without destroying it for future use. This is an important item; when this band is used a breeder can sell his birds with score cards and the purchaser can feel assured that he is getting the bird he pays for, which is not always the case with the ordinary band, on account of the opportunity afforded unscrupulous breeders of substituting bands and placing the band from a scored bird upon a bird which has not been scored or one that has received a lower score. These bands are sold as cheaply as any good band and this in connection with the advantages of their use accounts for the large sale of it and its universal popularity. Prices, etc., are quoted in the ad elsewhere in this issue.

## A NOTABLE SUCCESS.

It is a pleasure to the writer, as it is to others, to have his predictions come true when writing of a breeder and his stock, and we are especially gratified to learn that all we said last season relative to Mr. Fred E. Pile, of Cleveland, Ohio., has been verified by him in the development of his business during the past year. The business has now been incorporated under the name of the Fred E. Pile Poultry Farm Company, with a capital stock of $15,000, and Mr. Pile will push it, along the same lines as have been instrumental in bringing it to its present prosperous condition. The plant will be devoted almost exclusively to White Wyandottes, with the intention of making this breed a specialty. For the present a few Buff Rocks will be handled in view of the superiority of those now on the farm and the lucrative trade enjoyed in them. The time and attention given by Mr. Pile to his birds prior to last show season culminated in gaining for him one of the grandest victories at the last Cleveland show on White Wyandottes that were made anywhere last season. His winnings were many and well merited, and as stated at the time, we were sure that under his intelligent management and with his knowledge of the principles involved in mating, he would be able to produce youngsters from the parent stock that would not only maintain his reputation, but would add to it by increasing the high quality of his flocks. There are reasons for Mr. Pile's success, among which are his ability to raise prize winners, his adoption of business methods in conducting his business and his motto of satisfying his customers by giving just a little more than value received.

FRANK HECK.

We regret to announce that on the evening of Aug. 11 a disastrous fire occurred in the factory of Humphrey & Sons, Joliet, Ill., manufacturers of the popular Open Hopper Green Bone and Vegetable Cutter. Fortunately the fire was confined to the paint shop and offices; the immense stock of bone cutters, ready for fall shipment, was in a different part of the works and was untouched, so that the firm will be able to fill all orders as heretofore. The supply of catalogues, however, was totally destroyed, but a new catalogue and egg record book was put on the press at once and is now ready for mailing. Send your name at once for one of the first editions. The factory will be at once rebuilt on a much larger scale and the hope is entertained that

# How Is This For a Record?

At the great Chicago Show, 1901 one of if not the largest show ever held, my White Plymouth Rocks won 1st, 2d, 3d cock, 1st, 2d, 3d cockerel, 1st, 2d, 3d pullet, 2d, 4th, 5th hen, 1st, 2d, 3d pen, A. P. A. Cup for best cock, hen, pullet and cockerel American Class, Rigg Challenge Cup for best display American class, Gold Special for best display Plymouth Rocks, nine other Gold Specials.

## Fishel's White Plymouth Rocks,

At Great New York State Show, 1900, won 1st, 2d cock, 2d hen, 1st pullet, 2d cockerel, 1st and 2d pen, and all specials. At Indianapolis 13 regular prizes and 10 specials. At great St. Louis Show they won every prize offered, making a CLEAN SWEEP; a record never equaled by a White Rock Breeder. They are conceded to be

## "THE BEST IN THE WORLD."

Now study this matter over, and remember, why buy elsewhere when you can get better quality for your money of me. My 24-page catalogue is free and tells you all about my noted White Plymouth Rocks. Tells how to feed and mate them, etc. Remember I have 120 acres devoted to my birds, so can give good large, healthy stock. I am offering

# BLANCHARD'S WHITE LEGHORNS.

**The Leading Strain of Heavy Layers**

Are no experiment, having been carefully selected and bred for over 20 years with results that fully justify the claim that they are THE GREATEST LAYING STRAIN OF SINGLE-COMB WHITE LEGHORNS IN EXISTENCE. No labor or expense has been spared in building up this strain, and while the production of large, pure white, fancy market eggs has been the main object, STANDARD QUALITIES have not been neglected. They are large, vigorous, active and handsome, unexcelled for introducing new blood or as foundation stock. No better anywhere at any price. Stock for sale.

Illustrated circular free.

the large supply in the warehouse and at the leading agencies throughout the country will meet the demand until the rebuilding and enlarging is completed.

BETHLEHEM, GA., June 12, 1901.

*Page Woven Wire Fence Co., Adrian, Mich.*

GENTLEMEN:—I bought some Page Poultry Fence last spring, from your agent, J. H. Wright, of Winder, Ga., and I am well pleased with it. I think it is the best fence I ever saw, and your agent knows how to put it up all O. K. Yours very truly, .. *W. J. Ross.*

Our Mr. Wright is quite an ardent admirer of our Page Poultry Fencing, and recommends its use for heavy stock.. He is quite a practical man and has pretty good judgment, but we at the home office always advise a stronger and heavier wire for large stock. There is no question about the superior quality and larger size of the wire in Page Poultry Fence over other poultry fences and nettings, and we know that people will use it for stock, even though we do not advise it.

Mr. G. W. Brown, the well-known proprietor of the Ouachita Valley Poultry Farm, Camden, Ark., sends us a number of feathers from his 12 days old Barred Rock cockerels. They are some of the best we have ever seen and they speak stronger than words as to the wisdom of Mr. Brown's single matings. Mr. Brown made a remarkable record last year in the show room upon all his varieties, he winning 109 prizes and competing against birds from eighteen states. There is no question about the quality of his stock, and we know it to be a fact that he treats his customers fairly and gives them entire satisfaction.

We desire to call the especial attention of our readers to the ad of W. H. Eaton, Detroit, Mich. Mr. Eaton makes a specialty of writing advertisements. He is a thorough fancier himself and is, therefore, peculiarly fitted to give his patrons good service. The form and style of an advertisement has more to do with its pulling powers than most breeders imagine and many cases of failure in the business can be attributed to bad methods in advertising.

Mr. W. H. Overbaugh, of Hanover, Pa., successor to H. S. Burdick, writes that his flock of young Buff Plymouth Rocks are the best he has ever seen, there being a prenomenally large number, with good clean wings and tails. He has them up in size for the early shows. The cockerel weighs seven pounds and pullets are laying. He informs us that he has birds fit to win in the hottest competition. Mr. Overbaugh does not exhibit, but makes a specialty of furnishing winners for the large shows.

E. V. Lane, of Lacon, Ill., breeds S.-C. B. Leghorns exclusively and has sold about 20,000 eggs for hatching the past season. His stock is of a noted laying strain. One of his customers states that he had a pullet hatched from eggs bought of him that laid the day she was sixteen weeks old. His advertisement appears elsewhere in this issue. He is offering some bargains in stock.

Mr. S. B. Johnston, Boggstown, Ind., has formed a partnership with his brother, who for some time has been breeding a winning strain of White Wyandottes. We are quite sure that this variety in their hands will become as prominent with them as the Bronze turkeys are now. It is an acknowledged fact that the National strain of turkeys has no superiors and the same methods which have been employed to place them in the front will be pursued in breeding the White Wyandottes. We can heartily recommend this firm and their birds.

Mr. C. A. Porter, of Flat Rock, Ind., made special preparations last season to take care of his large and constantly increasing trade and he has not only succeeded in doing this, as regards the amount of stock raised, but he is also better than ever before prepared to furnish quality. It is an acknowledged fact that Porter's Barred Plymouth Rocks are fit to win in the strongest competition and Mr. Porter's record bears out the assertion. This is not only true of his birds in his own hands, but it will be the case with his customers. He has added a number of other varieties and is in position to furnish the same high quality in these as in Barred Rocks. He has an enviable reputation for fair and honest dealing and for giving full value for money received. It is reasonable to assume, therefore, that his business the coming season will be very large.

H. A. Emmel, Ogle, Pa., offers some of his S. C. Brown Leghorn cockerels cheap during September in order to make room for other stock. This is an opportunity to procure some good birds. They are of the kind that will be worth double the price after October 1. Look up his ad and write him for special prices. Mr. Emmel agrees to refund money if birds are not as represented.

F. C. Bailey, Reading, Mich., has a change of ad in this issue, offering for sale some of his exhibition Buff Plymouth Rocks. He says that his prize-winner, "Gold Mint," has proven a peerless breeder. He states that he has youngsters with clear wings and tails that would not be cut more than one-fourth on color. They are strong in size and have bay eyes. He will send a colored photo of "Gold Mint", score 94, to those who wish one.

Keyes, Davis & Co., of Battle Creek, Mich., have recently purchased the Eclipse Leg Band of B. F. Huntington, Prattville, Wis., and are now offering same for sale. The Eclipse Band is well and favorably known among fanciers and the sale of same is constantly increasing.

# Signs of Prosperity.

They Still Continue to Show themselves in Increased Numbers and to Unmistakably Indicate that the Past Season has been a Record Breaker and that the Coming One will be Fully Equal to the Past.

CEDAR SPRINGS, MICH., June 18, 1901.

DEAR SIR: Can say honestly that I have received the best results and made more sales of eggs and stock from ad in AMERICAN POULTRY JOURNAL than of any outside of Michigan. Have a fine lot of chicks this season, including about 25 from Bradley Bros.' best matings; also about 50 from E. L. Mile's Montauks. A number of them are sired by "Milo," the great pullet-breeding cokerel owned by E. L. Milles. Have had all the orders I could fill from four pens. Yours for success.

*E. W. Wheeler.*

HASKELLS, IND., July 14, 1901.

*Editor American Poultry Journal,*

DEAR SIR: In answering yours of June 12 will say that business this season has been exceedingly good both in stock and eggs, which prove to me that the Buff Plymouth Rocks are gaining in favor more every day, which they should, as they are a grand breed when bred right. They are handsome to look at and profitable to raise.

They give the amateur farmer and fancier many advantages.

I have bred the Nuggets under E. S. Burdick's personal directions for the last five years; have learned his method of mating for best results.

Mr. Burdick knew that the end was close and the strain being very dear to him he wished to place the strain where they would be bred on after his death.

The information I have received from him in the last few years of his life has been very valuable, and I can truly say that H. S. Burdick was as good a friend as I ever had. His manly qualities and square dealings placed him above par.

I have a fine lot of over 400 chicks that promises to be far better than ever before; they are so strong and hardy and are showing remarkably fine color.

All my stock is bred and raised on our farm, three-quarters of a mile from Haskells, but ten minutes' walk from postoffice. This insures strong, healthy, vigorous birds.

In my business method I guarantee square dealings. I will have satisfied customers under any circumstances. The AMERICAN POULTRY JOURNAL is the only paper I advertise in at present, as it gives me all the business I can attend do.

I expect to exhibit at several of the leadnig shows this winter.

My birds have always won wherever shown, including Chicago, January, 1901.

Yours for Buff Rocks only,

*Mrs. E. I. Reynolds.*

State Vice-President American Buff Plymouth Rock Club.

BATTLE CREEK, MICH., June 17, 1901.

*Editor American Poultry Journal,*

DEAR SIR: We are pleased to have an opportunity of telling of our most successful season's business. To begin with, our eggs have averaged 80 per cent fertile all through the season, and we have hatched on average of 85 per cent of the fertile eggs. We have not had a word of complaint from any of our customers. We have hatched to date more than 1,200 chicks and have finished hatching for 1901. Owing to the continued inclement weather the mortality record has been greater than ever before in the history of our poultry business. Our young stock is doing well and looking thrifty and promising.

Our egg trade has been good, and we are confident in our chance for a good stock trade this season. We are well pleased with our last year's trade and have plenty of enthusiasm left for other years of poultry work. *White's Feathered Stock Farm.*

HOPE, IND., June 14, 1901.

*Editor American Poultry Journal.*

DEAR SIR: You ask me to tell you how successful my poultry business has been the past season. I am proud to say it has been the most successful year I ever had. I have sold during the past 12 months over 3,000 "Fishel" White Plymouth Rocks. I never had such a demand for male birds and it seemed everybody wanted them large and above weight, and, by the way, these demands came from the east, where they passed resolutions against the large sized birds. This surely means something, does it not? The egg trade has been the largest I ever had, selling something over 500 settings and I never had eggs to hatch better, both at home and from shipments, as usual reports from eggs shipped the same day and from same yards some would report as 16 chicks from 17 eggs and others only 4. Of course "hen set well," etc., eggs just did not hatch. This is one part of the egg business I have never been able to explain. Chicks are the largest and strongest I ever saw and seem to try to grow into winners from tbe shell up. I have out over 1,000 chicks and all doing fine. I have moved my poultry plant to my farm of 120 acres and am devoting my entire time to my White Plymouth Rocks, so can give my customers prompt attention. I assure you the good AMERICAN POULTRY JOURNAL has done its part to make my poultry business the business that it is, and I do not see how any one that raises chickens can do without it. Come see me and tell all your readers to come see my poultry farm and look at White Plymouth Rocks of the big kind and winning kind. Your friend, *U. R. Fishel.*

APPONAUG, R. I., June 17, 1901.

*American Poultry Journal.*

GENTLEMEN: Yours of the 12th at hand. In reply I will say that our trade in all lines has been very satisfactory this spring, and as the demand for insecticides continues into the warm weather it is still on and is taxing our capacity to fill all orders promptly. We are just now getting out a new label for all four sizes of Death to Lice Powder and are to have the 100-oz. size put into boxes of uniform size and style when compared with the others. So you see we are trying to do our part at lice killing and make it easy for others to do likewise.

Eggs for hatching have been in good de-

mand all through the spring and orders continued to come in even into June. Many have reported excellent hatches, while some have sent in complaints of "no good," "all rotten" and such, which in many cases were from the same mating as those who said "hatched splendidly." With the exception of those from one pen the eggs set on our own farm have hatchel well and the chicks have lived to grow and we have a promising lot of youngsters that have begun to eat whole corn when they can get it, and we expect to have a poultry show all to ourselves next fall. Yours fraternally,

*D. J. Lambert.*

---

GROTON, N. Y., June 19, 1901.

*Editor American Poultry Journal.*

DEAR SIR: Your favor received. This spring we have had an enormous hatching egg trade and the end is not yet.

Very early in the season eggs were not as fertile as usual, but soon as the birds got outdoors eggs were all right and nearly every mail brings us letters from pleased customers telling of good hatches and fine, strong chicks.

We have out about 2,500 youngsters and expect to be in good shape to take care of our trade in stock.

Expect to build another house in which to winter more cockerels, as last spring we were obliged, to refuse many orders, not having enough male birds. This vicinity has for years been a great poultry center and there was never more interest and enthusiasm than now. I think the outlook for the poultry business very promising. Respectfully, *H. J. Blanchard.*

---

LOCKPORT, N. Y., June 17, 1901.

*Editor American Poultry Journal.*

DEAR SIR: Replying to your inquiry of the 12th inst., will say that business has been double that of last year. Hatches not as good as usual, but the quality of the stock, judging by the appearance of young chickens, far better than previous years.

There is much talk of the poultry exhibit at the Pan-American in October, which promises to be a great success.

With very best wishes for your success, I remain your very truly,

*C. S. Wetmore.*

---

WOLLASTON, MASS., June 27, 1901.

*American Poultry Journal.*

GENTLEMEN: Your letter of June 12 is received and would say that I suppose this year that my experience in regard to the sale of eggs and the demand for stock has been very large on account of the phenomenal winnings which I made in all the big shows of last year. I anticipated when I started in that if I came anywhere near winning as much as I did there would be a large demand on me for both eggs and birds, and would say that it has more than reached any anticipations that I had. Our percentage of hatching in our incubators has been about 65 per eent on an average and our percentage under hens has been about 80 per cent, and we are very glad to know that the utility qualification of the birds we breed—that is, the Rhode Island Reds — is being recognized by everybody throughout the country, and we know by the inquiries that we have that the demand for this variety will be greater next year than ever before. We are also glad to add the fact that there is not any paper that we have advertised in that has given us any better returns than your own journal.

Yours very truly.

*Houscrock Poultry Farm.*

---

LOUISVILLE, KY., July 1, 1901.

*American Poultry Journal.*

DEAR SIR: Yours of the 12th of June asking for information regarding our success during the season received, but on account of the busy season in our particular business (hardware) we could not find time to answer sooner.

We have been more successful with chicken hatching and raising this season than ever before. My Leghorns have been laying right along and are still laying. From the way the hens and pullets are acting toward one another there seems to be a secret compact made by the hens to outlay the pullets. Be that as it may, I know tbey are doing splendid work and Mrs. Wagner is getting the benefit of the rivalry.

I succeeded in raising about 200 young Leghorns. They are doing well and if nothing serious occurs between now and fall look out for me in the several winter shows. I also have about 75 Black Minorcas, April and May hatched, getting in trim for the coming shows: some of them promise to be prize winners against the hottest kind of competition. Am adding more pens to my yard and will build a new

**Importers and Breeders.** **Address B. C. SMITH, Mgr., Elmira, N. Y.**

poultry house 75 feet long before winter. Being a member of the executive committee of the Kentucky State Poultry Association, I can say that I believe our next show in January will be by far the greatest show ever held in this State. We are already at work making preparations for the show, and will succeed in all our preparations. To show you how a single person can awaken an interest iu certain breeds of fowls, I will cite you how the S. C. B. Leghorn interest was boomed in this section. Five years ago I attended the first annual show of the Kentucky Poultry Association at Louisville, Ky., and found 17 S. C. B. Leghorns on exhibition. My friends and myself came to the understanding that we had better birds at home than the ones shown. I bantered them to show against me the coming winter. They promised, but did not do so. I showed some, though, and won a few prizes. This stirred the boys up and the next year they came after me strong. But I had the lead on them and they have not been able to head me off since.

By selling eggs from the same birds I breed from myself I can raise the standard of the breed in the State and at the same time it keeps me "humping" to keep ahead of the procession. If I do say it myself, I can easily prove that I have done more than any one man in the State to raise the standard of the S. C. B. Leghorn in Kentucky. My show records have placed me in a position to advertise myself as the leading S. C. B. Leghorn breeder in the State.

The prospects for the poultry business in the State were never better and with judicious advertisement any one can dispose of his or her fancy stock at good prices.

The greatest mistake the beginner makes is to overestimate the quality of his stock and send out inferior birds at high prices, just because the stock comes from Mr. So and So's, the great breeder's, poultry yards. Treat everybody "on the square" and you will have no trouble to stay in the field.

Yours truly, *Paul Wagner,*
*"On the Square."*

---

WALTHAM, MASS., June 19, 1901.
*American Poultry Journal.*

GENTLEMEN: Your inqulry as to business at hand. I can say that the egg trade of this season showed an increase over that of last and had it not been for a late spring I believe the demand for eggs would have been far beyond the supply. When the fact is taken into consideration that I am a comparatively new advertiser in the A. P. J. I think it has done well by me. I have no doubt lt will do even better as its readers become better acquainted with Grove Hill Poultry Yards and its winners. Yours truly, *W. E. Bright.*

---

CONCORD, MICH., June 22, 1901.
*Editor American Poultry Journal.*

DEAR SIR: The AMERICAN POULTRY JOURNAL has brought me a good season's trade for my Houdans. Am pleased with results. I sold all females early in the season and was handicapped by not being able to sell trios and pens. Had a fine egg trade. Never in my nine years' experience in breeding the Houdans have the eggs hatched as well as this season, not only in my town but in the hands of distant customers. Success to you. *Frank W. McKenzie.*

---

MARLBORO, MASS., June 21, 1901.
*American Poultry Journal.*

GENTLEMEN: In answer to your kind letter wll say that my advertising this season with the AMERICAN POULTRY JOURNAL has been very satisfactory. I have done a larger business this season than ever before and am glad to say that my eggs have hatched well at home and in most instances in my customers' hands. I certainly have had fewer complaints than I have had any year, and my files show some of the nicest letters I ever received.

I have a nice lot of chicks, at least 4,000 in number; have one party on a big farm outside that has hatched 1,500 chicks for me this season; have about 800 at home, besides several flocks outside. Have handled within a week on one of my farms cockerels weighing 5 lbs and over, which looks as though I might be ready for the early shows. Taken all in all, this has been an exceedingly pleasant and satisfactory year and I can thank the AMERICAN POULTRY JOURNAL and its courteous management for its share of my success this year.

Believing this has been an especially successful season with you, and trusting it may continue, I am yours very truly,
*Arthur G. Duston.*

---

FLAT ROCK, IND., June 18, 1901.
*Editor American Poultry Journal.*

DEAR SIR: In reply to your inquiry as to how the past season has been with me, will say very fine. I have shipped a large quantity of Barred Plymouth Rock eggs and have the first complaint yet to hear as to bad results. One lady says: "Of the thirteen eggs received, I got thirteen chicks." One customer who purchased for incubator purposes says: "Of the one hundred eggs received I got eighty-four chicks." Friends who got stock are well pleased. We are looking for a fine trade in stock this fall and a large one in eggs next spring. My hatches are all very fine stock, healthy and young chicks, growing nicely. The A. P. J. is O. K. as a business getter and am well pleased with your paper. Yours truly,
*C. A. Porter.*

---

MONROEVILLE, IND., July 3, 1901.
*Editor American Poultry Journal.*

DEAR SIR: Your request for the results from busiuess during the past season is at hand, and while I cannot make such blowing claims as some others do in the columns of different poultry publications, will say that I have had, I think, a fair share of the egg trade, having sold all that I could spare up to the last week in June. Trade in stock has been light, but have had inquiries enough. The stock is in the best of health and condition, not losing any so far. I hatched about three hundred, equal in numbers of Barred and White Rocks. Have some February stock for fall fairs. Pullets about ready to lay. The A. P. J. is all right and does its share.
*S. M. Williams.*

---

WHEATLAND, WIS., June 18, 1901.
*Editor American Poultry Journal.*

DEAR SIR: I have had a good trade in my Buff Rocks and Buff Orpingtons. Business has more than doubled the past year and in eggs I have been unable to keep pace with orders. I attribute a good share of this to AMERICAN POULTRY JOURNAL. Eggs have hatched fairly well and the young stock are growing nicely, considering the unfavorable spring. I expect a lot of fine specimens from the best pens I ever owned for next spring's trade. They are sure to give plenty of winners for my customers for next fall and winter. I have purchased a small farm just outside the city limits of Burlington, Wis., which place I shall make into a model poultry plant and devote my entire time to raising Buff Rocks and Buff Orpingtons, and shall endeavor to keep my stock at the head of the procession in the future as I have in the past, and hope to supply my customers with the finest specimens of the above varieties to be had. Stock will have more range, which makes strong, vigorous birds and fertile eggs.

Yours truly, *W. F. Worth.*

---

PETERSBURG, MICH., June 17, 1901.
*American Poultry Journal.*

GENTLEMEN: In reply to yours of the 12th inst, will say that we have had a very prosperous season. Had more orders for brooders than we could fill. The sales on our insecticides are all we care to handle.

Eggs have hatched poorly, but we have succeeded in raising nearly every chick hatched, the loss being less than 3 per cent.

Prices for broilers have ruled unusually high, $7 a dozen being the average price received by us this season.

The outlook in this section is very promising for market poultry. Yours truly,
*The Raisin River Broiler Plant,*
*By F. C. Tyler.*

# Market Report.

CHICAGO MARKETS.

EGGS—The receipts at Chicago (not including through shipments) for the days mentioned were as follows:

| | This w'k. Cases. | Last w'k. Cases. | Last year. Cases. |
|---|---|---|---|
| Monday | 4,453 | 3,820 | 6,637 |

At mark cases returned there is no established market price. Eggs can he bought this way at from 12@13c for good to choice, down to 7c per dozen for poor, prices depending on quality. Missouri, Illinois and southern stock generally are the poorest. Iowa are averaging almost as poor as the more southern. To hring the top figure eggs must run very good, with scarcely any bad eggs.

City recandled stock, new white wood cases included, were quotably 14½c.

Seconds—Dirties, stale and small eggs—quotable at $1.50@2.40 per case.

Checks quotable at $1.00@1.50 per case.

| Medium to good, 7@10 lbs. | 4 00 | @4 50 |
| Springs, according to size | 2 00 | @4 00 |

The receipts of poultry have been liberal for the last few days and the market has been lower on springs. We have predicted for some time that springs would go lower, but we think they have about struck the bottom for the present. We would not advise the shipment of young turkeys that weigh less than five pounds each or geese weighing less than four pounds. Dressed poultry is out of season. We advise that everything he shipped alive until the weather turns cold, so that poultry can he shipped without ice.

For the last five years we have gotten out a ponltry crop report. We would like to hear from all your readers as to how much ponltry they raise this year as compared with last year and former years. Let us know about turkeys, chickens, ducks and geese. To all who will send us report of the prospects of poultry in their vicinity we will mail a copy of poultry crop report as soon as we have it completed. We would like to have these reports as soon as possible after the 1st of September, as we want to get our report out not later than the 15th of the month. For the benefit of those who are not familiar with shipping their own poultry, we have gotten out a hooklet, giving directions for making coops, preparing and shipping poultry and other produce, so that it will hring the highest market price. We will send this booklet to any one asking for it and we will also send market report and shipping tags free.

CHICK FOOD.

PAYSON, ILL., March 28, 1901.

*Mr. W. F. Chamberlain, Kirkwood, Mo.*

DEAR SIR: As I used your chick food last year with such good success I cannot do without it this summer, so please find inclosed $2.50, for which send me 100 lbs. of Chamberlain's "Perfect Chick Food." Please send at once, as my hatch is due April 3 and I must use it from the start. Yours truly,

*A. P. Peterie.*

We wish to call the attention of our readers to the ad of Mr. J. D. W. Hall of his Guaranteed Roup Cure. Mr. Hall has a 24-page book of testimonials which he will send to any one sending a stamp for its mailing. He will give many references from eminent poultry men if desired; also will refund money if goods are not as represented.

C. I. Forsyth, having purchased a large stock farm near Alton, Mo., is now better able to raise large flocks of Langshans than heretofore. He says that on account of his removal from Winfield, Kansas, that his birds are somewhat late in hatching, but that the youngsters are developing into fine big fowls.

Mr. W. F. Worth, formerly of Wheatland, Wis., and proprietor of the River View Poultry Yards, has moved his plant to Burlington, Wis., and his address hereafter will be Worth's Buff Poultry Yards, Burlington, Wis. He will have ample room here for his stock and intends in the future to raise enough choice birds to supply all customers. He has an exceptionally fine record on Buff Rocks and Buff Orpingtons.

Mr. C. L. Hogue, Battle Creek, Mich., informs us that he has raised better chicks this season that ever before. He is exceptionally strong in Barred Plymouth Rock cockerels and has quite a number of fine exhibition birds. Mr. Hogue is one of Michigan's oldest breeders and a good judge of all varieties. His experience enables him to satisfy even the most exacting customers.

The *Fancy Fowls*, Hopkinsville, Ky., published a Wyandotte special in July of fifty-two pages, which should be read by all Wyandotte breeders.

**Every person entering our prize article contest, and whose article is worth publishing, will be given a copy of the latest Standard and two year's subscription to A. P. J. Your article does not have to be better than any other one. See the offer elsewhere in this issue.**

—o—

Don't wait till you get ready to use a bird before buying it. Write to a number of breeders at least a month or so before you need the bird and ascertain where you can get what will suit you best. If you pursue this course and use good judgment in writing your letters, you can have desirable birds held for you and shipped promptly when you need them.

In this day and age of progression, the party who claims that standard bred poultry is no better than scrubs, simply shows his ignorance.

Do not under-estimate the value of the poultry show as an educator. The breeder who knows how to improve his opportunities can learn more at a good show in one week, than he can in his own yards in an entire season.

Much of the so-called cholera is only chronic indigestion, caused principally by incorrect feeding and lack of grit.

FOR YOUR MOULTING HENS.

Moulting is an exhausting process. Hens rarely ever lay while moulting, then help them to get their new plumage quickly. Many people get only five to six dozen eggs in a year from a hen, and lose money, when they ought to get three times that many and make money more rapidly. How? There are about 600 eggs in the ovaries of a hen; get all you can of them in two years, then kill the hen. You thus save two or three years' feeding of the hen, which is no small item if you buy all the food. When a hen is in 'condition,'' says a high poultry authority, "she will lay plenty of eggs." Therefore help her through the moulting season, that she may be in condition to lay during the winter. Thousands of people have proven Sheridan's Condition Powder to be worth its weight in gold when hens are moulting. It keeps them in health, helps form the new plumage and gets them in condition to lay early. If you give them during the moulting season Sheridan's Condition Powder daily in extra doses, they will get to laying much sooner and lay all winter, larger, better and more vigorous eggs for hatching than pullets. But don't keep them a third year; get all the eggs in two. Remember Sheridan's Powder is not an egg food; you can raise or buy food as cheaply as we can. To any person interested, I. S. Johnson & Co., Boston, Mass., the only makers of Sheridan's Powder, will send for 50 cents two 25 cent packs, five packs for $1; or for $1.20 one large two-pound can of Powder, post-paid; six cans, $5, express prepaid. Sample copy of the best poultry magazine sent free.

# News and Announcements of Poultry Associations and Specialty Clubs.

## THE GERMAN-AMERICAN POULTRY ASSOCIATION.

We are pleased to note the success of the German-American Poultry Association. The first annual catalogue has just been received and should he in the hands of every German poultry raiser. The organization has members in nearly every state and territory in the Union. The officers are: Adolph G. Horn, president, Dolgeville, N. Y.; Otto Heitman, vice-president, Norwood Park, Ill.; Henry Scim, Sr., secretary-treasurer, Wausau, Wis. The catalogue contains upwards of forty pages, which are filled with matter of interest to all poultrymen. A copy may be obtained by addressing the secretary-treasurer.

## THE WATER-FOWL CLUB OF AMERICA.

The vote of the members for annual meeting place has centered on Buffalo, N. Y., and in compliance with the president's orders, the meeting is called for Thursday, October 24, 1901, members to meet in secretary's office of the Poultry building on the fair grounds. It will be the banner meeting of our existence, a large entry and the highest quality of Water-fowl will be a lesson and revelation to us all.

If any of the members desire to contribute cash for payment of two silver cups, already offered as special premiums, the undersigned shall be pleased to receipt for it. Any small amounts will help, and if each one gives 50 cents we have a splendid sum to get the special prizes with. Let it always he our aim to save the treasury, if we can possihly do so.

Suggestions as to distribution of cash and special prizes are also appreciated.

Special meetings are hereby called for Hagerstown, Md.; Boston, Mass., and Philadelphia, Pa., to he held at 3 p. m. on Wednesdays during the week of the show held in the respective places. Meeting place, the secretary's office, located in Poultry huilding.

Yours for successful meetings of Water-fowl people.

*Theo. F. Jager, Secretary.*

## AMERICAN POLISH CLUB CATALOGUE.

*Editor American Poultry Journal.*

The first annual catalogue of the American Polish Club is now ready for distribution. It is neatly printed and contains some useful articles on the Polish fowls. Every hreeder should secure a copy of this catalogue, which can be had free for the asking. A special meeting of the club will he held in Buffalo on Friday, Oct. 25, at 3 p. m., during the Pan-American Poultry Show. All members and hreeders are earnestly requested to attend this meeting and make an exhihit of Polish or Polish Bantams. The club offers a grand $25 silver cup for the hest cock, hen, cockerel, pullet and pen, nine birds in all, any variety of Polish. Competition open to the world. All breeders who are not yet members of the cluh are invited to join at once. The membership fee is only $1 and dues $1 each year. For catalogue address M. V. Caldwell, Secretary and Treasurer, Leetonia, Ohio.

## POULTRY EXHIBIT AT THE ST. LOUIS FAIR.

The Great St. Louis Fair will open Oct. 7 and continue to Oct 12. As usual the Poultry Exhihit will he one of its chief attractions, and it is expected that this year especially will excel all previous efforts.

The list has been revised and now includes all the up to date breeds, including Rhode Island Reds and Buff Orpingtons. The premiums have not been changed and the same liberal cash offers that this fair has always paid through hard times and prosperity, through drought and moisture, will again he paid this year. No entrance fee is charged. The Fair furnishes exhihition coops, so that out of town breeds can ship in ordinary shipping coops, making express charges a small item. To cap the climax, insuring prompt and reliable rewards, the Fair Association have engaged Mr. B. N. Pierce of Indianapolis and Mr. W. S. Russell of Ottumwa, Iowa, as judges.

"Nuff said." Come early and stay late. Catalogues and prize list is now ready, and will be mailed free to all applicants by addressing John Hachmeister, Secretary, St. Louis, Mo. Respectfully,

*Henry Steinmesch,*
*Supt. Poultry Dept.*

## INDIAN GAME CLUB CATALOGUE.

The annual catalogue of the American Indian Game Cluh is now ready for distribution. If you are in any way interested in this feathered aristocrat this hook will he of great interest and help to you, and it is the wish of the club that interested parties have a copy. A two-cent stamp pays the freight. Send today to

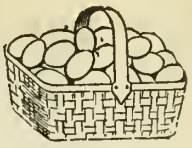
*C. S. Whiting, Sec'y.-Treas.*
*Darien, N. Y.*

## THE AMERICAN LANGSHAN CLUB.

Great preparations are being made for our annual meeting at the Pan-American Exposition, October 26, where our president, Ben S. Myers, of Crawfordsville, Ind., will place the awards on Langshans. This alone should be a great inducement for Langshan hreeders to exhibit. Mr. Myers has acted as judge at several of the leading western shows, besides hreeding the Langshan for a number of years, which qualifies him to place the awards where they helong.

Not only are we making preparations for our annual meeting, but a numher of our vice-presidents are hustling for state shows, which are under their management. These dates will be announced later, when the return votes are in Langshan breeders who are not members of this club should join at once before these meetings take place, so as to give them a chance to compete for some of these prizes which will be offered, besides helping to elevate their favorites to the

**Pullets EGGS Wanted**



For the next four months the demand will be large. Get your pullets to laying by October. A well-filled egg basket now is what makes poultry pay. You can get it by using

## ROSE COMB BROWN LEGHORN CLUB CATALOGUE.

The second annual catalogue of the American Rose Comb Brown Leghorn Club is ready for distribution. The catalogue is neatly gotten up and contains timely articles on mating, breeding and caring for our favorites, from the shell to the show room. These articles, with numerous cuts and half-tones, make this a very interesting and instructive catalogue to all who are interested in this meritorious breed. It is the desire of the club to keep on increasing the membership by adding new names to the list.

All who are interested should send to the secretary for a catalogue, application blanks, etc., which are sent free. Membership fee is only $1 and dues $1 per year.

*C. R. Milhous,*
*Secretary-Treasurer.*
*Spencer, Ind.*

———o———

## THE GREAT VIRGINIA SHOW.

For the first time in several years Richmond, Va., is to have a first-class show. Within the past year two strong associations have been formed, one the Virginia Poultry, Pigeon and Pet Stock Association, the other the Southern Belgian Hare Association.

The fancy has taken on new life throughout the entire South and the members have expressed a determination to give a show second to none. The date has been set for Oct. 7 to 12, which is the week of the great Richmond Carnival, and will be held in a commodious building erected expressly for that purpose.

The superintendent, Mr. R. C. Brauer, is thoroughly qualified for the position. The cooping will be uniform and the entrance fee includes coop, feed and attention. The premium list will be ready for mailing Aug. 15, and those wishing a copy should send their name and address immediately to Frank Jenkins, Secretary, 917 Bank St., Richmond Va.

———o———

## TO BREEDERS OF BUFF PLYMOUTH ROCKS.

It is anticipated that the poultry exhibit at the Pan-American will be a large and most interesting one. As will be noticed in the premium list, many of the largest specialty clubs will hold a meeting during the time of the show. Ours will be held at 2 p. m. Thursday, October 24, at which time we hope all who can will attend.

Pursuing our liberal custom, as in the past, and desiring to have strong competition, the officers of the club have decided to offer the following special premiums, to be competed for by members of the club only:

Silver medal for best cock, hen, cockerel and pullet, by one exhibitor.

Silver medal for best cock, hen, cockerel, pullet and pen.

Bronze medal for best shaped male, best shaped female, best surface colored male, best surface colored female, best male with best head, best female with best head.

It is hoped that these valuable specials, in addition to the liberal premiums open to all, offered by the officers

# Reliable Breeders' Directory

**OF THOROUGHBRED POULTRY.**

**We believe all breeders whose names appear below to be thoroughly reliable and honorable, and their stock to be of superior quality. Address will be inserted in the JOURNAL for such breeders as can satisfy us upon the above points, and that their stock is thoroughbred, for $2.00 per year, payable strictly in advance. Those who breed more than one variety, can have address under other headings (after the first) for $1 for each variety.**

---

The annual show of the Central Missouri Poultry and Pet Stock Association will be held in Boonville, Mo., November 26 to 29, inclusive. Judge, D. T. Heimlich will score the birds. We expect to have the best show in Missouri this fall. An attractive catalog will be issued this month and many valuable special premiums will be offered. We want every fancier in Missouri, the banner poultry state in the Union, to join our ranks. Send $1 for membership fee to the secretary, H. P. Mason, Fayette, Mo.

---

The Kentucky State Poultry Association will hold their next show January 6 to 11, 1902. The following officers were elected at the last meeting: R. H. Young, president; Charles A. Hess, treasurer; Charles H. Good, secretary; Arson Woods, superintendent. We are going to have the best show this year ever held in this city and have secured the services of H. A. Bridge and Sharpe Butterfield. *Jno. H. Good, Secretary.*

---

The second annual show of the Yorkville Poultry Association will be held December 2 to 6, 1901. They held a very successful show last season and are planning for a better one this season. The show will be uniformly cooped and there will be some grand specials offered. The well known judge, F. H. Shellabarger, of Iowa, will do the scoring. Get a premium list and enter your birds at this show. Premium lists may be obtained of the secretary. *A. S. Tarbox.*
*Yorkville, Ill.*

---

The fanciers of Southwestern Iowa will hold a show at Tabor, Ia., November 11-14, with W. S. Russell as judge. A great deal of interest is being manifested by those responsible for the success of the enterprise and it seems certain that one of the best shows held in this part of the state will be ours. Good premiums will be offered and fair treatment assured all exhibitors. The undersigned will be glad to answer all correspondence and to send premium lists after September 10. *E. H. Harrison, Secretary.*

---

The La Porte County Poultry, Pigeon and Pet Stock Association has elected the following officers: H. C. Schultz, president; J. J. Kreidler, vice-president; A. L. Peterson, secretary, and J. C. Buck, treasurer. The association has held two very successful exhibitions and if hard work will do it they expect to make their next show a greater success than former ones. It will be held at La Porte, Ind., December 30 to January 4. Premium list may be had by addressing the secretary.

---

The catalog of the American Plymouth Rock Club has been received and in some respects it is a departure from the regular custom followed in getting out club publications. It contains fifty-two pages the size of AMERICAN POULTRY JOURNAL. It is printed on an excellent quality of

**Barred P. Rocks,** Dark Brahmas and W. Wyandottes. Better than ever and this means a great deal. After Oct. 1st will have young stock for sale from our prize winning birds. Sure to please; at reasonable prices Don't fail to write us before you purchase. It's to your interest. C. L. Hogue, Battle Creek, Mich.

Are prize winners. Size, shape, color. I hold the White Plymouth Rock Club diploma for best pen in the state, won at Club meeting, Columbus, O., Jan., 1900. I have the best strain of line-bred White Rocks in the U. S. Have never been beaten. Show birds that will win. Breeders that will breed right. Old and young stock. Prices right. Eggs, $3 per 13, Write.

**FRED J. PHELPS, Bucyrus, Ohio.**

I have sold the winners at the largest shows, They win for me; they will for you. Try them.

paper. It is profusely illustrated and is indeed a creditable production in every way. It shows the club to be in the most prosperous condition. All breeders of Barred Rocks should have a copy of the publication. Mr. H. P. Schwab, Rochester, N. Y., who for the past few years has so successfully managed the club, is still at the helm as secretary-treasurer.

---

The premium list of the Marquez, Tex., fair has been made larger and more attractive. The managers are making a special effort to obtain birds from a distance and are arranging to give exhibitors special inducements to send their birds. Mr. E. O. Boggs, Marquez, Tex., is secretary.

---

The first annual silver cup show of the Eastern Illinois Poultry and Pet Stock Association will be held at Charleston, Ill., January 7 to 11, 1902. S. H. Taylor will judge. They are issuing a nice catalog that will be mailed upon request after November 15, 1901. The corresponding secretary is Mrs. Henry Gaiser, Charleston, Ill.

---

The third annual exhibition of the Wauseon Poultry and Pet Stock Association, Wauseon, O., will be held from December 31 to January 3, 1901. Their late show was a success in every respect. Mr. S. H. Taylor will act as judge.

---

We are in receipt of the first annual catalogue of the American Buff Wyandotte Club. It is an agreeable surprise in that it is far above the average of publications of this kind. It will, undoubtedly, be favorably received by the Buff Wyandotte fraternity and will do much to increase the present great interest in the variety. The book contains articles which are of real value to all breeders who desire to raise the best Buff Wyandottes. Mr. W. R. Wooden, secretary-treasurer, Battle Creek, Mich., will send a copy free to all applicants. He is to be congratulated in putting out so useful a book.

---

The Poultry and Pet stock breeders of Fostoria, Ohio, have organized an association of twenty-five members, with the following officers: T. H. Chance, president; T. D. Lewis, vice president; M. B. Overholt, treasurer; Chas. Mann, secretary, and will give an exhibition December 9, 10, 11 and 12, 1901, with Chas. McClave as judge.

---

The premium list of the Champaign County Fair is now ready for mailing and copies may be had by addressing R. D. Burnham, Champaign, Ill. The list is not only lengthy, but it is quite liberal and this association has always made a practice of paying the premiums in full and treating their patrons in the most courteous manner. W. S. Russell will place the awards.

---

The North Missouri Poultry Association will hold its fifth annual show in Kirksville, Mo., December 2 to 6, 1901. D. T. Heimlich will judge.

*F. M. Buckingham, Secy.*
*Kirksville, Mo.*

---

The Western New York Fanciers' Association will hold their next show in Jamestown, N. Y., December 10 to 14, 1901. Geo. H. Burgott will be judge. J. W. Morris, Jamestown, N. Y., is secretary.

**Partridge Cochins, Barred Plymouth Rocks.**

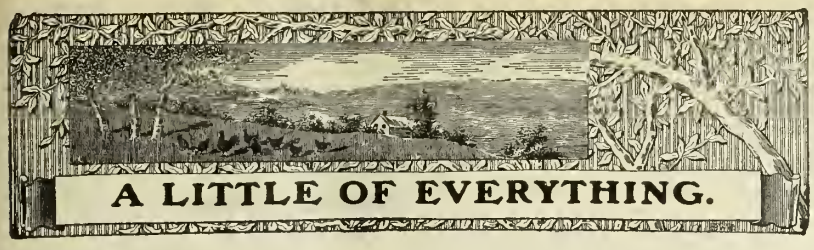
ROYAL MANUFACTURING CO., Box 518 Detroit, Mich.



# A LITTLE OF EVERYTHING.

*Infidelity.*

Many readers of the accounts of the great Van Dresser egg farm do not believe what is said and written of it. We firmly believe that this farm is an actual thing and, furthermore, that there is a man running it who knows his business. Everything written of this farm seems plausible to an experienced poultryman, hut, of course, those who own small flocks and take *small* care of them do not believe the profits of Van Dresser are what is mentioned, because they have never put business methods into their management; and, to be sure, they will never see the profits.

*D. Amos Burhaus,*

*Seward, Neb.*

*Growing Chicks on Dry Food.*

I have lost fewer chicks this year than ever before. It is the first season I have grown chicks wholly on dry food. I can see no other reason for a decrease in mortality. *W. H. Harrison, Jr.*

*Toledo, Iowa.*

*Vacation.*

I consider it a good plan to give fowls a sort of vacation every year. On the 1st of August I separate my males from the females, giving the latter full sway of the farm. The males are put up in smaller enclosures. As the fowls are in moult about this time a large range, where they can get hugs, worms and insects of all kinds, will do much to improve their condition, and looks, too. About the 1st or middle of October I begin to house the hens again, hut my best pens are not mated until the 1st of February. This insures me healthy, vigorous stock from which to sell eggs for hatching. *Paul Wagner.*

*Louisville, Ky.*

*Dipping Fowls.*

If you have let the lice get the better of your fowls try dipping them during some hot day in Septemher in an emulsion made as follows: Take two cakes laundry soap, shave fine, dissolve in one gallon hot water. Pour in half gallon coal oil and stir thoroughly until oil is emulsified. Carefully skim off any grease that may remain after putting emulsion in ten gallons warm water. Take fowls hy feet and beak and dip clear under. Squeeze water off feathers and place fowls where sun will dry feathers. It kills lice and nits. *H. P. Mason.*

*Fayette, Mo.*

*Feeding Late Hatched Chicks.*

Do not feed late hatched chicks wet and sloppy food, as the crop will get sour and cause indigestion. Cracked corn and cracked wheat is the hest in warm weather. The finest hrood I ever had was fed in this manner and since I have grown them in this way I have no bowel trouhle and chicks are healthy.

*Washington, N. J.* *O. E. Vass.*

*Clean Up.*

At this season of the year it hehooves us to keep all the coops and houses perfectly clean. My coops and houses are cleaned as clean as a pin every morning. Use some good disinfcctant freely, as well as a good louse killer. Water often and feed good wholesome food. You will be pleased at the reward of your work and will not have to fight lice and sickness. *U. R. Fishel.*

*Hope, Ind.*

*Don't Think the Lice are Dead.*

As the writer travels over the greater part of Marshall and Woodford counties he is often met by a woman with a dead chicken in her hands, saying: "I wish you would tell me what is the matter with my chicks. They are dying, and I know they are not lousy, for I can't find any. See if you can." No, I cannot on dead chicks, but can on the live ones, unless we fight them all the time. Many persons whom we know hatched 200 or 300 in April and May have not fifty now. How are yours? Ours are O. K.

*Lacon, Ill.* *John Watt.*

*Late Chickens.*

We have heen very successful here with late hatched chickens since we learned how to care for them. We select some spot where it is shady and possihly quite damp, so that there will he a good growth of tender grass. This away from the early broods as far as possible. We feed the same as earlier, only do not warm the morning mash. Have one lot that were put in small coops between rows of growing corn ahout July 4 that are doing fine. Barring is nicer on late Barred Rocks.

*Apponaug, R. I.* *D. J. Lambert.*

*Humbugs.*

If you don't believe it, powder a lousy hen with any of the sure deaths, hold her two minutes, then shake her well on a newspaper and watch the lice crawl away. All roup cures will not cure roup. Two months hard work, $4.75 and the loss of sixty-three fine chickens out of 140 in last year's work is the proof.

*Wauseon, O.* *J. H. Waddell, M. D.*

*Preparing for the Show.*

The time is now approaching when the hreeder of thoroughbred poultry is looking forward to success in the show room. It is with this end in view that we should endeavor to get better acquainted with our flocks; cull them closely; pick the hest individuals, watch closely their development and he thereby better enahled to get them in the pink of condition, for honors at the leading shows will be more closely contested this winter than ever before.

*Francis O. Brewer.*

*Jacksonville, Ill.*

*Hatching and Raising Chicks.*

I got out of patience with sitting hens this spring and bought a 120-egg Cypress incubator and two of their large size outdoor hrooders. There were 76 fertile eggs in each lot. My son, just 16, operated the incubator and cared for

**Kills** all lice or mites on chickens and hogs by simply painting or sprinkling on roosts—for poultry; on bedding for hogs. **Sample free.** Be sure to get **Lee's**, in yellow cans, with trademark. Not sold in bulk.

tbe chicks. Hatched 56 strong chicks the last time, 51 the previous hatch. Fed nothing but fresh water to drink and Chamberlain's Chick Food dry. The chicks are all alive and no one ever saw stronger, healthier chicks or any that grew faster. Not big hatches, but more and stronger tban the setting hens bave averaged this season, and no more setting hens in ours.

*Toledo, Iowa.* *W. H. Harrison, Jr.*

*The Poultry Interests.*

The dates and arrangements of the county fairs are most completed, and the poultry industry is not recognized as it should be. This has a tendency to keep poultry in the background, compared with other exhibits of stock. The premiums offered at some fairs are not sufficient to pay the express charges on the birds, and any covered building seems good enough, cooped with very unsuitable coops. Visitors and exhibitors who are interested in poultry cannot fail to notice that this is one of the greatest mistakes, for it usually brings out only the most inferior birds, and they receive the awards. There are a few exceptions. This branch of the farming industry should receive more recognition and encouragement, for it is the best paying to a great many. It is this disregard for the importance of poultry by fair managers that helps to keep the industry in the background, compared with other farm industries. *H. A. Emmel.*

*Ogle, Pa.*

*Rats.*

I have been bothered very much with rats this season. I removed from the houses everything that would afford them the least hiding place and am not now bothered at all. I have learned that they will not be troublesome if they have no place to hide or burrow. This may help some of the readers of A. P. J.

*Flat Rock, Ind.* *C. A. Porter.*

*From New York City.*

The reports show unusual activity in preparations for the Pan-American display. Fowls are being imported from the other side, of the kinds they surpass in over there. We saw the past week some Barred and White Plymouth Rocks that will be to full exhibition size and over by the time of the show at Buffalo. A battle royal is promised all along the line and the birds must be good to win. There are not so many early fowls in tbe east as usual, but those we have are fine and doing splendidly.

*New York City.* *T. F. McGrew.*

*Quick Moulting.*

A successful way of making the hens moult quickly is to not feed them hardly anything for about four weeks. Give one very light feed per day of oats and bran mixed, the oats being soaked. Then start feeding on fattening and oily food until real fat. Tbis will cause the old feathers to drop in forty days and a new lot will come in. This is what I call a starving and fattening process. This plan should be tried by all who have never pursued it. Start your incubators now for fall roasters. *John M. Sontag.*

*St. Charles, Ill.*

*Seasonable Necessities.*

Our long, hot, dry period has taught many a severe lesson by loss on account of not providing an abundance of shade and a sufficient supply of pure fresh water. A merciful man is merciful to his stock. To provide the above is far more

important than an abundanec of feed. Chicks will thrive on little else but insects, if kept comfortable.
*Jacksonville, Ill.* *M. L. Edson.*

*How I Feed Half Grown Chicks.*

I take fine bran, two parts; coarse shorts, one part, and add to this one morning one pint oil meal. The next morning one pint meat meal. This is mixed thoroughly with milk or water and fed to two hundred chicks. At noon I feed all the wheat they will eat up clean. At night I give them first a light feed of corn, then give them all the nice clean oats they will eat. I allow them free range and can see them grow.
*Flushing, O.* *Joe Farmer.*

*Pick Out Your Show Birds.*

It is almost time to pick out birds for the coming winter shows. Select the most promising, separating the sexes, and give them extra care and feed. You will be surprised at the improvement they will make and when you see the ribbons, which these birds will win, you will think the extra time was well put in. *F. E. Mow.*
*Union Mills, Ind.*

## POULTRY KEEPER CHANGES HANDS.

Miss Fannie Piggott has purchased the *Poultry Keeper*, published at Quincy, Ill., where she will continue to publish it. Miss Pigott until recently was associate editor of the *Reliable Poultry Journal*, having been connected with that publication since its first issue. During all that time she took an active part in its management and is unquestionably well fitted to make a success of the *Poultry Keeper*. We know enough of her methods of doing business to state that the *Poultry Keeper* will be handled in such manner as to place it in the very first rank and her subscribers can feel assured of receiving a paper in the future that will fill their wants and one that can be depended upon to give them the best to be had in poultry literature.

## THE SUCCESS OF POULTRY SUCCESS.

Perhaps one of the most notable advances in poultry journalism during the past year or two is that made by Poultry *Success*, of Des Moines, Ia. Under the vigorous management of Mr. De Puy it has forged ahead at a rapid rate and occupies a proud position now well toward the head of the column. Indeed were we to classify *Poultry Success* we would put it third in the list, as we consider it fully entitled to such distinction. It's regular monthly circulation is 18,000 copies, and the advertising rates are very low, circulation considered. It gives us pleasure to commend this journal to our readers. It is clean, handsome, bright and fully up to the times. A free sample will be sent anywhere on request to them at Des Moines, Iowa.

If you are going to purchase one or more show birds do not forget that there is often a wide difference of opinion between buyer and seller as to whether full value has been given and received. It is therefore wise to have an explicit understanding in regard to the special features of a bird, also if money will be refunded if a purchase is not satisfactory.

**Barred Plymouth Rocks,**
***S. C. W. Leghorns.***

# $50 IN CASH PRIZES

## GIVEN BY

## *American Poultry Journal.*

### No "Strings" to Them. Everybody May Compete.

If you know anything about poultry you may win one of these prizes. We want you to tell our readers briefly what you know about one or more of the following subjects:

The process of molting. Care of the fowls during this period. What to feed and why to feed it. Is delicate color and gloss of plumage affected differently by different foods. If so, how and why? A general treatise on the subject of molting.

The best and most thorough explanation of line breeding, with a detailed plan for establishing a strain, a clear and concise statement of the principles involved in developing the desired characteristics of the fowl and embodying the results of too close inbreeding.

Preparing birds for the show room. Instructions which will enable the amateur to take advantage of the many little details, which add to show condition. How to feed and care for the birds during their close confinement in show coops.

Instruction to the beginner whose ambition is to get prominently before the public as a fancier and breeder and establish a paying business.

The best method of starting a market poultry plant. The amount of money necessary to purchase stock and the profit to be expected from the outlay suggested. The amount of ground, number and size of buildings required and suggestions in regard to economical and successful management.

How to advertise successfully. Points to be considered in selecting a medium. Conditions affecting an ad. and hints on the advantage of continuous advertising.

Has the specialty breeder greater chances of success than the breeder of several varieties, as regards prominence and high prices for stock and eggs? If so, why?

Advice on management of incubators and the advantage of their use even though hens are available for the purpose.

Success with brooders. How to feed and care for the chicks.

Rules to be observed in getting the highest percentage of fertile eggs. Hints on house room, feed, care, selection and mating, as affecting fertility of eggs.

## $25 For the Best Article.
## $15 For Second Best Article.
## $10 For Third Best Article.

The list of subjects has been selected with a view to covering a wide range, so that every breeder will find some subject with which he is familiar enough to write upon with a fair chance of winning. THE CONTEST CLOSES OCTOBER 1. All copy must be in our hands not later than this date. The articles must be original and not have been published before. They must contain not less than 1,800 nor more than 2,500 words. *The writer who covers his subject most thoroughly and presents it in the most comprehensive manner will be given first prize.* The prizes will be awarded by a disinterested committee, which will be announced later. We reserve the right to retain all articles sent in and to publish them, if we so desire, giving full credit to the writers. Those writers whose articles do not receive one of the three cash prizes, but which are published by us, will be given a copy of the Standard of Perfection and a two years' subscription to AMERICAN POULTRY JOURNAL. ..

These prizes are worth trying for. You can lose nothing but a little time and you may be one of the winners.

Prepare an article at once and send it in. Address

**AMERICAN POULTRY JOURNAL,**
**325 Dearborn st., Chicago, Ill.**

### POULTRY EDUCATION.

We are informed that the Kansas State Agricultural College has added to its course of instruction a department for instructing students in raising and scientific judging of fancy poultry. It is gratifying to know that this college has recognized the importance of instructing its students in this line of agricultural work. Judge C. H. Rhodes, of Topeka, has been secured to give the course of instruction upon the scientific judging of fowls. It is to be hoped that the time is not far distant when the agricultural colleges of the various states will follow the example of Kansas and add a permanent department of this character.

### A CURE FOR GAPES.

One of our subscribers, noticing requests in the Questions and Answers department for a cure of gapes, offers a remedy which he claims never fails. If there is any efficacy in variety of ingredients, this should prove a sure cure. It is as follows: Capsicum, 4 oz.;; ginger, 4 oz.;; saltpetre, 4 oz.; gentian, 4 oz.; Fengreek, 4 oz.; carbonate of iron, 8 oz.; sulphur, 8 oz.; venetian red, 8 oz. Dose one teaspoonful to every ten fowls two or three times a week in their soft food. It is claimed that this is also a valuable tonic to give fowls in the spring.

### CERTIFICATE OF SALE.

OTTAWA, IOWA, April 20, 1901.

This is to certify that I have this day sold and shipped to U. R. Fishel, Hope, Ind., my entire stock of White Plymouth Rocks. I shall breed nothing but Barred Rocks in the future and refer all those wanting first-class White Plymouth Rocks to Mr. Fishel. Having visited his farm and examined his stock I believe he is in position to furnish specimens that will please the most exacting.

(Signed) W. S. RUSSELL.

Mr. J. W. Rich, Flanagan, Ill., in his advertisement this month, offers some choice April and May hatched Brown Leghorn cockerels at $1 each. He informs us that these birds were sired by 94 point cock. He also informs us that these must be sold at once or go to the butcher's block. The specimen feathers, which he encloses, show the birds to be far above the average.

Mr. F. C. Brewer, Jacksonville, Ill., has a large number of excellent White Plymouth Rock chicks that cannot be surpassed in quality and which promise to develop into great show birds. He will sell a limited number of these at reasonable prices to early buyers. His circular is free.

Pansies sown in the fall produce incomparably the finest and largest flowers of the brightest colors. They stand the hardest winters without injury and are the first to greet us in the spring. Every one should have a bed. We call attention to the very liberal offer made by A. T. Cook in his ad in this number.

Mr. Clark E. Adams in his ad this month makes some special offers of Wyandottes and our readers who may need birds of his variety will find it to their advantage to write to him.

# Questions and Answers.

**Our Subscribers are invited to make use of this department whenever we can be of service to them. All questions are answered in the order in which they are received. If your question is not answered in this number, look for it next month.**

*Editor American Poultry Journal.*

DEAR SIR: Can you tell me if there are any black fowls with yellow legs? What are the largest and best pigeons for market and where can I get them?

*Randolph, Mass.* *Mrs. E. J. H.*

We do not know where you can get black fowls with yellow legs. This is not a natural condition. None of the Standard varieties of black fowls are required to have yellow legs. The largest pigeons are of the variety called "Runts," but we understand the best market pigeon is the "Homer." You will find pigeons advertised in the A. P. J.

*Editor American Poultry Journal.*

DEAR SIR: Will you please inform me where I can get the Standard for Rhode Island Reds and White Wonders?

*Montpelier, Vt.* *W. M.*

The Rhode Island Reds and the White Wonders are not recognized by the American Poultry Association and a description of them, therefore, is not found in the American Standard of Perfection. We would suggest that you write to John Crowthers, secretary-treasurer of the American Rhode Island Red Club, Fall River, Mass., and to A. L. Merrill, secretary of the American White Wonder Club, Auburn, Me.

*Editor American Poultry Journal.*

DEAR SIR: Two of my S. C. White Leghorns have died and I am unable to ascertain the cause. They mope around and their combs turn blue. They linger two or three days and die. My folks are away on a vacation and the hens are left in the care of a neighbor. I find plenty of feed at night not eaten. *R. M.*

*South Hadley Falls, Mass.*

From the meagre description of the symptoms, manner of feeding and surroundings, we are unable to say what is the matter with your birds. They are certainly overfed for one thing, and this may be at the bottom of the trouble.

*Editor American Poultry Journal.*

DEAR SIR: I have some very fine B. P. Rock cockerels (March hatched); one of them has almost lost his voice, and I am afraid he might lose it entirely. He commenced crowing very early, as he is a vigorous bird and crows from morning till night. Please give me the cause and cure, if possible. *S. C. K.*

*Golden, Ill.*

There is probably nothing serious the matter with your cockerel, unless an examination of the throat reveals something. This is not uncommon. He may have strained his throat from overexertion, crowing. He will get all right without treatment.

*Editor American Poultry Journal.*

DEAR SIR: Can birds and their progeny be indiscriminately bred to each other, or is it necessary to continue to mate the old birds to each other and the offspring to each other to avoid evil effects. *Lamar, Mo.* *S. T. H., Jr.*

You cannot establish a strain without inbreeding, nor can you produce as many high grade birds by not inbreeding. Mate a cockerel to his dam and a sire to his pullets. In some cases certain birds of the same parentage can under special conditions be advantageously mated. Read the article "In-Breeding and its Effects," page 605, August number of AMERICAN POULTRY JOURNAL.

*Editor American Poultry Journal.*

DEAR SIR: Will a house built of pine lumber and lathed and plastered inside, well battened outside, be warm enough for hens to lay well in winter, if well cared for? *J. H. E.*

*Essextown, Ont.*

A house such as you describe would be more than ample. Fowls should not be kept in a really *warm* house.

*Editor American Poultry Journal.*

DEAR SIR: What is the cause of the feathers coming off of my hens' heads? They commence falling out at the comb and keep falling until I check them. I use pretty severe treatment, but know no other way. What do you advise?

What is the chance of a steady young man of 22 years of age, having had 12 years' experience in the chicken business and knows how to manage incubators and brooders, getting a position on a poultry plant, and what is the salary they receive? What would be the surest way of getting such a position?

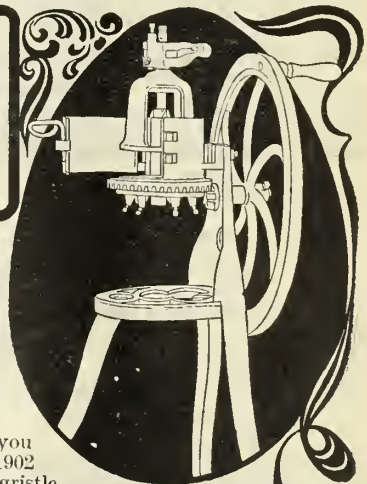
Would Tennessee be a good state to engage in the poultry business in?

*Barry, Ill.* *C. A. P.*

If the moult is not a natural one it is "depluming scabies," caused by a parasite known as the depluming mite. You should not resort to severe treatment. All that is necessary is frequent applications of carbolated vaseline.

A breeder with 12 years' experience should not find it difficult to get a posi-

# Have You Seen The New MANN'S?



You don't know what a bone cutter really is, until you see

## Mann's 1902 Model

**Different From All Others.**

You cannot afford to get along without a good bone cutter, and you cannot afford to buy one until after you have investigated the **Mann's 1902 Model,** especially as you can get one on **TEN DAYS FREE TRIAL.** No money asked for until you prove our guarantee on your own premises, that our 1902 model will cut all kinds of bone, with adhering meat and gristle, easier and faster and in better shape than any other type of bone cutter. If you don't like it send it back at our expense.

New design, open hopper, enlarged table, new device to control feed. You can set it to suit any strength. Never clogs. This is the newest machine covered by latest patents. It embraces all the best features of the old reliable **Mann's** and a dozen radical improvements which have increased its efficiency fully 100%. Compare its self-regulating feed with the crude devices of other types. Compare its products with that of others. Compare its ease of operation and then decide for yourself.

The **Mann's** is the only machine which cuts hard bones without any more exertion than is required for soft bones. The only machine which you can regulate to suit the strength of the operator. The machine which does not clog nor stall; the machine which cuts not only bone, but *any* bone and *all* bone, meat and gristle. Try it for yourself and see. Our new cat'lg explains all.

tion as manager of a poultry farm, provided his experience has taught him how to successfully manage a plant. There are plenty of positions, but competent men open for engagement are about as scarce as hens' teeth. Fifty dollars per month and house and garden constitute a fair consideration for services in this capacity, but you could not get it till you proved your worth. We know of managers who get $125 per month and a house to live in. With but few exceptions the man who can make a success with poultry is not working for someone else; he has a business of his own.

Tennessee is a good state for poultry raising, but you could find other locations where you would be *nearer* a *good* market and where feed could be purchased cheaper. You could raise your own feed, however, and work up a good trade.

---

*Editor American Poultry Journal.*

DEAR SIR: Kindly advise me if the Puget Sound climate is a good one for raising chickens. *C. V.*

*Seattle, Wash.*

There is nothing the matter with the climate in your locality. All you need is a little warmer houses than you would in warmer climates.

---

*Editor American Poultry Journal.*

DEAR SIR: Can you tell me how to cure an egg-bound hen or pullet? What is wrong when hens fail to shell their eggs? When a hen gets an egg broken in her body can she be cured? Mine have invariably died when so afflicted. *Stanton, Tex.* *A. S.*

One of the best remedies for an egg-bound bird is a liberal injection of sweet oil. If this fails to assist the fowl in passing the egg it generally breaks. In this case the trouble is apt to become obstinate and will not yield so readily to treatment. All that can be done is to inject the sweet oil and remove the broken egg with the fingers. The cause of soft shelled eggs is the failure on the part of the hen to retain the egg long enough for it to receive the coating of shell. This trouble is usually noticed with over fat birds in which case the egg is prematurely forced out. It may also be the result of a weakness of the organs caused by disease or from being forced for heavy egg production.

---

*Editor American Poultry Journal.*

DEAR SIR: If a breeder sends out eggs supposed to be from Standard bred birds and the eggs hatch mixed breeds, etc., is his advertising discontinued or is he allowed to go on deceiving the people? *Dwina, Ill.* *G. W. G.*

We cannot speak for other publications, but AMERICAN POULTRY JOURNAL will not carry an advertisement of those who intentionally defraud their customers. It is entirely possible under some circumstances for a buyer of eggs to get chicks other than the kind the eggs are supposed to produce, notably when a breeder has a number of varieties and the birds get out of their yards into others. If you think you have been defrauded in this way by any of our advertisers, it is your duty to write us the circumstances and endeavor to have the matter adjusted before making any accusations.

---

*Editor American Poultry Journal.*

DEAR SIR: I wish to go in the egg business and would thank you to tell me which would be the best hens for layers and how many I could keep upon seven acres of ground by giving them the best of attention; also tell me where I can procure a book, giving me information relative to egg farming. Can egg raising be made profitable on that amount of land? *J. H. S.*

*Woodland Mills, Tenn.*

If you wish to cater to the egg trade entirely we would advise you to select some variety of the Mediterranean breeds. The Leghorns are good layers. The American varieties, when bred with a view to heavy egg production, will about equal the Leghorn and will be more profitable as dressed poultry on account of their increased weight. You can keep two thousand fowls upon seven acres of ground. You would do better, however, with a smaller number. We publish a book entitled "Why Poultry Pays and How to Make it Pay," which will give you the information you desire along this line. If you conduct your business properly, you could make it pay you with seven acres of ground.

---

*Editor American Poultry Journal.*

DEAR SIR: For laying hens about how much whole grain and ground feed each will make a sufficient ration per day for every ten hens, kept in ordinary sized yards? taking into consideration that hens are of lighter breeds and the whole grain a mixture of oats, barley, corn, etc., and the ground feed a mixture of bran, middlings, meal, etc. *F. L. P.*

*North Jackson, Pa.*

Much depends upon the nature and the quantity of other food given the hens. They should not be given an exclusive grain diet. Hens are like people in that they do not eat the same quantity at each meal, and you will not get good results if you attempt to feed a given quantity for each meal. As a general thing, you can give each bird a half pint of mash and the same amount of whole grain. You should govern the feed by the appetite. Feed just what they will eat up clean quickly and no more. Keep them hungry enough that they are willing to do a little scratching.

---

*Editor American Poultry Journal.*

DEAR SIR: I wish to keep two pens of chickens. Not having much room I would like to know if two lots, 10x25 feet each, with a house 5 feet square and scratching shed same size, would do for four or five females and a male. The variety is Buff Plymouth Rocks. I have a pullet hatched this year that is exceptionally good in color, shape and eyes and every way, but has pale ashy colored shanks and feet. How would she do to breed from if mated to a good cockerel? How much of a disqualification is such shanks? *F. G.*

*Indianapolis, Ind.*

By keeping your pens clean and giving the birds proper attention the amount of space you have will be ample room. The pale shanks constitute a common defect in Buff Plymouth Rocks. The bird will be all right as a breeder, if mated to a male bird with yellow legs and feet. The pullet herself may have a tendency to yellow legs, but may have had them bleached as a result of the soil in your yards. In many places a peculiarity of the soil has this effect upon yellow legged fowls. The Standard says: "Legs other than yellow are disqualifications." Your question, "How much of a disqualification is such shanks," is hardly in order. It cannot be partly a disqualification. Pale shanks are generally cut

from ½ to 1½ points and if they are deserving of more than 1½ points the bird is generally disqualified. A great deal depends upon the judge. Some judges are too hard on the hirds and carry things to extremes hy disqualifying birds, unless they show deep yellow shanks.

---

*Editor American Poultry Journal.*

DEAR SIR: Will you kindly tell me how to feed and condition Silver Spangled Hamhurgs for the show room? I have two hens that had swollen heads and had a hard time to hreathe. Can you tell me what was tbe matter with them?

*Walla Walla, Wash.* *A. S.*

The method employed in conditioning Hamburgs for the show room is practically the same as for any other variety. It is necessary to feed and care for the hirds so as to have them in the hest of healtb. Keep them in pens always provided with an abundance of clean straw and take every precaution to prevent injuring and soiling the plumage. Immediately hefore the show it is advisable to clean the legs, comh and wattles. We have not space here to go into details. We will puhlish something along this line in the Octoher or Novemher numbers.

Your hens were affected with a disease commonly known as "swelled head." It is hrought on hy roosting in a draft or may be the result of a chronic cold. If not checked, it is very apt to develop into roup. The hirds should have heen treated for cold when the trouhle was first noticed.

---

*Editor American Poultry Journal.*

DEAR SIR: I have a valuahle Cornish Indian hen that is sick, but not affected like anything I have ever seen before. If you can help me, I will appreciate it greatly.

She seemed about ready to moult when she caught cold and acted as though she was in the first stages of roup. She became thin and poor and would not eat. I gave her some pills made of Pratt's Poultry Food and turned her out on range. She regained her appetite, hut her head twisted to one side, gradually getting worse, until now she runs with her head sideways. Sometimes when she starts to walk a fit seems to strike her and she twists her neck and head around back toward her hody, her head turning until the under part is uppermost. If you can tell me what to do for her, I will appreciate it greatly. *R. B.*

*Raymond, Neb.*

The fact that the bird caught cold when ahout ready to moult would indicate that the trouble is of a rheumatic nature. It is very hard to correctly diagnose these trouhles without examining the bird. If she is trouhled with rheumatism, you can relieve her by ruhbing her neck with some good liniment. Worms affect hirds in this way sometimes and especially worms in the crop, which come from eating decayed animal matter. It is sometimes called "limber neck." If you have reason to suspect the presence of worms it would, of course, he well to treat her for them, giving her liberal quantities of sweetened water, also giving her a dose or two of turpentine on sugar.

---

*Editor American Poultry Journal.*

DEAR SIR: I have been raising poultry both with incubators and hens and the greatest trouhle I have had to contend with is the scours. I find it largely among the brooder raised chicks, although those raised hy hens seemed to be trouhled occasionally. I purchased this summer 220 White Wyandotte eggs and had a hatch of 90 chicks. The incubator was placed in the cellar, where a previous hatch in the same position resulted in 140 chicks from 200 eggs from mongrel hens of my own raising. Wbat do you think of these results? I took the Wyandottes out of the incuhator at the end of 24 or 30 hours and placed them in a warm brooder of standard make, 45 in each, and fed hoiled eggs and fine grit added. They seemed all right until the second or third day, when one or two began to have the scours. This has continued now for about four weeks. They keep dying off one at a time. About three weeks ago I had three hens just hringing off a hatch, so I gave each one fifteen White Wyandotte chickens and they seem to be loosing them from the same eause. Those with the hens have free range on a forty-five acre farm, plenty of water and clean coops. I feed nothing hut cracked corn and wheat. They are well protected from dampness and the weather.

What is the cause of this state of affairs? It is the only difficulty, which it seems impossible to overcome. I have given them ginger, red pepper, also recipe given in the June A. P. J., and tincture of iron, but it did not seem to check it or prevent it.

What is your opinion of chicks hatched this time of the year?

Do you think it too late to have good results in raising them?

What is the hest time to hatch?

Do you consider pure breeds, such as White Wyandottes, more delicate than Mongrels or harder to raise?

Which branch of the poultry industry do you consider the hest for financial results, raising pure breeds for market purposes or for exhihition purposes?

Do you think that there is really a demand in any line that exceeds largely the supply? I do not mean some certain strain or a few that some specialty breeder has with a big name, hut of the ordinary pure hred fowls and eggs. I love poultry and devote all my time to it and am willing to remain at it, provided I can get as much for my lahor and time as I can in any other legitimate business.

What do you say in regard to this matter?

What line would you advise a young man to follow so as to ohtain good results? *W. W. T.*

*Westtown, Pa.*

There is nothing strange about the fact that only 90 of the Wyandotte eggs and 140 of the eggs from the mongrel hens produced chicks. This difference of 50 is liable to occur most any time from two hatches under apparently the same conditions. Your eggs from the mongrel hens should have produced a larger number of chicks, because they had the advantage of not having been shipped. Shipping eggs always lessens their chances of hatching.

There is something wrong in your method of feeding, but we are unable to say just what it is, bccause you do not inform us just how and when you feed and in fact do not state whether you have a regular time or system for feeding.

It is also possible that your chicks are affected hy the extreme heat.

You do not say whether or not they are free from lice. If you have not taken the precautions against this trou-

ble it, undoubtedly, exists and aggravates the other difficulties. Chicks hatched at this season of the year require a great deal of extra care and attention and unless one is especially prepared to take care of them, it doesn't pay to hatch them.

You should have plenty of shade for them and an abundant supply of cool water. The natural hatching season is during March, April and May.

Mongrels are no hardier than pure bred fowls. This has been conclusively proven time and time again.

In reply to your question as to which branch of the industry is best for financial results, it depends entirely upon the man. Any one who can raise birds successfully can make a market plant profitable. There is not as much money in this branch of the business as there is in breeding birds for exhibition purposes, but to make a success of the latter branch, requires a man fitted for the former and in addition he must have a certain amount of business ability. We would advise you to go into the business with the intention of making a success of it, raising poultry and eggs for market and work into the fancy by degrees. The demand for high quality must assuredly exceed the supply, but it is also true that many birds go to the butcher's block which under some circumstances could be sold for long prices. The demand will not exceed the supply with you, unless buyers know that you have the birds and you will have to prove this fact to them.

We have seen breeders' yards full of really high grade specimens and they were unable to sell them at more than market prices. If you will take your birds to a poultry show and win with them and not be afraid of advertising the fact, you could get in the same position as the specialty breeder, to whom you refer. You will be successful in just such degree as you approach this condition. There is plenty of room at the top.

*Editor American Poultry Journal.*

DEAR SIR: I wish to keep fowls for two purposes—eggs and table use. Should I keep an all purpose fowl, which will fill both places, or should I keep two breeds; if so, what kind?

What should I feed and how much and how often should it be fed to fifty chickens from the time they are hatched to the time they are sold as broilers?

How old are chickens when classed as broilers and what is the usual weight alive?

What is the difference between treatment for table use and for laying and breeding?

Are females classed as pullets until they are one year old?

How should broilers be dressed and packed for the Boston market?

Should I breed Standard bred birds for my purpose or cross them for weight?

What would be the best cross?

Which should I use, single or double mating or the line breeding system?

What and how much should yarded hens be fed to produce the largest number of eggs in the winter; also in the summer?

How long should a male bird be kept?

What shall we do with him in the summer?

How often should hens lay?

How much run should fifty brooder chickens have?

In what month should chicks be hatched for broilers?

I should also like some advice about my hens. The most of them sit curled up all day, except when I feed them. Then they bustle around as lively as can be, only to dump up and go to sleep after eating. They are fed twice a day a feed of one-half meal and one-half shorts, or all shorts, wet up in the morning, and oats, wheat and corn at night. Am getting two or three eggs per day from twenty-four hens. One of my birds has been moping around and upon examination I find the left side of her head, around the eye, swollen to twice the natural size. It appeared to be sore and running a little and the eye was finally hid from view by the swelling. The bird did not get better and was killed. As long as she could see, she ate quite well.

Can you tell me what is the matter?

Another one is moping around with comb discolored and half of her neck next to her body seems to be stiff and drawn around one side. I thank you in advance for your kindness in answering these questions. *Mrs. C. L. G.*

*Bethel, Me.*

We would advise you to keep one breed, preferably Plymouth Rocks or Wyandottes, any variety.

We cannot suggest any specified amount of food nor say just how often it should be fed. The chickens themselves govern this. They should be fed what is necessary to keep them growing nicely. Feed a variety of food, including various grains, some kind of animal food, consisting of meat or green bone, provided they do not have range where they can pick up bugs or insects.

Chickens are classed as broilers at from one to three months of age. The usual weight alive is from 1½ to 3 pounds.

The difference in treatment of chicks for table use and those for laying and breeding is that the former should be forced to the highest notch and be fed fattening food. Laying and breeding birds should be fed more with a view to future health and constitution.

Females are pullets until a year old.

Broilers for the Boston market should be clean picked and shipped with heads and legs on and drawn. It would be better for you to consult the dealer to whom you would ship your birds, relative to this matter.

We would advise you to breed Standard-bred birds, not necessarily exhibition specimens, but at least a good grade of culls. There is nothing to be gained by crossing. In raising for market you need not give the question of single or double mating or even line breeding any thought whatever, except in so far as line breeding applies to the production of a strain of layers. The answer above, in regard to feed, applies to your question relative to hens, as much so as to chicks. Experiment with your birds and find which ration produces the best results.

A male bird should be kept as long as a reasonahle percentage of the eggs from his pen are fertile.

In the summer the male birds should be separated from the females and placed upon range, if possible. Good hens should lay an average of twenty eggs per month during about six months of the year.

A laying hen should be kept as long as she can produce enough eggs to make her profitable and the time varies with different individuals. It is usually good policy to dispose of hens after their second laying year.

Fifty brooder chicks when first turned out from the brooder will get along nicely in a run 10x10 feet. This space should be increased as they get older. The aim should be to avoid any of the bad effects of overcrowding.

Chicks for broilers should be hatched in December, January and February.

Relative to the trouble with your old fowls, will say that most of the difficulty is perhaps in the food and the quantity given. You should give them something besides grain and mash food composed of ground grain. Give them a variety of food and include in it a liberal quantity of green food. The best thing you can do with them now is to give them each day about one-half what they should naturally have, in order to get them good and hungry and make them scratch and thereby get needful exercise.

The bird with a swollen head may have had an aggravated cold or it may have developed into roup. The information you give is not sufficient for us to say positively.

We are unable to say what the trouble is with the bird with a twisted neck. If we were fully acquainted with the surroundings in which the birds were kept we could, undoubtedly, give you some information of value.

# Wyandotte Sale New York Winners.

We offer 200 of our Golden and White Wyandottes at greatly reduced prices for the next 60 days. These are right out of our this years breeding pens, and such a rare chance is seldom offered. These include many of our New York winners and many other winners, every bird a fine one. Don't miss this. Eggs the balance of the season from our fine matings $1.50 per sittiug straight. We have a lot of fine Belgian Hares, all imported stock, at very low prices. Large circular.

**IRA C. KELLER, Box 75, Prospect, Ohio.**

**THE LIFE OF THE INCUBATOR CHICK** depends upon the care given after it leaves the incuhator. It is therefore necessary that you use a first-class brooder. You get this in the **WABASH BROODER**, simple in construction, built on honor, and will rear to a healthy maturity a greater portion of chicks than any other brooder made. Zero weather, a snow or thunder storm will not interfere with the healthy growth of your chicks if you use a **WABASH** brooder.

This Brooder is sold under a positive guarantee to be the equal of any made, and if it is not as represented in every respect your money will be refunded. Price $7.00.

**G. C. FLEGEL, Westville, Ind.**

# ROUP. COLDS. ROUP.

**AMERICAN ROUP CURE** is the cheapest and best cure for colds, roup and canker in fowls or pigeons. Simply put it in the drinking water, and they take their own medicine. One box makes 20 gallons of medicine. If it fails to cure we refund the money. Price, 25c per box postpaid. **FOR, CHOLERA, DIARRHŒA and all BOWEL DISEASES,** the American Chickeu Cholera Cure will effect a speedy cnre. Price 25c per box, postpaid. Keep these two excellent remedies constautly on hand for immediate use, and you will not lose a bird. Please do not send stamps.

**AMERICAN POULTRY REMEDY CO., Dept. B, 48 Cortlandt st., New York City.**

# White Wyandottes.

**Breeding Stock For Sale at All Times.**

Some excellent last year's breeders for sale now, not for a dollar apiece, for I do not keep that kind, but low, quality considered. Write for my illustrated circular.

**F. C. WILCOX, Prop.,**
**Hickory Grove Place, Joliet, Ill.**

# Every Poultry Raiser

well knows the destructiveness of lice and the difficulty of getting rid of them. Picking, dusting, powdering and dipping are not sufficient; the **WARY LOUSE** and the **NIT** escape.

Our Peerless Poultry and Animal Fumigator will, with a single treatment, kill

**EVERY LOUSE, FLEA, MITE and INSECT and destroy EVERY NIT.**

A great profit increaser. Worth many times its cost. Perfectly safe. Easily operated. Lasts a lifetime.

**B. CODDINGTON & CO., Berea, Ky.**

# White Wyandottes.

Miller's White Wyandottes are bred for utility as well as fancy points. They are shapely and large, healthy and vigorous, good foragers and good layers. Their show record is unexcelled. We can please you in quality and price.

**MILLER BROS., Box 15, Nashville, Ind.**

# Greene's White Rocks

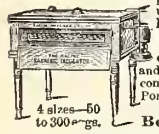
RACINE INCUBATORS hatch strong, healthy chicks. They are simple and easy to understand and operate, regulate and ventilate themselves, low priced, have all the latest improvements and are



GUARANTEED TO SATISFY or money refunded. We also make indoor and outdoor brooders and equip poultry plants complete. Send 2c stamp for catalog, "Poultry Pointers." It is full of poultry information.
4 sizes—50 to 300 eggs. RACINE HATCHER CO., Box 26, Racine, Wis.

"Poultry for Profit"

is the title of our new year book. It probably gives more exact information drawn from actual experience than any book of its size now issued. Tells all about how to breed, grow, feed and market fowls of all kinds. Tells incidentally all about the Famous Millhook Poultry Farm, the largest pure bred poultry establishment in the country. Finely illustrated with cuts from life. Mailed anywhere for 10c. Send for a copy and be entertained and informed.
THE J. W. MILLER CO., Box 444 Freeport, Ill.

## *Nuggets! Nuggets! Nuggets!*

The greatest prize-winning strain of Buff Plymouth Rocks in the world. Their record is sufficient proof. Stock from our yards won highest honors at the largest shows in America past season in hands of customers. Our matings produced the best lot of young birds we have ever seen. We have them up in size, fit to win in hot company. If you are looking for prize winners for the early shows, remember we never exhibit, so are not afraid to sell good stuff.

**W. H. OVERBAUGH, Hanover, Pa.**
***Successor to H. S. BURDICK.***

## Want to Win on Silver Wyandottes NEXT SEASON?

You can do it by sending me your order now for eggs from my prize winners. They are line bred and the eggs will not disappoint you. I have won more prizes during the last four years at the Illinois State, Indiana State and Chicago shows than any Wyandotte breeder in the country. My birds score as high as 94 by prominent judges. I have a phenomenal English cock bird mated to some elegant open laced pullets, and expect grand results from this mating. Eggs $3 per 15; $5 per 30. Mention A. P. J.

**MRS. GEO. M. HANLEY, Hoopeston, Ill.**

## When In Doubt

feed meat. This rule has been adopted by wise and experienced poultrymen everywhere. **Chickens Need Meat.** Authorities differ about other things but they all agree on this point. The **easiest, cheapest, most satisfactory** way to get meat is to buy

## DARLING'S Pure Poultry Foods.

They are not like other so-called poultry foods, but are meat. They give more eggs, the eggs are more fertile and hatch better; chicks and broilers grow faster and pullets mature and lay earlier when fed our meat foods. Send your name on a postal card for a copy of our booklet, "Fill the Egg Basket." It can't help paying you. Address,

**DARLING & COMPANY,**
**Dept. C, Union Stock Yards, CHICAGO, ILL.**

## RICE'S LICE PAINT

Rice's Lice Paint is a wholesale Lice and Vermin Destroyer. Saves Time, Saves Expense, Saves Labor. No Dipping. No Dusting. No Greasing. Does not injure the fowls or mar the plumage in the slightest. Quickly applied and absolutely certain to kill every species of parasite that prey upon poultry.

## THE ORIGINAL AND ONLY LIQUID LICE KILLER

that is always uniform in strength and that does not deteriorate with age. Sold under a guarantee to kill all lice on **Poultry, Live Stock and House Plants.** Easily applied by brush or spray pump. Send for circulars. Agents wanted.

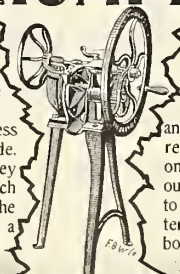
ONLY EXCLUSIVE MAIL ORDER DRUG HOUSE.

**Heller Chemical Co. Dept. C', Chicago, Ills.**

## THE HUMPHREY

**The Best Bone Cutter is the one you like best.**

The Humphrey is sold on a positive guarantee to cut more bone, in better condition, in less time and with less labor than any other bone cutter made. If it doesn't do it, you get your money back. Try it for yourself and judge which machine you like the best. That's the only way. It beats the world as a vegetable or kraut cutter. It will pay for itself in six months.



**Why the Humphrey is Displacing others.**

It has an open hopper—you don't have to chop the bone to pieces with an axe. You turn it with one hand and regulate the feed with the other. It has only three working parts—nothing to get out of order. It turns easier and is easier to keep clean. It produces bone in better shape for the fowls. Send for free book and egg record blanks for a year—the handsomest book of the season

**Humphrey & Sons,**

# AN INTERESTING STORY.

## One Man's Successes and Failures, Told in a Plain and Comprehensive Manner. The humorous Side of the Question Brought Out and Facts and Figures Given that Make Mighty Attractive Reading.

By J. W. MORSE.

PART I.

SOON after our marriage my wife brought home a copy of the November, 1872, *Poultry World*, which she had borrowed from a neighbor upon whom she had been calling. It contained a picture and description of a trio of Single Comb White Leghorns.

Well I remember how we admired that picture and longed to be the owners of some fowls just like them, and how anxiously we read and re-read those pages, especially the advertisements, finally selecting two who advertised the very best, and what we thought strange at the time was both claimed to have won first prize at a previous Boston poultry show on trios of chicks.

We were young and inexperienced and did not understand the tricks of the trade, and those first premiums puzzled us. Many an anxious conversation we held over the question, "How can two breeders of White Leghorns both win first prize on trios at the same show?" but we had never been to but two poultry shows and we gave it up as too hard a nut for us to crack.

Finally we concluded to write to both and the letters were written and mailed, and then it was my task to watch the postoffice. We were young and not wealthy then and Uncle Sam was not bothered much with mail for us, for our relatives were few and far off, but after four days of watching and not very patient waiting Uncle Sam brought the precious letter and I hurried home with it, and how our hopes and hearts fell when, upon reading it, we found that Mr. Smith wanted $15.00 for a trio of his best breeders. Fifteen dollars! when I was only earning $12.00 per week! Just think of it!

THE QUESTION OF PRICE.

After much reading and discussing that letter we finally concluded to wait for an answer to the other letter. It came the next day and we found that Mr. Lewis would be pleased to sell us a first class trio of his prize winners, warranted to win anywhere, for $6.00. We further found that Mr. Lewis owned and bred the very best White Leghorns in America, line bred from the original importation, and that they never had been beaten.

To me that was certainly conclusive to my mind that Mr. Smith was a robber and a fraud and he should not get any of my money. If he had baited me for a sucker he should find his mistake, yes sir.

But I noticed that my wife was silent and thoughtful and that she went and got Mr. Smith's letter and seemed to be studying the letters and comparing them. She said nothing that night, but the next morning she informed me that she would purchase the trio of White Leghorns if I would furnish feed for them and a house for them and give her all she could make on them. I agreed, and then she informed me that she would send for the $15.00 trio, and then I went up in the air.

I said a lot of mean things. Then I told her it was foolish giving $15.00 for three chickens when she could get just as good for $6.00. Just like a woman; showed how much she knew about buying fancy stock, extravagant and so, but she was firm.

Then I asked her how she proposed to get the $15.00, and she informed me that she would borrow it from a neighbor and pay in work herself. Then I went up in the air again, but it was no use. She had her way, and the next Monday the $15 was sent in a registered letter, and in about four days the birds came in a light, neat crate. I carried them home, but I felt sulky, the thought of that $6 trio rankled in my breast. The express charges were 85 cents, making $15.85 the trio cost. It seemed outrageous robbery and I felt that my wife had made a fool of herself; $6 seemed to me big money for three fowls. I had yet to learn that it takes time, money, patience, study and skill to produce such fine stock, and fine they certainly were. I had yet to learn that the best is never too good to breed from. My wife was right, I was wrong. Today I would not take as a gift cheap stock to breed from, as it always proves dear in the end.

I took the birds home and took them out of the crate by lamp light, as it was evening, and we examined them. They were certainly very fine specimens of a very handsome variety, with their fine combs, snow white plumage, bright yellow legs, red eyes, white ear lobes, they had an aristocratic look from head to tail and I knew at once, even ignorant as I then was, that the birds were worth the money, and in my heart I felt it.

HOUSING AND INCREASED FLOCKS.

We fed and watered them by lamplight and it was quite late when we took them out to the nice coop I had built for them out of two large dry good boxes. It had a good sized window in it—quite a cozy home for three birds. Bright and early the next morning we were up to see our white beauties. We fed, watered and admired them and my wife suggested that as it would soon be winter I had better get some lumber and enlarge the coop. This I did, building a house 10x10, shed roof 6 foot front 4 foot back, with a good sized window in the south side, and this with the house made of dry goods boxes made a very nice place for them.

When it was all complete my wife suggested that I should purchase ten common fowls (pullets), which I did, paying $5 for them. They were, as I remember, all sizes and colors; some had rose and some single combs, some had clean yellow, some clean black legs, and there were some that had feathers on their legs. No two looked alike. They formed quite a contrast to our White Leghorns.

This made a flock of twelve pullets and a cockerel and we felt quite proud of them. I remember I asked my wife how she would pick out the Leghorn eggs and she said she would watch them, and sure enough she did, and she did not make a single mistake during the season that followed.

The snow did not come until about January 10, and our biddies had their liberty up to the time the snow came.

POULTRY LITERATURE INTERESTING.

About this time I sent in my subscription to the *Poultry World*. I also purchased a copy of the American Standard of Excellence, it was then called, and a book written by Lewis Wright, an English writer on poultry,

and I think that the *Poultry World* and those books kept me at home during the long winter evenings of 1873. They certainly furnished much pleasure and instruction for both wife and I.

We spent that winter counting the number of chickens we would raise and the money we would make on them; building castles in the air; but that was certainly better than for me to spend my evenings elsewhere, leaving my wife alone at home and it certainly cost less. Those were happy days, and although I have bought a great many fancy fowls since then I don't think I have ever taken the comfort with them that I did with those White Leghorns.

They commenced to lay in February, about the first. I was away every day about my work and the whole care of the poultry fell to my wife, and she managed them. From November to April 30 I paid for feed just $3.22. She fed them scraps from our table and they furnished all the eggs we used in the family, besides selling about $8 worth to neighbors and not counting the Leghorn eggs which we saved to set. About the middle of February I think we had saved a setting of thirteen eggs and I hired a team and started out to find a setting hen. I rode about nine miles and bought one, paying 75 cents for her, only to find upon reaching home that she would not set. I finally found one which cost me 75 cents more, making the whole cost of team and two hens $2.50; but in those days there were no incubators or brooders and hens that wanted babies were scarce, and most any old dunghill that wanted to set would bring from 75 cents to $1 in February.

OPENING OF THE HATCHING SEASON.

The last hen bought proved a good setter and in due time brought out seven little white beauties. How we admired them. My wife fed them on stale bread crumbs and cracked wheat until they were about a week old, then she fed them on Johnny cake made in this way: One cup of flour, two cups of Indian meal, teaspoonful of baking soda, one-half cup of molasses, one-fourth cup of meat chopped fine, salted to taste and baked brown in the oven. We gave them a cabbage to pick and sand and gravel to dig in and I fixed a nice place in the dry goods boxes for hen and chickens. My wife fed and watered them six times a day and they grew rapidly, and by April they were feathering nicely.

During the winter my wife would put the Leghorns in a box every night and throw a blanket over it to keep their combs from freezing and during the long cold winter their combs were not even touched by the frost. She learned this trick from the *Poultry World*.

About April 1 we let the hen run out with her babies and one of our neighbor's cats fell in love with them and caught two and ate them. That cat died from the effects of a gunshot wound in the hands of some unknown person. This left us five and we mourned the loss of those two, the hen not seeming to care and my wife wondered how she could be so heartless.

I bought beef bones and pounded them up with an ax until one day I pounded my finger, then I threw down bones and ax and went on a strike against pounding up bones, and my wife told me I had better go in the house and leave the chickens alone if I could not get along without swearing. I obeyed her to the letter. There were no bone cutters in those days.

A. A. FENN, Delavan, Wis.,
One of Wisconsin's successful fanciers in breeding, raising and showing Game and Ornamental Bantam varieties.

RESULTS OF BUYING GOOD STOCK

About this time a stranger, who represented himself as being an expert in the chicken business, called on us, remarking that he had heard that we had some very nice chickens and he asked to see them. We were always proud to show them, and after he had looked them over critically he wanted us to set a price on the cockerel, two pullets and five youngsters, which we refused to do and never shall I forget the look of triumph my wife gave me when, before leaving, he offered us $20 spot cash for the trio and five chickens, and when we refused, asked us to set a price on them. My wife felt then that her judgment in buying the $15 trio was vindicated, as I had plagued her some about the price she paid and told her that the $6 trio would have been just as good. After that I maintained a becoming silence on the cost of those birds, for if we had sold them we had a setting of eggs under a hen which hatched ten chicks and we would have still retained the breed.

We set every good shaped egg those pullets laid and they laid very few that were not fit to set. Commencing in February we set every good egg until July 1 and the result just one year from the purchase of the stock was sixty-four fine Leghorn chicks, forty one pullets, twenty-three cockerels. We lost a few chicks and a few eggs did not hatch.

A GOOD SHOWING.

On January 1, 1874, fourteen months after we started, the account stood:

| | |
|---|---|
| Expenditures— | |
| One trio single comb White Leghorns and express charges | $ 15.85 |
| Ten common dunghill pullets | 5.00 |
| Feed | 19.30 |
| Buildings | 23.40 |
| Five setting hens | 3.75 |
| Hiring a team to look up setters | 2.00 |
| Advertising in *Poultry World* | 9.40 |
| Total | $ 78.70 |
| Receipts— | |
| Eggs sold to neighbors for table | $ 8.00 |
| Sold 15 common dunghill fowls to butcher | 7.50 |
| Sold 21 White Leghorn cockerels for breeders | 53.00 |
| Sold 21 White Leghorn pullets for breeders | 53.00 |
| Sold one old White Leghorn cock and two hens | 10.00 |
| Total | $131.50 |

It will be seen that the above figures give the handsome balance in my wife's favor of $53.80, but those figures don't tell the whole story, for it must be remembered that I was to feed and furnish the buildings, this being the agreement

Building owned by the A. A. Fenn Company, Burlington, Wis., used exclusively for the breeding of their Game and Ornamental Bantam varieties. Those of our readers who are in need of stock of this kind will find this firm thoroughly reliable. They have 300 fowls now ready for shipment.

made between my wife and I at the start, and she was to furnish the labor, which I could not do because I was working in the shop and had not the time. Deducting the $23.40 for buildings and the $19.30 which I paid for feed and adding these amounts to the $53.80 would make $96.50, and that is just the amount my wife really made; nor was I any out of pocket for I had the buildings and my wife had furnished the table with all the eggs we used and had clothed herself. She had not called on me for one cent of money during the whole time and she paid for the common fowls and the setters, all the stock in fact, leaving me just the buildings and feed to pay for, but she fed them all the scraps from the table and they had unlimited range which helped me wonderfully on the feed bill and she had two fine white Leghorn cockerels and twenty pullets worth just what we could sell them for which was $35, as we were offered just that sum for them.

REPUTATION COUNTS IN PRICES.

We commenced the first of January, 1874, with 20 nice pullets and 2 cockerels fully as good as the original trio and worth just as much, fowl for fowl, I think, only we did not have the confidence to ask it. We had not the reputation and I have found that reputation counts when one wants a long price. I have since then sold birds for more than we paid for that whole trio and I have paid more for one single bird but I will tell you about that later.

January, 1874, found me with the chicken fever bad and I reasoned that as we had done so well with a few of one variety that we could do much better with several varieties, so I built a hen house that winter 50x16 with sixteen good sized windows in it, pitch roof and divided it into six apartments with laths, as I knew nothing about poultry wire. I don't think there was any poultry wire in 1874. I built six yards. I gave the inside two good coats of white wash. The yards were built of laths.

A COMMON MISTAKE.

When it was all complete I purchased from one man 1 trio single comb brown Legborn, 1 trio Houdans, 1 trio Light and 1 trio Dark Brahmas, 1 trio Partridge Cochins, and I trio American Dominiques. We now had seven varieties of fowls and looking back now I can laugh at my over-confidence and foolishness. We were not content to let well enough alone. My first mistake was in buying cheap stock. I paid $18 for the eighteen fowls, and they were not a nice, bright, clean lot like the White Legborns we had purchased in 1872, and we soon had to commence doctoring them.

It must not be understood that I claim that all high priced stock is good stock, for I do not. All depends on the breeder. Unfortunately there are rogues in the poultry business just as there is in all business, and there are honest men in the poultry business. On the whole I think breeders of fancy fowls will compare well with men in any other line of business.

With seven varieties our troubles were to begin in dead earnest, and I was to learn that a man to succeed in breeding poultry must put brains, labor and patience right into it, and the greatest foe of the poultry man is neglect. He cannot neglect his business. If he does, it will neglect him to his sorrow.

*(To be continued.)*

# American Breeds.

## The Wyandottes. The Jersey Blues, Rhode Island Reds. What they Might be.

By T. F. McGREW.

THE original or now-called Silver Laced Wyandotte had the advantage of the hour on their side, they had the beautiful head and comb that is still their individual or family emblem, they had the most complete market fowl qualities of the time, they are prolific layers aud in almost every way they filled the demand of the fancy and utility breeder, but for some unknown cause they have been neglected for many years. Once again their standing is in the balance. A club has been formed in their favor. Shall their future be what it can and should be, or will it lag and fall behind even their present position?

We have everything needed in the line of poultry. We have beauty, elegance and grand egg producers. We have fowls that lay fully as many eggs as the Wyandotte and of larger size, but we have not got a better market fowl than they. In two ways they can be advanced to public favor. One of these will attract the financier, the other gain them prestige among market poultry men, the latter will come when they are inclined to lay a larger size egg, the love of the fancy for them will come when they are guided into clearer and better color and markings. The clear, clean silvery white top color of the male must come, and it must be freed from the dark or black shading of today; the entire plumage of female and body plumage of male to be what is called open laced, and it should be very full and open. We know full well the objections to this that will come from very prominent admirers of the breed, but no matter as to this, if the Silver Laced Wyandotte is allowed to remain as it is they may hold their own, but not advance. They must be clothed in more attractive plumage or they cannot gain popularity in the show room.

The Silver and Golden-laced Wyandottes stand silently by and allow the family to develop around them and outstrip them as they look quietly on. They are the original of the family, they are quite as handsome as the new, for size and vigor and egg yield it is claimed they can outdo the whites, but no matter as to this, the whites have gone so far ahead in the race for popularity that there is no comparison. Those who breed and exhibit the Silver and Golden-laced will scarcely exceed twenty-five in the states. The result of lost energy and opportunity on the part of those who breed them, if guided into clear, rich colors with grand full open lacing, the edging of which should be narrow and rich glossy black in color we would have a fowl that could be made very popular if the public was fully apprised of their real value and beauty.

If we are to have the small narrow stripe of white to count as a white center, why not accept the blacks and be content? Better turn our attention from the Golden-laced and adopt the Buff rather than have the three-quarter black specimens with spots of bay; the narrow open lacing of the Sebright should be the adopted style of plumage, clean cut lines and centers should be the demanded markings, under color should be made subservient to proper surface color, male birds should have clear clean top color, hackle and saddle properly and richly striped. In this manner can be fashioned within the demand of our standard beautiful fowls that would gain great popularity.

Bunch of Light Brahma cockerels, including first prize cockerel at Wisconsin State Poultry Show, 1901. Bred by Charles E. Pond, Light Brahma Specialist, Westfield, Wisconsin.

The style of color and markings of the Silver and Gold-laced as seen, are entirely too well known to demand comment. The fact is also well distributed that there are few of them shown. Quality, numbers and popularity have all gone backward under the unusual influence put forth in favor of others, to counteract which the changes above mentioned if followed and aided by a consolidated effort might work a wonderful change in their favor.

THE WHITE WYANDOTTE.

The natural offspring of the Silver-laced, they began with good form and Wyandotte qualities, they have been most successfully handled into wonderful popularity without the disadvantages of a boom. No other fowl has ever gained so fast as they. They outnumber all other

varieties at our exhibitions and fairs. A greater number of fanciers are interested in them than in almost any other bird. They are today the top-notch fancy fowl of our large exhibitions, a distinction they have gained through the indomitable will of those who breed and exhibit them. At this time they have gone their full length of popularity. The future of the breed depends upon the ability of those who handle them to breed them to better and truer breed characteristics.

We have by far too many types that are admitted as correct, if we accept as proof the high scores that have been given specimens that differ materially in shape. Either one thing or the other must be accepted as the true type and adhered to, or the days of their great popularity are numbered.

WYANDOTTE SHAPE.

Shape has been sadly neglected in White Wyandottes. The Silver Wyandotte always had the better shape. They have today by far better Wyandotte form in every way as per the standard, than is to be found in any of our Wyandottes. We saw at Cleveland last winter two or three hundred of them that were kept for market purposes, color and markings very bad, but their Wyandotte shape put to shame many displays we passed judgment upon during the winter. We dwell so strongly on this point for the purpose of showing what fine forms the White Wyandottes should have by inheritance. The first of them shown had better and truer shape than is seen in the greater portion of them today.

There are a few sections in shape that the first time amateur cannot fail in understanding. We parallel them with the same sections in Plymouth Rock for your study:

| *Back of Plymouth Rock Male.* | *Back of Wyandotte Male.* |
|---|---|
| Broad, of medium length, and rising with a slight concave sweep to the tail, saddle feathers of medium length and abundant. | Short, broad and flat at shoulders, saddle broad, full and rising with a concave sweep to the tail. |

The difference here is very plain. The one has the medium length of back, the other short. One simply rises with a slight concave sweep to the tail, the other, broad and full in addition to the concave sweep to the tail.

The back of the Plymouth Rock female is described the same as in the male, while the back of the Wyandotte female is short, broad and flat at the shoulders, slightly cushioned, plumage abundant. This plainly describes the Plymouth Rock back as fashioned after the Brahma, while the Wyandotte is short and cushioned after the fashion of the Cochin. This should be plain to all when comparing the score cards of each for cuts on shape, study these points well and demand their fulfillment.

| *Body and Fluff Plymouth Rocks.* | *Body and Fluff Wyandottes.* |
|---|---|
| Body of medium length, broad, deep, full, compact, keel-bone of medium length, straight and extended well forward. Fluff *moderately* full. | Body short, deep and well rounded. Fluff full feathered and well rounded. |

To our notion the body of the Plymouth Rock cannot be broad, deep and full, and at the same time be compact. We should favor striking the word compact from the description. It is also plainly shown in this section that the Wyandotte should be full feathered in fluff, while the Plymouth Rocks are not. If the standard demands in these two sections alone were lived up to by both judges and breeders both birds would be benefited, and the distinction between the two would be marked.

Again, the tail formation of females can be guided to largely add to the beauty of each. In the Plymouth Rock female the tail is only fairly well spread, while in the Wyandotte it is *well* spread *at base.* This spread at the base helps to fill out about the point of the wing and adds to the beauty of the slight cushion of the back, while on the Plymouth Rock the tail is simply spread slightly that allows it to gather into graceful proportions as it ends the concave sweep of back without any apparent break in same. Any man, woman or child can grasp these conditions and fully understand their intent after a few moments' consideration. This being the fact why do we continue the farce of deceiving ourselves at home and in the exhibition room?

Now just a few words more against the bad shape of the solid colored Wyandottes. In this respect the whites are the most to be censured, for in fact as a rule the buffs and blacks average better in shape than the whites. We have seen single comb specimens raised from eggs laid by Wyandottes win prizes as Plymouth Rocks. You can say if you wish that all the difference between the White Plymouth Rock and the White Wyandottes is the combs. If true, they are not up to the Standard demand for shape, but so soon as we begin to demand that the same attention is paid to form as is now given to color, neither judge nor breeder will permit of the same shape in both.

THE BUFF WYANDOTTE.

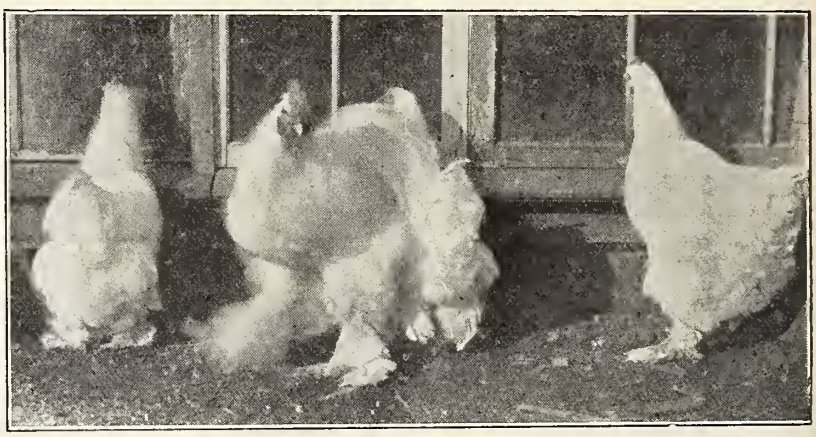
Shape has had more consideration in the handling of the buff variety for a few years past than size. There is a tendency toward undersize in females. This should be changed. We spoke fully of this when writing of Buff Plymouth Rocks in the last issue of the JOURNAL. The same will apply to the Buff Wyandottes. Keep up the size of your females for in this way you will gradually gain size all along the line. Another feature of value should have consideration, that is the average size of eggs laid by all Wyandottes. The egg yield is fine, but the size of the eggs are rather smaller than they should naturally produce, a fault that can be improved as you increase the frame of the fowl.

We unfortunately reckon size by the scales, and not by frame proportions. A small chunk of a hen if hog fat and Standard weight or nearly so, will gain more credit in size consideration than will one whose frame is naturally one-half larger. If a few ounces under weight, many of these small undersized Wyandottes will take on fat readily and weigh full weight, while in reality they should be cut not less than two points for being too small. Such small framed females naturally lay small eggs and produce small offspring. The remedy for both the above mentioned evils is increased size of the females.

The same rule for color in Buff Wyandottes will hold good as laid down last month for Buff Plymouth Rocks. Color conditions are the same in all fowls, and the same rule for mating will apply for all. Having mentioned fully the rule for both white and buff in our last article, shall not say more of them at this time, but refer you to the former issue of this JOURNAL.

THE BLACK WYANDOTTE.

We have seen the past two winters some Black Wyandottes that could stand as models for the breed. Their shape is superb and the color as rich and glossy as a Hamburg. The allowing of the black shanks upon them has aided in the improving of their color. All black fowls should have the proper shade of shank to conform to nature's demand. If the Black Leghorns might have black shanks they would soon take the middle position between the Long Shank Minorcas. We have spent many years contending for small meanings and applications of the Standard. Our conduct to ourselves has been so small and contracted as to confine our own chance to improve our stock. More attention by far has been given in searching for a hidden defect, or in quibbling over a sectional difference, than has been given to widening the standard for possible improvement. Why not step out boldly for better things, and not hold out against improvement.



WHITE COCHINS.
Bred and owned by F. T. Franklin, Urbana, Ill.

THE JERSEY BLUE.

The Jersey Blue and the Andalusian should be worked side by side, the one as the blue laced general purpose fowl, the other, as the largest and best proportioned Mediterranean. Now, don't allow

tbe Minorca fancier to grow angry at this, for the facts are the Andalusians average with the Black Minorcas in size. They equal them in egg grade, and have the advantage in head points, not being over-balanced by the over large combs. These two blue fowls are both marked and colored alike, or rather they should be. If both or either had behind them tbe pusb and vigor of those who have pushed to the front the Rhode Island Reds, two better breeds would be gaining in public favor than the one tbat has gained at the hands of the Rhode Island Red Club.

The Jersey Blue is a fine large fowl. Very strong and prolific, they are a splendid farm fowl, and their eggs are of good size, strong and firm in shell, fine in flavor, and they are good market poultry. For a novelty if pushed they have much to recommend them. They breed quite as true as does the Andalusian. If handled with care they would make a most attractive line for the exhibition. If pushed for their own worth, they would quickly prove their higb qualities above others that have gained much notoriety through the lauding of their improved qualities.

LIGHT BRAHMA COCKEREL.
(Hatched July 3, 1900.) Bred and owned by U. Grant Davidson, Manson, Ia., originator of the "Great American Strain."

THE RHODE ISLAND REDS.

This breed can claim title to whatever position they hold by virtue of the push of the club that fosters them. Tbeir career is, like that of the rocket, they went up with a boom and have now settled back to earth where they must stand or fall under their own future standard of merit. Why anyone should claim unusual qualities for the Rhode Island Reds has always been a wonder to me. They are no better egg producers than any of the American varieties. Their eggs are not so large as those of the Plymouth Rocks. All manner of kinds and colors and styles of combs will come from a single mating. They have neither set, form nor color among them, and their own most ardent admirers dispute one with the other on matters of what they call Standard qualities.

In the face of all this, there are possibilities of a great breed amongst them. Just as soon as the Rhode Island Red Club recovers from its vain attempt to push them as competitors for the position so well filled by the Plymouth Rock and tbe Wyandotte, and choose from among them all those that have the distinguishing feature of the Pea Comb, and select them as the one true Rhode Island Red, and demand the striping in hackle of both male and female, hold to the strong, rich red for males and the snuff-brown for females, they will have gained a position entirely their own, from which they can reach out upon a new and distinct type.

We know full well that the Pea-Comb has been refused admission to the position of a variety in the camp of Rhode Island Reds. We also know that unless some unusual assistance is given by the unseen power that the breed will soon fall by the wayside. Having seen them in flocks, pens and pairs, having seen hundreds of the small chicks and the growing fowls, having seen thousands of their eggs and market stalls full of them as dressed poultry, we willingly concede to them the title of good farm stock for market purposes, but no more. It will take years of care and close breeding to bring them to a position where they can be depended upon to reproduce ten per cent of good quality.

They have it in their power to take up the distinguishing feature of the Pea-Comb variety, and to clothe them in a style of marking and color that will be new and individual to the breed. There was a day when the best of them were sold as Buff Plymouth Rocks or Buff Wyandottes, as the style of the comb might be, but today the culls of either the Buff Plymouth Rocks or Wyandottes will pass muster for Rhode Island Reds. This being tbe case nothing but superior qualities on all lines will gain for them the position so much desired to be obtained. For these reasons we believe their salvation rests within the Pea-Combed variety that can, after years of care, be guided into an attractive fowl.

The Jersey Blues are fully their equal in every respect. They had an equal boom in early days, but those who took hold of them faltered in their completion. They attempted to make unwarranted profit from an unfinished fowl. This all went well so long as people would buy poor quality at paying prices to the seller, but the day soon comes with all breeds when quality counts for or against a breed, and when that day comes the buyer is the power and not the vendor.

In the hands of good painstaking breeders both the Jersey Blue and Rhode Island Reds can be trained into true breeding handsome fowls that will win their way into public favor and we hope and trust this may be, for there is plenty of room at the top, but each day finds the under quality less salable at any price above the per pound market price.

## Black Minorca Combs.

The breeders of Single Comb Black Minorcas seldom hear complaints against their favorite birds other than that of large combs and wattles. The color of plumage is no longer an objection, as it has been proven beyond question that the black fowls can be bred true to color more easily than those varieties of buff, white or mixed colors.

Their size cannot be considered an objection, they being the largest of the not-sitting breeds. Their skin and flesh being a light color and the body plump make them a desirable table fowl. It is a fact acknowledged by all poultrymen that the Black Minorca lays the largest and greatest number of eggs of any known variety, and now it only remains for the Minorca breeders to reduce the size of the combs and wattles to make them the ideal fowl. This can be done.

For six years I have been working along this line and find that I have had wonderful success. I have reduced the size of combs and wattles about one-fourth, retaining all the good points, size, shape, color and egg production. I would like to urge Minorca fanciers to try it. Select say, four pullets and a cockerel (good birds) having the smallest combs and wattles, and get as many youngsters from this mating next season as possible. Select from them a few of the very best, all points considered, especially small combs and wattles. Do this for a few years, and you will have a flock of Minorcas with comb no larger than we see on the Brown Leghorn.

*Rock Falls, Ill.* *E. C. Winters.*

The high scoring specimen which comes from a long line of meritorious ancestors is much more valuable tban the bird from a chance mating which happened to be good. The former can be depended upon to transmit his desirable features to a great degree, and the latter is wholly unreliable in this respect.

Scaly legs are an indication of filth and neglect. No painstaking breeder will allow his fowls to get in tbis plight. A mixture of equal parts of lard, coal oil and powdered sulphur applied daily will remedy the evil and restore the legs to a healthy condition.

# INCUBATORS.

## Practical Tests and Experiments, Bearing Upon the Moisture Problem. The Effects of Proper Ventilation.

By CHARLES M. BROWN.

A GREAT many incubator manufacturers, and operators as well, have long entertained the belief that eggs, during incubation, must be supplied with pans of water, or water admitted in some manner into the egg chamber, in order to warrant a large and healthy hatch.

The man who first invented the incubator, and many of his successors, must have associated artificial moisture with incubation, and the method seems to have been followed to the present day, so hard is it to break away from established customs.

I have studied and experimented with artificial incubation. To me it has been both interesting and fascinating. I do not claim to know it all, but I have learned many valuable lessons during my experiments. I have convinced myself that under ordinary climatic conditions throughout the various states no sort of moisture need be applied to an incubator at any period of the hatch.

I have two incubators of my own invention and manufacture. With them I have experimented side by side, and during various months, one with water pans and one without. I learned that the average of the one without was 90 per cent, and the other very much less. The difference in the chicks was marked. Those without moisture hatched rapidly, were wet and when dry fluffy and strong. The others hatched slowly, had to be helped out of the shell in part, were small, too wet and weak. The former raised well, the latter died off alarmingly. Such has been my experience with moisture and no-moisture.

Some claim the hen exudes moisture from the pores of her skin during incubation. It may be true; if so, it is so slight it cannot be detected. I do not bank much on the moisture furnished the eggs by the hen.

I figure out the problem from a different hypothesis. No one will deny that at all times, while the hen is sitting on her eggs, air reaches them even in a warmed state. In this air is moisture, unless the month is exceedingly dry. If dry, it will be a medium or poor hatch. It will be noticed, also, the hen will turn three or four eggs out of the nest if the weather is not too cold. Air reaches them that way. So we conclude that the egg under the hen is supplied with moisture from the air. If that be true the air, under ordinary climatic conditions, furnishes all the moisture the eggs need.

Reasoning from this condition of natural incubation I have applied it to artificial incubation, and with fine results. From my machines, without water pans, I hatch 90 per cent of all fertile eggs; In fact, I do not use water in any form during the hatch.

It is said, and it is true, that at pipping and hatching time, plenty of heat and moisture are needed. No more is needed than the hen and hatching chicks supply at such periods. The hen supplies the heat and the wet chicks the moisture. You will agree with me that such is the condition found in natural incubation. Why, then, is it necessary to introduce water, in any form, into an incubator at any time during incubation? No reason in the world why we should do so, therefore I do not do it, and the success I have attained without moisture proves my position to be correct. An average of 90 per cent through the hatching season without moisture cannot be equaled with it. If it cannot be equaled with it no-moisture machines are the best to operate. When chicks hatch under a hen they nearly all pip at same time and hatch rapidly, come out of shell strong and wet, and when dry are full size, fluffy and lively—a natural condition. I hatch my chicks, without moisture, in the same manner—they appear the same and raise well. But I close the door on the evening of the eighteenth day, that is the last time I open it until my judgment tells me all the chicks are out. Of course they will pant and appear to be warm, but they need heat to dry them off, so I let them alone, keeping the chamber dark. They will not stir around much in the darkness and disturb those hatching.

The secret of a good hatch at hatching time is to keep the door closed and plenty of heat. The chicks coming out of the shell wet furnishes those in the shell and pipping all the moisture necessary. Opening the door lets in cold air chilling those out and those pipping.

I have entered into these details to establish the fact that no artificial moisture is needed at hatching time; also, that none is needed up to this time as the air furnishes same under ordinary conditions. I have said nothing, however, in regard to the method of supplying the eggs in an incubator with the proper amount of air up to and including the eighteenth day.

The method is easy, if understood, and in line with natural incubation. If the incubator has no ventilation above the eggs and air entered from the bottom not much evaporation of the eggs would occur. No air entering from the bottom and full ventilation at top would soon evaporate the eggs. Either result would be disastrous. In such cases, there must be apertures in the bottom of machine and ventilators at top, and a proper equilibrium obtained. Fresh air must enter at the proper time and right amounts and evaporation of the eggs escape.

To obtain the right results I have made experiments until I have my machines in perfect shape to average 90 per cent through the season. No one can any more than equal it as well, with or without moisture.

I am aware of the fact that climatic conditions govern incubation in a measure. I bar all high altitudes, like Colorado, in this estimate, also low marshy countries where extreme wet prevails. Extreme dryness and extreme wet are unfavorable to natural or artificial incubation.

In case of extreme dryness I would put no water in the machine, but would furnish a liberal supply in the room where I operated the incubator. It will evaporate slowly and supply the atmosphere with all the moisture the eggs will need. In extreme wet weather or locality I would allow very little air to enter machine and full ventilation.

BUFF COCHINS AS BRED BY E. L. FAMULENER, CAMERON, ILL.

So much can be said on this subject I fear I have already used too much white space, hence will leave it for another time.

*Fort Worth, Texas.*

---

The White Wyandotte will maintain its present popular position as the points they possess are what we want in a fowl for the farm or town. The more I see of them the better they please me. Just think of a gracefully formed fowl weighing as high as eight or ten pounds or more, legs clear yellow, free from feathers, with a plumage covering the whole body of a snow white color; the head crowned with the best of combs, an ideal rose, fitting closely to the head. Is it any wonder the White Wyandotte is a popular fowl? I think not—and then when we enumerate their valuable qualities, such as great egg producers, fine meat, early maturity, hardihood, etc., we see that they have gained their present popular place with both utility and beauty.

# The Inconsistency of Facts.

## Reply to Editor Robinson of Farm-Poultry.

By E. C. HUFFAKER, C. E.

IN *Farm Poultry*, Aug. 1, the following criticism appears, relative to an article of mine in the July number of the AMERICAN POULTRY JOURNAL:

"Mr. Huffaker says: 'Nature seems at times to possess the power of prevision. Thus the Italian Leghorn hen when transported to the north of Europe is said to double her egg yield during the first year, instinct teaching her that the colder winter will carry off more of her chicks and that provision should be made for more.'

"In the paragraph immediately preceding this he says: 'Geographical and climatic changes produce variations, breaking up existing types and inducing long enduring changes. Hence the disappointing results that often follow the shipment of birds or eggs long distances. Prolific layers fall to the level of mongrels and eggs, from large strains, hatch chicks, which fall short in weight. Both birds and eggs become adapted to certain localities.'

"If there is an 'instinct' which compels a double egg yield in anticipation of a high rate of mortality, ought not this instinct to act uniformly? If Italian hens, transported to the north of Europe, double their egg yield, why should 'prolific layers' shipped long distances in America fall to the level of mongrels?

"Is either proposition correct. if made of general application? That in regard to the depreciation in quality certainly is not, for as any one who has had any considerable experience in handling fowls and has made it a point to observe such things, knows, changes, both climatic and other, have little or no effect on some fowls and affect others some for the worse and some for the better, and this, too, in fowls of similar breeding subjected to precisely the same changes."

Note particularly that the editor declares most positively that my proposition in regard to the depreciation in quality is certainly not correct and then consider the following statements of the editor himself, extracted from the March 1 and May 1 issues of *Farm Poultry*, 1901:

"Eggs from a low altitude do not generally hatch as well at a high altitude as they would at a low altitude. Eggs from unacclimated stock do not hatch very satisfactorily, or else give many weak chicks, which after a more or less protracted struggle to live are apt to pass over to the majority without leaving anything in the way of value received with their owner as a memento of their brief stay on earth. It requires several years in a high altitude to thoroughly acclimate a stock of fowls from a low altitude and many of them will succumb during the process. The almost yearly introduction of new males from low altitudes into many flocks kept at high altitudes makes perfect acclimation of stock impossible and accounts for much of the unsatisfactory results from such stock.

"Much of the difficulty in hatching chicks and many failures in rearing them come from the use of unacclimated stock. It requires some months for most birds to completely recover from the effects of sudden change of climate, and many never become acclimated at all, but die exhausted by the drain laying makes on their enfeebled constitution."

When an enemy is invading your territory it is a good plan to make things interesting for him at home, and while the editor of *Farm Poultry* is affecting a reconciliation between his different statements and making up his mind which to hold to and which abandon, I will see what can be done toward straightening out my own statements.

In the first place I do not see that both my statements may not be true, for the last quotations given conclusively prove that my second proposition is true, namely, that geographical and climatic changes induce long enduring changes and that "disappointing results often follow the shipment of birds or eggs long distances." We need only concern ourselves, therefore, about the first statement, namely, that "the Italian Leghorn hen when transported to the north of Europe is said to double her egg yield during the first year." The reader will please note that I do not say she does double her egg yield, but only that it is said she doubles it. In proof of my statement I quote again from the editor of *Farm Poultry*, August 1st issue:

"Mr. Hunter made mention of this alleged remarkable increase in the yield of hens brought to Belgium from Italy, when describing conditions in Belgium."

I did not profess to be making the statement on my own authority, but gave it for what it was worth. My authority was Mr. Hunter himself, who mentioned it along with other items of interest in a long conversation we had on the subject of "Heredity." I know of no better authority. But the editor of *Farm Poultry* goes on to say:

"But as when he tried to ascertain actual yield of eggs, he found no figures obtainable. I have ever since been unable to believe that enough Belgian poultrymen knew that their hens laid when brought to Belgium to say nothing of what happened in Italy, to make their opinions of any value to persons looking for facts."

But how are the facts to be had? And when? No one is ready to undergo the expense of an investigation, so the matter is likely to remain where it is. Any one is justified in disbelieving, but not to the extent of challenging those who are disposed to credit the statement. The evidence certainly is not conclusive, perhaps not very strong or even weak, but on the other hand the only rebutting evidence we have is that the editor of F. P. finds it does not agree with what he sees in America, which is not yet quite clear.

In the second place it is not so important a matter whether the statements made are correct or erroneous as that we should recognize that basing our conclusions on the supposed unreasonableness of alleged statements of facts is a very unsafe proceeding. Unreasonable statements sometimes have an awkward way of turning out to be substantially correct as in the Van Dreser affair. The incredulous mind is no more likely to get at the truth than the credulous one. The great mass of supposed facts, which go to make up the sum of each individual's knowledge consists largely of unverified and often unverifiable materials and in consequence our conclusions can never be final and are oftentimes mere inferences. From the nature of things we must accept many facts on hearsay and many that are erroneous, but it is better to accept everything that is not manifestly absurd than to reject everything. And especially must an editor accept many statements and proceed upon the assumption of their accuracy, which he, in his own mind, discredits. He cannot spend all this time calling people fools and liars and hope to retain their goodwill, and besides this method of reasoning, of denying the truth to all statements, which are not otherwise easily disposed of, is not only cheap, but savors of insincerity. All progress comes through the endeavor to reconcile apparently irreconcilable facts. An erroneous notion often gets worked into the mass of accepted facts and theories and to get rid of at times requires the labor of a generation of men. To say we disbelieve this or that does not eliminate it from the problem; we must disprove it and the man who cannot disprove it is scarcely in position to emphatically deny it.

Chuckey City, Tenn.

## Wise Sayings.

The fall season is with us, and the thoroughbred fancier is concerned about his stock and its care. Plenty of good food is needed now by the young and old birds, to prepare them for the winter season. The strain upon the systems of the birds now is great, as they must make both flesh and abundant feathers. Few realize adequately how much this means. Constant care must be exercised in feeding if the best results are desired.

* * *

Nearly all breeders can find room for some fine pigeons. Few birds are more attractive than pigeons. They are very beautiful and make excellent pets, besides affording pleasure in various ways. Fine bred specimens of the best breeds command good prices and are in good demand. The beautiful white fantails are very attractive with their fine tails, proud carriage, snow white color and winning ways. They are very hardy, easily raised and become very tame and friendly.

* * *

We have had years of experience with poultry, continuously, under various conditions, with different breeds, have read, written, talked and observed and we fully believe that the proper and sure way to produce fine, healthy stock is to breed from only strong, healthy stock. This is our system and we intend to keep at it. If all breeders would adhere to this rule or system the results in a few years would be most gratifying.

Fancier! Breeder! How about the "Golden Rule?" Are you using it in your dealings? Do you measure each shipment with it before it leaves your place? Let us all use it constantly.

*Freeport, Ill.* *John M. Wise.*

# Women's Department.

This department, while of interest to all breeders, will be conducted with a view to making it especially interesting to the women, who, if the truth were known, are responsible for the success of many a husband. The matter herein will be edited by Mrs. Myra V. Norys and will consist largely of instruction and advice in response to requests from readers. The sympathetic feeling of the gentler sex for each other should make this department of more than passing interest to our lady readers, and the demonstrated ability and wide reputation of Mrs. Norys makes it all that could be expected as regards the practical value of the information contained therein. Every line of thought and work in which woman may be supposed to be especially interested will find space for discussion here, and all who desire to ask questions, no matter how elementary, or wish advice upon what to do to overcome the difficulties peculiar to their case, are urged to make use of this department. Address all letters to Mrs. Myra V. Norys, Ridgewood, N. J. EDITOR.

In embracing the opportunity offered by the AMERICAN POULTRY JOURNAL I desire to say this: If any one is in possession of facts that will aid in the advancement of women in the fancier's work I want to know them; if there is any woman who needs instruction and encouragement I want to know it; if anything inspiring has already been achieved I want to know it, to the end that every woman may be encouraged. Greeting, hearty and hopeful, to you all! —*Myra V. Norys.*

### THE PRESENT INTEREST.

WHILE we are waiting for the special inquiries and puzzles that may find future discussion here, our space may well be devoted to a sort of Review and Pre-view of woman's work with poultry. It would seem that the time is especially suited to the beginning of such a department, inasmuch as there has been considerably more than the ordinary interest in the question of late. This interest was partly stirred up by this affirmation from a leading poultry editor in this country. "There is no question that a capable woman can't make a very good thing out of poultry keeping on her own account." At first people generally took this for a proof-mistake, making it read "can't" when "can" was intended. This explanation was repudiated by the author of the statement, who insisted that he meant exactly what was printed. Later, however, it came out that it was an error in grammatical construction, the intention being to affirm that women CAN make a good thing of poultry raising for themselves. But the noticeable thing about the whole matter was the veritable storm of protest which swept the country from Maine to California and even shook the pillars of the poultry industry across the water. Most of those commenting found words fail them to express adequately their opinion of the judgment of a man who could make such a statement, and it is safe to say that a sigh of general satisfaction was breathed when it was found to be all a mistake after all. For people do dislike to have their faith in one whom they have considered sensible, undermined!

### THINGS AS THEY HAVE BEEN.

In the dozen years during which I have kept a more or less careful run of the poultry papers generally, I remember that two women have managed or edited poultry papers, and perhaps three such papers have had a household department, which gave attention chiefly to children and to recipes in which eggs and poultry figured. All these soon passed into different hands or different branches of work, the inference being that they were not satisfactory. Perhaps six years ago, a prominent editor refused to open a department for women on the ground that poultry keeping was all the same, whether women or men attempted it. In some aspects of the question he was, of course, right; in others he was absolutely wrong. There is no room for doubt that women are far more deeply interested in the unqualified success of a woman than in that of the average man; or that they are keen for any hints that will meet some difficulties inherent in their limitations and handicaps.

### WOMEN IN PRINT.

Commenting on the work of a woman writer—which work she pronounced "logical, dignified and comprehensive"—a cultivated woman said recently: "A thing of that sort, written by a woman, is always read with a distinct sense of pleasure and relief. Women in print have much to learn. It is very difficult to be always logical, honest and truthful." She was wholly right, yet the criticism had a distinct element of unfairness toward women, in that it carried the inference that this was truer of women in print than of men in print. I have seen, within the last year, the work of a woman poultry writer who mixed up her admonitions about kerosene for roosts, etc., with references to how her husband called her "wifey," to her lovely golden-haired baby, to the fact that she couldn't advertise herself or her fowls, no matter how hard she might try, and to the other interesting fact that two judges gave a certain bird of hers sky-high scores, he being "a wonderful bird" (full description following). All this supposed to be written for the instruction of readers of the poultry paper in which it appeared. You think that pretty "flat?" But, I assure you that it is outdone by plenty of the stuff that a good many men write for the poultry papers. What I want you to see is that women are so keen to be proud of those who represent them in print that they criticise them more sharply than they do the far greater number of men who are doing work as bad, or worse. There is good work, and there is poor work, from both men and women. There is, at the present time, a paper edited by a woman, in this country, for which she gets no public credit, simply because the public never suspects the fact. I am not sure that it is known in the majority of the offices, even. Another woman has been for years one of the "wheel horses" in the progress of one of our prominent poultry papers west. Men have had most of the credit of her work; but I have heard more than one man who knew the facts say that she was by far the biggest factor in the success of that particular poultry paper.

### WOMEN IN THE ACTUAL WORK.

Although I know very little of the detail of the work of most of them, I find that there are something in the neighborhood of fifty or sixty women who are offering eggs for hatching and most of them stock also. There are thousands of reasons why women in general cannot enter this field, prominent among them being the insuperable one that the husbands are not willing. But the men who are not willing that their wives shall make what they can out of utility stock at home, while many, are very few compared with those who are liberal-minded enough to give their wives this chance. The recent poultry contest of the American Agriculturist, carried on throughout an entire year by above 500 contestants, is something of a revelation, as showing the extent to which women are reaching out for opportunities along this line. Of the largest five regular prizes, dealing with sums of $15 and upwards, three were taken by women; one of these being the sweep-stakes of $200. Of the twenty-seven regular prizes, nine, or one-third, were captured by women, while among the receivers of specials, the names of women appear 125 times.

### HINDRANCES.

Before the average woman, be she wife or daughter, can make even an initial effort to make the poultry keeping a distinct money-making branch of the farm work, particularly for the benefit of her own purse, she has to settle it with the head of the family. I suspect that, in a very large number of instances, this is the very greatest Hill Difficulty which she meets. This, and her limitations of strength and time are together enough to make any but a stout heart quail. What can this department say or do to help, when one writes: "I have already five little children, and I cannot do the house work and keep well. I thought if I could only make enough out of poultry to pay the hired girl, it would give me a chance for fresh air and renewed strength. But Mr. Z is not willing that I should try it, lest the fowls disturb the neighbors and his crops;" or when another writes, as lately: "With John saying he must have every cent of my butter and egg money for debts, and not always taking good care of what he has, do you wonder that I sometimes get blue?" Oh, the pity of it!

### YANKEE SCHOOL TEACHERS.

And beyond the question as to whether 'he" will be willing is the matter of intelligence and executive ability, when it comes to making poultry raising a matter of business with which the general public must be connected as customers. I have been more and more interested to find, as the facts came out, that nearly every woman who has made anything like a prominent success of writing, or selling fancy stock, has been a school teacher. The teacher in an ungraded school who has not executive ability is a failure. Having suceeeded, however, and earned money for her own spending, here are two things to keep her bobbing up every time she is downed by difficulties: one is that her executive power is always looking for new worlds to conquer; the other is that she has had a good taste of the sweets of independence of finances. To her, more than to most women, will it be galling to be limited in purse, or to be ground down to the point of asking for every "quarter" which she spends. One inquires whether such a woman should not have been "smart" enough to avoid union with a man so unjust as to lay this humiliation upon her. I think she *has* avoided this, usually; but many a man cannot do what he would in the matter of pocket-money. However this may be, the fact is that the ex-school teacher is very much in evidence among the women fanciers.

MRS. MYRA V. NORYS.

Back in the last century, close at the heels of an old-time farmer who had followed his little sons, one by one, to the grave, was wont to trudge a small, pink-sun-bonneted, bare-footed girl. Her cup of delight was filled to the brim when her patience was rewarded by the privilege of riding the horse while the potatoes were cultivated, or driving the team with drag across the field to show how she could do it without making "a balk."

About mid-afternoon, the path of delight led towards the house, where were eggs to be gathered, under barn and in hay-mow and stack. "Wait till four o'clock, daughter," was the mother's firm charge; the hens must not be bothered till they have finished their day's work." Here was a lesson in patience and the habits of hens.

It was only three or four years till the small girl was nearing her 'teens and bargaining with her mother to raise all the chicks "on shares." The only flaw in this plan was that, as the mother said, "Myra's experiments were apt to take off all the profits." The later training of the girl embraced six years' attendance at the bed-side of an invalid father. After this, Myra V. Norys was free to teach, to put herself through an advanced school, and to launch out into literary work. The quality of this work was such that she was soon elected a member of that brilliant band, the Woman's Press Club of New York City, being then one of only fourteen members outside New York and Brooklyn, three of the fourteen being in foreign countries.

During the past year, an editor, who knew her by her work only, referred to Mrs. Norys as "a typical American woman, talented, resourceful, and a favorite with publishers from the very first." Her work, covering fourteen years, has comprised editorial and miscellaneous contributions and reporting. For the last she has unusual faculty, having held for years the rank of special staff reporter for New York City and vicinity on a country weekly of highest standing. For years she carried on Departments on Household, Window Gardening and Poultry. A severe illness, which laid her aside from pen work for about three years, checked her advancement very materially, as it cost the loss of much of the prestige of the first few years of work. But she resolutely set her face to regain lost ground, and has since served on the New Jersey Institute force more or less for three consecutive years, and has published three books. "Pocket Money Poultry," which came out in October, 1899, has already become a standard rule-book for beginners. "Easy Poultry Keeping for Invalids" receives such editorial comment as: "A mass of pointers," "full of safe and sensible advice," "first-class in every way," etc.

With the best of her time and strength thus given to literary work continuously, Mrs. Norys is also a practical and successful breeder of fancy poultry. Nothing but the best ever satisfies her in the pursuit of any one of her numerous interests. But she is still at heart a daughter of the farm, and a pink sun-bonnet still suits her. Her fowls have early and intimate acquaintance with this same sun-bonnet, and with her active work in ministering to their needs. Indeed, on one occasion when neither love nor money could provide a man to do the work, she battened and capped the entire outside of a much-needed new poultry-house.

The business has always been small; as suited to village-lot dimensions on rented property, and to slender strength. But matters are now in train to purchase land and to enlarge very materially before next season's work is under way.

As a pleasing and polished lecturer, as graduate from Rhode Island College Special Poultry Course, as writer of the first rank, as breeder of fine stock, as friend and adviser to every woman poultry-raiser who asks her help, Mrs. Norys has made her own place. The AMERICAN POULTRY JOURNAL welcomes her to the ranks of its special workers. Knowing the consideration given her writings and her ability, by the fraternity in general, we believe that we can hardly say too much concerning their merit. Not the amateur merely, but many who pose as experts may find help in her department. Whatever may be counted as of especial interest to women as poultry raisers will be specifically discussed therein. "Sloppiness" and sentimentalism will have no place; but sound, practical talk on practical matters on the "yours for business" basis will be the rule.—(Editor.)

MRS. MYRA V. NORYS AMONG HER FOWLS.

George F. Ahles & Son were amongst the most successful exhibitors at Champaign last month. They made the following winnings: Buff Cochins, first and second on cock, hen, cockerel and pen and second pullet; Partridge Cochins, first cock, second cockerel and second pullet. Silver Wyandottes, first hen, first and second cockerel, second pullet and second cock; White Wyandottes, second cockerel and second pullet; Black Langshans, first cockerel and first pullet. This firm's birds are always found in the winning classes wherever exhibited, and the quality of their stock, combined with fair dealing, has placed them in the front rank. They are closing out their Wyandottes, Leghorns and Langshans and are offering some real bargains in these varieties. Their ad may be found elsewhere in this number.

**Prairie State Incubators and Brooders**

Are used exclusively by the U. S. Government Experimental Farms.

**343 First Premiums.**

Largest catalogue published. Contains fifty color-plates. FREE. Ask for No. 2.

**Prairie State Inhubator Co.,**

**Homer City, Pa.**

**D. F. TAYLOR,**

**THE WHITE ROCK MAN,**

Has bred White Plymouth Rocks and White Wyandottes for twelve years. Winners at the World's Fair and many shows since. My birds are good size, color and shape. I have 250 chicks hatched from March 1st to May 1st now ready to ship.

**D. F. TAYLOR, DeRuyter, N. Y.**

1882 1901

**Grand Stock For Sale.**

Light Brahmas, Black Langshans, Barred Plymouth Rocks, S. L. Wyandottes. These birds are winners and will do you good. Parent stock scores 90 to 95. Prices right. Satisfaction or your money back. Circular of breeding yards free. Write me.

**HENRY T. REED, Camp Point, Ill.**

**WYANDOTTES.**

**White—600—Silver**

Young and old; score from 90 to 93¾. Don't buy until you hear from me.

**OLD HOMESTEAD POULTRY YARDS,**

**W. F. COATS, Columbus, Ind.**

**Congdon's Barred Rocks,**

BRED FOR

**Utility and Beauty.**

Our new catalogue will be issued Nov. 1st. Send for a copy.

**W. A. CONGDON, Waterman, Ill.**

**Black Langshans.**

50 fine young hens. Some of my prize winners. They go from $1.50 to $5 each. You can't find them any better. Will be pleased to hear from you. Try me

**L. E. MEYER,**

**Bowling Green, Mo.**

**300 FOR SALE 300**

Rhode Island Reds, Houdans, Light Brahmas. All of my breeding birds to make room for chicks, from $2 to $10 each. Also Belgian Hares and Homing Pigeons at fair prices for quality; some grand ones. Send for circular.

**DANIEL P. SHOVE,**

**Box 666, Fall River, Mass.**

# The Economy Club.

By MRS. M. E. C. BATES, Traverse City, Mich.

In this department each month will be recorded the proceedings of the Economy Club, the object of which is to assist our lady readers in devising ways and means of making home attractive and of providing for the table in an economical and at the same time pleasing and plentiful manner. The various problems will be discussed in an interesting way and solutions given which will materially aid the housewife in making her work a pleasure rather than a burden. We believe it fair to devote this space to matters somewhat foreign to poultry in view of the fact that our thousands of lady readers are vitally interested in the subjects under discussion.—[EDITOR.

FALL IS COMIN' 'ROUN'.

W'en the brown creeps into the grass
And the leaves fall off the trees
And you get hungry fer a glass
O' cider, with good ole cheese—
I say, when the grass begins to brown
And nature sort o' tries to frown,
Et's a sign that fall is comin' 'roun'.

W'en the brown creeps into the grass
And the weeds are up to your knees,
An' you're gittin' low on gardin sass
And you've picked the last of the pease—
I say when the grass begins to brown
An' the hired man's cuttin' the thistles down,
Et's a sign that fall is comin' 'roun'.

W'en the brown creeps into the grass
And the blackberries are a flockin'
An' grasshoppers are bait for bass
An' the wimmin' folks are talkin'
O' cleanin' house upstairs and down
An' you jes' sneak out and slide fer town,
Et's a sign that fall is comin' 'roun'.

—o—

IT all just happened so. It began to happen at Aunt Patty's house. Aunt Patty doesn't exactly live in town, but is sort of betwixt and between—that is, between the city and country. She is a betwixt and between kind of a woman, anyway, I often think—what our old Uncle Ben calls a "mixtur." I can't stop to analyze her character now, but I fancy you'll find out as we go along. To look at she is fat and comfortable. Her age—well, maybe it *isn't* just fair to tell, but her hair is getting pretty white with the snows that fall as we go down the slope that verges to the end of the long path; her eyes are surrounded by wrinkles, but are full of fun, too full, maybe, for a woman of her age, and yet are swift to fill with tears at the call of sympathy; while she has laughed so much all the years of her life that one wonders how she keeps so plump with all the shaking her round sides get.

To Aunt Patty's house, then, there came the other day pretty May Rose. May Rose hasn't been May Rose a great while; only a few short months ago she was one of "Aunt Patty's girls." Aunt Patty always has a set of "girls." I don't know how many generations of them she has loved and petted and seen married and come to have wee girls of their own. They are scattered all over the country, from Maine to California, and now there are a half-dozen or more of romping fourteen-year-olds who rush into her house after school and Saturdays and evenings, and invade her pantry and eat up her cookies and doughnuts, and rummage her piece bag for bits of bright colored ribbons and silk to make patchwork of, and wheedle her out of her choicest roses and carnations and pansies when there is a party on foot, and come to her sometimes in the twilight with their little griefs and troubles or their Christmas and birthday secrets. They don't stand one bit in awe of her, but they love her dearly, and Aunt Patty has told me in some of her quiet talks that one of the sweetest thoughts she has is that when she lies in her last dreamless sleep the dear eyes of her girls will be filled with loving tears, and their sweet lips be among those who will kiss her a last good-bye.

May Rose, in the days before she was May Rose, had been one of the old lady's and so the motherly heart took her in to its warmest corner.

Aunty Patty was out in her kitchen when there came a click of the gate, a patter of high heels up the walk, a swish of flying skirts through the front room, and a head crowned with fluffy hair from under which shone two bright eyes, peeped in through the half-open door. Aunt Patty was stooping down at the oven, into which she was putting a pie, and as it was one of her own incomparable pumpkin pies which was to make its appearance a little later, large and brown and deep, redolent of all the spices that ever grew, it stands to reason that it required careful steering to get it into the oven without spilling any of its uncooked sweetness on Aunt Patty's immaculate kitchen floor. So in answer to May's familiar "Hello, Auntie," which is the undignified greeting that young America bestows of late years on its friends, old and young alike, the old lady only responded:

"Wait a bit, child," and presently she emerged victorious from her contest with

Barred Plymouth Rock pullet breeding cockerel, bred and owned by L. H. Edwards, Mulberry, Ind.

the refractory pie, which had required much propping up with a big tenpenny nail and a piece of an old iron spoon before it would consent to stand straight on the oven bottom and go to baking as a well-conducted pie should.

May immediately proceeded to give "her auntie" a vigorous hug, which was responded to with a motherly kiss, the effect of which was to transfer a dab of flour from the soft, wrinkled cheek to the round, rosy one, but as neither of them were the wiser for it, it didn't matter.

"Please, ma'am, I've come to stay to dinner," said May, pulling off her black Tam o' Shanter with its scarlet pompons, and perching it up over Uncle Samuel's gray overcoat which hung on a nail driven into the end of the big cupboard, where it sat with a jaunty air quite astounding to the venerable garment in question.

"Will has gone to Walton and won't be back till the 6:15 train, and to spend one of these grim, gray autumn afternoons alone I found to be a thing 'most intolerable and not to be endured,' as Mr. Shakespeare remarks. You'll let me, won't you?"

"Let you, dear child! You know I'd be glad to have you come New Year's and stay till next Christmas, only I suppose your Will would have two words to say about that. That's right, put your cloak away and sit right down," and Aunt Patty pulled forward a big, motherly wooden rocking chair with a gay patchwork cushion, into the depths of which May sank with a satisfied little sigh.

Aunt Patty gave her a keen look over the tops of her glasses. "What has gone amiss, little girl? That troubled little pucker around your mouth isn't there for nothing."

"Well, I *am* troubled, auntie. And it isn't any one thing, it's lots of things."

"All of which you must expect, child. The first year of married life isn't by any means the sea of rosewater waves and sunny skies girls picture it to be before they set sail upon it."

"But it isn't Will a bit," said May, firing up at once in defense of her six-months' husband. "He's an angel in coat and boots, if ever there was one. It's me," she continued, waxing ungrammatical in her excitement. "I am such a stupid, good-for-nothing little fool. I don't see what the dear boy ever married me for, and I am afraid it will prove a sorry day for him when he did."

"Tut, tut! Stop right where you are," said Aunt Patty. "I don't allow anybody to abuse one of my girls in my hearing. What has brought you to a sense of your unworthiness to such a degree all at once?"

"It isn't all at once—it's been a-comin' gradual,' as Uncle Ben Spicer says. You know how it was; mother died when I was too young to remember her, and I went to live with Uncle Jay and Aunt Nell. Auntie was good to me—she was too good, and when she died and uncle lost his property, what did I know about getting my own living? I can embroider a little, and paint a little, and play on the piano a little, and talk a little French and German, and know something of English literature and higher mathematics, but I am not quite sure I could say the multiplication table through without stopping, and I know I couldn't do an example in discount or partial payments, and get the right answer the first time to save me. So you see that when I tried to teach school it was a perfect failure, and if Will, like a dear, good fellow, hadn't come to my rescue, I guess, what with the discouragement and loneliness and all, I should have died. He'd no business to have married me; I don't mind telling you and nobody else, that all the salary he gets is fifty-five dollars a month; just fancy a young man trying to make a start in life on that and support a little foo—well, you needn't shake your head, I *will* say a little goose, that never made a loaf of bread or washed a pocket handkerchief in her life. Well, to make a long story short, we've been keeping house six months, and all I've succeeded in doing so far is to spoil and waste things, and run Will in debt. What the end of it all will be, I can't tell, but I am clear discouraged. If I didn't love Will so, it wouldn't be so hard, but to spoil his life when I would be a help to him instead of a burden, is hard."

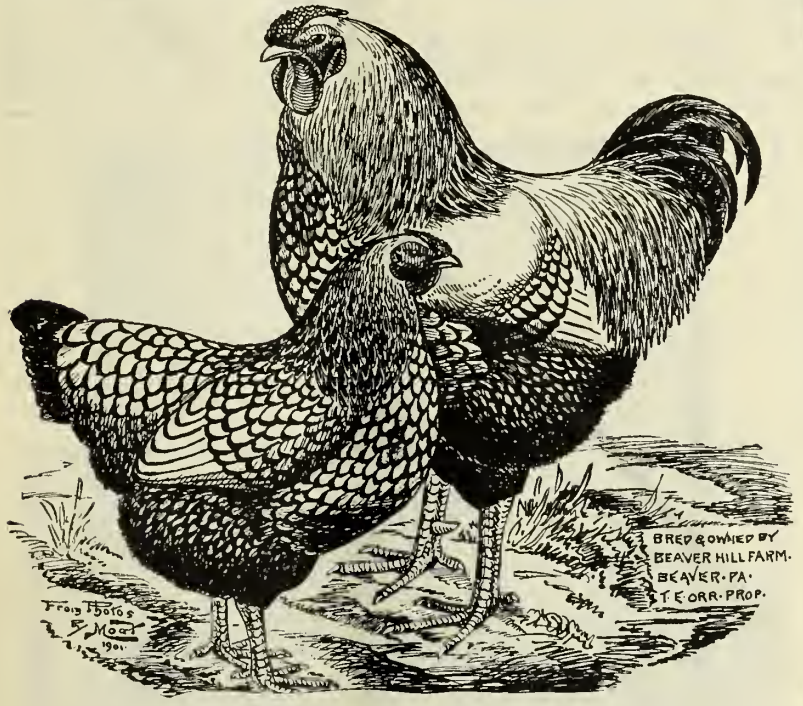
"You poor child!" said Aunt Patty, sympathizingly, at the same time wringing her dishcloth vigorously and giving her bright tin dish pan a polishing wipe, as the finishing touch to the washing up of her breakfast dishes.

"But there's one thing to comfort you; with your loving heart and your desire to do the best in your power to do, all things will work out right in the long run, be sure of that."

"That may all be, but a loving heart won't pay the last month's meat account and a desire to do one's best isn't considered an equivalent for groceries at the store. No, Aunt Patty, it's a bad state of affairs, look at it anyway you will, and *I* don't see how it is to be bettered. I just don't know how to keep house, and while I'm learning, things are all going to rack and ruin."

Aunt Patty opened her mouth to reply, when a great clatter arose at the back door. There was a shrieking of fowls, a rush of wings, and one old white hen dashed against the outside of a window and hung on the sill for a moment, then fluttered off to the ground, protesting loudly, while mingled with the feathered bipeds' outcry was a woman's voice uttering vigorous *shoos*. A moment later, the door opened and a newcomer appeared on the scene.

(To be Continued.)



**MOST NOTED PAIR OF LACED WYANDOTTES IN AMERICA.**

Cock won 1st and Gold Special at Chicago, February, 1901. Hen won 1st and Gold Special at New York, same week. Their picture as above is found on **Every Can of Orr's Liquid Lice Killer,** now acknowledged without a superior. Manufactured by **ORR & COOPER, No. 404 Fite Building, Pittsburgh, Pa.**

## SEASONABLE RECIPES.

### TOMATO SOY.

Peel and slice one peck of ripe tomatoes and eight onions. Add one cupful of salt and let stand over night. Drain and add two quarts of cider vinegar, one tablespoonful each of ground mustard, ginger, cloves and allspice, and one-fourth tablespoonful of cayenne. Boil slowly two or three hours. When nearly done add one pound of brown sugar and one-fourth pound of white mustard seed. Cook till thick like catsup. Bottle while hot and serve with cold meat. This is a very spicy relish.

### SWEET PICKLED CUCUMBERS.

For this pickle the larger sized, ripe cucumbers are generally the most suitable. Cut them into quarters lengthwise and allow them to stand for twenty-four hours covered with vinegar. Drain them and put into a stone jar. Boil together for five minutes one quart of fresh vinegar, two pounds of light brown sugar, one tablespoonful of salt and one ounce of cassia buds. Pour over the cucumbers and cover closely.

### APPLE CHUTNEY.

Pare and core five pounds tart cooking apples. Put them in a porcelain kettle with two pounds brown sugar and two quarts vinegar. Cook gently until thick and smooth. Take up, put in a porcelain dish, and add two pounds of finely chopped sultana raisins, a minced head of garlic, two ounces each of ground mustard seed and ginger root, four ounces of salt and three pods of chopped red pepper. Mix well together and let stand eight hours. Stir until perfectly blended, put in small jars and seal securely. Keep in a cool, dry place. This will keep for years and is delicious for using with cold meats or as a filling for sandwiches.

### GREEN TOMATO CHUTNEY.

Chop all together one peck of well grown green tomatoes, half peck yellow cucumbers, one dozen medium sized onions and four pods of red peppers. Put in a colander with one tablespoonful salt and let drain all night. In the morning drain off the brine, squeezing the vegetables dry. Put in a porcelain kettle with one teaspoonful peppercorns, six cloves, a piece of ginger root, a blade of mace, and a slice of horseradish. Cover well with strong vinegar and simmer slowly until reduced to a thick pulp. Rub through a fine sieve. Seal in small jars.

**If You Want to Make Money**

don't buy poor stock. We breed only the best.

**WHITE WYANDOTTES** (Duston and Willowcrest). Standard in weight and color and bred to stay white. **LIGHT BRAHMAS** (Shaw and Autocrat) Correct markings, true shape, grand birds. # HOUDAN COLOR.

## A Discussion of this Very Important Question which is to be Considered by the American Houdan Club at its Buffalo Meeting.

WITHIN the ranks of the breeders of Houdans there is today an apparent conflict going on as to what constitutes proper Houdan color. Members of the American Houdan Club, an organization containing the foremost and most able breeders of this fowl, are divided, apparently, and the color line is in controversy. Within the past few months members have contributed articles to the press, and the evidence is sufficient that the breeders of "the emigrant from France" have set up many individual types.

At the next meeting of the American Houdan Club this matter will be considered, and it is proper that action be taken along lines which will ultimately result in the bringing together of all Houdan breeders, and an adjustment of the difference of opinion now existing as to proper color. This is eminently right and proper.

I have carefully read the very able and interesting articles by Rev. C. E. Petersen, Mr. Jos. B. Thomas, Jr., Mr. J. F. Crangle, Mr. J. Ainsworth, secretary of the Houdan Club of England, and other prominent breeders, and, notwithstanding the seemingly diversity of opinion therein expressed as to proper color, I believe, that after all, these gentlemen are agreed, and that if we were all to meet, and to freely and frankly discuss this question of Houdan color, we would be like the lovers who had made up after a quarrel—we would not be very far apart.

Now, let us see what really constitutes proper Houdan color. I am frank to say that the American Standard of Perfection gives no definite idea. The Standard says:

Color of male and female—black and white, intermixed; the black slightly predominating.

"Black and white intermixed! What does that mean as applied to the beautiful and evenly mottled Houdan? Absolutely nothing. A fowl black and white intermixed may consistently be one with white feathers and black feathers, the whole feather white and whole feather black.

Lady Mary as a hen. Note the beautiful and even molting. Each black feather tipped with pure white. As a pullet she was quite dark in plumage color.

Such a Houdan would today be rejected as entirely worthless by every intelleetual breeder, and is never seen in the show room. It looks as though the makers of the Standard of Perfeetion took Piper as authority. Piper published his book "Profitable and Orna-

mental Poultry" in 1851, and of the Houdan plumage color he therein says:

"They are generally white, some having black spots as big as a shilling."

Ye gods! Some having black spots as large as a shilling," on a white background. That is white and black intermixed, surely. What else is it, please?

We submit herewith some photo cuts. These photos were taken for the express purpose of showing plumage color. We submit them as being very nearly our ideal, barring, of course, the natural effects of the tricks of the camera—the effects of lights and shadow.

Let us consider photo No. 1. The subject of this photo is Lady Mary (property of Rev. C. E. Petersen). Note the very even mottling of this hen: *that every feather shown is a black feather tipped with pure white.* She shows, I believe, a color upon which the conflicting color advocates can unite.

This hen won first as a pullet at Boston, and the following year was given first as hen at Philadelphia. I had the honor to pass judgment upon the Houdan classes at the Boston and Philadelphia shows where this specimen was exhibited. I have not forgotten the criticism given my action in awarding her first as pullet. Those who have held that the Houdan was being converted into a *black* bird said she was far too dark. I think that all will now agree that time has vindicated me in the placing of this award.

These friends who have become alarmed lest we should drive the Houdan into the fold of black birds have constantly held up to us as a pattern of perfection the English bred Houdan. Let me here quote from Mr. J. Ainsworth, one of the prominent and successful Houdan breeders and exhibitors of England, an honored judge, and, as heretofore stated, secretary of the Houdan Club of England. Mr. Ainsworth says:

"The color of the plumage is black and white, but by this I do not mean that some feathers are wholly black and others wholly white. This, I think, is a great failing. On the body of a Houdan hen of correct color, to my idea, every feather should be black with a white tip, this white feather not so large as to cover the black on the feather below; we thus get a well mottled bird. The male should be very similar on the breast, but is allowable of much more black plumage on the back."

No indiscriminate "intermixed white and black" there! Just what I have always insisted upon as a breeder and judge, in an exhibition bird, a mottled fowl, black largely predominating, each black feather tipped with pure white, no wholly black and no wholly white feathers. Does not this eminent English authority, in the few lines quoted above, describe your idea, Messrs. Thomas, Crangle, Petersen et al., and is it not a very likely description of the plumage here shown? I submit again, we are like the lovers referred to—we are not so far apart as we might be, thank you.

Cut No. 2 shows the wing of Lady Mary. It is a wing "one in a thousand," coveted alike by the breeder and the exhibitor. The Standard of Perfection in describing the color of the wing says "wing bows and secondaries, black; primaries white and black intermixed.

This wing subscribes to this demand, leaning a little to the dark side, which makes it all the more valuable, especially in a breeding specimen. Note that the wing-fronts are mottled nicely, a virtue some breeders claim is unattainable. Again, "black and white, intermixed" is objectionable. The ideal wing, to my notion, is one with each feather half pure white, half pure black, the shaft being the dividing line. This as to primaries.

You see, we are getting nearer together at every turn, we waring brothers.

What does it mean that the specimen herewith illustrated was considered too dark in plumage and color as a pullet? It means a great deal. It means that just here is the "path of parting" of Houdan color advocates. It is a fixed and consistent law of nature, a law that never, even for a season, relaxes, that the black in Houdan plumage disappears, in part, with each successive moult. This is why the evenly and beautifully mottled pullet and cockerel, deservedly winners, are worthless as exhibition hen and cock. This is why we must, in protection and in accordance to the laws of nature, keep the pullet and the cockerel, the breeding birds, and especially the male, on the dark side. We may argue against this as we will, the fact still remains a certainty to the breeder-exhibitor, regardless of the words and protestations of the theorist. I have, perhaps, handled as many Houdan breeding pens in the show room of late years as any other judge, have certainly handled as many breeding pens in yards as any other breeder in America, and I want to say that I have never seen a pen of pullets and cockerel, evenly mottled birds, as herein described, that I would mate as a breeding pen in my yards. And no such specimen, pullet or cockerel, has developed into a first-class, high-quality show bird as a two or three year old specimen. I make this statement absolutely sure that no breeder will be able to disprove it.

We need not go far to bring out a case with which every prominent Houdan breeder is familiar. At one of the leading eastern shows, recently, the first prize cockerel in a very large class was beyond all question the most evenly mottled male Houdan ever shown in America. As an exhibition bird he was a dream. The owner of this bird said to me:

"Of course he will go all to pieces in color as a cock bird, and will never again be fit to exhibit. Have a number of very dark hens to which I will mate him next year."

As a show bird this specimen was never again heard of. Of course not. A mating of this bird and Lady Mary would have given stock worthless as breeders or exhibition stock. Yet here are two ideal show Houdans, a male and a female, winners in their respective classes, in the strongest kind of competition, which if mated would not, could not produce desirable birds. Such a

mating would, very likely, produce some pure white Houdans. It is but a few weeks ago that the *American Fancier* contained an account of pure white Houdans. Note Editor Drevenstedt's comment thereon.

Such Houdans were advertised a few years ago in the *Poultry Monthly* by a Massachusetts party, but of course no one wanted them.

This case, referred to above, further emphasizes the fact that the Houdan breeder must keep his male line far darker than that of the proper show bird. We may cling, ever so tenaciously, to the beautiful theory that "like produces like," that our breeding and exhibition Houdan should be alike as to color of plumage, but every experienced Houdan breeder knows the fallacy of such a position. Dark birds are to be preferred for breeders, as the tendency is to run lighter with each successive moult. Let me again name a case, *a fact*. For several years I supplied one of the most prominent and successful Houdan breeders with two male birds nearly every season. In the letter consummating the sales of the first birds this man said:

"Leave the Standard entirely alone as to color. Send me the very darkest cockerels you have, that are right in other particulars. I want to mate them to my light exhibition pullets another year."

That is, the light, handsomely mottled pullets were mated the following year, as hens, to nearly black males. From such matings he annually produced his winning females, and had the reputation of showing the best hens in America. The record shows that he never lost first on aged females.

These remarks are submitted to the members of the American Houdan Club, and to all other Houdan breeders, in the hope that they will freely use the columns of the AMERICAN POULTRY JOURNAL in a discussion of this very important matter. Let us proceed to build a platform upon which we all can stand.

*Iowa Falls, Iowa.* *Thos. F. Rigg.*

Remember that what was ample room for 50 chicks two months ago is hardly sufficient for half that number now. Over-crowding is one of the greatest blunders poultrymen make. It is absolutely better to cut off the heads of a few good chicks than to ruin a whole flock as is often done in an effort to care for more birds than can be properly handled.

GROVE HILL TROPHY.
The principal prize at the tenth annual show of the Missouri State Poultry Association.

Separate the cockerels from the pullets as soon as possible after the sex can be determined. It is better for both that this be done. Cockerels so separated may be kept together until after they are fully matured and they will get along together as peacefully as a flock of pullets.

## Minneapolis State Fair.

THE poultry exhibit of the Minnesota State Fair, held Sept. 2 to 7, 1901, was one of the principal features of that great state fair, and was especially noteworthy from the fact that fully three-fourths of the two thousand entries were made by local breeders. For the past several years the larger part of the poultry exhibit consisted of "car load lots" from Southern and Middle States, which, while possessing quality of a high degree, did not arouse the same enthusiasm among the home fanciers as a local exhibit would. The present year the entries of the local breeders were double those of a year ago, which made the show about the size of other years. The quality of the stock remained *fully* as high as in the past, if not superior. The largest individual exhibit of 454 birds was made by E. G. Roberts, of Ft. Atkinson, Wis.

One of the surprises of the state show was the great falling off in the number of Barred Rocks exhibited, there being but a small number shown in comparison with the White and Buff Wyandottes, and the Buff Plymouth Rocks. Two or three of Minnesota's Barred Rock specialists were not represented. Where there were hundreds of Belgian Hares a year ago, there were only nine on this occasion, and these few attracted but little attention. The pigeon display received many favorable comments, there being 225 entries in the class.

Geo. D. Holden, of Owatonna, Minn., judged the show, and his work was satisfactory to all. The superintendent of the poultry department was the veteran breeder of Buff Cochins—Mr. Leslie Parlin. Mr. Parlin has had charge of this department for the past several years, and has brought the exhibit to a high state of perfection. His position did not permit of his entering birds in competition, but several of his Chicago winners of last January were on exhibition. One was a cock weighing 14 lbs., and a hen 12 lbs.

Interest among the fanciers was largely centered in the exhibit of Barred Rocks, there being a very fine showing and mostly by local men. To capture the lion share in so hot competition was a great distinction, and the honor went to F. T. Brunk, of Ellsworth, Wis., who received first, second and third pairs in chicks, and third on the only pair of fowls entered by him. These chicks had the fine narrow barring so popular today, and were barred to the skin. Mr. Brunk in the Rose Comb Brown Leghorns, received first, second and third in chicks, first pen and second in fowls, and on the Buff Leghorns third in chicks. He also won first and second on White Rock fowls, being the only White Rocks shown by him. Mr. Brunk has 300 birds at his home; also has his stock raised on different farms and has some seven hundred head of young stock for sale.

Light Brahma cock John L. ("the sire of many prize winners"), raised, bred and owned by H. A. Emmel, Ogle, Pa.

C. N. Bliss, of Minneapolis, won the best prizes in the Black Minorca class, he getting first in fowls, first in chicks and first pen. This is to be expected, however, with the kind of stock bred by Mr. Bliss. He breeds Black Minorcas exclusively and spares no pains to have the best.

N. S. Beardsley, St. Paul, the Barred Rock specialist, and H. H. Bonniwell, of Hutchison, Minn., breeder of Buff Plymouth Rocks, had no stock on exhibition, but were interested spectators. Each reported a most successful breeding season. Mr. Bonniwell recently shipped some of his young Buffs to Iowa points for county fairs.

John P. Peterson's Partridge Cochins have always been winners in recent years in Minnesota shows, and again demonstrated their fine breeding by winning first, second and third in chicks, second and third in fowls and second pen. Mr. Peterson also exhibited White Polish, Golden Seabrights and Polish Bantams, winning in White Polish second and third on fowls, first in chicks on the Golden Seabrights, and in the Polish Bantams first, second and third in chicks and first on fowls.

Goette and Schroeder did not show any of their famous Silver Wyandottes, but confined their exhibit to the S. C. White Leghorns, which, with the Silver have been their specialties for years. The firm has a reputation for breeding as fine White Leghorns as Silver Wyandottes, and on this occasion won first, second and third pairs in fowls, second in chicks and first and second pens. They have been fortunate in raising an unusually large amount of young stock of the best quality and look forward to a great trade.

E. G. Roberts, of Ft. Atkinson, Wis., made the largest and most varied exhibit and it would be difficult to find a variety in which he did not receive substantial awards. His success was most conspicuous in the Light and Dark Brahmas, Buff Cochins, Golden Laced Wyandottes, S. C. Brown Leghorns, Hamburgs, Game Bantams and Water Fowl. Mr. Roberts is an annual visitor in Minnesota, and his sales for the week exceeded those of any other exhibitor. The quality of the stock exhibited was good, as evidenced by his winnings in classes where he came in competition with specialty breeders.

The exhibit of incubators and brooders was one of the most complete ever given in Minnesota, those showing being the Des Monies, the Racine and the Cyphers. The two first companies had their machines in operation, and these were a center of interest for most of the visitors to the poultry building.

Write name and address plainly, and if JOURNAL does not come regularly and promptly, write us at once.

In requesting change of address be sure to give the old address as well as the new one. This is important.

Advertising rates will be furnished on application.

The reliability of new advertisers must be ascertained before an insertion of an ad in the columns of AMERICAN POULTRY JOURNAL can be made. This is a business matter, the justice of which is readily seen, as protection to the readers who answer advertisements.

Alway say when writing advertisers, that you saw it in the AMERICAN POULTRY JOURNAL.

All copy for advertising and manuscripts for publication should reach us not later than the 20th of the month preceding the date of issue.

## Meeting of American Poultry Association.

The South has again been chosen as the place for holding the meeting of the Amercian Poultry Association. The vote resulted as follows: Charleston, 29; Philadelphia, 22; Cleveland, 20. It is needless to say that all who attend this meeting will receive a hearty reception from the Southern fanciers. No better or more enthusiastic breeders are to be found anywhere and we predict that they will he lavish in the hospitality for which the South is noted. AMERICAN POULTRY JOURNAL congratulates the association and Southern breeders. The show at Charleston will be held January 20 to 29, 1902, hut the actual date upon which the meeting of the association will he held has not yet been fixed.

## Clash of Dates of the Boston and New York Shows.

We are in receipt of copies of the correspondence, which has passed between the management of the Boston and New York Associations. This has been sent us hy Mr. Sharp of the Boston show. The Boston show dates, which comprise the second week in January, 1902, were fixed at the time of the last show. Under date of April 30th Mr. Crawford of the New York Association wrote Mr. Sharp of the Boston Association that the New York folks had selected the same dates for their exhibition, claiming that they were compelled to do this, as it was the only time when Madison Square Garden could be engaged.

Upon receipt of this letter Mr. Sharp wrote Mr. Crawford that the Boston show had already engaged judges and paid a forfeit when making contract for the Mechanics' Building. An effort was made, however, to change these dates, hut it was unsuccessful and Mr. Sharp was instructed by his committee to propose to the New York Association that the two draw lots in order to see which show should be given up for 1902, the New York Association, to assure Boston that they could get the Garden for no other week and to pay, in case Boston show was given up, what was necessary for the proper cancellation of their contracts, also to give the Boston management an equal voice in the selection of judges, Boston promising that they would do all in their power to make the combined show the best ever held, and to give liberally in special prizes. This proposition was declined by the New York management.

Under date of May 20 Mr. Sharp wrote to Mr. Crawford expressing surprise that the New York management would close a contract for Madison Square Garden until they had heard from the Boston Association, in view of the fact that Boston had had these dates so many years. The proposition of Boston was then modified to the extent of the suggestion that both draw lots and each look after canceling their own contracts. The only condition asked by Boston being that both associations have an equal voice in the selection of judges. Not hearing from Mr. Crawford in the meantime, Mr. Sharp wrote him July 2, expressing his regret that the efforts of the Boston management to avoid a clash had thus far been unsuccessful. It appears that the last letter written is to Mr. Crawford, secretary of the New York Association, from Mr. Baylies, treasurer of the Boston Association, acting in the absence of Mr. Sharp, stating that Boston would hold the matter open in order that Mr. Crawford could com-

# An Intellectual Feast.

### This is What Our "Prize Article" Contest will Prove to the Readers of American Poultry Journal.

We are pleased to announce that the interest taken in the contest for the prizes given for articles for AMERICAN POULTRY JOURNAL has far exceeded our expectations. This is worthy the special consideration of our subscribers, because it means that they will have placed before them the results of study and practical experiments of experts who are acknowledged authorities in their respective lines. The information contained in these articles will be thoroughly reliable and up to date, and will prove of immense value to all who are interested in breeding standard-bred fowls, either for pleasure or profit or both. We urge our readers to not miss a single number of the journal the coming year, for we conscientiously believe that these articles will embrace a fund of information such as has never before been given in as available a form to the readers of any publication devoted to poultry. There is no reason why this should not be the case. At this writing we have received upwards of seventy-five communications containing about one hundred and fifty thousand words, and there are several days yet in which articles may be received. Think of it! Some of the best talent in America is represented and the questions are treated in a thorough and exhaustive manner. The writers have put their best efforts into these communications and dealt with the subjects from a practical standpoint. The instruction is so plain and complete that it cannot be misunderstood or prove lacking in details. Ideas are presented and the results of experiments given which will be instructive to and appreciated by, the experienced breeder as well as the novice.

Following are the subjects which will be discussed and elucidated:

The process of molting. Care of the fowls during this period. What to feed and why to feed it. Is delicate color and gloss of plumage affected differently by different foods? If so, how and why? A general treatise on the subject of molting.

The best and most thorough explanation of line breeding, with a detailed plan for establishing a strain, a clear and concise statement of the principles involved in developing the desired characteristics of the fowl and embodying the results of too close inbreeding.

Preparing birds for the show room. Instruction which will enable the amateur to take advantage of the many little details which add to show condition. How to feed and care for the birds during their close confinement in show coops.

Instruction to the beginner whose ambition is to get prominently before the public as a fancier and breeder and establish a paying business.

The best method of starting a market poultry plant. The amount of money necessary to purchase stock and the profit to be expected from the outlay suggested. The amount of ground, number and size of buildings required and suggestions in regard to economical and successful management.

How to advertise successfully. Points to be considered in selecting a medium. Conditions affecting an ad. and hints on the advantage of continuous advertising.

Has the specialty breeder greater chances of success than the breeder of several varieties, as regards prominence and high prices for stock and eggs? If so, why?

Advice on management of incubators and the advantage of their use, even though hens are available for the purpose.

Success with brooders. How to feed and care for the chicks.

Rules to be observed in getting the highest percentage of fertile eggs. Hints on house room, feed, care, selection and mating, as affecting fertility of eggs.

There is not a breeder of poultry anywhere who is at all interested in his work and to whom the information given on any one of the above subjects will not be absolutely and undeniably worth many times the price of a year's subscription to AMERICAN POULTRY JOURNAL, and yet this is all it requires to have the information upon each and every subject placed before them. In this connection we wish to state that this is only one of the features which will make AMERICAN POULTRY JOURNAL indispensable to poultrymen everywhere and make the procuring of subscriptions easy for our agents. We want a representative in every locality and will offer most liberal terms to persons who are in a position to devote a little time to the work. All things considered, our proposition cannot be duplicated in its line, and we would like to hear from every reader of this who may feel interested.

As stated in our prize contest announcement, the time for receiving articles expired October 1. After that date none were accepted in competition. The articles will then be submitted to the judges for their decision. Owing to the large number of articles that have been sent in it will be some time before they can all be read and decisions rendered. The work will be pushed as rapidly as possible and each writer will be promptly notified hy mail of the result and the result will he published in the first issue of AMERICAN POULTRY JOURNAL following the decision of the judges.

municate with the directors of the New York Association with a view to adjusting the matter. It is to be regretted that two shows of the size and importance of Boston and New York should occur at the same dates, considering the close proximity of the two shows and the fact that they are largely dependent for support upon mutual friends. This condition of affairs is detrimental to the interests of eastern breeders, as well as to the Associations. Exhibitors will be prevented from showing at both shows, which in many cases is an advantage in several ways. This in turn will reduce the number of entries at both shows and will therefore prove a financial loss. It will also lessen the value of the prizes from an advertising standpoint, because the competition will not be nearly so strong. But what is to be regretted as much as anything else is the ill feeling which will be engendered among the supporters of both organizations. A. P. J. has many friends directly interested, and we deplore the circumstances. We trust a clash of dates will yet be avoided.

## The Economy Club.

We wish to make special mention of a department which will hereafter be found in A. P. J., the title of which is, "The Economy Club." In this department will be recorded the details of the organization and the proceedings of its meetings. This will be exceedingly interesting and of great practical value to the ladies, as the topics discussed will pertain to houshold affairs, and the object will be to disseminate information which will enable the housewife to take advantage of the many ways of making home attractive and enabling her to conduct her culinary department upon an economic and satisfactory basis. The experiences related and the suggestions offered will be of the most helpful nature, and we predict that this will be a most pleasing and appreciated innovation. A number of seasonable recipes will be given each month in addition to the above mentioned general information and these will be of such character as to at once impress our lady readers with their simplicity of preparation and their palatable features. We realize that the household duties devolving upon women are of no small consequence and we believe that the thousands who read A. P. J. each month will appreciate our interest in their work and our effort to place them in touch with information that will be of real help. It is this belief that prompts the inauguration of this department.

## U. R. Fishel as Poultry Judge.

With the increase and development of the poultry business comes the demand for more good poultry judges. Every poultry judge in the country, we will guarantee to say, will have his hands full the coming season and could, undoubtedly, accept many more engagements, if he had the time to devote to it. The demand for good judges is greater now than at any time in the history of poultry raising and the good all-round breeder who is familiar with different varieties of poultry need not go long without engagements for judging. We are able to announce this month that Mr. U. R. Fishel, of Hope, Ind., has decided to enter the field of poultry judging and we can assure our readers that in our judgment no breeder is better prepared to take on this important work than Mr. Fishel. He has been a breeder for years and has handled a great many varieties of fowls, taking up at last the White Plymouth Rocks, with which he has made such a remarkable success in the largest show rooms. Mr. Fishel is in the poultry business "for keeps," for he has recently disposed of his hardware business, has bought a large farm and in the future will devote his entire time to poultry. The fact that he has decided to enter the field as a judge is an important announcement, in view of the fact that the poultry fraternity desires and must have good judges and we take pleasure in recommending Mr. Fishel to all poultry associations who are in need of a first-class all-around poultry judge.

Cull your flock and use the axe freely. Aim for quality rather than quantity. There are too many fairly good specimens. The money is made in raising winners. Better raise one bird worth $10 than two birds worth $5 each. The one bird sells for the same money, requires less room, care and feed and will produce better specimens of his kind.

Generally speaking, progress in breeding Standard bred poultry is retarded more by introducing new blood than by inbreeding. Poultrymen have been educated to fear inbreeding as they would the cholera, until the evils of it have become magnified a hundred fold.

There are people who will place chickens in a pit and allow them to maim and tear each other to pieces till death stops the fight. The heathenish practice is called sport by those so lost to all sense of humane principles—and still we send missionaries to China.

Free range is not what many writers would have us believe it is. You can raise prize winners without it. Too much of it is positively harmful. A youngster can "run off" more flesh chasing grasshoppers than he can gain by eating ten times the quantity he would get.

Breed the kind of fowls which the people want and will buy. There is no money in trying to convince a purchaser that he should buy something he does not want. Don't get married to a lot of has-beens. Times change, and the successful breeder changes with them.

The hen that is not forced for heavy egg production during the winter, will produce more fertile eggs when hatching season comes. The eggs will also produce stronger chicks. When nature's laws are violated something must pay the penalty.

Don't expect to get a $10 bird for $5. Fine specimens have a fixed value as much so as any article of high grade merchandise, and they will bring their true value under proper conditions. The demand is large and the supply is limited.

Side issue attention brings side issue results. There is only one way to reach the top in any line of endeavor, and that is by mastering the subject through thoughtful and careful work and plenty of it.

The specialist, or the breeder who handles one variety only, seems to make the greatest success. The exceptions to the rule are very few.

Sloppy food should be avoided. Make the mash crumbly.

## A Bill of Fare

at any first-class hotel or restaurant includes chicken in some form. It is a task for caterers to get nice plump poultry, especially during warm weather. Most flocks are well fed, but lice and mites are allowed free course among the coops and on the birds and this will prevent the hens from laying and chickens from growing more than any other one thing in the business. This is where Lambert's Death to Lice Remedies come in.

## A Fall Fair

is a good place to show the product of your skill at poultry raising. The competition is such that no lousy, skinny birds stand a ghost of a show of winning any of the best prizes. You can use Lambert's Death to Lice Powder on your birds while they are in the show coops, but to get the most benefit from this remedy it ought to be used for weeks before showing.

## The Regular Fare

of every well kept poultry yard includes all the necessities for growth, fattening and the production of eggs. Yet you can feed everything under the sun and house the flock in gilt-edge palaces, and still you will need to treat them for lice or they will continually harbor vermin. Grain is too high in price to feed a lot of lice. You can save the cost of many a box of Lambert's Death to Lice on your feed bills by using it often and liberally.

## A Fair Offer.

Death to Lice Powder for dusting large chickens and fowls, 10 and 40c by mail, postpaid; larger sizes by express from here or nearest agency: 48 oz. 50c; 100 oz. $1.00.

Death to Lice Ointment for head lice on chickens and children, also scaly shanks on fowls, 10 and 25c by mail.

Death to Lice Special for dissolving in white wash or mixing with the regular powder when used for moths and fleas, 10 and 40c by mail.

Samples of each one of the above (three kinds) sent by mail for 25c, if ordered at one time.

Death to Lice Liquid, for painting and spraying roosts and houses for mites, spraying cattle for flies, etc., 1 qt. 35c; 2 qts. 60c; 4 qts. $1, by express from here or nearest agency.

A 64-page Poultry Book free for the asking.

Importers and Breeders. Address B. C. SMITH, Mgr., Elmira, N. Y.

# The BELGIAN HARE.

ANIMALS that suckle their young are called Mammalia, from the Latin "Mamma," a nipple. They are divided into two great families, based upon their structure and habits. The larger family is the rodent, or gnawing family, and are very small in comparison to the other division of the great family. They are, for the most part, vegetarians. They have many enemies, and, notwithstanding their weakness and size, are able to hold out because of their wonderful breeding power. This fecundity being so great it tends to make them at times a serious menace to vegetable life; and yet they act as a balancing power—keeping vegetation in check and transforming plant tissue into animal tissue, or vegetable life into animal life, thus advancing the scale of evolution one step. These rodents are classified according to the arrangement of their teeth, and scientifically form four natural groups. To the first group belong the hares and rabbits. It is known as the Leporine, arising from the Latin "Lepis," a hare. Each family possesses twenty-six or twenty-eight teeth.

Externally these animals are readily distinguished from others by possessing hind limbs much larger than the fore limbs, and ears of great length—equal to and frequently exceeding the length of the head. When in rapid motion they leap with great bounds, covering from five to fifteen feet at a single bound. They have large full eyes, a tail recurving over the rump, five toes on the fore feet and four on the hind feet, with the soles of the feet furry. These animals are natives of all parts of the world, except Australia, and to this country they were imported, and now abound in great numbers, notwithstanding the rigorous efforts to exterminate them. They thrive in Arctic and tropical regions, and, like a Chinaman, can live in comfort anywhere and everywhere. However, the family is at its best in North America, where there are some twenty different species.

DIFFERENCE BETWEEN HARES AND RABBITS.

There is considerable difference between hares and rabbits—the rabbit burrowing, while the hare does not; the rabbit lining her nest with fur pulled from her own body, while the hare does not; the rabbit gives birth to more young than the hare; the young of the rabbit are born naked, blind and helpless, while the young of the hare are born with a covering and with eyes open. The common rabbit is sixteen to seventeen inches long from nose to tip of tail, and weighs from two to four pounds. From the original stock there has sprung divers breeds of pet rabbits, of divers color and greatly modified in size, form and fur. These various breeds have received various names as the result of some special feature. Thus we have the Dutch, Himalayas, the Lops and Half Lops, the Silver Greys, the Fawns, Patagonians, the Angoras and Belgians.

THE BELGIAN HARE.

The Belgian Hare is the most important of these varieties, and is called a hare because fanciers have bred it to resemble the true hare. It is much larger than the common rabbit, measuring from twenty to twenty-five inches from the tip of its nose to the end of the tail, and weighing from seven to twelve pounds. Its limbs are also longer than those of the common rabbit, and its color of a rich rufus red, with black hairs so beautifully distributed through the fur as to produce a wavy ticking appearance. The ears are sharply laced with a velvety black, and the eyes are prominent and hazel in color.

AS TO ITS ORIGIN.

Those who have carefully investigated the subject claim that it is the result of the application of scientific means to a desired end—that end being to combine beauty with practical qualities. Early in the nineteenth century some students of nature, who resided in Belgium, engaged in the systematic crossing of these animals with one great purpose in view—that of producing one animal possessed of all the desirable qualities of the various varieties, and at the same time discarding all the undesirable qualities, traits and markings. The animal was then called the Leporine, and was shorter and heavier in body and limb, and not so fine in flesh and fur as the beautiful Belgian Hare of today. About the middle of the century the Leporine was taken to England as a producer of meat, and here it soon attracted the attention of some English fanciers, who became much interested in the further development of the animal; and, as a result of several years of breeding in England, there was a marked improvement and development in the animal, and finally the fanciers adopted the standard in 1882, which is the foundation of the present English standard, though somewhat different. The name given to the animal was the Belgian Hare, while another development was called the Flemish Giant. In the course of this variation the English fanciers became energetic and progressive. Numerous meetings were held. Many discussions took place. Various revisions were made. Different standards were submitted, until finally the fanciers' efforts were rewarded by an alteration in the standard in 1889, when Mr. Lumb drew up the standard and submitted it to the annual meeting of the Belgian Hare Club, by whom it was accepted and approved. Since then the wild hare has been faithfully copied, and the result has been the advancement of the variety both in popular estimation amongst fanciers and in producing a hare-like rabbit.

It was once claimed that the Belgian Hare was a hybrid—that is, a cross between the hare and the rabbit—but the most careful experimenters have exploded this theory. Mr. Lumb, Ernest Wilkins, the superintendent of the British Zoological Gardens, and others, have tried in vain to produce such a union; and the naked, immature condition in which the young rabbits are born, as compared with the clothed and highly developed young hares, renders it exceedingly unlikely that hybrids could be produced.

THE BELGIAN HARE'S INTRODUCTION INTO AMERICA.

It is claimed that Mr. E. M. Hughes, of Auburn, N. Y., had the honor of first introducing the Belgian Hare into the United States. This was in 1888. He was a Scotchman of splendid organism, and great lover of pets. He devoted much of his life to introducing his hobby, and in 1898, when he passed away, the Belgian Hare lost one of its most ardent admirers. This gentleman made many importations from England and Belgium, and exhibited his animals at numerous poultry shows, and was of valuable assistance in the primary work of introducing the Belgian Hare, and promoting the National Belgian Hare Club of America, and in bringing the industry to its present standing.

No matter what the origin of this graceful little animal, it is here and it is here to stay. It has become of so much interest to the Yankee that he is giving much attention to the mating, breeding, care and development of the animals, that it doubtless will require only a few years for him to lay claim to another step in its evolution. He has given him a redder color, a sprightlier disposition and a more beautiful form. The industry will doubtless increase in this country until it equals or surpasses that of Europe and England, where the hare has become a staple article of food. The Dictionary of Useful Animals says: "In the season England imports one million, five hundred thousand weekly from

**BELGIAN HARES, Dirt Cheap.**

Rare opportunity. Good stock at prices that will surprise you. $3, $5 and up for fancy stock. Business keeps me out of the city. Am open for a reasonable bid on a big lot.

**W. T. GALLAWAY, 496 LaSalle ave., Chicago, Ill.**

Ostend, Belgium, or about seventy-five million annually; that France consumes from seventy to eighty million per annum; Paris, alone, ten million pounds annually." The Britannica states that "two hundred tons are imported into London from Ostend every week during the colder months of the year. The pelts are valuable—sixty millions being sold each year in France, thirty millions in England, five millions in Leipsig, four millions in Belgium, and so on, besides large numbers being imported into the United States for the purpose of making felt hats." These figures are based on official data and are reliable.

A conservative writer estimates that fully two million dollars are invested in the Belgian Hare industry in the United States, and that Denver breeders shipped in 1899 above thirty thousand dollars' worth of Belgians to Los Angeles, Cal. Wherever the animal is introduced he wins admirers, and every purchaser finds a score of his friends anxious to engage in the industry, thus multiplying the number of breeders, each in turn endeavoring to secure the best strain and to produce the finest animals, until the end is not yet in sight. The writer, with many others, can testify as a back yard industry it surpasses the front yard industry. We are thankful for the Belgian Hare. We hailed his coming with joy. Beautiful is his appearance. Affectionate is his disposition. Valuable is his fur. Delicious is his meat. Pleasant and profitable is the industry. Therefore, long may he live!

*John L. Brandt,*
*Valparaiso, Ind.*

## IMPORTANT NOTICE.

The well-known Norton-Fuller Farm is now called the "Norton Poultry Farm," Mr. H. N. Norton having purchased all other interests in the plant. The business has grown to such proportions that Mr. Norton finds it impossible to give attention to details, and hereafter Mr. James W. Armstrong, who has been in charge as superintendent the past two years, will handle the correspondence. Mr. Armstrong is a thorough poultryman and business man, and will give careful attention to all customers.

There is also a change of address to be observed. While heretofore correspondence has been sent to Oak Park, Ill., where Mr. Norton resides, the farm has always been located at Antioch, Ill. Please, therefore, address all future inquiries to "Norton Poultry Farm, Antioch, Lake County, Ill.," which will effect a saving of time. Mr. Norton wishes to thank his many patrons and friends for their past support, and assures us that the same high standard both of breeding and business will be maintained.

Remember the name and address.

—o—

We are glad to state that O. E. Thompson & Sons, of Ypsilanti, Mich., are using our advertising columns again this season. Our readers will remember these people as being the manufacturers of those widely known and reliable machines, Thompson's Banner Root Cutters and Thompson's Wheelbarrow Grass-seeders. We are in a position to recommend these goods and to indorse the manufacturers as being thoroughly reliable and generous and fair in their dealings with the public. Write them for printed matter.

—o—

## COSMOPOLITAN MAGAZINE.

Fourteen noted writers were sent by the *Cosmopolitan Magazine* to the Pan-American Exposition to study the most interesting features with a view to preparing the most beautiful souvenir of any exposition ever made, from both a literary and an artistic standpoint.

Under the direction of the editors of the *Cosmopolitan*, 105 photographs were prepared showing every variety of architecture and every phase of life, not neglecting the Midway, at the Pan-American. These are engraved and printed in a style never surpassed even in the *Cosmopolitan's* high standard of art.

The *Cosmopolitan's* Pan-American souvenir will be an even finer number than that of the Chicago fair. To those who have visited the exposition it will recall vividly in days to come every feature they have seen and those who are unable to go there will secure such a comprehensive view of its main attractions as will be well worthy of preservation.

## Items of Interest to Buyers and Breeders.

### BARGAINS IN WHITE LEGHORNS.

There is seldom an opportunity presented to get good birds at reasonable prices that equals that offered by Mr. Sid Brooks, Bedford, Ind. Mr. Brooks breeds S. C. White Leghorns exclusively, but is desirous of reducing his flocks in order to make room for Buff Orpingtons, which breed he will take up this fall. We have seen his birds and know that he has as good White Leghorns as are bred anywhere. He not only has quality but he has large numbers and can fill all orders promptly. His birds have reached the remarkable score of 96½ points, and have time and again won the best prizes in strong competition. Mr. Brooks' ad will be found elsewhere in this issue, and we heartily recommend him to our readers. Those who are in need of a few choice show birds can get what they want from Mr. Brooks, with the assurance that he will deliver just the kind of stock ordered.

### EPPERSON'S BARRED ROCKS.

While spending a day at the Champaign County Fair recently we availed ourselves of an opportunity to visit the farm of Mr. E. H. Epperson, Champaign, Ill., and were agreeably surprised at what we saw. Mr. Epperson is an old patron of A. P. J., and through his customers we have at times learned that he has good birds and does not hesitate to ship them at reasonable prices, but we were not aware of the fact that he had so many good ones as we saw upon his place this season. He breeds Barred Plymouth Rocks exclusively, and the condition of his stock and a few minutes' chat with him are sufficient to convince anyone that he understands his business. His unculled flocks are of such average excellence that they had the appearance of having been closely culled. We saw and handled nearly a hundred as specimens that will surely develop into winners. His exhibit at the Champaign County Fair, although in strong competition, was in a class by itself, and he won first cock, first cockerel, first and second hen, first and second pullet and first and second pen. The only premium he failed to get was second cock. The awards were placed by W. S. Russell. Mr. Epperson has enough good ones to spare winners in both old and young stock, and readers of A. P. J. will make no mistake in placing their orders with him.

*Frank Heck.*

We desire to call the attention of our readers to the announcement, elsewhere in this number, of W. C. Pierce & Co. Owing to poor health, Mr. B. N. Pierce will retire from judging and will devote his time hereafter to editorial work upon the *Fanciers' Gazette*. Mr. W. C. Pierce will also give his entire time and attention to the *Gazette* and the judging of poultry and will give up breeding fowls as a business. The firm, therefore, offers a large number of both old and young birds for sale, including their most noted prize-winners last season. This is an opportunity to get absolutely high-grade stock at reasonable prices. Score cards will be furnished when desired. The firm makes a specialty of White and Buff Rocks and White and Buff Wyandottes, and all who are contemplating a purchase of show birds this season will find it to their advantage to correspond with Messrs. Pierce & Co.

Ben Hazelton Smith, Coldwater, Mich., has a change of ad in this issue and is offering for sale 500 choice chicks, all in prime condition and bred from his Chicago and Detroit winners. He will also dispose of fifty yearling and 2-year-old breeders at prices which are about half what the birds are really worth, if they are taken soon. Our readers will not go wrong in placing their orders with Mr. Smith.

August D. Arnold, Dillsburg, Pa., the veteran Buff Leghorn breeder, informs us that he has the finest lot of Buff Leghorns and Buff Rocks that he has ever raised. He procured eggs last season from the most noted breeders in the east and west and has the youngsters from these, besides from his own valuable matings, which have proven better than ever before. He will not exhibit the coming season and will sell his best show

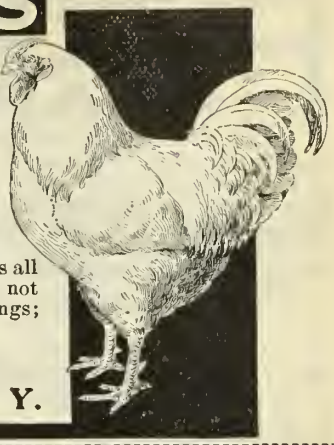
# HIGHEST HONORS

were awarded my birds at the Rochester, N. Y. Poultry Exhibition 1901; we won against the hottest kind of competition, all first prizes in our class, besides specials. That's what you can expect of the

Majestic Strain **WHITE WYANDOTTES**



the handsomest, most profitable fowls in the world. My stock is all farm-raised from prize winners at the big Eastern Shows. They not only **look right,** but they **are right;** they come from proper matings; they are healthy and vigorous; they will make you money.

**Choice breeding and exhibition stock from this prize-winning strain at right prices. Satisfaction guaranteed.**

**C. S. WETMORE, Box 377, Lockport, N. Y.**

birds. Mr. Arnold claims to have the finest collection of White, Black and Blue Belgian Hares in the world, and is preparing to make a large display at the Pan-American. He is also breeding Silver Gray and Silver Blue rabbits, which are very popular in England and will, he thinks, be as well received here. He has some stock imported from France that won medals at the late Paris exhibition.

We had the pleasure recently of inspecting the new plant of Sid. Conger & Son, of Shelbyville, Ind. This plant is complete in every detail and has been arranged in accordance with the ideas gained from long experience in raising prize winning birds. Mr. Conger's flocks this season are fully equal to those he has raised in the past, and this is ample evidence of the high quality now to be seen upon his farms. Fall trade has already opened up and the present season's business promises to be the greatest he has ever enjoyed. We hope to be able to give our readers a detailed description in an early issue of some of the conveniently arranged houses and appliances found on Mr. Conger's farms.

F. M. Hereford & Son, Fulton, Mo., have a change of ad. in this number and state that they have more than 500 birds to select from in filling orders this season. We have no hesitancy in recommending Hereford's Black Minorcas. The firm has reached a high state of perfection in breeding this variety.

Thomas E. Hoskins, of Sparland, Ill., is offering some bargains in Barred Plymouth Rocks. Mr. Hoskins has had nine years' experience in mating and breeding this variety. He raises about three hundred birds each season, which have free range of his farm, and are well developed and are first-class quality. He can supply stock for the show-room or for breeding purposes for improving flocks. His ad. will be found elsewhere in this issue.

The Edgewood Poultry Yards, 700 Stowell avenue, Milwaukee, Wis., exhibited a pen of their White Plymouth Rocks at the Wisconsin state fair and won first on cock and first on hen. The best birds in Wisconsin are found annually at this fair and the record places this firm in the front rank of winners.

John M. Wise, Freeport, Ill., has a large number of birds and is prepared to take care of his customers again this season in a most satisfactory manner. His Houdans are a well-known winning strain and he has just as good quality in White Wyandottes. He also breeds White Fantail pigeons.

One of the best grits upon the market is that sold by Porter Bros., Muscatine, Iowa, known as Porter's Star Grit. It is hard and sharp, and contains 95 per cent lime. It is put up in 100-pound sacks and sells for 75 cents per sack. A free sample of this grit will be sent to A. P. J. readers who mention that they saw the ad. in our columns.

We desire to call the attention of our readers to the ad. of W. R. Curtis & Co., proprietors of Niagara Farm, Ransomville, N. Y. Upon this farm are bred Mammoth Pekin Ducks, Stay White Wyandottes and Red Belgian Hares, all of which are leaders in their respective classes. This plant is one of the oldest and most favorably known in the country. They have over 20,000 square feet of floor space under cover and usually carry 1,000 head of breeding stock. They make a specialty of combining utility and fancy points in their fowls. They also do an extensive business in poultry supplies, and are in a position to satisfy all who place their orders with them. They put up a superior brand of cut clover and can fill all orders immediately upon receipt.

J. W. Eastes Poultry & Belgium Hare Co. has purchased the famous Cleethorpes rabbitry, comprising fifty head of imported bucks and does, among which are Lord Bancroft, Jr., Carvill, etc., and does of equally important strains. This stock was personally selected last year in the rabbitrys of William Lewes and Lord Stratheden, England. This firm has one of the best equipped rabbitries in the west and their prices are low.

Mr. U. R. Fishel, of Hope, Ind., the well-known White Plymouth Rock specialist, announces that he is open for engagements as judge of this variety. Mr. Fishel is a veteran breeder and his fitness for the position of judge will be acknowledged by all. We unhesitatingly say that we believe no judge or breeder in the country is more competent to pass upon this variety than Mr. Fishel.

E. W. Wheeler, Cedar Springs, Mich., has a fine lot of March and April hatched chicks ready to ship now. Among this lot are quite a number of birds which give every evidence of developing into winners in strong competition. He will send circular free to all who request same.

The illustration on page 698 is of White Cochins as bred by F. T. Franklin, Urbana, Ill. Mr. Franklin breeds the World's Fair winning strain, and has obtained a most remarkable degree of success with this variety. He now has in his yards the first prize pen at Boston Mass., and will breed from these and

# SALE OF WINNERS AND BREEDERS.

Owing to business reasons we will be compelled to sell our entire stock of

**White and Buff Plymouth Rocks,**
**White and Buff Wyandottes.**

***About 2000 Birds.***

Which include our famous winners and their progeny. If you are contemplating buying some show birds or breeders now is the opportunity of your life. Don't delay, but write at once. At Chicago and Indianapolis we won 38 first prizes out of a possible 49, and many 2d, 3d and 4th prizes in the past two show seasons on the above breeds. We are the only breeders that ever won every first prize on White Plymouth Rocks at Chicago. For information and list of prizes won write

***W. C. PIERCE & CO., Indianapolis, Ind. Office, 55 Virginia Ave.***

# PORTER'S POULTRY LEASES

## PRICES GO TO PIECES!

But quality remains firm. Barred Rocks and Silver Wyandottes. My choicest breeders will be sold to give room for growing stock. Buff Rock male birds $1 each. Satisfaction guaranteed. Correspondence solicited.

***GEO. J. GLEASON,***
***Box C, Elburn, Ill,***

---

## SHAW

Has a fine lot of young and old stock ready for the fall and winter shows, in Barred, White and Buff Rocks, Light Brahmas and Toulouse Geese. The high scores given the parent stock by Pierce and Myers is sufficient proof of quality. Bred from Chicago, Indianapolis and Madison Square winners.

***DUANE SHAW, Palestine, Ill.***

---

## CHICK FEED—EXTRA QUALITY.

We are putting up the best dry feed on the market to-day. It is especially prepared for the rearing of young chicks from the time they are hatched until eight weeks old.

We want reliable agents in all parts of the United States. The feed is all right and when once tried is always used. Sample by mail 4c. Circulars free.

**STEINMESCH & CO., St. Louis, Mo.**

Reference: Editor of this paper.

---

## MATTESON HAS

## *Just What You are Looking For*

The right kind of stock at the right prices. Leghorns—Single-comb White, Buff, Black and Rose-comb Browns. Wyandottes—Golden and Black; Barred Rocks, Partridge Cochins, Game Bantams, Pekin Bantams, Ronen Ducks and White China Geese. Also Scotch Collie Dogs—the poultrymen's dog. We win with our birds each season. Have won this year at Upper Sandusky. Carey, Bucyrus and Sycamore—all good Ohio shows. Special bargains in cockerels and eggs now.

**IRA T. MATTESON, Upper Sandusky, Ohio.**

---

others equally as good the coming season. Among his White Cochin bantams are the first hen at Boston last season and the cockerel which headed the first pen at the same show. This is the quality which Mr. Franklin breeds. At Champaign, Ill., last month he made a clean sweep of all first and second prizes in strong competition.

Mr. C. H. Andrews has severed his connection with the firm of Andrews & Franklin, and will again conduct the business on his own account. He makes a specialty of his favorites, the White Cochins, and he produces annually some of the best birds brought out at the shows. Mr. Andrews has won scores of valuable premiums on his birds, among which are those obtained at the World's Fair, Chicago. We have seen his stock and can consistently recommend both Mr. Andrews and his birds.

We are in receipt of an annual catalogue of J. A. & W. S. Harrison, Henry, Ill. This company has built up a business in poultry supplies that extends all over the United States. Their line is complete in all respects and the prices quoted are as low as good articles can be sold for. They make a specialty of shipping and exhibition coops and these two articles of their production have become standard with many of the largest breeders. They are also in position to furnish printing for poultrymen and will quote prices upon request.

C. E. Hinman, Iowa City, Iowa, has determined not to show any this season and will, therefore, dispose of his very best show birds. He informs us that he can mate them up to please customers and he has quite a number of very choice birds. He is particularly strong in pullets. He breeds Silver Laced Wyandottes exclusively, and his show record is evidence that there are no better birds than those in Mr. Hinman's yards.

J. R. Mathis, Box A, Boggstown, Ind., commences a yearly ad in this number of the AMERICAN POULTRY JOURNAL. Mr. Mathis, while a new advertiser with us, is not a new breeder. He breeds White Plymouth Rocks exclusively, and can furnish exhibition or breeding birds at reasonable prices. We would suggest that our readers write him for prices and description of any stock they may think of purchasing. At Franklin, Ind., this season he won first and second cockerel, first pullet and first pen. At Shelbyville he won first cock, second cockerel, first pen and second hen.

E. C. Winters, Rock Falls, Ill., is making a special offer on some of his best stock, both old and young birds. He, as our readers know, breeds the Diamond strain of Black Minorcas. His birds have scored as high as 95½ and have been given high scores by some of the most prominent judges, including Hewes, McClave and Shellabarger.

Charles M. Brown of Forth Worth, Texas, has a change of ad. in this number and is offering White and Brown Leghorns of the highest quality. He is in position to give his customers entire satisfaction. His stock is very hardy and under Mr. Brown's system of feeding they obtain rapid growth. He informs us that out of a hateh of fifty eggs taken off recently he got forty-nine chicks.

The old reliable house of William Rust & Sons, New Brunswick, N. J., are advertising their poultry specialties in this issue. These people make various standard remedies, which have been extensively sold for years, locally. They are now giving their merits wider publicity, and we bespeak for them a large share of our readers' patronage. The present ad. calls attention to Rust's Egg Producer. Write today for their circulars and send a trial order.

Following are the kind of letters Mr. E. L. Famulener is in the habit of receiving from his customers:

*Rockville Center, L. I., N. Y., Sept. 6, 1901.*

*Mr. E. L. Famulener, Cameron, Ill.*

DEAR SIR: The pen of pullets have arrived and are very satisfactory. Think the Buff and the largest White are beauties. Thanking you for prompt attention, I am, yours truly,

*Geo. E. Morris.*

*Garden Prairie, Ill., Aug. 31, 1901.*

*Mr. E. L. Famulener.*

DEAR SIR: I received the five Cochins yesterday. The birds are all right for the money. Yours truly,

*B. S. Beckington.*

Mr. G. W. Brown, Camden, Ark., has announced his entrance to the field of judges, as will be noted by the following communications. We take pleasure in indorsing Mr. Brown, for we believe that he is qualified for the position and will give satisfaction:

*Editor American Poultry Journal.*

DEAR SIR: I have been earnestly and urgently petitioned and solicited by many friends, poultrymen and associations to announce myself as a poultry

judge, and while truly I have but little ambition in this direction, as I am very busily engaged and deeply interested in my own poultry matters, which are assuming great proportions; besides have much other business employment. Yet after much careful thought and consideration, and realizing that this state of Arkansas should have and is greatly in need of a judge, have decided to comply with the many requests, and offer my services to all who may wish same, and just here I want to state as my friends claim for me that I have had much experience and am fully acquainted with all the most popular and standard varieties, having bred and exhibited the majority of them for years, and have also had quite a little experience as a judge, having acted in that capacity quite often, to the entire satisfaction of all. Respectfully,

*Camden, Ark.* *G. W. Brown.*

*To George W. Brown, Proprietor Ouachita Valley Poultry Farm, Camden, Ark.*

DEAR SIR: We, the undersigned citizens and poultry fanciers of our respective localities, knowing your long experience in raising and handling over thirty varieties of fowls of the highest fancy order, your long and remarkable show record and experience in poultry shows in several states, also your character as a man, embracing the highest attributes of honor and fair dealing; also knowing you to be a man of most excellent judgment relative to fancy fowls and pets, and in every way worthy of the highest confidence of the poultry craft—these fanciers who desire their stock fairly and impartially judged, and in saying this we do not reflect on any judge in the United States, we solicit you to announce yourself at once as fancy poultry judge, that your services may be obtained throughout the south this season.

We trust you will accede to our earnest solicitation, for we feel sure your own state will be proud of the compliment your announcement would bestow, and the whole south feel that one first-class judge of fancy fowls and pets were at her command. Yours very truly.

*Ark. State Poultry Association, Little Rock, Ark.*

*Texarkana Poultry Association, Texarkana, Ark.*

*Ouachita Valley Fair Association, Camden, Ark.*

*W. H. Westbrook, Prest. A. S. P. A., Pine Bluff, Ark.*

*W. H. Croxson, Secy. A. S. P. A., Little Rock, Ark.*

*C. M. Brown, Brown Incubator, Fort Worth, Tex.*

*S. J. Leake, breeder, Los Angeles, Cal.*

*Jeff Fleming, editor, Blakely, Ga.*

*N. L. Hutcherson, judge, Crystal Springs, Miss.*

*J. D. Rassey, breeder, Memphis, Tenn.*

*S. A. Smith, breeder, St. Louis, Mo.*

*W. T. Walker, breeder, Homer, La.*

*C. M. Emerson, Minneapolis, Minn.*

With many other prominent signatures.

---

Mr. Arthur G. Duston, Marlboro, Mass., writes us that he has about 4,000 head of young stock this season raised at home and on his farms and that they are the very best birds he has ever owned. Some of his young stock has made its appearance at shows this season and have won. He has pullets that have been laying for some time. He was unusually fortunate in getting out early hatches. He takes pleasure in showing visitors around his plant and such calls are always a pleasure to those making them.

---

P. B. McCormac, Zanesville, Ohio, comes in with us this month as a yearly advertiser and, as will be noted in his card elsewhere, he offers to ship birds C. O. D., thereby giving customers a chance to see the fowls before paying for them. Mr. McCormac informs us that in all cases where the birds are not entirely satisfactory he will pay express charges himself.

---

H. R. Ingalls, Norton Hill, N. Y., commences a yearly ad in this issue. He breeds Buff Rocks, Buff Wyandottes and Single Comb White Leghorns. Mr. Ingalls' foundation stock was from the very best strains. His Buff Wyandottes are of the Piser strain; Buff Rocks of the Nugget strain, and his White Leghorns are from C. H. Wyckoff. Mr. Ingalls guarantees reasonable prices and a square deal.

---

A. C. Hawkins, of Lancaster, Mass., has recently made several shipments of Barred Rocks and White Wyandottes to Australia, New Zealand and Sweden. Mr. Hawkins has a world-wide reputation for fine poultry.

---

Darling & Company, Union Stock Yards, Chicago, start their new season's advertising with this issue of our paper. Their advertisement will be found on another page of this issue. Our readers will please remember these people as being the manufacturers of Darling & Company's celebrated Pure Poultry Foods. These are essentially meat foods and are absolutely free of admixture with other and cheaper substances. This fact accounts for the almost abnormal percentage of protein (60 to 65 per cent) contained in the Darling foods. Every intelligent breeder and feeder knows what this means. Our readers may correspond with these people with perfect assurance of fair and honorable treatment. Write them for their little booklet, "Fill the Egg Basket."

---

Mr. W. C. Denny, who has so long and satisfactorily held a prominent and important position with the Cyphers Incubator Co., has severed his connection with them to accept one as eastern manager of the Des Moines Incubator Co., of Des Moines, Iowa. His office will be located at 101-105 Erie street, Buffalo, N. Y. He extends a hearty invitation to visiting poultrymen to call upon him and make his office their headquarters while stopping in Buffalo. We congratulate the Des Moines Incubator Co. upon the accession to their force of so valuable a man as Mr. Denny.

---

We have just been gathering some nice plums from a tree in our poultry yard, and as we see how easily they are grown and note what an advantage the shade rendered is to the fowls and chicks, we cannot help but advise all poultry men to plant plum trees in the poultry yards if space permits. To prevent the fowls from dusting about the roots place bricks, stones or boards around the trees. This is a sure and cheap method. Fowls should always have plenty of shade, it is as necessary as sun. The craze used to be for grass. That has subsided, but some seem to overlook shade, and think it of small importance. The contrary is the case, however.

## NOW IS THE TIME TO PAINT.

The Heller Chemical Co. of Chicago, Ill., whose advertisement appears in this issue, have just issued one of the neatest paint catalogues ever sent through the mails. It contains a fine color page showing 60 distinct colors for out and inside painting; for barns, fences, floors, carriages, wagons, enamels and stains. It is the most complete paint line ever sent out in a catalogue. Besides this fine color selection there is a splendid line of brushes, also painters' supplies of all kinds, offered at prices that it would be impossible to duplicate elsewhere. This company is one of the largest manufacturers of paints in the country and has been to a good deal of expense in getting up this catalogue and making it complete in every detail. They carry a complete line of oils of all descriptions, and sell nothing except the best that can be made. They have made this catalogue especially for the mail order customers and our readers will make money by sending for one, especially if they have any painting to do this fall. The prices are away below what the same goods can be bought for elsewhere and the company guarantees to make good every statement made in their catalogue, so that none of our readers need fear being deceived in any way, as the Heller Chemical Company is thoroughly reliable in every respect Be sure when writing to ask for their paint catalogue, and kindly mention this paper. These paints are all mixed and ready to put right on.

## PULLETS SHOULD BE LAYING.

Young pullets hatched in March and April ought all to be laying this month. Later hatched ones if not laying by November will probably, if left to themselves, not lay before spring, when eggs are down to 15 cents per dozen. A well known poultry farmer showed us recently his account for last December with 125 pullets. The net profit for that month from eggs alone was $39.39; from the same pullets in April following the profit was $14.97, and he got 50 dozen more eggs in April than in December. Now this is a striking lesson to all who keep hens for profit. Get all the eggs you can at this season; if other crops are short, eggs always bring cash. Probably 45 cents per dozen by Christmas. Therefore get the pullets to laying early when prices are highest. Rev. S. W. Squires, of Franklin, Mass., says: "For the purpose of seeing how many eggs I could obtain last winter from twelve hens, I used four large cans of Sheridan's Condition Powder. I believe it is the best preparation known to increase egg production. I saved part of the eggs for hatching after forcing the hens four months for all they were worth with Sheridan's Powder, and I never had a greater percent of fertile eggs or more vigorous chickens. In brief, I do not believe I can afford to be without the powder to give health and vigor to young hens." If you cannot get it near home, I. S. Johnson & Co., Boston, Mass., the only makers of Sheridan's Powder, will send for 50 cents two 25-cent packs, five packs for $1; or for $1.20 one large two-pound can of powder, postpaid; six cans $5, express prepaid. Sample copy of the best poultry magazine sent free.

## A REMARKABLE SUBSCRIPTION CAMPAIGN.

The well-known magazine "Success," of New York, has just completed one of the most novel, and, in its results, extraordinary campaigns for subscriptions, ever undertaken by an American publication. About a year ago, it secured from some of the strongest periodicals in the country, unusually low prices for annual subscriptions, and, combining an annual subscription to "Success" with subscriptions to other magazines, it extensively advertised "Success Clubbing Offers" at large reductions from regular prices. The result has more than justified the confidence of "Success" in the ability of the great American public to absorb periodical literature. Not only has it added over 150,000 subscriptions to its own list, but it has sent "The Review of Reviews" nearly 80,000 new subscriptions: the "Cosmopolitan," between 50,000 and 60,000; "McClure's," over 30,000, and other magazines many thousands each. This campaign has completely revolutionized prevailing ideas about circulation-getting, and "Success" will undoubtedly have some competition in this line next fall, but it has just completed contracts with the strongest and best magazines in the country for the subscription season just opening, and it is understood that the "Success" offers will be even more popular this year than last.

"Success," itself, is one of the clearest and most "up-to-date" magazines published. It is bright, cheerful and optimistic,—and inspiration and *life* are in every page. In a thousand different ways, direct and indirect, it tells how to lay the foundations of true success in life,—how to climb the ladder of achievement. Its contributors include the best-known names in politics, religion, science, art, literature, and industry. Business men of the highest standing—men who will write for no other periodical—are willing to give the readers of "Success" the benefits of their wide and valuable experience. The illustrations of "Success" are by the best artists in the country, and the inspiration of a lifetime has come through its columns to thousands of "Success" readers.

**A. A. EVANS, Bement, Ill.,**

**BUFF COCHINS, BARRED P. ROCKS.**

Eggs in season, $2.50 per 15.
A few Buff breeders at $1 and up.

**Butler's Wh. Wyandottes**

**and Light Brahmas.**

Our Brahmas from Ella Thomas matings have splendid wing, tail and hackle feathers, with the typical Brahma shape. Our Wyandottes are direct Duston strain. Cocks and hens still pure white and fine in every particular.

**THOS. H. BUTLER & SON, 218 N. Taylor st., Oak Park, Ill**

**Barred and White Rocks.**

I won 1st on White Rock pullet at the Mazon Show, 1900, score 95½. Russell, judge. None scoring under 92½. My Barred Rocks won 2d on pullets at Joliet, Dec. 13, 1900, score 92½, Hewes, judge. None scoring under 91. Eggs, Barred Rocks, $2 per 15. White Rocks, $3 per 15 or $5 per 30. Guaranteed fertile. Circular free.

***JOHN CULBERT, Braceville, Ill.***

**Brown Leghorn Cockerels**

**Each $1 Each.**

# News and Announcements of Poultry Associations and Specialty Clubs.

## THE CHICAGO SHOW.

The Sixth Annual Exhibition of the National Fanciers and Breeders' Association of Chicago, will be held Jan. 20, 21, 22, 23, 24 and 25, 1902.

Cash prizes, according to competition, will be paid in Poultry, Belgian Hare, Cat, Dog and pet stock departments as follows:

Twelve Entries in Class—First prize, $5; second, $3; third, $1.50; fourth, $1; fifth, 50c.

Eight Entries in Class—First prize, $3; second, $2; third, $1; fourth, 50c.

BREEDING PENS.

Six Entries in Class—First, $6; second, $4; third, $2.50; fourth, $1.50.

Four Entries in Class—First, $4; second, $2.50; third, $1.50.

Two Entries in Class—First, $3; second, $1.50.

One Entry in Class—First, $1.50.

IN PIGEON DEPARTMENT.

Five Entries in Class—First, $2; second, $1; third, 50c.

Four Entries in Class—First, 75c; second, 50c; third, 25c.

Two Entries in Class—First, 50c; second, 25c.

One Entry in Class—First, 25c.

Liberal specials will be announced later.

In addition to all other prizes, the association will give as specials in all departments, on all breeds, varieties and classes an amount in cash equal to fifteen per cent of amounts offered by specialty clubs, breeders, exhibitors or fanciers.

The entry fee will be $1 per specimen for poultry, Belgian Hares, Cats, Dogs and pet stock, and fifty cents per each specimen for pigeons.

*Fred L. Kimmey, Sec'y.*

## THE DAYTON, OHIO, SHOW.

The Gem City Poultry Association of Dayton, Ohio, is actively engaged in arranging for its Third Annual Exhibition, to be held January 2-7, 1902. Judging from the numerous and generous responses we are receiving our next show will outclass all previous ones in every respect. From the beginning this association has never failed to pay all premiums in full, and this fact has made it popular with breeders and exhibitors far and near. The quality of birds heretofore shown has been second to none. The management are determined to make our next show the best in this part of the state, and in addition to offering great inducements, have added several new features. Mr. Jas. A. Tucker, of Concord, Mich., will place the awards. He needs no introduction. A score-card by him is one to be proud of and a credit to any exhibitor. Premium list will be ready for mailing about Dec. 10. All information cheerfully answered by addressing

*Theo. Faulstich, Sec'y.*

## AMESBURY SHOW.

The Eight Annual Exhibition of the Amesbury Poultry and Pet Stock Association will be held at Amesbury, Mass., Dec. 4, 5, and 6, and the management proposes to make it the largest and best ever held in the history of the Association. The hall, in which it will be held, is one of the best in the State for a poultry show, it being on the first floor and well lighted and heated. Mr. I. K. Felch will officiate as judge, and the decimal score card will be used. The premium list is now in course of preparation, and any one who may wish advertising space or to donate special premiums, should correspond with the secretary. All donations, whether large or small, will be fully appreciated. $14 in cash in regular prizes is offered on each Standard variety. The list of specials includes a number of silver cups, one of which is sterling silver, gold lined. Belgian Hares, Pigeons and Cats will have special classifications, and will be well provided for. All birds, scoring 90 or more and not winning a first, second or third prize, will be given cards of merit. Premium list will be ready about Nov. 10, and will be mailed to all who request it.

*M. H. Sands, Secretary.*
*Amesbury, Mass.*

## THE CEDAR RAPIDS SHOW.

Unless all indications fail, the Seventh Annual Exhibition of the Western Poultry Fanciers' Association to be held Jan. 13-18, 1902, will be the largest exhibition of poultry, pigeons, hares and pet stock held in the mid-west. The association has paid out upward of $10,000 in premiums to its exhibitors, and has always been noted for its promptness, the care given exhibits and the fair start and no favors granted to exhibitors, the liberality of its prizes, its method of cooping and handling large shows. This year will be no exception, as all efforts are being made to eclipse all former efforts. Remember the dates. All desiring catalogue or information should address

*E. E. Richards, Secretary.*
*Cedar Rapids, Ia.*

## NOTICE.

The National White Wyandotte Club have unanimously selected Chicago as the place to hold their next annual meeting. The exact date of same will be announced later.

*Geo. G. Brown, Sec'y. and Treas.*

## ANNUAL AND SPECIAL MEETING OF THE AMERICAN PLYMOUTH ROCK CLUB.

The Eleventh Annual Meeting of the American Plymouth Rock Club will be held at Philadelphia, Pa., Dec. 30, 1901. A large attendance and a grand meeting is assured. Donations for special premiums should be had at once, so that they may appear in the premium list with due credit to donors.

By order of the executive committee, a special meeting of the club will be held at the Pan-American Poultry Exhibit, Buffalo, N. Y., Thursday, Oct. 24, 1901. An enthusiastic meeting is promised. The clubs' special premiums added to those of the exposition insures a large and choice display of Barred Plymouth Rocks.

## Reliable Breeders' Directory

OF THOROUGHBRED POULTRY.

We believe all breeders whose names appear below to be thoroughly reliable and honorable, and their stock to be of superior quality. Address will be inserted in the JOURNAL for such breeders as can satisfy us upon the above points, and that their stock is thoroughbred, for $2.00 per year, payable strictly in advance. Those who breed more than one variety, can have address under other headings (after the first) for $1 for each variety.

*Erie, Pa.* *Wm. Sapper, Sec'y.*

## FANCIERS' ASSOCIATION OF INDIANA.

DATES CHANGED TO DEC. 4-10, 1901.

At a meeting of the Fanciers' Association of Indiana, held September 19th, the following officers were elected: President, Lora C. Hoss, Kokomo; First Vice President, C. J. Ward, Irvington; Secretary, C. W. Hackleman, Indianapolis; Treasurer, H. D. Lane, Indianapolis. The above named officers and the following members were placed on the Executive Committee: Ed. B. Murphy, Carmel; D. B. Shideler, Indianapolis; F. R. Hale, Shelbyville; R. E. Jones, Flat Rock, and J. W. Alvis, Indianapolis. At a meeting of the Executive Committee, held September 20, the following members were appointed Vice Presidents: Harmon Bradshaw, Lebanon; Wesley Lonius, Greensburg; L. L. Moorman, Winchester, and C. R. Milhous, Spencer.

Owing to the association's inability to get the use of Tomlinson Hall for the date previously claimed, it was decided to hold the show one week earlier, which will be December 4-10, 1901, when it is expected that the largest exhibition ever given in the state will be held. Well known and competent judges will be employed for all classes, and the score-card system will be used for judging the poultry. Special attention is being given to the departments for dogs, cats, pigeons, Belgian hares and all kinds of pet stock. The premium list will be ready at an early date and a copy will be cheerfully sent to any one on request to the secretary.

A guarantee fund is being largely subscribed to by the members of the association, which insures that all premiums and other expenses will be promptly paid. Breeders should bear in mind that this will be one of the largest score-card shows of the season, and if you do not win a place you have a card for your bird, by a prominent judge, which alone is worth more than the entry fee. Further information will be promptly furnished upon request to the secretary, C. W. Hackleman, 818 Majestic Building, Indianapolis, Ind.

## INDIANA STATE FAIR SHOW.

The usual large numbers of birds was not there but quality was very good, the late spring being responsible for this, as the young stock showed. Those big, early hatch specimens were limited, yet some classes showed up well for size. The birds were all in and cooped by Monday evening and judging commenced Tuesday morning and Tuesday evening the show was all judged and ribbons up. The work was done by Ben S. Myers, Crawfordsville, Ind.; R. E. Jones, Flat Rock, Ind.; U. R. Fisher, Hope, Ind.; Bob Hale, Owensboro, Ky., no poultry. J. W. Alvis, Indianapolis, Ind., on Belgian hares. As usual the B. P. Rock class was a warm bunch and some great color was shown. George Muck, of Edinburg, Ind., came out as usual with a goodly number and walked off with the male bird premiums, while E. B. Murphy, Carmel, Ind., was a close second and came out in the lead on Pullets.

The White Rocks were not as numerous as usual but some good specimens

**Partridge Cochins, Barred Plymouth Rocks.**

Bred by the single mating plan—the only correct way. Also Buff Cochins, Light Brahmas and Bronze Turkeys. Stock and eggs at reasonable prices. Send for illustrated catalogue. Sharpest and best grit 150 lbs. for 50 cents. Agent for Cyphers Incubator. Stock carried.

## PHELPS' WHITE PLYMOUTH ROCKS

Are prize winners. Size, shape, color. I hold the White Plymouth Rock Club diploma for best pen in the state, won at Club meeting, Columbus, O., Jan., 1900. I have the best strain of line-bred White Rocks in the U. S. Have never been beaten. Show birds that will win. Breeders that will breed right. Old and young stock. Prices right. Eggs, $3 per 13. Write.

**FRED J. PHELPS, Bucyrus, Ohio.**

I have sold the winners at the largest shows. They win for me; they will for you. Try them.

were shown and color was extremely clear. E. B. Murphy again made "himself prominent" in this class, and took the pullet prizes, while J. R. Mathes, of Boggstown, Ind., was leading in the cockerel row.

Buff Rocks was a good class also but short in numbers. Here we saw some of those soft buff colored birds with solid buff wings and tails, both in males and females and A. L. Weckler, Bunker Hill, Ind., shows his careful labor and painstaking in mating; his first and second cockerels were even all over in color, as was also his winning females. To look at his exhibit was enough to prove this, for they looked as one family, a distinct type in color and shape.

The Wyandotte alley was full of quality and some grand birds were shown, in Silvers. The old birds were not in the pink of condition but were good. The young birds were not up to size of former shows but the quality was there.

In Whites there was the best bunch of hens I have seen this season. They had size, shape and color. The first and second cocks were both grand in shape and color. Cockerels were not developed enough to show their shape well, but color was there, the pullet class was good in size and color.

Goldens was the largest class ever shown at the fair and quality far above the average. Here we found some grand open centers with narrow black lacing The first and second cocks were grand birds and the first pullet was laced all over and a back free from mossy centers, so seldom found in the Wyandottes.

Buff Wyandottes was a small class but some very good birds. In the Asiatics there was a heavy show all the way through, Light Brahmas taking the lead, a big show and of the highest quality. F. P. Johnson, Howlands, Ind., and J. C. Fishel & Son, Hope, Ind., taking the bulk of the ribbons. Mr. Johnson's first cock was a handsome bird and in fine shape as was his first pullet. Fishel & Son came out with a big string and had cockerels up to weight with color to spare. They captured both places on cockerels and they well deserved it. Down the cochins line we found a string of good ones and of the proper shape with color well up to the Standard. The Buffs took the lead and some great color was shown. Langshans was not a large class, but had plenty of quality, and here we found some good shape and color also.

Mediterraneans were out as usual. A great show of Leghorns, the Browns taking the lead, and some grand colored specimens were shown. The first and second cockerels had that striped hackle and saddle that the Leghorn breeders so much desire. First and second pullets were of the proper shade and had penciling like it must be. "Murphy of Course" is what the boys said. He always gets "his hooks" in the ribbon basket when it comes to Brown Leghorns, Whites and Buffs were good and there was a good show all around.

The small breeds was a good show and some high quality was shown. The leading show in the Bantam row was Buff Cochins. Here we found a great show and quality that made us look close to pick the winners. W. A. Graffis, of Logansport, Ind., took the big end of it and had a fine show of them. He also purchased the first prize pen of "Big" Buff Cochins and is going after some of the boys in this class. He is a cochin man all over and showed a nice string.

Turkeys, geese and ducks were all

## Partridge Cochins

STROHM, FISHER & CO. Evansville, Ind.

there in full force and some good specimens were brought out. It was impossible to get a full list of the winnings correctly in time for this issue, so the AMERICAN POULTRY JOURNAL advertisers can send in their winnings and they will be published.

*Flat Rock, Ind.* *R. E. Jones.*

The tenth annual show of the Missouri State Poultry Association will take place in the Town Hall, Chillicothe, Mo., Dec. 9 to 13, 1901. W. S. Russell and F. H. Shellabarger judges. The breeders of Barred Plymouth Rocks will have the greatest opportunity ever offered in the West to make a record and the successful one will certainly have something to "blow about."

Mr. Wm. Ellery Bright, of Waltham, Mass., the well-known breeder of Barred Plymouth Rocks and S. C. Brown Leghorns, has offered a silver cup, made to order, undoubtedly the finest cup ever offered at any poultry show in the West. It is silver, gold lined and stands 18 inches high, and is valued at $75. It is handsomely engraved. The Barred Rock Cockerel engraved on the cup represents "Century," first prize Cockerel at Boston, 1900, which bird Mr. Bright sold for $100, hence name "Century." The cup will be known as the "Grove Hill Trophy," after "Grove Hill," Mr. Bright's poultry farm. It is offered for the two best Barred Plymouth Rock cocks, two hens, two Cockerels and two Pullets, making eight birds. The party that can win this cup and advertise that they won it on eight such Barred Rocks as enumerated above, will be in the poultry business good and strong for the next twelve months. Competition is open to the world, and winners are keepers. It is only necessary to win it once.

Other breeds are also well provided for, the Association offering the most liberal cash premiums of any show in the country, and what is more, paying them every time. Send for premium list to C. W. Nuss, secretary, Tina, Mo.

The Fort Black Poultry and Pet Stock Association will have their premium list ready for distribution about October 20. The secretary, Mr. A. C. Carney, Eldorado, Ohio, requests us to state that premium list will be mailed to all applicants as soon as it is ready for distribution.

The sixth annual exhibition of the Poudre Valley Poultry and Pet Stock Association will be held at Fort Collins, Colo., from January 28 to February 1, 1902. Poultrymen in this section of the country have been unusually successful in raising large flocks this season and the success of the Fort Collins show is again assured.

The Interstate Poultry and Pet Stock Association will have their second annual show at Wabash, Ind., on January 22 to 28, 1902. W. S. Russell, judge. B. F. Clemans, secretary and treasurer.

The Upper Iowa Poultry Association will hold its Sixth Annual Exhibition at Mason City, Ia., Dec. 17 to 20, 1901. This show attracted a great deal of attention last year all over the state on account of its liberal premiums which were promptly paid. The Association will be more liberal this season, and will again be under good management. F. H. Shellabarger will judge, and any inform-

A Sick Hen

or a molting hen needs SHERIDAN'S CONDITION POWDER. It puts her in condition, makes the plumage grow quickly and gives the gloss so attractive in show birds.

Sheridan's CONDITION Powder

will make chickens healthy and keep them up to the mark. Makes young pullets early layers for October egg prices. If you can't buy it near home we will send one package 25 cents; five, $1.00; 2 lb. can $1.20; six, $5.00. Ex. paid. Sample poultry paper free.

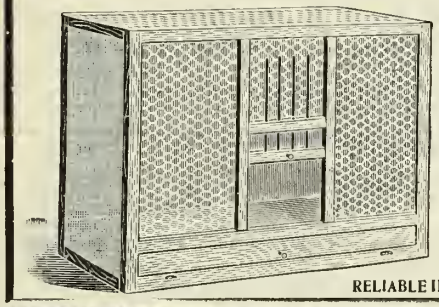
I. S. JOHNSON & CO., Boston, Mass.

Molting Hens

If your hens are shedding their feathers and not laying, they are out of condition. The best poultry authorities say, "When hens are in condition they will lay perfect eggs and plenty of them." Then help them over molting time or your egg profit will be lost. SHERIDAN'S CONDITION POWDER will help the molting hens. The process of molting is a very exhausting one. The growing of new feathers requires all the nitrogen and phosphates in the food, so that there is an extra demand upon the strength. The elements needed by poultry at molting, in addition to good food, are contained in SHERIDAN'S CONDITION POWDER to a high degree. Thousands of poultrymen have proven it to be worth its weight in gold for molting hens.

When your hens show signs of molting, feed them once daily, in a hot bran mash, SHERIDAN'S POWDER as directed. Do this and you will have as others do who have tried the plan, an abundance of eggs to sell in the fall and winter months.

These RELIABLE Exhibition Coops



are the *neatest, most roomy* and *most convenient* coops made for the purpose. They are *exceptionally strong* and will restrain fowls *without injury*. RELIABLE INCUBATOR & BROODER CO., Box A-I, Quincy, Ill.

Ducks from Door-knobs.

Some incubators promise everything in sight; either ducks from door-knobs, or chicks from china nest eggs, and a full grown bird in a week or two. The

PETALUMA INCUBATOR

won't do that. It's just a good incubator—made for hatching eggs in the best possible way. It is made on scientific principles, of good honest material, by honest workmen. Consequently it will do all that a good incubator ought to do. We think our construction is a little better than any other; we are sure we take pains; we know we please the people. If you are looking for a machine that will hatch all the fertile eggs, you'll be interested in THE PETALUMA. Our large illustrated catalogue is sent free upon request.

We pay freight anywhere in the United States

We make a good brooder too.

Petaluma Incubator Co., Box 150, Petaluma, Cal.

ation desired will be given by the secretary, *Jno. D. Reeler.*
*Mason City, Ia.*

The Illinois Fanciers Association will hold its annual show in Lanark, Ill., commencing January 15, 1902. The secretary, Mr. E. D. Leland, of Lanark, states that they are hoping to make this one of their best exhibitions. Quite an interest is being taken and the display will not be lacking in either quality or quantity.

The Shelby Poultry and Pet Stock Association will hold their annual show January 28 to February 1, 1902. This is the third exhibition of this association, each one of which has proven successful. Some very attractive specials and cash prizes will be offered and a special effort will be made to attract the best breeders of Ohio to the show. Charles McClave will judge the birds. Premium list may be had by addressing E. P. May, secretary, Shelby, Ohio.

Fayette Fanciers' Association, Connersville, Ind., have selected December 2d-6th as the dates for holding their annual show. S. B. Lane, judge; E. C. Brattain, secretary, Connersville, Ind.

The Burlington Poultry and Pet Stock Association has been organized and arrangements made for holding a successful show at Burlington, Iowa, December 16, 17 and 18. W. S. Russell has been engaged to place the awards. Some of Iowa's most prominent and energetic fanciers are connected with this association, and their exhibition will, undoubtedly be a success. Mr. John A. Dehner, of Burlington, was elected secretary.

The Des Moines Fanciers' association will hold their first annual show at Des Moines, December 23-28, and present indications are that this will be the largest show ever held in Iowa. F. H. Shellabarger and W. S. Russell will place the awards. Premium list and full information may be obtained by addressing Charles H. Clarke, Des Moines, Iowa.

Dallas County Poultry and Pet Stock association will hold their first annual show at Redfield, Iowa, January 7, 8 and 9, 1902. Liberal cash premiums are offered. Thomas F. Rigg will act as judge. A. Moorman of Redfield, Iowa, is secretary of the association.

The Carlinville Poultry club will hold their third annual show November 26 to 29. They have engaged Judge Butterfield to place the awards. The secretary, Mr. Perry Duckles, Carlinville, Ill., will send premium list to all interested persons.

The fifth annual show of the McDonough County Poultry association will be held at Macomb, Ill., December 16 to 21. A. B. Shaner, judge. The cash premiums will be liberal and the association has sufficient cash in bank to pay every one of them. Their motto is: If you win a premium at Macomb, you get it promptly. W. E. Thompson, secretary, will mail a premium list to all who write for one.

Plans are about completed for the next show of the Muscatine County Poultry and Pet Stock association, which will be held at Muscatine, Iowa, January 8 to 11. Shellabarger and Warnock will officiate as judges. The association intends to make special inducements to all par-

ties owning good birds to show at Muscatine this year. They will put up $500 in cash prizes. They will also give an elegant $25 medal to the incubator company whose machine hatches the largest percentage of chicks at the show. Premium lists can be procured by addressing G. M. Porter, secretary, Muscatine, Iowa.

The first annual show of the Western Michigan Poultry and Pet Stock Association will be held in Muskegon the last week in January, 1902. Mr. P. P. Stekетee, Muskegon, is the secretary.

The Cedar Valley Poultry and Pet Stock Association will hold its fifth annual show at Waterloo, Ia., Dec. 31st to Jan. 4th. D. J. Lambert and W. E. Walden are the judges, and C. A. Hollis, Hudson, Ia., secretary.

## AN EXPORTATION OF WHITE WYANDOTTES.

B. G. Smith, of Elmira, N. Y., received on Sept. 10 the second large export order this year for his famous White Wyandottes. The shipment consisted of fifty pullets and ten cockerels. The shipment was made via the United States Express and steamer to Grandberg, Germany, showing by this that Mr. Smith is as well known in Europe as in America. This same customer was at Mr. Smith's farm last year and purchased twenty birds. He now forwards another order, as above mentioned. This is the best possible evidence of Mr. Smith's reliability.

## CURE FOR BOWEL TROUBLE IN TURKEYS.

Mrs. A. Northrup of Morley, New York, writes us that she cures the most severe cases of bowel trouble in turkeys with sumac buds. She takes a handful of the buds and pours boiling water over them, putting in enough buckwheat to feed the birds for two days. We would suggest that our readers give this a trial. If it is good for turkeys, we see no reason why it should not be beneficial for other fowls.

## FOR A JUDGE AT FAIRS.

T. E. Orr, having retired from the *National Stockman and Farmer* that he may have a more active outdoor life, is open to a few engagements to judge live stock and poultry. An intimate lifetime acquaintance with fine-wool sheep and fancy poultry, and fifteen years' study of other classes of live stock as shown at leading fairs, fit him well for such a position. He may be addressed at 539 Liberty street, Pittsburg, or in care of this office.

## PERFECT CHICK FEED.

HEMATITE, Mo., June 18, 1901.

*Mr. W. F. Chamberlain, Kirkwood, Mo.*

DEAR SIR: You will please find inclosed a Pacific Express money order for $2.50, for which I will thank you to send another 100-pound sack of chick feed to me as soon as possible, as I am nearly out of same and find your feed worthy of the highest praise. Yours,

*D. W. Carroll.*

Honesty pays in the long run. Many people have had this demonstrated in the poultry business.

## The Price

of this splendid Exhibition Coop

## is Only $1.

If you have not our catalogue, send for a copy at once. It describes and gives lowest prices on all articles used by poultrymen. We are printers of catalogues, stationery or anything you may wish. The use of a big line of poultry cuts free. This is the new style Leg Band manufactured by us. It is unequalled. Price, post-paid, 17c per dozen. State breed of fowl. Write us your wants and we will make you estimates.

J. A. & W. S. HARRISON, Box C, Henry, Ill.

## Rhode Island Reds.

### The General Utility Fowl of the Twentieth Century.

Our WINNINGS the PRESENT year demonstrate without a doubt that we have MORE PRIZE WINNERS than any breeeer in the country. Having won in 1900, nine firsts and sweepstakes for best male, Concord State Fair, Concord, N. H. Eight first and and second, nine entries, at Brockton Show. Two firsts and special for best R. I. Red male birdin Fall River. Six first prizes, six entries, Malden, Mass. Forty-two prizes Philadelphia, including the special offers of $50 in gold and $25 in gold; also including nine firsts and nine seconds out of a possible ten each.

**1901**

Boston Show in the hottest competition, forty-eight prizes, including four firsts, three seconds and eighteen specials. At New York, seven firsts, five seconds. Which is a result unequalled by any breeder of any variety of any fowl. If you desire to obtain stock from the very best that there is, state what you want and write us for quotations.

**HOUSE ROCK POULTRY FARM,**
**Wollaston, Mass.**

## 50 CHOICE BIRDS.

Yearling Barred Plymouth Rock breeding and exhibition hens for sale. They are the kind that will not disappoint you.

**D. T. HEIMLICH, Jacksonville, Ill.**

## WANT

the name and address of every man, woman and child who reads the A. P. J. that is interested in Plymouth Rocks, White Wyandottes or B. C. Bantams. They will send you something.

Address WATT & CAMPBELL, Lacon, Ill.

TO MY FRIENDS AND CUSTOMERS.

I have sold my entire stock of Golden and Silver Wyandottes to Mr. R. E. Jones, of Flat Rock, Ind., and with the stock goes my good-will, my influence and my best wishes, and I would consider it a great favor if my friends and customers would continue to give the trade they have always given me to Mr. Jones.

They will find him a square, upright man—a breeder that has few equals—and I feel confident that my stock, under his care, will keep on improving, and as heretofore keep on winning wherever shown.

Among the stock sold Mr. Jones are all my prize-winners, Silver and Golden Queen, two birds never beaten; also Silver King; in fact, all my stock. I reserved nothing, not even one head of breeding stock. Of young stock he has made arrangements to take the pick of it, which will probably be some 250 head of fine youngsters. Yours very truly,

*Crescent Poultry Farm,*
*F. F. Davison, Prop.*

*Shousetown, Pa.*

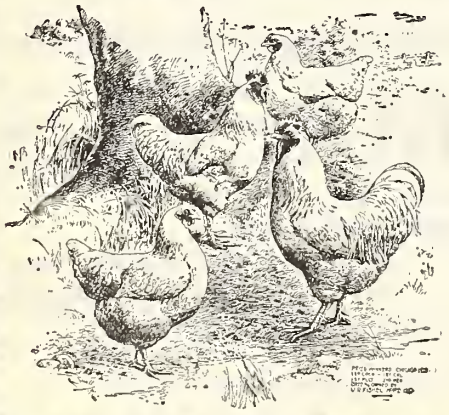
The above birds added to Mr. Jones' flock places him amongst the leaders in Silver and Golden Wyandottes. While these birds are, undoubtedly, valuable additions to his flocks, we doubt if they are superior to the birds bred by Mr. Jones. He is an old and experienced breeder and each season exhibits his stock in the strongest competition. We have seen his birds a great many times and know whereof we speak. His past show record, however, is the best evidence of the quality of his birds, and our readers well know his record is not surpassed by any other breeder.

S. C. WHITE LEGHORNS.

I am willing to produce any kind of evidence, both show records and personal opinions, to prove that I breed the very highest quality of White Leghorns. If you were satisfied of the fact would you place your order with me? I will not ship a bird that scores less than 90 points and guarantee absolute satisfaction. My birds have won the best prices at St. Louis, Indianapolis, Louisville, Ky., and New Albany, Ind. Scores as high as 96½. Write me before you buy. Mention AMERICAN POULTRY JOURNAL.

*Bedford, Ind.* *Sid Brooks.*

## FISHEL'S WHITE PLYMOUTH ROCKS.



***AT CHICAGO, 1901***—Won 1st, 2d, 3d cock, 1st, 2d, 3d cockerel, 1st, 2d, 3d pullet, 2d, 4th, 5th hen, 1st, 2d, 3d pen, the American Poultry Association's cup for best 2 cocks, 2 ckls., 2 hens, 2 pullets, all American breeds; the Rigg challenge trophy for best display American class; gold special best display Plymouth Rocks; gold special best display White Plymouth Rocks; gold special best cock, gold special best cockerel; gold special best pullet.

***AT NEW YORK STATE SHOW***—1st, 2d cock, 1st pullet, 2d hen, 2d cockerel, 1st and 2d pen. Winning 8 out of possible 10 prizes.

U. R. FISHEL, Box A, Hope, Ind.

# Questions and Answers.

Our Subscribers are invited to make use of this department whenever we can be of service to them. All questions are answered in the order in which they are received. If your question is not answered in this number, look for it next month.

*Editor American Poultry Journal.*

DEAR SIR—Will you please tell me if a pullet, which I bought last spring will ever be of any service to me? She had an attack of bowel trouble in April and was sick two weeks. Since then she goes on the nest every day and comes off cackling enough to have laid a dozen eggs, but she has never laid since her sick spell. She appears to be in the pink of condition.

*Hoosick, New York.* *E. F. B.*

We are unable to give you any positive information regarding the matter, and perhaps nothing but a post mortem examination would reveal the truth. An attack of bowel trouble could not in itself affect the egg production. This condition is often noticed in birds that have become stunted at an early age and never having fully developed.

*Editor American Poultry Journal.*

DEAR SIR—Will you please inform me if rye is just as good for poultry as wheat? *R. M.*

*New Philadelphia, Ohio.*

Wheat is probably the best of the grains, and rye is, perhaps, the poorest. In all experiments with rye, which have come to our attention, the results were not, in any way, satisfactory.

*Editor American Poultry Journal.*

DEAR SIR—Is there any virtue in cotton seed meal as a poultry food? If so, in what proportions should it be fed and in what manner? Is it equal to linseed meal for the same purpose, presuming that either are of value? If either are beneficial, what part do they play in the economy of poultry raising?

*Wellford, S. C.* *R. C. H.*

Both cottonseed meal and linseed meal are useful at times, but the latter is much superior to the former. Their value as poultry foods is about the same as a stock food. They may be fed for the purpose of regulating the bowels, and should be given at first in small quantities. Linseed meal is especially valuable as a poultry food during the molting time. It is rich in oil, and is, therefore, a heat producer. It assists in bringing about a quick molt and adds luster and gloss to the plumage. It should be fed mixed with ground grain, which should be given in the form of a mash. A quantity equivalent to one teaspoonful per fowl each day will be sufficient. As above stated, the feeding of it should be regulated by the condition of the bowels of the birds. It is not advisable to feed it the year around.

*Editor American Poultry Journal.*

DEAR SIR—Please tell me if I can keep thirty hens in a house twenty-four feet long, eight feet wide, six feet high in front, and five feet in the back, it to be divided into roosting, laying and scratching pens with a solid partition between the scratching pen and the other two. Should hens have offal meat while molting? I will have about one hundred and fifty hens and pullets next spring. Will it pay me to build five houses like the one above described and have yards 25x100 feet? The reason I ask these questions is because I lost my leg last summer and must find something to do that does not require too much exertion. All the money used in buying the place and erecting houses would have to be borrowed at about 4 per cent. Can you tell me of anything better to do?

*Carversville, Pa.* *E. J. M.*

We would not advise you to try and keep thirty hens in the kind of a house you mention. Such a house would be better if divided into two pens, 8x12, and not more than a dozen birds kept in each pen. They should have as much outside run as possible and not less than the amount you mention. It would be better and cheaper to make roosting and scratching rooms combined out of the pens. The floors should be covered about six inches deep with straw and the roosts made with dropping-boards beneath them, under which could be placed the nests. Considering the fact that the money required to start in the business would have to be borrowed, we would suggest that you go slow and try the business upon a small scale, not erecting more than the one house at present. Offal meat, if in good condition, may be fed in small quantities to fowls two or three times per week with beneficial results.

*Editor American Poultry Journal.*

DEAR SIR—Will yon please advise me if you think it possible for a man to make money out of poultry where the average prices for the year are six to twenty cents per pound for poultry and from six to twenty cents per dozen for eggs. I can get an eighty-acre farm for $75 per year and love poultry well enough to try the business at the above mentioned prices. All the experience I have had is what I have read.

*Heflin, Kentucky* *J. G. F.*

We do not know if you can make money under these circumstances or not. It would be possible for an experienced poultryman to make money under these conditions. If there are suitable buildings on the place and the ground is such that you could raise nearly all of your feed, you would not be running much risk in starting in on a small scale. The prices, which you mention, are very low and unless there would be some prospect of creating a better market, the outlook would not be unusually encouraging.

*Editor American Poultry Journal.*

DEAR SIR—Intend raising Buff Coch- EIGHTEEN-Poultry Arthur Wednesday ins. I have yards, well filled, 16x28 feet. No grass runs, no shade trees, but have a scratching shed 3 ft. wide by 6 ft. long; houses are 3 feet from the ground, 6 ft. long by 4 ft. wide. Would it be advisable to have vines (butter beans) growing over yards for shade in summer? Would a place as described be good for raising Buff Cochins?

*New Orleans, La.* *E. B. D.*

You can raise a few birds upon a place such as you describe, but you have about reached the limit as regards space. You will have to supply green food in

**Here's Your Chance.**

Prize winning Barred Plymouth Rocks. We will not set any more eggs this season, so will sell all the eggs from our best pens at half price—$1.50 per 15. No discount for large orders. ### Taylor's Remarkable Record on Bronze Turkeys.

Winning sweepstakes at Chicago's great shows three years in succession. Show birds a specialty. Stamp if convenient.

**S. H. TAYLOR, Sibley, Ill.**

President National Bronze Turkey Club. (Poultry Judge.)

some manner. The birds would eat the vines and not allow them to grow. It would be torture to confine the birds in bare runs of this size where they could see the green stuff growing and not be able to get it. Feather legged varieties will not do well in bare runs, as far as appearances are concerned.

---

*Editor American Poultry Journal.*

DEAR SIR—Please tell me what is the matter with my turkeys, and what to do for them. The eyes are very much swollen. The eye waters and it is very red. I have lost twelve in the last two weeks.

*Burdick, Ind.* *S. S. M.*

Your turkeys are evidently suffering from "swelled head," which is really an aggravated cold, which may be started by roosting in a draft. When the trouble is first noticed you may be able to check it by bathing the face with equal parts of warm water and vinegar, after which apply vaseline. One of the best remedies is Peroxide of Hydrogen, which you can obtain at any drug store. This should be sprayed upon the face and in the eyes.

---

*Editor American Poultry Journal.*

DEAR SIR—Will you please tell me how to treat "bumble foot," where to lance it, etc.?

*Lookout, Ind.* *G. H. W. S.*

Your question is fully answered in our reply to E. V. L. elsewhere in this department.

---

*Editor American Poultry Journal.*

DEAR SIR—About a week ago I discovered four of my chicks sick, with wings hanging down, neck drawn in and, in fact, looking pretty tough. Upon examination I found their crops distended with a watery viscid secretion and a great amount of gas. Their throats were affected to some extent with what I took to be canker. This A. M. I found five of my best chicks sick with the same trouble and at noon I found seven more, making twelve in all. I feed plenty of grass and green vegetables. Mash in the morning together with table scraps. Wheat at noon in the scratching shed. Cracked corn, barley and rye at night. I feed raw beef scraps once or twice a week and keep plenty of fresh cold water, grit and crushed oyster-shells before them all the time. Please tell me what I can do to stop this disease. *E. F. R.*

*Kenosha, Wis.*

It is exceedingly hard to be of service in cases of this kind where one is not thoroughly familiar with all the surroundings. We do not know the quantity of food you give neither do we know the condition of your flock, as regards their being overcrowded. You are evidently feeding them something that sours in the crop. We doubt if it is possible to cure the chicks after they reach the stage which you describe. We would advise you to cut out the table scraps from the bill of fare. These are too rich and concentrated for chicks and especially if fed in large quantities. Do not over-feed them upon anything. Keep them so that they will always be willing to scratch in litter for grain. Do not feed them the raw beef for a week or two and then only a moderate feed once each week. Feed them twice a day for a while, giving them mash in the morning, in which has been placed a liberal quantity of ground charcoal, for the purpose of sweetening the crop. Give them all the green food they will eat, and see that

**Bluford, Ill.,**

Will sell eggs for hatching after Feb. 1st from farm-raised Buff and Barred P. Rocks and S. L. Wyandottes. Yards headed by prize-winning males, scoring 94½ to 92, Stock raised from eggs purchased from me will not disappoint you. Correspondence promptly answered.

they are well supplied with grit. Give them wheat at night, but make them scratch for it in the litter, and, above all things, see that they are absolutely free from lice, especially the head lice. We believe if you will adopt this method with the well chicks which you now have, you will have no further trouble.

---

*Editor American Poultry Journal.*

DEAR SIR—Please tell me what is the matter with my fowls. They have lumps from the size of a pea to a hickory-nut. Some come on the head, but about 90 per cent of them on the feet. All the birds are not afflicted, but some have been during the entire year, that is, different ones at different times. Can you tell me what to do for them?

*Lacon, Ill.* *E. V. L.*

In the absence of more explicit information, relative to the character of the lumps, will say that those on the head are probably scabby, excresences, commonly known as 'sore head." This can be cured by frequent applications of carbolated vaseline. The lumps upon the feet are, no doubt, "bumble foot." This is generally caused by the birds jumping off their perches or other objects and alighting on the hard ground or floor. These lumps are similar to corns. Mild cases may be cured by confining the birds in pens deeply littered with straw, and by keeping them off the perches until the feet assume their former condition. In aggravated cases where the lumps are much swollen, it will be found that they are filled with pus and it is necessary to make an incision in the swelling and clean it out, using, if possible, some antiseptic fluid. Anoint it with vaseline and pursue the same course as recommended with mild cases.

---

*Editor American Poultry Journal.*

DEAR SIR—Can you give me the address of any breeder of Golden Polish Bantams? *A. N. C.*

*Toledo, Ohio.*

We would refer you to breeders of Bantams who are advertising in AMERICAN POULTRY JOURNAL. You will find quite a number who breed several varieties, and you can obtain Golden Polish Bantams from some of them.

---

*Editor American Poultry Journal.*

DEAR SIR—Can you give me any information as to preparations on the market for preserving eggs and the nature and character of such preparations, whether in liquid or powder form, and the merits of them? I would also like to know if, in your opinion, a preparation that would keep eggs perfectly fresh for a year, could be readily sold to the farmers. *A. M. B.*

*Chicago.*

There are a great many recipes for preserving eggs, but the best and cheapest that we know of is the waterglass method, as described on page 602 of our last August number. We cannot take the space here to re-print it. We will send you a copy of that number upon receipt of 5 cents in stamps. No preparation has yet been discovered that will keep eggs perfectly fresh for a year. Such an article would, of course, sell readily.

---

*Editor American Poultry Journal.*

DEAR SIR—I have a White Wyandotte chick hatched May 3, and it is feathering out with buff feathers like the Golden Wyandotte, only white and buff instead

**Barred Plymouth Rocks**

**EXCLUSIVELY.**

Leffel strain. Two pens mated for exhibition. Eggs for sale. Pullet pen $2 per sitting; cockerel pen, $1.50 per sitting.

**THOS. McKEE,**
**Lock Box 11. Washburn, Ill.**

of black and yellow. I have no other kinds in my yards, but the white. Can you tell me what causes it?

*Columbia City, Ind.* *S. E. L.*

We are unable to account for the off feathering of your chick, unless at some time or other the ancestors of the bird have had Buff blood introduced into them. It is not uncommon to see these chicks feather out white and black, in which case it is a reversion to the Silver Wyandotte, provided the birds are descendants of a strain, which is originated from the Silver Wyandotte.

Mr. E. E. McCrea, of St. Paul, Minn., to whom we are indebted for the notes relative to the poultry exhibit at the Minnesota State Fair, was an exhibitor there and showed some of his Buff Rocks. He won first pair in fowls and first and third pairs in chicks, also second pen. This is a most excellent record, considering the fact that there are so many good Buff Rocks bred in Minnesota and that the exhibit at the State Fair was a large one. Mr. McCrea was also a heavy winner at the last exhibition of the Minnesota State Poultry Show at St. Paul in the strongest competition in Buff Rocks ever seen in Minnesota. When inspecting this stock at the St. Paul show, we predicted that Mr. McCrea would be found in the winning class this fall and winter and he has started in with an admirable record. He is a true fancier who breeds for quality rather than quantity. He is the Minnesota Vice President of the American Buff Plymouth Rock Club.

Old hens and pullets should not be kept together in the same pen. The food required by growing pullets will be sufficient to make the old hens overfat. There will be a loss in egg production from one or the other.

## A LITTLE OF EVERYTHING.

*Let Them Toughen.*

At this season of the year we are careful to avoid colds among young stock by allowing them to roost in coops with open fronts, which insures plenty of pure air that gradually cools with the outside temperature, consequently avoiding any sudden change from warm, stuffy air to the crisp frosty air of the autumn months. But don't keep them out too late or the warm winter house quarters will start them dying with roup.

*West Cairo, Ohio.* *H. E. Rinehart.*

*FEEDING.*

This fall I have the finest lot of young birds I ever raised, and they were fed principally on a mixed feed of grain, consisting of oatmeal, millet seed, cracked corn, wheat and oats. I find this to be one of the best feeds, from start to finish a practical breeder can use. Of course, now when fall is coming on, we use a little more whole corn. Rose Comb Buff Orpingtons and Sherwoods are my two breeds, and finer birds you never saw. *Jacob S. Handte.*

*Calla, O.*

*Rearing Young Chicks.*

See that they are hatched strong by compelling their parents to scratch for their grain. It does not matter what you feed them so long as you do not feed them for two or three days, and then see how little they will live on for at least three weeks. Watch for head lice, use good common sense in feeding young chicks and you will overcome the trouble that new beginners have in loosing 75 per cent of their chicks from bowel trouble.

*Glenshaw, Pa.* *Norman Baughman.*

*Start Right.*

Don't put your money in fine houses, patent feed troughs, etc., but put it in good fowls, buy the best and if only three birds, start in right. Grow in the business gradually. Gain in knowledge by subscribing for at least two poultry papers, and if you are satisfied with your success put an ad in the AMERICAN POULTRY JOURNAL. This will do the rest. *E. O. Thiem.*

*Denison, Ia.*

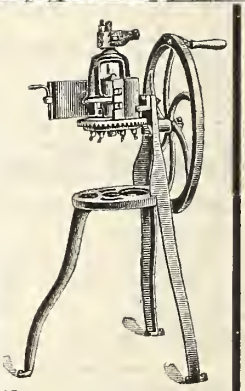
*Poultry Advertising.*

Fully 50 per cent of the advertisements in poultry papers can be improved 50 per cent. Another 25 per cent of them can be improved 75 per cent. This refers not only to appearance but to pulling power. An ad is of no use unless it brings business, and every advertiser is spending his money in that direction because he expects profitable returns. If he doesn't get them it's a hundred to one shot that the ad or the one who wrote it is to blame, and not the paper, as most ad-

A COMMON SENSE PROPOSITION

THE MANN'S 1902 Model BONE CUTTER.

New design, open hopper, enlarged table, new device to control feed. You can set it to suit any strength. Never clogs.



**Our Proposition is** to send our machine on **TEN DAYS FREE TRIAL.** No money asked for until you prove our guarantee on your own premises, that our 1902 model will cut all kinds of bone with adhering meat and gristle, easier and faster and in better shape than any other type of bone cutter. If you don't like it, send it back at our expense.

The reason bone cutting by the ordinary types of machine is such hard work, is that in them no account is taken of the varying degrees of hardness of bones, or the difference in the strength of different operators.

The positive feed machines feed hard bones as rapidly as soft bones and feed to a weak operator as rapidly as to a strong one. The hand feed machine—at best a crude and awkward arrangement—demands not only constant attention from the operator, but a strong left arm to hold the bone against the knives with sufficient pressure to make cutting possible. It is always a tiresome, temper-trying, unsatisfactory process, as everyone knows who has tried it. We have entirely overcome these difficulties in the Mann's 1902 Model. It has an adjustable automatic feed. You can set it to feed as rapidly or as slowly as you like; to run as hard or as easily as you like, to cut as fine or as coarse as you like. For this reason it is the only machine which a child or a woman can put to practical use.

*Overcoming difficulties.*

But that is not all. When you strike a hard place in bone it does not stall. The governor checks the feed the very second the bones begin to cut hard and allows the knives to cut off the portions they have bitten into, without further feeding. In other words, the machine—without any attention from the operator—feeds soft bones more rapidly than hard bones.

This feed—a very simple device in itself, free from complicated parts—is without doubt the greatest step forward ever taken in bone cutter construction. You need not take our say for this. Accept our proposition.

*A step forward.* Prove it on your own premises.

**OUR NEW BOOK** explains this self-governing feed in detail and shows how and why the Mann's 1902 Model cuts **all** bone, meat and gristle free from splinters and chunks; how it discards and wastes nothing that goes into the hopper; how its knives are easily sharpened and adjusted; how it cuts more rapidly than others; how its knives are in action all the time and not waving idly in the open air; how the hinged open cylinder gives instant access to all working parts for cleaning the machine and removing or adjusting the knives; how it is free from breakages and how you may **try it before you buy it.**

F. W. MANN CO., Box 56, Milford, Mass.

Bone Cutters, Clover Cutters, Corn Shellers, Granite Crystal Grit, Swinging Feed Trays, Etc.

vertisers suppose, who fail to get the expected returns. *W. H. Eaton.*
*..Detroit, Mich.*

*Roosting Coops.*

Give those growing cockerels and pullets plenty of room to roost at night. Small flocks to each coop, a wide perch, set well out from the wall. Keep coops clean and free from vermin. Go around once a month at night with a lantern and see if any coop is crowded. A coop tight on three sides and open on one side, with plat or wire is correct for summer. Better have ten good, properly grown birds to a coop than to have thirty or forty misshaped, undersized ones from over crowding. Many a fine bird is spoiled in the making.
*Lancaster, Mass.* *C. H. Latham.*

*Cleanliness.*

Keep the yard tidy and clean. At this time of year when the flock is about through the moult, we should be careful to keep the premises clean. The fall rains are likely to create bad conditions in the yard unless carefully cleared up, raked and burned. Don't let the spring and summer brood coops lie out in the storm. Clean out, whitewash inside and put away in shelter for next season. *Jesse E. Morgan.*
*Lemont, Ill.*

*Poultry Judging and Judges.*

While the writer believes the only true and correct way to judge poultry is by the score card system, to-day there is too much difference in opinions of judges. It has been suggested a number of times through the columns of our leading poultry journals that there should be a school or institute for judges to meet and get their ideas of applying the Standard to the different varieties more uniform, but this does not seem to materialize, but anybody who has the courage or cheek to think himself capable of deciding the superiority of birds brings his name before the people and gets a few friends to get him some private scoring and a small show or two and goes to work. This may be all right, but a score card is more valuable when signed by a judge of more experience and better known. This could all be bettered in our opinion if the American Poultry Association would take these judges and would-be judges, in hand and not recognize a score card signed by anyone who did not have a proper certificate to do such work. This could easily be done by having one or two old reliable judges in each state or territory, such as Rusell Shellaberger for Iowa, Hewes for Missouri, Heimliech for Illinois, Pierce, Indiana, etc., to whom new judges must go or have them meet them somewhere and score at least ten to twenty birds of each variety, entirely alone, and on the correctness of these score cards a certificate be granted as a commission to publicly do such work for which they may receive pay, but anyone doing this work without a proper certificate should not be recognized. As a recompence for a judge who issues a certificate the applicant should pay for same according to time taken by the judge. If the applicant were examined at a public show, where the judge was already engaged in the work, $5 to $10 would be a fair price, but where a man would make a trip especially for the work he should be paid accordingly, and whenever this is done we will have a better class of judges and very often the new

Leghorns, Light Brahmas, white and Barred Plymouth Rocks and Bantams. My birds are as good as can be found and I will ship them C. O. D. and allow examination at express office. I am the only C. O. D. poultryman in Ohio. Write and tell me what you want.
P. B. McCORMAC,
Maysville Ave., Zanesville, Ohio.

WHITE ROCKS,
—AND—

White Wyandottes.
My Rocks were winners at Chicago in 1900 and 1901. My Wyandottes are pure Duston strain and bred in line from stay-white males.
Prices for good breeders are from $2 to $5 each. Show birds at reasonable prices. Incubator eggs in all seasons at $5 per 100. A large number of March and April chicks to select from.
J. L. JEFFERSON,
Box A. Des Plaines, Ill.

Arnold's Buff Leghorns
Are the Oldest Strain in America, and have WON SINCE 1891 at NEW YORK, BOSTON, PHILADELPHIA, WASHINGTON and HAGERSTOWN, 314 Regular Prizes and 74 Gold and Silver Specials. We made our last exhibit at Madison Square Garden in 1900, and won on Buff Leghorns, 2 Silver Cups, 5 Gold Specials, 1st and 2d Pens, 1st and 2d Cocks, 1st and 2d Hens, 3d, 4th and 5th cockerels, 1st, 4th and 5th pullets. Our stock better this season than ever. We don't show and will sell the best show birds. Have your orders booked early.

Arnold's Buff Plymouth Rocks.
We bred from the 1st NEW YORK COCK all season. He won 1st at New York in 1901 and beat 13 of the best cocks in the East. Besides over 100 sittings of eggs from our own breeders we have the chicks from four sittings of eggs from the yards of the best breeding cock in the East and a large number of eggs from the four best males in the west. And, remember, in the fall of 1899 we went up to the yards of H. S. Burdick and got the pick of his old and young stock at big prices. A noted Western breeder and judge says we have the finest females he saw in the East. We wont show but will sell our best exhibition birds. We have also the finest collection of WHITE, BLACK and BLUE BELGIAN HARES in the world: also Silver Grays and Silver Blues.
AUG. D. ARNOLD, Box 77, Dillsburg, Pa.

**White P. Rocks, Pekin Ducks and Toulouse Geese.**

A few old breeders for sale. Young stock after Oct. 1st. Price and quality right. 80-egg incubator almost new, cheap.

HARVEY H. HUGGETT, Fall River, Wis.

judge will soon outclass some of the old ones.

*Lacon, Ill.* *John Watt.*

*Don't.*

Poultrymen who handle market poultry inform me that farmers are selling off their stock very closely, hens especially. Our huckster says that hens are going to market in greater numbers than he has ever known before. I think this is ill-advised for the reason that next spring prices of eggs will be up to the top notch, and as a result the farmers will regret their present action,

*Flat Rock, Ind.* *C. A. Porter.*

*Feeding New Corn.*

Now is the time when poultry breeders must be very careful about feeding new corn, as it causes bowel trouble and, if fed in too large quantities, makes the birds sick. Sometimes it affects them as though they had the cholera. When breeders do feed it, it should be fed sparingly and on the cob, as then they cannot eat so fast and it will not be apt to hurt them.

*Battle Creek, Mich.* *C. L. Hogue.*

*Honesty.*

I wrote recently for price on a very good cockerel. The bird was described by the seller who stated that the only defect was a crooked comb. I ordered the bird on that condition. He came four days after the party said he would be shipped, notwithstanding the fact that he had only twenty miles to come. His mouth was nearly coated with canker, and I was compelled to return him. Filling orders in this way can hardly be called honest dealing, yet a great deal of it is done.

*Upper Sandusky.* *Grant W. Kinley.*

*While the Hens are Moulting.*

At this time of the year when the old hens are moulting, let us strive to have a fine lot of pullets to take their place in filling the egg baskets and a fine lot of early cockerels for the fall fairs to fill our orders with. The early bird is what we want, for it is the money-maker through the winter when eggs are high and people want to buy.

*Ira, New York.* *H. D. Page.*

*Yards Seeded to Rye.*

Yards seeded to rye are doubly beneficial. The stirring of the soil and turning under all accumulated filth should alone recommend this course for sanitary reasons. While the growth of the crop, through absorption and assimilation still further sweetens and freshens the ground and the exercise and pleasure afforded the fowls, and profit as well, should bestir the thrifty fancier at once to action.

*Jacksonville, Ill.* *M. L. Edson.*

*Care of Fall Chicks.*

The most important and trying time for chicks is October, November and December when the fall rains are the worst. Most young chicks roost out of doors these months or part of this time, especially farm chicks. These damp, cold nights impart colds, roup and canker in combination with the louse and filthy quarters. The farmer does not know the symptoms of these diseases or their causes. He simply says: "My chicks have cholera" or remarks during these months: "How my flock of poultry has fallen away."

*Concord, Mich.* *Frank McKenzie.*

**Volga Valley Poultry Yards**

MRS A. L. HEATH, PROP.,
Fayette, Iowa.

The home of Heath's Barred and Buff Rocks, also Buff Cochin Bantams. Have made two exhibits—won four 1sts, four 2ds, two 4ths, three 5ths and two specials. Eggs and stock in season. Write your wants and mention A. P. J.

# Breeders Cards.

Under this heading ads will be inserted for five cents per word each month. Numbers and initials count as words. Commencing with the January, 1902, issue, all ads will be inserted under this general heading of Breeders Cards. No ad accepted for less than $1.50 per insertion. Terms, cash with each ad. Count the words carefully to avoid delay in publishing. Copy for Breeders Cards should reach us by 19th of month preceding date of issue. Write your copy plainly, as upon this the correctness of your ads largely depends. AMERICAN POULTRY JOURNAL is furnished every advertiser during the time his ad is running. **Thirty thousand per month.** We guarantee an average monthly circulation of 30,000 copies of AMERICAN POULTRY JOURNAL. When placing your ads remember that advertisers of Breeders Cards get better returns from AMERICAN POULTRY JOURNAL than from any other poultry journal—none excepted.

***On writing any of these advertisers mention A. P. J. It helps you and doesn't hurt us.***

***All Copy for Breeders Cards Must Reach us by the 19th of the month.***

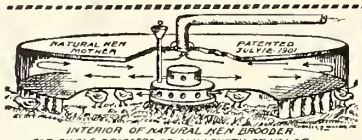
# Bailey's Brown Leghorns,

**Barred Plymouth Rocks and White Wyandottes.**

We have opened the ball for 1901 and 1902 by winning four premiums on Brown Leghorns and Barred Plymouth Rocks at the Colorado State Fair, Pueblo, Sept, 1901. We make no grand stand play in offering you choice stock this season. It's a notion we have that we can please you. Try us.

***J. A. BAILEY,***
***738 14th St.,***
***Denver, Colo.***



# Natural Laws Discovered.

***3 trials hatched 90 to 100 per cent, after 16 years experimenting. Beats the old hen.***

The Natural Hen Incubator has a natural, soft, moist heat, just like the hen, and we claim we have the only devise as to ventilation, just like the hen airs and cools her eggs. In fact, it's shaped like a hen, and all principles are just like nature. To cool and air eggs, a little round cover on top of machiue is raised; if you forget to close the cover it will never chill the eggs. Never gets below 70°. To turn eggs you don't handle an egg nor a tray; you don't have to open and close ventilator slides; no water pans to fool with; eggs are not in mid-air; chicks don't drop under trays while yet wet to get chilled and liable to bowel trouble, etc., where the temperature is 10 degrees cooler. Eggs are in a round nest in a square box. Eggs when once fertile hatch a chick, same as nature does it. Fertile eggs do not die in all stages during incubation. This proves that the ventilation is up to nature. It hatches more chicks than any other incubator on the market of same capacity and hatches no cripples, and larger, healthier chicks a hen cannot hatch, etc., etc. We guarantee that our Incubators will hatch 90 per cent. on the average and our brooders raise 90 per cent. This speaks for itself. Catalogue will be out in December. Send for circular now, description etc; 10c in silver will place one for you. The inventor will please you on any point on incubatiou, broodiug, etc., on any large scale.

***JNO. M. SONTAG, Inventor.***
***Natural Hen Incubator & Brooder Co., St. Charles, Ill.***

# Epperson's Barred Plymouth Rocks

Were winners at the big Champaign County Fair, Sept. 3-6, 1901. Winning 1st cock, 1st, 2d hen, 1st cockerel, 1st, 2d pullet, 1st, 2d breeding pen. W. S. Russell, judge. Fine exhibition and breeding birds for sale. All farm raised. Satisfaction guaranteed or money returned.

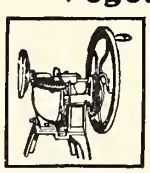
*Your Money Back* *If You Want It.*

**Here's the Humphrey Proposition.**

A good bone cutter pays for itself in a single season by reducing grain bills, increasing the egg yield and promoting the flock's health. IT PAYS. But you want a cutter which you can run. We will sell you the

**Humphrey Green Bone and Vegetable Cutter**

on a guarantee to return your money, if it does not cut more bone, in better condition and with less labor than any other cutter on the market.



It is the open-hopper, one-hand machine; takes large bones without chopping with an axe. Easy to turn, easy to keep clean.

Only three working parts.

The Humphrey is displacing other makes because of its ease of running, its simplicity and durability. Every poultry raiser should have our beautiful book, full of valuable hints and blanks for a year's egg record. It is free. Send for it.

**Howlands, Ind.**

## Rhode Island Reds

**The General Utility Fowl of the Twentieth Century.**

Our WINNINGS the PRESENT year demonstrates without a doubt that we have MORE PRIZE WINNERS than any breeder in the country. Having won in 1900, nine firsts and sweepstakes for best male, Concord State Fair, Concord, N. H. Eight first and second, nine entries, at Brockton Show. Two firsts and special for best R. I. Red male bird in Fall River. Six first prizes, six entries, Malden, Mass. Forty-two prizes Philadelphia, including the special offers of $50 in gold and $25 in gold; also including nine firsts and nine seconds out of a possible ten each.

**—1901—**

Boston Show in the hottest competition, forty-eight prizes, including four firsts, three seconds and eighteen specials. At New York, seven firsts, five seconds, which is a result unequalled by any breeder of any variety of any fowl. If you desire to obtain stock from the very best that there is, state what you want and write us for quotations.

**FARM RAISED POULTRY**

Some persons make a great deal more money from a hundred hens than others do. Why? Isn't it because they know how to do it? Let us help you to get the "know-how." Our

**NEW CENTURY POULTRY GUIDE**

is by far the biggest and best poultry book and catalog we have ever issued. Contains all about the care of poultry; so as to get the money-making results. Valuable recipes, plans for poultry houses, how to get eggs illustrations of the different breeds taken from life, and a full description of one of the largest and most successful poultry farms in the country.

**Contains Information Worth $100.00**

It will be found to be the best help of the year toward making your poultry pay. May we send it to you? We ask only 15 cents to pay for postage and mailing.

**JOHN BAUSCHER, JR., BOX 130, FREEPORT, ILLINOIS.**

# Nothing Under the Sun Will Make Hens Lay

and keep them in healthy condition all the year round like

# Banner Egg Food and Tonic.

It starts the pullets laying, and will keep them at it all through the winter, when eggs are very scarce.

We are having our SIXTH ANNUAL SALE during NOVEMBER and have some special inducements to offer those who have never tried it, as well as old customers, who know a good thing when they see it.

During this sale, we will sell a 1 pound box for 15c or 7—1 lb. boxes for $1.00.

The regular price is 1 lb. box 25c or 5—1 lb. boxes $1.00, so it will be to your advantage to order this at the reduced prices.

In addition to the reduction in price we will give you with each order for 7—1 lb. boxes, one of "KUHN'S EGG RECORD AND ACCOUNT BOOKS," which retail at 25c each, or to those who order $2.00 worth, or 14 lb. boxes, we will give a book, which every poultryman needs, entitled "LITTLE CHICKS," which retails at 50c each. It contains special articles by M. K. BOYER, P. H. JACOBS, G. W. JONES, W. W. KULP, A. G. DUSTON, A. F. COOPER, M. V. NORYS and other well known poultrymen. The information it contains is worth $100 to any breeder.

Remember these special prices and offers are for the month of NOVEMBER ONLY, and no orders will be filled after NOVEMBER 30th, at the above reduced prices.

Send your orders in at once, and we will fill orders as soon as received.

N. B. If sent by mail, add 20c for each box for postage, but the 7 boxes are cheaper by express, purchaser paying all charges.

Our large POULTRY SUPPLY CATALOGUE mailed free.

# Silver Laced Wyandottes.

Winners of first prizes at Madison Square Garden, N. Y., Hagerstown, Md., Atlanta, Ga., Asheville, N. C., Columbia, S. C., and others. Can and will suit buyers in exhibition and breeding stock at reasonable prices. Satisfaction or no sale. Eggs in season $3.00 per 15 from excellent matings.

***THEO. E. F. HOLZHAUSER,***
***Broad River Poultry Yards, Columbia, S. C.***

# SILVER WYANDOTTES.

The leading Silvers of the 20th century are either in our yards or have been produced by us. This may sound like a very broad claim but we stand ready to substantiate it as a fact. Now wouldn't you like to own some of the best in this country? Couldn't you take pleasure in showing stock that will bring home the blue ribbons? Why breed inferior stock when you can own the best? A cockerel from our yards would help improve the stock you own. A trio would be better still, or if you want something fancy we can sell you pure English stock at half what it would cost you in England. We guarantee satisfaction and will return money unless you are pleased. Not much risk in doing business with people who give you this privelege. Mention A. P. J.

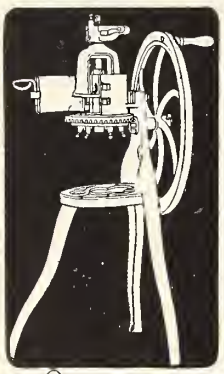
# Millions For Eggs



The American people spend millions for eggs every month in the year. Are you getting your full share of all this money? Perhaps you would like a little more of it. You can double your egg profits by putting a

## MANN'S 1902 Model BONE CUTTER

in your poultry yard. We say *Mann's* because the new Mann's is the cutter which will give satisfactory service in every way.

**Read Our Broad Claims.** The Mann's runs easier than any other machine (if not don't keep it) because it adapts itself automatically to the power operating it. A boy, a woman or a man can turn it with equal ease. You can set it to run as easy, to cut as fast or as slow, as coarse or as fine as you like. It cuts hard bones as easily as soft bones, because the self-governing feed adjusts itself to them without attention from the operator. The Mann's is easy to clean; just pull one latch and the working parts are all exposed. The Mann's makes more and better feed from a given quantity of bone than does any other make, because it cuts all the bone and all adhering meat and gristle, allowing none to escape to clog the machine, making no slivers to endanger the lives of your fowls. The Mann's special cylinder and cutting device do it. The Mann's cuts more rapidly than others, if not don't keep it. It's knives are in action all the time (not waving in the empty air half the time). The machine that never stalls. The Mann's has new design, open hopper, enlarged table, new device to control feed. Set it to suit any strength. Never clogs.

**10 Days Free Trial.** No money asked for until you prove our guarantee on your own premises, that our **1902 Model** will cut any kind of bone, with all adhering meat and gristle, faster and easier and in better shape than any other type of bone cutter. If you don't like it send it back at our expense.

**OUR NEW CATALOGUE** explains the How and Why; it describes in detail all our late improvements. You'll be glad to get a copy—we'll be glad to send it.

**F. W. MANN COMPANY,**
**Box 56, Milford, Mass.**

## Barred Plymouth Rocks,

***Bred by the Single Mating Plan—***

The only correct way. Also Buff Cochins, Light Brahmas and Bronze Turkeys. Stock and eggs at reasonable prices. Send for illustrated catalogue. Sharpest and best grit 150 lbs. for 50 cents. Agents for Cyphers Incubator. Stock carried.

***O. E. SKINNER, Columbus, Kas.***

## HOW TO MAKE POULTRY PAY.

It depends entirely upon the feeding rations. Fresh cut green bone will produce more eggs and better fowls than any other poultry food. The easy running

## Stearns Bone Cutter

produces better cut-bone than any other machine, because it reduces the bone to granular meal, free from splinters and chunks. Better feed with less labor—isn't that worth considering?

## Our New Model No. 7 Ball-Bearing

is admitted the easiest turning, most rapid cutter made. Automatic feed; perfectly self regulating. Don't buy until you investigate this machine. We make eight other models for hand or power.

**"How to Make Poultry Pay"** is a book written by our own corps of poultry experts, full of sound hen-sense. May we send you a copy? It's worth reading.

**E. C. STEARNS & CO., BOX 15, SYRACUSE, N. Y.**

*"Don't keep hens—make hens keep YOU."*

No. 9. Price $3.80.

For Hand Use.

## Our Experience of Ten Years

has enabled us to produce the best line of bone cutters on the market. The principle is similar in all our bone cutters—automatic feed, horizontal cylinders, knives cutting across the grain, easy running and durable.

We manufacture nine different sizes ranging in price from $6.75 to $29.50. Write for particulars on our new large power cutter. The best made. Sent on trial. Send for catalogue.

**STANDARD BONE CUTTER CO.,**

**Milford, Mass., U. S. A.**

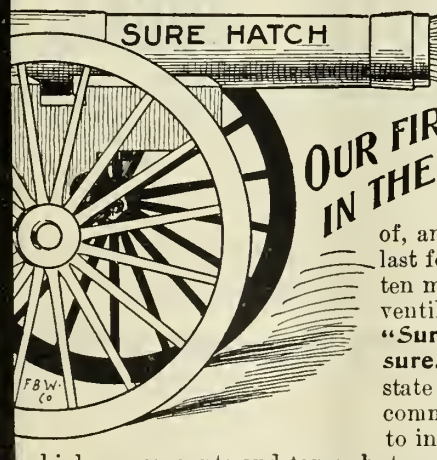
**Genoa, Cayuga Co., N. Y.**

# Incubator Announcement Extraordinary



OUR FIRST GUN IN THE EAST

We made our first "stand" at Clay Center, Neb., and our firing line wasn't very strong, nor did we have much powder to burn in an advertising way, but we had some good scouts out and they soon reported that California redwood was the best material to build an incubator out of, and that 12 oz. cold rolled copper was the only material that would last for tanks. Our old Indian fighter scout, who knew a "chicken" ten miles off, then went to work and got up a system of heating and ventilation and we made an incubator, and we christened the thing **"Sure Hatch,"** just because everybody who tried it said it **hatched sure.** It did hatch sure, and folks will talk, and now it's out in every state in the Union, hatching sure. After we got well intrenched and commenced to do business, city councils sent delegates over the trail to induce us to break camp and come with them and enjoy labor unions' high wages, rents and taxes, but we felt best on the old stamping ground, where we could manufacture a better incubator for less money than anywhere in the world. It has been quite a fight and we have had to scalp a few theorists and chase a few competitors up into the foothills and over the divide. Now that the cat's out of the bag and folks all over the country know about the **Sure Hatch** we might as well own up and announce that our trade has been so enormous in the east that to insure quick delivery and low freight, we have opened a branch house at Columbus, Ohio, and have shot five thousand machines down there as a starter to help hold the post. Our catalogue is a mammoth one, containing everything about chickens, incubators and brooders. It's free. Send for it. Write nearest house.

***SURE HATCH INCUBATOR CO., Clay Center, Neb. or Columbus, Ohio.***

# CORNELL'S LEGHORNS, Single Comb White.

They are finer this year than ever, and we are now prepared to furnish breeding or exhibition pens, trios, pairs and single birds. # FISHEL'S WHITE PLYMOUTH ROCKS.

***AT CHICAGO, 1901***—Won 1st, 2d, 3d cock, 1st, 2d, 3d cockerel, 1st, 2d, 3d pullet, 2d, 4th, 5th hen, 1st, 2d, 3d pen, the American Poultry Association's cup for best 2 cocks, 2 ckls., 2 hens, 2 pullets, all American breeds; the Rigg challenge trophy for best display American class; gold special best display Plymouth Rocks; gold special best display White Plymouth Rocks; gold special best cock, gold special best cockerel; gold special best pullet.

***AT NEW YORK STATE SHOW***—1st, 2d cock, 1st pullet, 2d hen, 2d cockerel, 1st and 2d pen. Winning 8 out of possible 10 prizes.

***AT ST. LOUIS***—1st, 2d cock, 1st, 2d hen, 1st, 2d cockerel, 1st, 2d pullet, 1st, 2d pen: winning every prize offered, making a clean sweep; a record never made by any other White Rock breeder.

***AT INDIANAPOLIS***—In one of the strongest shows of White Rocks ever brought together, my birds won ***13 REGULAR PRIZES and 10 SPECIALS.***

Not a show of any note, East, West, North or South, but what Fishel's White Rocks win. My 24-page catalogue is free, it tells all about White P. Rocks, how to feed, etc. I have

***3000 Select Birds For Sale 3000***

Either in year old stock or youngsters. Can mate them up any way to please you. ***Prices Low; Quality High.***

***White Belgian Hares.***
***Fox Terrier Dogs.***

**U. R. FISHEL, Box A, Hope, Ind.**

**85c** per 100 sq. feet with caps and nails, on cars New York or Chicago.

In use by thousands of poultrymen. For samples and circular address

# The Poultryman and His Work.

## Suggestions from One Who Has Made the Business Pay.

J. W. ROBERTS, Sonoma, Cali.

ENTERING the ranks of writers for the JOURNAL, I seek self-discipline of utterance, and to assist others who may not yet have given even as much attention to the business as has thus far fallen to my own lot, nor had the previous long general business experience to modify methods and judgment.

*Point of View.*—Putting myself in his place, it appears to me not profitless to any reader of this article that he should be put into my own point of view by a hrief historical sketch of the events leading to my connection with the little poultry plant where this paragraph is written.

Born in Cincinnati, educated in Philadelphia—both in letters and in the printing trade—I reached San Francisco in 1880, spent two years with the largest printing and publishing house here, thereafter embarking in the printing business on my own account, my foreman having run the office for the last three years while I have given my time to "the great outdoors," and the development of the poultry business near the little, old, historic, incorporated city of Sonoma, in Sonoma County, forty miles from the metropolis of the Pacific.

A brother-in-law originated the plant, huilt the incubating, brooding and roosting houses, and, after four years sold off, elsewhere, all but a remnant of his stock, which I purchased, leaving him free to engage in partnership in another line in San Francisco.

Starting then with 200 young hens three years ago, none of the old stock is now left, and we now have 250 laying hens, hatched spring of 1900, and 200 pullets, hatched this spring.

The poultry buildings and accessories are: A feed house sufficient to hold comfortahly seven tons of wheat and middlings, and assorted barrels and sacks of cracked wheat, cracked corn, ground corn, hone meal, meat meal, linseed meal, cocoanut cake and charcoal; an incuhator house, a hrooder house, a "setting" house (for setting hens), eleven roosting houses, yards for breeding stock, coops for mother hens with hroods, well, pump, water buckets.

The stock is White Leghorn, Buff Leghorn and Black Minorca.

The immediate object is eggs for market; and these three years, actively with the egg layers, have heen regarded as excellent discipline in the severe hut thorough school of experience.

And now, from this view point, what can I say helpfully to others, in response to the questions suggested hy the ten paragraphs of the JOURNAL'S prescription?

*Moulting.*—As yet a novice compared with the veterans, I would not venture scientific utterances on moulting with a view of affecting color and gloss of plumage, hut shall sit at the feet of others and learn of them.

*Line Breeding.*—In line breeding, also, while deeply interested and helieving the philosophy correct, being yet but in the "freshman" class, I leave discussion to seniors and postgraduates.

*Show Room.*—The show room, too, should interest all, both in itself and in its reports through poultry journals; but the experienced only can best help us here.

*Fancier and Breeder.*—While in the show room a novice should he only a learner, yet on the calling of fancier and breeder one not yet an expert may have some correct opinions. Any careful ohserver may give some helpful suggestions thereon. Surely the fancier's hranch of the poultry business resembles other hranches. The general principles at the foundation are the same for fancy or staple, for the show room or the market, for "eggs for hatching" or eggs for the gastronomic epicure.

The runner in this poultry race, whichever track he chooses, must keep in eye the goal, and study the "training" of successful "runners." He must first master many of the general principles which underlie all life, and all hreeding, and all sanitary science. Then he must proceed to grow a reputation as hreeder and fancier.

I suggest that he early decide on a definite hreed, or breeds, on which he shall stake his reputation; then that he buy the best eggs or stock only from the reputedly best fanciers in each line, and then do his hest to advance the stock so obtained. No husiness as fancier can pay that does not win a good reputation; and no reputation will last unless built on genuine character in hoth stock and owner.

Unless well capitalized—as Mr. Orr seems to have been when he started Beaver Hill Farm—the prospective fancier must start in a small way, first learning, according to Mr. Orr's text, something of life on a farm. City folks are apt to amuse themselves with the oddities and errors of "a hayseed come to town." But the hayseed come to town is grace in every motion compared with the colossal ignorance and awkwardness of a city greenhorn learning the farmer's trade. My small son laughed heartily at his father's first effort at plowing, and the father could not justly hlame him.

Any phase of farm life constitutes one branch of a trade—as truly as does that of the warehouseman, the compositor or pressman make hut part of the calling of the printer.

Any way you fix it, the beginner must begin. He cannot graduate the same day he enters the new school of poultry experience, where there is no "free" school, but all must pay full price for tuition.

There is only one hope for the fancier; he must produce "good goods," and he cannot do this fitly until he is first a practical farmer, at least in the poultry branch of the farmer's trade. He must huy good stock to start, and give it good care, mastering the general principles which underlie all hreeding, and all feeding—this takes time.

*Market Poultry.*—In starting a market poultry plant, two cases may be considered: the heginner with abundant capital, and the contrasting starter with only enough to piece out living expenses until his plant shall pay. It seems to me that most people with abundant capital invest elsewhere, and primarily hecause oneself, as well as his money, must go into this calling if success also is to go there, so that the workingman, rather than the capitalist, is the typical poultryman. Now, experience shows that few concerns, in any line, start large, and is it not the same in market poultry?

I recall my impression of the business seven years ago, be-

fore I had purchased any feed, sold any eggs or handled a fowl. There called, incidentally, at my printing office, an experienced poultryman whom I interviewed on behalf of my brother-in-law, just starting the plant. This caller referred to an established poultry journal, the complete file of which I am proud now to own, and its continuous numbers are still welcomed. He narrated his experience, and in my utter ignorance of the matter, it then appeared to me that there was little to do but throw down a handful of feed and gather a bucketful of eggs, and that a novice surely would be moderate in starting with so small a number as 500 fowls. My views to-day are quite different.

I believe that an investment of $500 in cash, in the hands of a poultryman of some experience, can accomplish wonders in purchase of stock and starting a market poultry farm; but in the hands of a novice such a start might have a speedy finish.

Apparently five acres are ample for a one-man poultry plant, and I am emphatically of the opinion that no purchaser or renter should expect from his poultry plant a penny's yield of profit applied to living expenses any sooner than he would from the same investment in a young orchard. "Fruit" from either comes only in due time. Before that time money and labor go into development of the "plant"—"flowers" and "fruit" come later.

View on the ranch of John W. Roberts, Sonoma, Sonoma County, Calif.

A sage said: "When one gets beyond the making of an ordinary livelihood the accumulation of money is a comparatively easy matter." So in the poultry business—fancy or market—it must at first be dig, dig, dig, for many, many months before much other reward comes than the consciousness of fidelity, the growth in quantity and quality of the plant, the confidence born of practice, and, not to be despised by the city man, the hardening of one's naturally good constitution by a life out of doors. Thank the poultry activity for preserving to usefulness and health such men as Mr. Boyer of Hammonton.

My mind often reverts to the average method in educational institutions as typical for the poultry practitioner. With a four years' course, and a corps of fifteen or twenty skilled professors, some of the professors instruct all classes, others only the freshmen and still others are listened to by seniors only. So in the practical school of poultry experience—some studies are with us all the time, some mastered in the earlier days, and some demand our attention when we hoped ourselves already taught. And when, at the end of four years, the graduate goes forth, diploma in hand, he is warned that even now only as a trained student—to study on—shall he do credit to his Alma Mater. Ceasing to study he shall cease to grow.

View on the ranch of John W. Roberts, Sonoma, Sonoma County, Calif.

So I say the best method of starting a market poultry plant is to start small—as the acorn does. Profit is impossible without experience. In the hands of one competent, it is conservative to count on the old annual profit of one dollar per hen, in money, with perhaps another dollar per hen in health and strength to the owner. Outdoor life is better than the best doctor. For room, five acres. Such elaborately constructed houses as may be needed for the extremes of eastern climate are not essential in California's fertile valleys.

General principles from other businesses apply here. At the start, with one hand, keep down expenses, while with the other insist on scattering good and sufficient seed for a harvest later on. Keep accounts as faithfully as in a modern department store. Debit and credit your pens and your yards. Cut short your losses and let your profits run on.

*Publicity.*—And here I would like to utter a few convictions on advertising. Having desired, in my trade as printer, to serve those chiefly who follow the motto, "Put your best ideas in print," it has been my study to present these ideas of patrons in the most attractive form. So, counseling with some bright advertisers through many years, I have one ingrained assurance, namely, that no man's advertising could make permanent success unless first he himself was strictly "on the square." There is no use in advertising unless you first have something to advertise. Having something, and knowing its worth, through circular or periodical, or both, tell your story to prospective customers—not to the general public. Reputation must be had before a paying business can be built up by any fancier. Of course the fancier is the chief advertiser, market poultry and table eggs soon finding their own best market. And, as before stated, this reputation cannot stand unless backed by character, and by eternal vigilance, to keep up quality to the standard advertised.

In selecting a medium, its suitability to the purpose must be considered. If "fancy" breeds are to be kept, select such journals as reach the fancier; if eggs and fowls for stocking market egg farms, choose the journal reaching chiefly such subscribers as conduct this branch of the business, and results will pay you.

A three-line advertisement, with even but one bright phrase, looking face to face at the readers of every issue, is better than the same money spent annually in but a single issue. As well expect to drive a strong nail home with one blow of a hammer as to "nail" a customer with a single insertion. "Keep hammering"—run the ad without omissions. If possible, keep a few becoming "earmarks" always in the ad and change the rest each issue. It is more work, more cost—and more returns, this way.

*Specialty Breeders.*—To-day I have no doubt that the specialty breeder outranks the breeder of several varieties. Within fifty miles of me is an owner of fifty pens and many varieties. Yet I have passed him by, to send three thousand miles away to purchase from a celebrated specialist (and liberal advertiser) of New York state.

*Incubators.*—The best technically equipped operator is he who, starting with hens, has graduated into incubators. The operator must be as good a follower of "time tables" as locomotive engineers or railway conductors. Turn your eggs on time, keep right water in the boiler, watch your fire, note your steam gauge, have your eye on the danger signals, stay the necessary hours—for a safe "run."

Hens don't always behave—neither does an incubator. Hens sometimes eat eggs; incubators do not. Hens fight and break eggs; an incubator won't—if the operator keeps steady. Hens get tired or sick and quit the job; an incubator is a wooden hen, without sentiment. You can write the history of each egg upon it and the incubator leaves it there; a hen is like some bookkeepers, fond of scratching away even original records, an inveterate eraser. You can keep more absolute track of your work with incubators—and they keep you quite steadily at home, out of mischief.

*Brooders.*—The brooder tenants, not the thermometer, must be watched closely by the boarding house keeper. Don't make the lodgers ring for "fires" nor cry for meals. Give them just enough fire inside and out. I think three times a day enough to feed boarders, and chicks. Scrutinizing those raised for me on the "two-hour" system elsewhere in this valley, and also by others on this ranch, I cannot discern that my own, fed but three times a day, are any worse looking, worse tempered and show any less prospect of eventually paying their cradle board.

I think a brooder with sand on the floor is best, putting thereon a sheet of newspaper, over which more sand is

A bunch of Mammoth Pekin Ducks as bred by Wm. E. Knight, propr. Fishkill poultry and Pekin Duck Farm, Fishkill Landing, N. Y.

sprinkled, and destroying the newspaper daily.

*Fertility.*—For egg-fertility, in percentage and in strength, have two male birds to a pen, cooping one of them up each day and allowing only one at a time to run with the hens. Have a young male with old hens, or an old male with young hens. Last year, I think both females and males were immature, or not mature enough, in some of my pens. In one instance I hatched 105 chicks from 112 eggs, but the percentage raised was unsatisfactory. This year, with older breeders, experimenting, I have had low percentage of fertility, but strong, sturdy chicks, few dying by the wayside. I believe that, as with others, even the highest class of breeding, there should be with poultry full maturity, experience, intelligence and all other "grown up" attainments in the breeding stock to give best results, and here, as everywhere, "blood will tell." Better low percentage of fertility, and best quality in all germs developed, than high fertility and a chick community of no-accounts.

In saving eggs for setting, place them in shallow boxes or trays, wherein first place an inch of wheat to hold the eggs upright; therein set the saved egs, small end down, slanted, as the carpenter would say, at half-pitch; turn them morning and evening, as if already in the incubator. If the life of a germ is preserved by this process during incubation, why is this not likewise helpful to exercise the "twelve-hour turn" during the probationary period before setting?

So, well aware of the shortcomings of this article, I seek herein, through the columns of the AMERICAN POULTRY JOURNAL, to aid my fellow workers.

Read the JOURNAL; then think for yourself, and act on your own best judgment.

Do not disregard the experiences of others; let their experiments, as reported, be digested by you.

Start small, and, for peace and happiness, go slow—yet not too slow.

Keep within your capital. Keep out of debt, or, if in, seek steadily to get out.

For most people, the days of large returns—if they ever existed—are now past. But likewise, for most people, the returns from the poultry business are more certain than in most callings: first, because something can be done even with a small capital. What could you do in starting a dry goods trade, or a fasbionable shoe store, or the purchase of a fine job printing equipment of type and presses on $500? Yet, with this amount—backed with experience always—in the poultry line, the highest price can speedily be obtained, at least for market poultry and eggs. Secondly, the returns in the poultry line are more certain than in many lines, because the demand to which even this small capital may promptly cater is a demand steady all the year around. The retailer of ordinary merchandise has his "seasons," dull and busy. The hen-man, however, is himself always busy, and happy indeed if he can likewise keep his hens' energy productively active, for her product meets with ready sale.

# AN INTERESTING STORY

## Valuable Pointers for all who wish to Steer Clear of the Many Drawbacks which Confront the Poultryman.

By J. W. MORSE.

PART II.

FEBRUARY, 1874, my new hen house was finished and stocked with one trio of Light and one trio of Dark Brahmas, one trio of Partridge Cochins, one trio Brown Leghorns, one trio of Houdans and one trio of American Dominques, 12 Pullets and 6 Cockerels, 18 Fowls in all, and as the hen house was 50x16 and such a small lot of fowls seemed almost lost in it I proposed purchasing 50 Dunghils, but as the whole care of the poultry fell to my wife, excepting what little help I could give her mornings before going to my work at 7 o'clock and after my return at 6 o'clock at night, and as she did not seem to take kindly to the idea, I gave it up.

I gave the old hen house to the White Leghorns, and as the Cockerels seemed to get along well together we let the whole flock of 20 Pullets and 2 Cockerels run together. By the middle of February all our fowls were laying.

Coming home from my work one evening late in February I found my wife with the Houdan Cockerel in her lap feeding him. I asked her what ailed him and she held his head up to my nose. It smelled very badly, and I noticed that there was trouble with his breathing. He rattled and opened his mouth, seemed to gasp and haul for breath, every once in a while sneezing. There was no swelling about face or eyes, but the face was hot, the eyes had a distressed look, feathers seemed dull, wings dropped just a trifle.

My wife took a cup and cut an onion up in small pieces, sprinkled asafœtida on it, filled the cup with pure cider vinegar, let it sit about five minutes, then opening his bill forced him to swallow the whole onion. She gave him this dose twice daily for three days morning and evening, bathing his face and nostrils with witch hazel and injecting warm water in his nostrils, using a small oil can, and rubbing his throat with vaseline. At the end of the three days he was cured and never was troubled afterward. He was kept in a box during treatment away from the other fowls.

This disease is caused by a cold and if taken in time can be cured in this way, but if neglected will certainly end in catarrh or roup, either of which certainly spoils a bird, male or female, for breeding. Indeed, I believe that catarrh is really the roup in its first stage and I consider a bird worthless that has ever had either. None but the finest, healthiest birds should ever be bred. An unhealthy fowl is good for nothing but to enrich the ground.

Our fowls were kept clean by a liberal use of whitewash and coal oil and Persian insect powder. Droppings were cleaned up every other day.

They were fed a warm mash consisting of shorts, meal and

ground oats, two-thirds oats and shorts to one-third meal, salted to my wife's taste. At noon they were given just a little rye, barley, wheat or buckwheat; at night whole corn. Sometimes when it was very cold, she roasted the whole corn in the oven. She gave boiled potatoes twice a week. I bought calves' and sheeps' hearts or any good sweet meat that I could get cheap. Pure water was given twice a day and if very cold three times. The meat we chopped fine and mixed with the soft food. We gave them heads of cabbages twice weekly, hanging them up just out of their reach, making them jump just a little, keeping them busy. A busy hen seldom becomes a sick hen. We were always very careful to feed no more than they would eat clean, for if you leave food scattered around, especially soft

One of Knight's Pekin ducks, the "Big kind." Wm. E. Knight, Fishkill Landing, N. Y.

food, it becomes sour and will often cause crop-bound fowls.

I regret that I can find no account of the number of eggs laid by our fowls, but I know that they paid for all our groceries. The Leghorns proved the best layers and the Partridge Cochins the poorest. The Houdans laid the largest egg, pure white, the Brahmas a very dark brown egg.

We commenced setting Feb. 20. I purchased three Dunghill hens. They proved fine setters and mothers. The Partridge Cochins wanted to set about the first of March and as we did not like them and had made up our minds to discard them we let them set. They proved clumsy setters. One broke three eggs, the other two daubing their eggs badly, and I had to wash them in blood warm water, drying them carefully with a soft cloth. They killed five chickens between them while hatching. We did not like them. The breed may have improved since 1874. I have never bred them since then.

About the first of March I think, some boys went in my hen house and carelessly left the door open between the Light and Dark Brahmas and when I went out at night to feed I found the Light Brahma dead and the Dark Brahma covered with blood. I brought him in the house, washed and cleaned and dried him as well as as I could, being careful to wash his mouth out, for they will sometimes pick each other in the mouth while fighting, and if not taken care of canker will set in and canker will if neglected sometimes cause roup, especially in winter. When you find a bird has canker wash the mouth out twice, morning and evening, with gold thread water. Take the gold thread root, boil it and use the water warm with castile soap. This will surely cure in three or four days. After washing and drying we placed the bird in a box behind the kitchen stove until morning. He recovered and appeared well afterward.

The loss of my Light Brahma Cockerel caused me to send to Elbridge C. Comey, Quincy, Mass., for a pair of his Duke of York Light Brahmas. This pair cost me $10 and 90 cents express charges, making $10.90. The Pullet was the largest I ever saw, but proved barren. Not one of her eggs ever hatched. I tried her two years with the same result. Eggs unfertile. Eggs from the other Pullets mated to the same Cockerel hatched well. Had I known then as much about breeding as I do now I would have bought another Cockerel to mate with her, for sometimes a hen or Pullet will not breed well with one male. Her eggs will be unfertile, but change her and give her another mate and her eggs will hatch all right. I have since regretted that I did not try the experiment, for she was an extra fine bird, and I hope this hint may serve some one who may be caught as I was.

We had extra good luck getting out chickens this year and by the first of June we had over three hundred Brahma chicks. They seemed to be the hardiest. There did not seem to be much difference between the White Legborns and American Dominiques. We did not have a chance to test the Brown Leghorns, for I sold the trio for $7 about March 1. The Houdan chickens proved a poor lot. Nearly every one of them had the catarrh. We had trouble with them all the season and out of 47 hatched we only raised 19. I shall always think they inherited a tendency to catarrh from their father and it taught me a lesson never to raise males or females for breeders that have ever been sick. I have often disregarded the lesson, always with the same result. Chickens from parents that have been sick are poor weaklings not worth raising.

We raised 330 chickens. We hatched 409 in all. Hawks got some. A skunk got 25 one night by my carelessness in using a box with no bottom to it.

I used dry goods boxes, giving a hen and 15 chickens a box. I wanted to put 30 chicks with each hen, but after trying two hens found that they trampled some to death or allowed some to get chilled and that I was losing more than I was gaining by doubling up. Fifteen chickens is all any good hen can care for in the spring and I would not give more than 10 to a hen now unless she was an extra good mother, for if you wish to raise good chickens you must not crowd either under the hen or in the brooder and you must keep them growing from the shell to the hatchet. Some hens will care for more chickens than others. By watching your hens closely you can tell. Some hens will hatch better than some others. I think some hens have not enough vitality to hatch eggs. If you have several hens setting, by placing your hand under them you will notice a big difference. Some will be real hot, others quite cold. I have noticed that those that were cold as a rule never hatched good, while the hot ones as a rule hatched well.

WHITE PLYMOUTH ROCK PULLET.
Score 93¾, bred and owned by W. A. Greene, White Plymouth Rock specialist, New Albany, Ind.

Some of my hens brought out 13 chickens. The poorest hatch I had this year was three chicks from 13 eggs. Had I sold that setting and the result been the same I should probably have been called on to make it good and should have sent another setting free of cost, yet these eggs were from a hen that was hatching fine. It is, I think, quite often the hen's fault that eggs don't hatch, but the seller has to take the blame almost always.

I being in the shop, most of the care of the poultry fell on my wife and she worked very hard. I helped her all I could mornings and nights and Sundays; I bought all the feed and gave her one-half of all we sold, not the profit, but one-half of all we sold, and she earned every cent she got.

I sold $59 worth of setting eggs, nearly all White Leghorns, during the setting season. Then hens and chickens had free range and it was much trouble nights to get each hen to go to her own box at first, but as the boxes were scattered all round they soon learned, and when the hen weaned the chicks the most of them stuck to their box. We were sometimes until 9 o'clock getting the hens in the right boxes, several times later, and I began to think I should have to give up raising chickens or give up my job in the shop and come home and help my wife feed, water and properly care for the chickens. She never complained, but sometimes when I was tired I felt discouraged.

We fed the chickens when first hatched, commencing when they were 24 hours old, rolled oats and stale bread we

BOARD OF DIRECTORS NATIONAL FANCIERS' AND BREEDERS' ASSOCIATION, CHICAGO.

bought from our baker, giving them this food for one week. Then we gave them a hot mash mornings consisting of shorts, meal and ground oats, equal parts, and the rest of the day rye, barley, wheat and cracked corn, feeding five times a day, giving no more than they would eat up clean. We used shallow tin dishes for water and soft food, one dish for water and one for the soft food for each brood. If deep dishes are used little chicks will get drowned quite often. To this day I use these little tin dishes. They are so easy to clean and cost so little. I fed mornings and nights when I could. We did not get much time for recreation, but as the chicks grew larger we taught them to come to the hen house for food and lodging and water. Especially after the chicks were weaned our work was lighter.

We commenced selling broilers alive the first of June, the price ranging from 20 cents per pound in June to 10 cents per pound in August, alive.

I found that the American Dominiques made the best broilers, sold the best, with their clean yellow legs. The Leghorns were too small. The poultry dealer objected to sides were something new and popular. In June the Dark Brahma cockerel was taken sick, comb turned dark, did not eat well, wanted to sit around, dumpish. I removed him, but he died. I opened him. His heart was enlarged, his liver was all black and crumbled up when taken out. For every effect in this world there is a cause. The cause of his death I have always thought was his fight the March before when he killed the Light Brahma cockerel, and it taught me to be very carefull not to let my males fight. Thus by carelessness I lost two good birds. After his death we put springs on all gates and doors in hen houses and yards. By October I sold 150 young cockerels for broilers and roasters, leaving 180. The 150 brought us $75. It was about the first of November when a stranger came to see our fowls, and after looking them over wanted us to set a price on the White Leghorns. I told him they belonged ot my wife. I expected she would refuse to part with them, but to my surprise she told him he could have them all for $1.50 each if he would take them all. There were 20 hens and 2 cocks and 90 chickens—27 cockerels and 63 pullets—in all. After some talk he offered $125, spot cash,

them. The Brahmas he did not like. They were too scrawny and bony, and he didn't like the feathered legs. The Houdans he would not take, and we used the nine Houdan cockerels ourselves on our own table. His objection to the Houdans was their bluish legs and meat, but to this day I have never found a better table fowl than the Houdan. The meat will compare well even with the splendid American breeds.

About April 1 I purchased three settings of Barred Plymouth Rock eggs, 39 eggs. I got 16 chickens from them. I sent for three more settings and got 28 chickens from them, making 44 chickens from 78 eggs, and I felt pleased. We raised every one of them, 31 pullets and 13 cockerels. They cost, express charges and all, $19.50. It proved a good trade. I sold 4 of the cockerels in Noevmber for $20, and the following January 3 more of the cockerels for $15, and this left me 31 pullets, 6 cockerels and $35 in money. We liked these Plymouth Rocks the best of all. They seemed to grow better, had a bright, clean, pleasing look, and be-

and she finally sold them to him for $130. Among them was one cockerel that I was told won at the Boston show and sold for $25. We now had left the Light and Dark Brahmas, Houdans, American Dominiques and Barred Plymouth Rocks. The trio of Partridge Cochins I sold for $4.

I was surprised that my wife should sell the White Leghorns, but she told me she believed it was for our best interest to keep but one breed and that she thought the Barred Plymouth Rocks the best all-round fowl for us to keep.

I sold the 10 Houdan pullets for $15, the old trio for $4 and all my Dark Brahmas and American Dominiques, 42 birds in all, for $63, leaving me 31 Barred Plymouth Rock pullets and 6 cockerels, 21 Light Brahma cockerels and 32 Light Brahma pullets. Fifteen of the Light Brahma cockerels and 2 of the Barred Rock cockerels I sold to our butcher for $12.75, leaving me 4 Barred Plymouth Rock cockerels, 31 Barred Plymouth Rock pullets, 3 year-old Light Brahma hens, 1 cock, 6 Light Brahma cockerels and 32 Light Brahma pullets.

I mated up five pens of Light Brahmas, one pen consisting of the old birds and four pens of Barred Plymouth Rocks. The two extra Light Brahma cockerels I loaned to a neighbor.

In looking back over this hard year's work and the old account books, grown yellow with age, the writing much faded, which I kept (for I have always kept an account of my expenses with my fowls and given them credit for all poultry and eggs sold, but I have never given them credit for eggs or poultry used on our table or for cooking purposes in our family), I find I made a clean profit this year, not counting eggs or poultry used in our family, of $224.75, and I think certainly we must have used $25 worth of poultry and eggs during the year, especially as I often carried boiled eggs for my dinners.

I tried turnips chopped during the winter of 1875, but think they taint the eggs. I fed some apples, cutting them in halves. It kept them out of mischief and I think did them good. Beets and carrots chopped fine, and mixed fine with soft food I tried and believe did them good.

In short, I tried to give my hens the same thoughtful care that a good farmer or horseman would bestow on his horses or cattle.

And if farmers would give their fowls better quarters and better care I believe the day would soon come when the money Uncle Sam pays every year for imported eggs and poultry would go into the farmers' pockets, for I believe no stock kept on the farm pays better than poultry. Poultry can be made to pay, and at some time I will tell you about an experiment I tried putting fifty hens against three cows.

(To be Continued).

# BROWN LEGHORNS.

## Origin, Standard Demands, Color, Matings, Size and Finish. By T. F. McGrew.

WHILE the blood that gave us the start in Leghorns came from the Spanish countries, there is so very little left of the original type as to make them as truly Americans as are the Brahmas. The Brown Leghorns of to-day are fully as much American fowls as are we American people. Just how they were made no one can ever tell to a certainty, but those that have given most thought to the subject are inclined to the opinion that the early ones were from a cross of Black Leghorns or Minorcas with Earl Derby Games or Games of that character prior to their coming to this country.

We are also inclined to give to Mr. A. W. Halstead, of Rye, N. Y., much of the credit for early development of the variety, he having early in the seventies produced some of great excellence. He was inclined toward the true color and good size, also white ear lobes, a feature that all the strains did not have. From that early date till the present thousands have selected them as their favorite fowl. Among all these but few have gained the name of having produced the best quality.

### THE STANDARD DEMAND.

We shall only mention a few special points as to shape and head points. Many who breed Leghorns of all kinds have not as yet apparently discovered that they should have medium-sized and not large combs and that said comb of medium size should not have any tendency to follow the shape of the neck. When a comb on a Mediterranean has a tendency to follow the shape of the neck, brand it as a "Minorca Comb." Leghorns are almost as plenty as blackbirds. When we see a 30-cent Leghorn in the show room, it shows the advancement of its owner, or, perhaps, his lack of information as to the breed.

Ear lobes should be, first of all, smooth, not rough or corrugated; second, thin, free from folds or wrinkles, and should fit close to the head. Color, white; the ear lobe counts six. We have seen a rough, thick lobe that was full of wrinkles that did not fit close to the head and bad in color cut one and one-half on lobe. We think a lobe that did not fill one single requirement of the standard should be cut six. This is one of our objections to discounting for poor quality. Such an ear lobe destroys a specimen for any possible standard value as a breeder. Why should he be ever considered as of any value as a show specimen?

The tail of Leghorns seems to be less understood than any other section. For males, it should be large and full and carried well up, but not upright. Now, whenever the Leghorn male carries his tail upright it is wrong. Whenever he carries it beyond the upright and toward the neck it is very bad, but it seems to be the fashion to allow them to go uncut, if more than upright, just so they don't touch the neck. We think the most serious fault a tail can have is to be carried upright or beyond. We much prefer the tail that droops like the Hamburgs than the upright or beyond carriage, because it is more of a Standard tail.

The tail of the female, large, full, carried well up, hut not upright. This we consider a faulty description, because it does not provide for the spread tail so much to he admired, but it does demand that it shall not be upright. We prefer the tail that is spread out and rather open or inverted "V" shape. We like it as broad as the tail feathers will make it when each one lops half its width on the one above. We love to see the tail carried fairly well up and spread as above stated, but there is no Standard demand for such a tail, but we believe there should be.

### BREED TO THE STANDARD.

The only way to succeed in the exhibition room is to produce specimens that are actually up to the full demands of the Standard. It is the prattle of youth or inexperience to decry the Standard for Brown Leghorns, because, as they say, you must have separate matings for producing exhibition males and females. Any child could produce the old-time type and those who desired the dark seal brown female to be Standard or exhibition color simply did not know the inexcusable error they were making.

The effort was made at Boston to have the color of the exhibition female as follows: Brown pencilled with lighter brown, or, in other words, the dark color to predominate. This would have given us the dark seal brown surface color. That is very easy to produce; thousands of them can be found in every locality. They have no market value above utility prices, and those who would foist them upon the people as against the beauty and elegance of the soft, beautiful color that is now accepted as proper under the Standard, would do the breed an irreparable injury. Efforts of this kind on the part of any person or persons should be guarded against at all times.

### THE BEAUTY OF COLOR.

The real true beauty of color, as it should be on the Brown Leghorn female, is equally as difficult to produce as is the highest quality of color in any breed. It is quite as striking when seen as is the delicate finish of a well colored Dark Brahma pullet. The natural bent of the Brown Leghorn females is to grow darker, or, rather, the nature of the variety is to reproduce dark rather than light females. If we allow the Standard to call for the dark shade of color, soon we would have them almost black.

Occasionally the Black Red Pit Game that has the yellow shanks will produce a pullet that has the soft, clear, light shade of grayish brown that leans toward what is called "ashes of roses" in dress goods (remember, we say "leans toward" this color). When this soft shade of brown is nicely sprinkled with the darker shade, you have the original Black Red color in all of its beauty, as we frequently saw it prior to the superseding of the old Derby Game with the present type of Standard Game. That color is the true shade demanded by the Standard, as indicated by the winners at the large eastern shows. Mr. Morris, who never sold a Leghorn till he sold his whole flock the past spring, made the model for Brown Leghorn color in the East. He alone of all the many was never beaten, we believe, on Brown Leghorn females. He bred them all himself, never grew to exceed a dozen in any one year, and from them he was able to select the New York winners for several years. It is a misfortune to the fancy that he has retired. In his successes we have the absolute proof of the possibility of producing better show specimens from four birds on a small city lot than did all who opposed him in their extensive breeding.

The great secret of success in producing fine show specimens of any breed is first to know what must be produced to win; after that, to know what will produce it. We have visited the yards of many breeders and studied their matings. In some of them the absolute proof is presented in their very matings that tells us they neither know what the color should be nor how to produce it. When this is the case, but little progress is made.

### THE QUESTION OF MATING.

All have their notions and methods for the pairing of Brown Leghorns for the best results. There are those who make use of the same manner of females for producing males that they use for producing females and while they do produce some very superior males in this way, such matings have not produced females of quality, simply because the laws of nature do not lean in that way. No one has to our knowledge produced a New York winner in this way, and so far, the world over, including Canada and England, the finest colored Brown Leghorns have come to New York.

The barrier to producing fine females in this way is the fact that female Brown Leghorns that will produce high-class males cannot in the nature of things produce the soft, delicate color that should be present upon the true colored female. The reason for all this will be apparent to all who will study the plans of mating that follow. There may be in the future found a way to produce both males and females of the highest quality from the one style of females, but up to this time it has not been done.

The same Black Red color holds sway over the Brown Leghorn that influenced the markings of the old English Game. The same gives to the Partridge Cochin their rich red and black plumage; two have the striped hackle and all three could have. The female of each has the brown pencilled with the darker color. In successfully breeding each, the matings are double. The best colored Game males come of females that cannot produce exhibition females. The same conditions have existed with the Partridge Cochins.

This has to a considerable extent been overcome with the Partridge Cochins, one strain of which has produced males and females, full sisters, from one pair that have won first

in the same show for cockerel and pullet, the parent pair having won like honors one year before as young; and the same year and show as cock and hen. This is the result of training a strain within the demanded lines of color breeding. The fact tbat this has been done gives us reason for hoping that the same results will be obtained with the others.

MATING TO PRODUCE MALES.

The males we wish to produce must have the most exquisite finish of form and color or we have not gained the quality demanded. Shape, size and color must be very prominent or we fail, or we may have all of these and fail on head points, proving the necessity of evenly balanced quality of the very best in each and every section. To secure this we must have as the head of our mating a male that is as perfect in every section as a male can be. He must have size, strength and vigor and the best of color on shanks. Start right. If by so doing you feel you can only afford one pair, have them the best you can get. Never start tbe strain with poor quality.

The color of the male, rich, brilliant red. One even shade from the head down the neck and the whole length of the back to the end of tbe saddle. This color must be, as stated, brilliant red, not dull or heavy nor shading into lighter red or orange. The whole must be so even in shade as not to show any perceptible variation in same when examined from any point, the hackle and saddle strongly marked with glossy greenish black that follows the shape of tbe feather almost to the point, but in no instance should the black run out at the point, nor should the black show in any part of the red. The clear, unmarked red should encircle each feather about the black stripe and in no case should it show thin or faded on tbe edge. We have tried to make it doubly clear that the color and striping shall be true, bright and clean-cut, with no inclination for either to intrude its shading upon the other.

The Standard provides for a slight difference in the shade of color on wing bows. At the same time, if all can be of the one shade with neck and back so much the better. Close attention must be given to the wings, for the proper color of flights and secondaries lend their assistance in forming the wing bay and bar that are of so much importance. The color of breast and body, rich, glossy black; head points must be of the very best; lobes as smooth and white as possible; face entirely free from any trace of white; comb a model of perfection; under color as dark as can be found on such a well favored specimen.

The female for such a male sbould be fine in shape, large in size and very dark in color. Some of the females used in these matings are almost black; the breast the same color as the back, no salmon showing on breast; tails very dark. Such females show a slight trace of the lighter color over the dark and but little, if any, on main tail feathers. Some of the females from these extreme matings for males come with very dark shanks. Some make use of them for breeders. We should advise not to do so, because such matings injure shank color quite enough without aiding them by using the very dark shanked females. Keep an eye all the time, guarding against this evil.

Some, as above stated, use females that have salmon breasts and fairly good surface color with such males for producing males and in this way produce some good males, but the richest color, the darkest under color and the most prominent striping comes from the darker matings. So soon as one of these dark bred males is used for producing females, they will fail in so doing and destroy a female breeding strain if continued in. We have seen some males the past season that were produced from these dark matings that did not show any trace of gray, even at root of tail.

MATINGS FOR PRODUCING FEMALES.

The admitted Standard shade of color for Brown Leghorn females is a very soft shade of grayish brown that does not show the shaft of the feather. This is dotted all over or pencilled, as it is called, with a darker shade of brown (grayish brown is my own term, used to indicate a mild, soft color). Too many Leghorn females are almost seal brown in color, while otbers are too light in color. Both of these shades show heavy shafting and are usually quite uneven and at times tinged with red on the side of the wings. The color of the Brown Leghorn female must be very even all over, except the breast, wbich must be a rich salmon that shades lighter between the thighs.

To produce these females in perfection has proven a very hard task. Those who succeed the best mate the most perfect females they can find with males that have the orange hackle and saddle with the least possible shading or striping in saddle. Good males from such matings are valued highly for future matings. After breeding after this fashion for two or three years, a line of males and females can be established that will produce to perfection. We have in mind one strain that has been bred after this fashion for six years that last season produced some males with beautiful shanks and saddles of the most desirable orange shade, the hackle beautifully striped with black, the saddle entirely free from any shading of any kind. Such are the ideal males for producing pullets.

The only way to have better than any one else is to build up your strain so as to know that you have of your own a line of Brown Leghorn breeders that can be depended upon to reproduce better than themselves. It is useless to hope for success from a lot of breeders that lack in quality and that are not line-bred for pullet breeding. The winning pullets at New York for several years have been raised upon a city lot less than eighty feet square, by a man who never raised to exceed a dozen any one year, and all of these usually from three hens that he mated to a son of one of the hens by a son of tbe mother of one of those he bred from.

Many do not take so much pains as this with their matings, neither do they produce the highest quality. It is quite as necessary to have high quality matings for producing exhibition Brown Leghorns as to produce Barred Plymouth Rocks or Partridge Cochins. You may continue with the medium quality or chance matings, if that satisfies you, but for the best, great care in selecting, mating and line-breeding must be used.

SIZE AND COLOR OF SHANKS.

The day of the small or undersized Leghorn has gone. To be classed as Leghorns, females under five pounds in weight and males under six pounds are too small for the present style. First of all grand, good Leghorn shape must be presented. Color must be right up to Standard demand; head points, perfection. To all these must be added good size and tbe proper Standard color of beak and sbank. The Standard allows horn color for beak, bright yellow for shanks, dusky yellow for toes, and disqualifies for shank color other than yellow. The same black red color on Games has willow shanks; on Partridge Cochins yellow or dusky yellow. It is a hard task to produce Brown Leghorns of high quality with all tbese belongings; at the same time there is no excellence without very great labor in all things; only those who try can or should succeed. We shall hail with delight unusual demand for quality in the show room rather tban leniency.

To gain the larger size in Leghorns one must depend upon hens of the largest size obtainable for breeders. Size comes largely from the females. Use hens, not pullets, for this purpose. Follow this rule for several years, but do not go beyond the size that maintains good Leghorn shape. There is a size in every breed beyond which you cannot go, for if you do, good form will be injured. There is, however, but little danger of Leghorns going beyond this size within themselves for several years. Some Whites have been injured by the too much intermingling of White Minorca blood, but even tbis can be tempered into good form, if carefully handled.

The color of shanks is of vast importance, because bad color in them demands they be disqualified. Even now the shank color has been allowed to get at least very close to the point where the specimen might be debarred, but the facts are that the closer you come to the real colors that the Standard calls for the more likely you are to have the dusky shade. As we move along the line of study the high color qualities present with some of the very best specimens shown, we are led to consider whether or not we shall reduce color demands or permit the dusky breeding, that is allowed on the toes, to creep up the shanks. Don't throw down the bars too soon. Study the question well in all its bearings and decide as experience teaches, not as theory would have it.

---

If anybody is in position to make money with poultry it is the farmer, and yet the farmer generally says there is no money in hens, this, too, in the face of the fact tbat he knows of poultrymen who are making the business profitable.

---

Milk in any form is one of the best foods for fowls. Mix the mash with it for growing young stock. It is excellent for drink, but cannot entirely take the place of water.

# Houses and Fixtures,

## Timely Hints Upon Building.

By M. K. BOYER.

WE may have the finest stock in the world, and give them the very best feed, yet we cannot hope to have good results if we do not provide proper houses and necessary fixtures.

To get the best result from stock we must have cool houses in Summer and warm houses in Winter. In other words, the fowls must be comfortable. Hens will lessen their egg yield as quickly during hot weather as they will during cold weather, and while we cannot change conditions entirely, we can so moderate them that the fowls will not suffer.

Coop up a lot of fowls in a close house during Summer, and they will suffer more torture than they would outdoors during bad weather; and quarter them in a cold house in Winter and they do not receive any more comfort than they would in an open shed.

We are firm believers in fresh air. We believe it is necessary for the health and thrift of fowls, and it is surprising the amount of cold they can stand.

In order that our fowls may not breathe impure air, we have all our houses built with open wire fronts, which afford a lot of cool fresh air during the Spring, Summer and early fall. When real cold weather sets in windows are put in place of these wire screens in the small houses, and muslin curtains in the large houses (or scratching sheds).

Our ideal of a house is built on the scratching shed plan. That is, we erect a plain house about six feet high in front and four feet in the rear—single pitch roof. The length of the house is sixteen feet; breadth, seven feet. The interior is divided off into a scratching shed 10x7 feet, and a roosting pen 6x7 feet.

The house is built of matched lumber, with a roof made of hemlock boards, over which is laid Paroid roofing. The entrance to the pen is in the front of the scratching shed, the door and remainder of the frontage being covered with inch wire netting. This gives protection from the rats, weasles, skunks and other enemies of poultry, not even forgetting two-legged coons. Entrance to the roosting pen is made from the scratching shed.

The front of the roosting pen is matched lumber, with a half window sash, over which wire netting is fastened on the outside of the building. During warm weather the window is removed and the wire netting prevents anything getting in the pen, but at the same time it allows the fresh air to enter. The back wall of the roosting pen, as well as the side walls, are double boarded with paper and an air space between. This makes a very comfortable place for them to roost in Winter.

The roosts are placed two feet from the ground, in the rear of the roosting pen, with a platform under them, and under the platform we have the nest boxes.

During the coldest weather we have never had any trouble from frosted combs on the fowls quartered in these pens, and during Summer nights we have never noticed that the fowls suffered from the heat as is the case in closed pens.

The poultry fraternity have to thank that veteran, I. K. Felch, for the introduction of scratching shed houses.

While living in Massachusetts, the writer saw one of the original scratching sheds as devised by Mr. Felch, and while the plans today are superior to the one he used, yet to him must be given the credit of originating the idea.

Acting upon Mr. Felch's idea, the writer made some changes, and somewhat improved the style. Mr. Felch had his roosting pen larger than the scratching shed, and had the front of the shel open the entire year. We made the roosting pen and scratching shed of the same size, and closed the shed front in Winter with muslin, painted with linseed oil. This muslin we fastened to the building with ordinary carriage buttons.

A. F. Hunter then took a step forward and made the scratching shed larger than the roosting pen, which was a wise move, as a fowl needs more room during the day than she does at night. Mr. Hunter furthermore improved on the curtain part, making that a hinged door.

These scratching shed houses can be erected at $2 per running foot, and that price includes labor, material and fencing for 100 feet runs.

While we do not wish to claim that these scratching shed houses are perfect, or that they are superior to any other class, we do say that we have never used any house that has given us more convenience and satisfaction, and in which fowls thrive so well.

In this connection we might say a few words regarding runs. It is important that we have good, comfortable houses, and it is equally necessary that we have suitable runs. We have experienced the fact that, with proper feed and attention, and where sufficient run is provided, we can get better results from yarded poultry than if allowed free range. This is no theory. It is the actual result of careful experimenting. But our readers must not draw from this that fowls will thrive in small runs and with indifferent care. They must be given the best of attention, be compelled to exercise, and there must be as great a variety in the food.

Not less than one hundred feet in length should be allowed each flock, but instead of having that space in one run, we prefer dividing it, having a fifty-foot run in front of the house and fifty feet in the rear. By this plan, one section can be sown to green stuff while the other section is being used. This enables the keeper to supply green food in the best form.

* * *

In each scratching shed we have a long trough, hooked to the wall. We also have one of the same size in each run. During clear weather we feed our mash in the troughs in the runs, and during bad weather the mash is fed in the troughs in the house. Each night we hook these troughs fast to the wall, and turn over the troughs in the runs. By doing so we always have clean troughs for the fowls to eat out of.

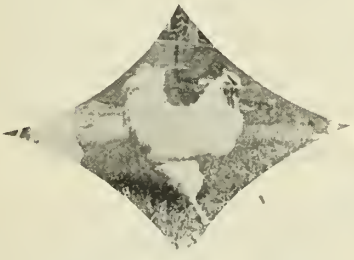
* * *

In drinking vessels we have quite a variety on our farm, which includes the Hallock, Prairie State, Russ, and Hood. The Hallock we use in our breeding pens, the Prairie State in the runs occupied by our growing stock, and the Russ and Hood fountains in the chick runs. These two latter are crockery, while the two former are made of galvanized iron. Any or all of them are for sale by dealers in poultry supplies.

* * *

Other fixtures of use on a poultry farm are as follows: A cooker, which can also be used for heating water; a root cutter for cutting up potatoes, beets, turnips, etc.; a bone cutter; a clover cutter, more profitable for cutting grass and other greens than hay, as we can buy cut clover hay about as cheap as we can buy it in lengths and cut it; incubators and brooders. Another invaluable adjunct to a poultry farm is a carpenter shop. There is a constant need for tools, and all well-equipped plants have a small shop fitted up for this purpose.

We have mentioned just such fixtures as are most necessary in the work, and the plan of house that has given us the best satisfaction, and hope the hints may be of value.



First prize pen of White Wyandottes at Cleveland, Ohio, January, 1901, and a cock bird at the head of a special mating, which has produced some remarkably fine and promising cockerels white as snow. These birds are the property of George G. Brown, East Cleveland, Ohio, the well-known proprietor of Roycroft Poultry Farm. Mr. Brown has made rapid progress in this variety, and has birds fit to win in the strongest competition, as the records of his customers prove.

———o———

There should at all times be plenty of clean straw or other litter on the floor of the poultry house. Have it at least six inches deep and never feed whole grain anywhere else.

———

Exposure to cold, chilling rains has furnished the foundation of a cold that has developed into roup and killed many a promising young bird.

AMERICAN POULTRY JOURNAL

Puhlished the first of each month by
GEO, G. BATES, 325 Dearborn St,, Chichago, Ill.

FRANK HECK, Editor.

Subscription price 50 cents a year in advance.

When delivered by carrier in Chicago 60 cents a year in advance.

Payment for AMERIOAN POULTRY JOURNAL, when sent by mail, should he made by money order, registered letter or stamps.

Write name and address plainly, and if JOURNAL does not come regularly and promptly, write us at once.

In requesting change of address. be sure to give the old address as well as the new one. This is important.

Advertising rates will he furnished on application.

The reliahility of new advertisers must he ascertained before an insertion of an ad in the columns of AMERIOAN POULTRY JOURNAL can he made. This is a business matter, the justice of which is readily seen, as proteetion to the readers who answer advertisements.

Alway say when writing advertisers, that you saw it in the AMERICAN POULTRY JOURNAL.

All copy for advertising and manuscripts for publication should reach us not later than the 20th of the month preceding the date of issue.

### *Special Features for Next Month*

In addition to much miscellaneous matter of more than ordinary interest we will give to readers of A. P. J. next month a special article upon the subject of preparing birds for the show room which will not only be timely but will cover the subject in a thorough and pleasing manner, treating at length of the details of fitting birds for show. This should be read by every breeder who pretends to raise show specimens. It will explain the many items of care and feed which contribute to success and influence the awards. If you want to be doubly sure of winning do not fail to read this article. There will also appear a communication upon the subject of specialty breeding, answering the question, "Has the specialty breeder greater chances for success than the breeder of several varieties as regards prominence and high prices for stock and eggs? If so, why?" This is without doubt the best treatise that has ever appeared upon this important subject. The arguments are convincing and the points involved are handled in a masterly manner. Many breeders will find in this hints which will aid them in ferreting out some of the stumbling blocks to success and the beginner will certainly find therein a fund of advice which will save him loss of time and money and possibly from failure itself.

### *Judging at the Chicago Show.*

The management of the Chicago show has adopted a unique plan for satisfying exhibitors in regard to the method of placing awards at the next show. The directors have certainly made a mighty effort to please the exhibitors, and it will, no doubt, be appreciated. The plan may be open to criticism, but not more so than would the adoption of the comparison system exclusively. The entry blanks prepared for exhibitors will contain a column marked "Method of Judging." Exhibitors will be requested to indicate in such column for each specimen the method by which the exhibitor desires such specimen shall be judged. As soon as the entries are closed the secretary will examine the entry sheets and ascertain therefrom the wishes of the exhibitors in each class. If in any variety there should be a tie or if all the exhibitors in the variety shall fail to indicate the method by which they wish the specimen in the variety judged, then a committee on judges shall determine the method by which such variety shall be judged. At first glance this looks entirely reasonable and that a majority of the exhibitors would dictate how the classes should be judged. It will be noted, however, that it is entirely possible for one or two exhibitors in a class to control the matter, regardless of the total number of exhibitors in the class. For instance, if one exhibitor has forty birds, his wishes in the matter of judging are respected more so than would be five other exhibitors, making a total entry of thirty-nine birds. Looking at the matter from one standpoint, it is, perhaps, proper for the man with the largest number of birds to say how the entire class should be judged, but it would also seem that the majority should rule and that the wishes of a majority of the exhibitors should be respected. The feasibility and wisdom of the plan remains to be demonstrated.

### *To Poultry Show Managers.*

The almost universal demand for Frank Heck's model Constitution and By-Laws and Rules and Regulations for the government of poultry shows led us to mailing a copy to all secretaries whose names and addresses we could obtain at the time it was issued.

We find from inquiries now coming in that there are some who have not received the booklet and to those who have not and those who may not have seen the announcement we wish to say that we will be glad to send a copy to all applicants who are interested in the management of shows.

### *Rhode Island Reds.*

Mr. T. F. McGrew in his article last month took occasion to speak in somewhat uncomplimentary terms regarding the Rhode Island Reds and as a result we are in receipt of a number of vigorous protests from admirers of these fowls. We can find room for only two of them and as they thoroughly cover the questions involved we trust that our Rhode Island Red friends will be satisfied and especially as the breed is defended by such able writers as Mr. Crowther, of Massachusetts, secretary of the Club, and Mr. Taylor, of Michigan. It is unquestionably true that the Rhode Island Red has many points of merit to recommend it, but the unprejudiced onlooker will agree with Mr. McGrew in some of his conclusions. We think that his motive has been misunderstood by his critics. We hardly believe that he has said anything which was prompted by a malicious desire to injure the breed. Among other things Mr. McGrew says, "their own ardent admirers dispute one with the other on matters of what they call Standard qualities." This recalls the fact that at the last Boston show we were among the interested listeners to several as heated discussions as we ever heard upon any subject, politics included, relative to what constitutes proper shape and color. This is not strange, all things considered, but it is evidence that the breeders of the Reds should quickly and effectually reduce to a minimum the drawbacks which make it possible for these differences of opinion to exist. The birds which we saw at the Boston show were indeed handsome fowls and in shape and size were as near the ideal market fowl as any breed we know of. They are more worthy of a place in the Standard than are some of the varieties now given recognition there and we trust that the breeders of them will continue their work with untiring energy till the popularity of the breed will be sufficient to warrant their admission.

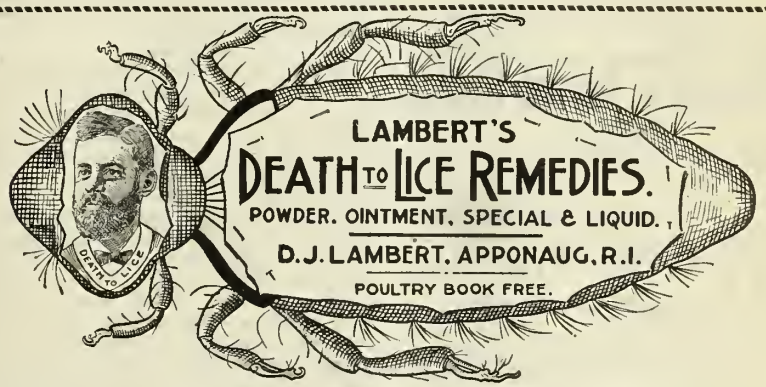
### *Winners in the Prize Contest.*

We had hoped to be able to announce this month the names of the winners in the $50 prize contest but the work connected with the matter has proven greater than we anticipated. We received upwards of 125 articles containing nearly three hundred thousand words. This immense lot of matter has had to be typewritten with names left off. It was necessary to rewrite the articles for the convenience of the judges and in order that each one could receive a copy at the same time and therefore enable us to get their decisions much sooner than we could otherwise. The articles have all been prepared for the judges, we having placed two expert stenographers upon the work and we are quite sure of getting a decision from the judges in a few days. The men selected are I. K. Felch, Natick, Mass., M. K. Boyer, Hammonton, N. J., and F. L. Kimmey, of Chicago. We do not know of three men who are better qualified to intelligently and satisfactorily place the awards. Mr. Felch has for half a century been in the closest touch with poultry culture in all its branches and has earned the oft applied title of the father of the industry in America. Mr. Boyer's years of practical and editorial experience have made him known to all poultrymen and enables him to correctly pass judgment in cases of this kind. Mr. Kimmey is an experienced fancier and breeder who has for years devoted liberally of his time to poultry as a recreation. He is and has been the moving spirit in the Chicago Show and is now holding the position of president of the American Poultry Association, which is evidence of the high esteem in which he is held by the fraternity.

A certain amount of food is necessary to sustain life and produce an egg. If the hen does not get it the egg basket suffers the loss. You cannot steal from nature without paying the penalty.

### Get a Record.

We wish to impress upon the minds of breeders of exhibition stock the importance and advantage of a show record. There may be some poultrymen to whom a show record is of no special benefit or to whom it is not particularly desirable, but they are not breeders of Standard-bred birds. The only class not affected are those who breed scrubs, or rather those who allow the scrubs to exist upon their premises. These people cannot properly be termed breeders. Even the market poultryman who may not lay claim to having exhibition stock, will find it greatly to his advantage to get in position where he can make the claim. By so doing he can materially increase his business, because he can raise high-grade birds as cheaply as he can a poorer quality, and with proper management he can sell a bird for $10 that would otherwise be sent to market at a few cents per pound. Proper management in this case means that he intelligently mate his birds, pick out a number of the best ones reared and place them in competition at a poultry show. It goes without saying that the fancier is vitally interested in showing his stock. He cannot know just how good his birds are unless he is capable of judging them himself, and even then he cannot have the satisfaction of knowing that his stock is better than the other fellow's without meeting him in the show room. If he is a fancier for profit as well as pleasure, then it is simply shortsighted negligence for him to keep his birds at home during the show season. He may have just as good or better birds than his more enterprising competitor (some people always have "better birds at home") but the public will not believe a word of it and he is deluding himself at his own expense in thinking otherwise. The great army of buyers are not going to part with their cash unless they are reasonably sure that the party with whom they place their order has the quality of stock they desire, and the best and most convincing evidence is a show record. Many breeders are at times prompted to remain away from a show because they fear that they will not win and that defeat will injure them financially by affecting their sales. There is also a certain degree of false pride which will not allow some people to take defeat gracefully. The breeder who faces competition and wins only a third prize is to be more highly commended and he will enjoy a better business than will the one who stays at home. Not only this, but he learns valuable lessons which enable him to more successfully meet competition each succeeding time, and he develops staying qualities which sooner or later will place him in the front rank. The breeder who is afraid his birds are not good enough to win should sit down and think the matter over. How can he hope to raise good birds next breeding season if his present stock is not of the proper quality and how can he consistently expect people to patronize him if he himself has not enough confidence in his stock to show it. If he has not as good as the best, let him sell ont and buy the proper kind and start in upon a basis that promises success. In going after a record it is well to bear in mind that there is a difference in them not only as regards the numerical value of the premiums won, but the size and character of the show. A third prize won at Chicago, Boston or New York is more to be desired than a first prize won at some local show, where competition is not very strong and the classes are small. We do not mean to speak disparagingly of the smaller show, but wish merely to emphasize the fact that the stronger the competition the greater the value, from an advertising standpoint, of the premiums won. Everybody cannot exhibit at the larger shows and the beginner especially would be unwise to attempt it unless he has paid long prices for the best birds to be bought. At the large show are generally found the birds that have previously taken the highest honors at the smaller show. It is a round-up, so to speak, at which the cream of the season's production is found. There are more shows this year than ever before, which means that more people will become interested than usual and that there will consequently be a greater demand for stock of the popular varieties. This fact should serve as an incentive for all breeders to exhibit at one or more shows in their state, and more particularly in their immediate locality. After a record has been made there is yet an important item to be considered before full benefit is derived from the winning of the prizes. We may have a farm full of winners and any number of blue ribbons, but if the buying public is not aware of the fact we will be no better off than if we had not won a prize. It is also necessary that the news be heralded abroad rather than at home, for it is a well known fact that there exists an insane desire upon the part of a large majority of buyers to send away from home for stock and eggs. You can sell more birds away from home and at better prices than you can at home, and your success financially depends upon how widely and judiciously you advertise your winnings. There may be some people so narrow minded and suspicious as to jump at the conclusion that this advice is biased and influenced by the fact that we have advertising space to sell. We will make no excuses or explanations for their benefit. Those who cannot realize the truth of our statements would hardly have business foresight enough to advertise very extensively or to place their business upon a profitable and lasting basis. The breeder who fails to advertise will soon find that he is a "has-been" and that he is without a business. The observing man who has been in the business a few years can point to numerous cases of this kind. If you do not intend to spend a reasonable amount in advertising in a publication with a *national circulation* and with a *subscription list large enough to make it thoroughly representative*, you may as well not go to the trouble to get a record. The breeder who does the business is the one who gets the record and says the most about it. In this connection it is well to remember that inflated values or exaggerated statements regarding the importance of a premium will do more harm than good. Do not try to create the impression that the competition at Clayville was as strong as that at the leading shows of the country. Do not overestimate the size of the show or the number of birds in the classes. Advertise just what you won and no more. Honesty is the best policy, both for conscience's sake and as a matter of business. There are thousands of breeders who believe enough in the value of a record to get one, but they do not seem to realize the necessity of advertising it or the advantage in so doing. At one of the largest national shows last season



**We Want to Make Room for Small Fry.**

**DANIEL P. SHOVE,**

**Box 666, Fall River, Mass.**

an unknown breeder stepped in and in competition with the most noted breeder of the variety he made practically a clean sweep. Instead of following up the advantage thus gained, he remained in the background and lost at the lowest calculation a thousand dollars in sales of stock which would have undoubtedly come to him by judicious advertising. Many an advertiser has failed to get profitable returns and been unable to trace the cause when it was plainly evident. We refer to those who have no winnings or record to advertise and whose competititors are carrying a card in the same column calling attention to their show record. The buyers, as above stated, will spend their money with the advertisers who can furnish the most proof of quality and the people who can do this are the ones who have met competition in the show room and have come out victorious. Therefore, *get a record.*

# WOMEN'S DEPARTMENT.

This department, while of interest to all breeders, will be conducted with a view to making it especially interesting to the women, who, if the truth were known, are responsible for the success of many a husband. The matter herein will be edited by Mrs. Myra V. Norys and will consist largely of instruction and advice in response to requests from readers. The sympathetic feeling of the gentler sex for each other should make this department of more than passing interest to our lady readers, and the demonstrated ability and wide reputation of Mrs. Norys makes it all that could be expected as regards the practical value of the information contained therein. Every line of thought and work in which women may be supposed to be especially interested will find space for discussion here, and all who desire to ask questions, no matter how elementary, or wish advice upon what to do to overcome the difficulties peculiar to their case, are urged to make use of this department. Address all letters to Mrs. Myra V. Norys, Ridgewood, N. J.—[EDITOR.

## WOMAN'S FUTURE PLACE IN THE WORK.

SINCE woman has already won so fair a footing among fanciers, marketmen and writers on poultry topics, it may not be amiss to ask where she is likely to find her best field, and what her future standing and proportion among poultry keepers is likely to be. The crying need today is for instruction—which can be best secured by actual work on the plants of those who have become expert, not only, but who know how to pass their knowledge along. Failing this, there remain special schools; or the time-honored way of getting one's schooling as one goes along, and paying for it in chickens and worry and hard work—often for nothing but schooling, because not done with judgment.

### THE CHANCES.

There is, at the present time, but very small chance anywhere for gaining the first class of instruction mentioned, because poultrymen are looking much harder for skilled help than for the unprofitable "green hand." If the pupil cares to pay for board at least, and often something for tuition as well, it is quite likely that openings will come. But chances for free tuition are not so likely to come for the woman as for any man, unless she is willing to help in the house as part of her work. Any one who will fill the kitchen demand, ever present, will in time find opportunity to work out the rest of her desire. Yet this is a hard saying, for it is largely the brightest and most enterprising women who will be so anxious for instruction, and these are ill-fitted to take the place of a servant, even in homes where they can receive a fair degree of consideration and respect.

### THE SPECIAL SCHOOLS.

These schools are bound to increase in number and usefulness—particularly (as it now looks) in the correspondence line. In these schools, as in medical schools, there is much that is unpleasant in the mixed class instruction, but if a woman be strong of body and spirit, there is no reason why she may not gain fully as much as her brother student. The correspondence courses are pleasanter and probably cheaper, but they do not fully take the place of the others. There is still need of practice work. Yet in the correspondence schools, presumably, women will find their best and most feasible help, which they can supplement by practice work on their own plants, even if these "plants" consist of but two old hens and coops for same: these will soon become more in eager, persistent hands.

### WORKING IT OUT.

Not long ago, I saw a letter from a large and successful poultry raiser, saying that he was ready to take on a month's trial, for board only, any woman who was reliable and willing to work, and who would help in the kitchen part of the time. Most of her work would be among the chicks; if, at the end of a month, both parties to the matter were satisfied, he stood ready to pay fair wages. The word "fair" is, of course, susceptible of many interpretations, but assuming that both employer and employed were reasonable and lovers of justice, the right thing ought to come out of the month's trial. Some one has said that it is because a man can be put at laborer's work, as a woman cannot, that he can find work where he can learn the rudiments by actual practice and without the risk which putting his own money into an untried venture would demand. If this be true, the call for kitchen help everywhere will offset it, and a woman can find her niche if she wants it badly enough to make some sacrifices of pride in order to attain her great desire. This is the most practicable thing at present in sight for women who would learn poultry keeping as a business, to obtain the instruction they seek without paying out money direct.

### HANDLING LARGE PLANTS.

Reference was made last month to an editorial statement intimating that women are slow in working out effective methods of handling stock in large numbers. Be that as it may, women are quick to learn. If they are not fitted to work out large problems of handling easily by themselves, let them study how men do it! Let them consider, right where they are working, the methods of the men who are handling large plants. An object lesson gives the best opportunity in the world for this; for no one quick to observe and interested scans the work of another without not-

ing where it could be bettered. "When I get a place of my own," says the embryo superintendent of Big Things, "I will better *this*, and do away with *that*." All this is schooling. It may be that soon the very idea contemplated may be seen in practice, and the critic having studied it is ready to judge wisely as to its real value.

WOMEN AS SUPERINTENDENTS.

Only the exceptional woman will ever become a superintendent, other than of her own place. I know of one who does superintend a large broiler plant for another; I know, also, of one woman who superintends one of the largest mills in the country. She attended the same school where I studied, and gave no sign of remarkable brilliancy or destiny. Events simply pushed her in this direction. But such cases are no indication of woman's fitness, generally speaking, for this unusual work. Then, there is a practical reason inherent in the business wherever markets are good enough to make it worth while to build up a plant. There has been a little public talk lately about the excessive value which students of the special course at R. I. set on their services, and this is attributed, inferentially if not actually, to an undue valuing of their attainments, perhaps something like vanity. But, for the "Pioneer" class, I can say this: it was not an undue valuing of their own attainments, but a conviction that there was too good a promise in the work for one's self to allow a low price in case of engagement with another. To what purpose have they taken this course, except to learn how to avoid the *risks* which the ignorant must run? Having done this, to what purpose should they pass over the best profit to another? Because of this, I say that, even if there be a call for her services, it is not likely that woman will be found largely superintending other plants than her own. Moreover, laborers do not take kindly to a woman's superintendence; and in her own case, she will have picked help as she could not expect to do on a large plant owned by another.

MEN EQUALLY INTERESTED.

Editor Robinson has stated his conviction that, contrary to the general belief, "women are not better poultry growers than men — not than men equally interested in poultry." The limiting clause might do much to prove him right, or wrong, as one viewed it. Personally, I am of the opinion that men are never "equally interested in poultry" with women, except in cases of an occasional born fancier and the comparatively few who depend chiefly on poultry for the family support. And I strongly suspect that even the struggle of the average man to support his family lacks the intensity of that of the woman who feels compelled to earn a little extra for any of the various reasons which may appeal to her. Add to this that poultry growing is almost the only side occupation which gives good promise of profit to the woman who must spend her life and most of her strength at the hearthstone, and how is it possible for man, with his thousand opportunities, to feel the very painfulness of interest which dominates her? All this without mentioning the characteristics which are commonly supposed to make women the superior poultry raisers. Mr. Robinson says, however, and it may be truly, that woman is very much slower than man in working out effective methods of handling large stocks of fowls, and that she is a little more apt than he "to fool away time and money in doctoring sick fowls and coddling weak ones." Even without the observation which has led to this conclusion, it might be predicated from the facts that women are used to being compelled to work at disadvantage and that their nature and usual occupation would lead them inevitably to "coddling." With lives spent largely in dealing with man and child, how shall they escape the enlarging of this characteristic?

## BRIEF MENTION.

The Sisters of Mercy, at a special sanitarium in the Adirondacks, have been having worldly troubles connected with hens! Miss Frances Ellen Wheeler, who tells the story in the Woman's Special of Poultry Monthly, says: "The wicked little pests that bother our secular hens are no respecters of persons." In the midst of their troubles the Sisters called on Miss Wheeler for help, and together they reduced the work to a paying business basis. One of the most interesting things at the New York show last winter was the sight of Miss Wheeler and one of the Sisters conscientiously "doing" the big show the whole week for what they could learn. I can warrant that it paid, it was so faithfully done.

Miss Wheeler is herself most interesting personally, in that she has wrested success from life more than once. Born "in the purple" as to finances and later thrown on her own resources, she fitted herself for stenographic work. After a few years, her hands failed her and she turned to ducks and bees. She has built up a paying trade alone and is notable among those who know of her work as both full of common-sense and eminently "a lady."

Mrs. Nellie Hawks, of Nebraska, will, with the aid of several men as assistants, superintend the exhibits of the Sure-hatch Incubator Co., at some of the big western fairs and shows. She being an excellent talker, and always an enthusiast, I suspect that she does this work remarkably well.

Prof. A. A. Brigham as the masculine member, and Mrs. C. S. Valentine as the feminine member, were elected last spring to form the executive committee of the League of Student graduates from the R. I. College special poultry course. It is rather interesting to find them again in conjunction in active work: both have been engaged by the New York Weekly Tribune to furnish the special poultry matter for the greatly enlarged Agricultural Department of the Tribune.

Miss L. Goodell, of New York State, says that the main portion of her work in breeding high-class Dorkings has been to sell breeders and exhibition birds to exhibitors "especially to the men with 'strings of birds.'" She will, however, show in her own right at the Pan-American.

# THE GREAT POULTRY PLANT

## of U. R. Fishel at Hope, Ind. The Home of Fishel's White Rocks, and Easily the Largest Western Poultry Plant. It is Devoted Exclusively to One Variety of Fowls.

There is no poultryman in this country with a heart that pumps good red blood, who has not an ideal in his mind that he hopes to realize sooner or later. Ideal surroundings that will go to make the work of poultry raising a profit and thus will afford a pleasure in the work of producing the winning stock that is the foundation of success.

No poultryman of recent years has established a better known strain of fowls than has U. R. Fishel, of Hope, Ind., and no breeder is better known to readers of the AMERICAN POULTRY JOURNAL than Mr. Fishel.

The Hoosier state of Indiana, lying in the belt that includes some of the greatest poultry-producing states of the Union, can lay claim to a model poultry plant, the home of Fishel's White Rocks, where, under the best conditions of a clear Indian summer morning, I first caught sight from my window in Mr. Fishel's hospitable farm house, of scores of these white beauties industriously catching the lamented, ill-advised early worm on the pasture land across the way.

Mr. Fishel has always been a fancier from early boyhood. For a good many years he successfully conducted a hardware business in Hope, a town of about 1500, but at no time did he lose his love for his fowls. Success with his fowls and a growing reputation in the show-room from continued winnings increased his poultry business to such an extent that he disposed of his interests in his mercantile business, bought a 120-acre farm, lying just outside of the town and for nearly a year has given his entire time to building a poultry plant to meet the requirements of his business. The farm, consisting of 120 acres, is gently rolling land with heavy soil, well watered by a stream at one side, and all the grain necessary for feeding the fowls is raised here. The railroad runs directly by one side of the place and the roofs and sides of poultry houses and barns afford an excellent chance for sign painting. Mr. Fishel has demonstrated his well-known advertising ability by announcing in letters two feet high to hundreds of passengers who pass daily that here is the house of "Fishel's White Plymouth Rocks—Best in the World."

Fifteen acres have been set aside for poultry houses and runs. Here are five scratching-sheds 8x24, with one-half to one acre to each shed; ten colony houses 8x12, with an equally large runway. The colony houses are built on brick pillars 18 inches off the ground, which is an especial feature with these houses. There is a large two-story building used for the shipping-room and upstairs are rooms to prepare exhibition birds. The shipping-room is provided with every convenience for quick work in cooping and shipping stock with permanent coops for stock after selection is made.

The winter quarters are 16x48, with a 16x20 "L." The lower floor of the main part is used for keeping male birds in winter and the best exhibition and breeding stock. On the upper floor are the

Gold Medal & Highest Award
at the Pan-American, Oct. 1901,
Were Placed on
THE CYPHERS INCUBATOR.

We do not attach great importance to medals and awards, no matter by whom given. What we do swear by is the fact that the Cyphers is to-day used with uniform success on TWENTY-SIX GOVERNMENT EXPERIMENT STATIONS in the United States, Canada, Australia and New Zealand; also by America's leading poultrymen and by many thousands of persons in every walk of life. The Cyphers Non-moisture, (Original and only genuine) Self-ventilating, (diffusive principle fully covered by patent) Self-regulating Incubator is now

**The Standard Hatcher of the World.**

It is used in every country on the Globe where poultry is produced for market and is giving satisfaction "the world around." (Ask for foreign testimonial sheet.)

The Cyphers Incubator is sold UNDER A POSITIVE AGREEMENT that it will do satisfactory work in the hands of every purchaser who will give it a fair trial, or it can be returned and the price paid will be refunded. Agents for the Cyphers Incubator are AUTHORIZED BY CONTRACT TO STAND BACK OF THIS GUARANTEE IN EVERY PARTICULAR.

Illustrated, descriptive, 32-page circulars, English, German or Spanish, FREE ON REQUEST. Complete Catalogue and Poultry-man's Guide, 224 pages, 8x11 inches, weigbing one and a quarter pounds, 10 cents in stamps for postage. Ask for Book No. 5 and address our nearest office.

CYPHERS INCUBATOR CO.,

BUFFALO, N. Y., Cor. Court & Wilkeson Sts. | CHICAGO, ILL., 325 Dearborn St. | BOSTON, MASS., 34 Merchants Row. | NEW YORK, N. Y., 8 Park Place.

brooders for early chicks. The "L" is devoted to coops for male birds for winter.

Every house, room and coop is numbered for systematic keeping of records of stock. There are miles of wire fencing provided with substantial white wooden gates. The houses are well built, neatly painted and the great noticeable feature of the whole plant is its extreme neatness and cleanliness, all houses being cleaned every day.

In addition to the space devoted to buildings, Mr. Fishel has 17 acres of orchard and meadow land given over to growing stock. He has planted poplar trees for quick growing shade in the 15-acre tract about the buildings, which will be left until his fruit trees will be large enough to afford shade. This fall he will plant 300 apple trees.

I asked Mr. Fishel to describe his manner of caring for stock from the incubator to maturity. He follows a well-defined system. The young stock is taken from the incubators and placed in brooders in the winter-quarter house. They are left there until six or eight weeks old, then placed in out-door brooders in the orchard. When fully feathered, put in colony coops made out of piano packing boxes in convenient places. The stock is kept in these coops until nearly matured, and then separated into lots of 60 to 75 each to one acre of space. The use of these piano packing box coops is an idea of his own. He buys the new boxes from the manufacturers, battens down water-proof paper on the tops and slanting sides; detaches half of one end for a door, hanging it with strap hinges; hinges a part of the front for ventilation, protecting the opening with wire netting, and you have a fine house at the cost of $2.50, complete, ready for 50 chicks until ready to move into larger quarters.

Mrs. Fishel has the management of the Bronze Turkeys entirely and she now has between 200 and 300. The breeding hens reach a weight of 30 pounds and the toms from 42 to 48 pounds.

There is plenty of life and variety of interests in this model place, for there are the imported Fox Terriers, filling the air with manifestations of their presence, and the Pointers that they were so proud of. White seems to be the prevailing color, for there are also the White Belgian Hares, that Mr. Fishel has carefully selected and bred, and scores of White Fantail pigeons that Master Edward claims for his own. If Mr. Fishel were not so well known as a White Rock Breeder, any one of these other varieties of stock would make him a leader in each fancy.

There is, however, one pet that departs from the prevailing white, too important to overlook. Master Edward's black and brown goat is no respecter of persons and is just as much at home on top of

## PIKE'S POULTRY FOOD.

We do not claim everything for this food. Simply that it will increase the egg production, promote growth and help keep your fowls well. We make it ourselves and everything that goes into the package is pure and of special value to poultry. Valuable article on "How to Make Poultry Pay" free with each package. Agents wanted. Liberal inducements given.

R. A. PIKE & CO., 29 Bedford Ave., Minneapolis, Minn.

## Phœnix Poultry Yard.

I will sell one hundred cockerels at $2.50 (two dollars and fifty cents) each.

**Barred and White Plymouth Rocks, White Wyandottes, One Black Langshan.**

I also offer my entire stock of Buff Plymouth Rocks, consisting of four fine cock birds and about forty hens. A rare bargain in these. Write for particulars to

**MRS. J. H. OREBAUGH, Batavia, Ohio.**

# WHITE ROCKS, EXCLUSIVELY

No breeder has better stock than we have and no breeder sells this high grade quality of stock at more reasonable prices than we do. Breeding cockerels $3.00 up. Eggs $3.00 per 13, $5.00 per 26.

**EDGEWOOD POULTRY YARDS,**

**700 Stowell ave., Milwaukee, Wis.**

# MATTESON HAS

## Just What You are Looking For

The right kind of stock at the right prices. Leghorns—Single-comb White, Buff, Black and Rose-comb Browns. Wyandottes—Golden and Black; Barred Rocks, Partridge Cochins, Game Bantams, Pekin Bantams, Rouen Ducks and White China Geese. Also Scotch Collie Dogs—the poultrymen's dog. We win with our birds each season. Have won this year at Upper Sandusky, Carey, Bucyrus and Sycamore—all good Ohio shows. Special bargains in cockerels and eggs now.

**IRA T. MATTESON, Upper Sandusky, Ohio.**

## Barred and White Plymouth Rocks
## Light Brahmas.

Some very choice stock in the lot, scoring up to 95½ points by Felch, Lane and others. These are a part of my this season's breeders, and must be sold at once to make room for young stock. Also have one

## Golden Wyandotte Cock,

one year old, sired by the first prize winner at Detroit. This bird will be sold at a bargain as I have no use for him. I also breed **WHITE WYANDOTTES and COLORED MUSCOVY DUCKS.** Young stock for sale of all the above varieties, except Brahmas. Also

# BELGIAN HARES

of the most noted blood. Good breeding and exhibition stock. Write for what you want and I will guarantee to satisfy you, both in quality and price.

**J. W. BELL, Congress Park, Ill.**

the wood pile or sheds as when making friendly and energetic advances towards friendship with strangers.

Mr. Fishel is building a new house. If the hospitality that Mrs. Fishel and he offered me increases in proportion with the size of the new house, it will be too great to easily express. The new house that is being built is located on a rise of ground right in among all the poultry and wonderfully convenient to it all. The incubators will be located underneath the house and the cellar is 16x32 feet in size, where ten machines will be located. The house will probably cost about $25,000 and Mr. Fishel will have his office here.

Here he has his mail delivered by special carrier, for he receives and sends out an average of from two to three hundred pieces of mail a day. He has a long distance telephone and telephoned all around the country ahead of me to keep the poultry houses well locked—until I was out of the country, I presume.

Here at Mr. Fishel's is an ideal poultry plant, built on an extensive scale for expansion of a business already large. Here is an enthusiastic and successful fancier who is devoting his entire time and energy to the poultry business and is entitled to and is receiving the patronage and good-will of all AMERICAN POULTRY JOURNAL readers.

It is hardly necessary for me to elaborately describe the quality of the stock which I saw at Mr. Fishel's plant. He has time and again demonstrated in the show-room that his birds are the kind that win. There is hardly a show anywhere that he or his customers have not at some time taken the best prize and their success is not a matter of surprise when one sees the magnificent big white birds which have made their owner famous as a breeder of White Rocks. There is no room at Fishel's for anything but the best, and this determination upon his part to have the best only has been the means of his occupying the position at the top which he does. Surely he has the proper thing in White Rocks and he has them in sufficient numbers to fill all orders regardless of how numerous they are or how fast they come.

GEO. G. BATES.

## TRAP NESTS.

The down-to-date trap nest is especially adapted for use as a common nest when not wanted for a trap. Now that these nests have been so simplified and improved that they may be used for any flocks or in any quarters, their advantages are increased, as their cost is but a few cents each and every one can afford them. Prof. Cushman of Samuel Cushman & Co., well known breeders of Rhode Island Reds, writes:

"The benefits of using them but a few weeks at a time during the season just to learn which hen lays the most desirable colored and best sized eggs will be worth the trouble and expense, but that is a fraction of the benefit we expect to get from it."

This firm is showing their faith in trap nests by fitting up their breeding pens and many laying houses with them. One of the best nests on the market is the "Ideal," made by F. O. Wellcome, Yarmouth, Me.

Hens confined in houses should be kept in small flocks. Ten in a pen will give better results in the way of egg production and fertility of eggs than will a greater number in the same space.

# Illinois State Fair.

By R. E. Jones.

AS usual Illinois held a most successful fair, and it is beyond a doubt the greatest fair grounds on earth. In fact, we think if they would put more money in poultry premiums and a little less in style and officers' salaries they would have a much better exhibit. They have the buildings and as fine a poultry hall as is to be found, but it takes more than this to bring out a good show.

Breeders like to show and advertise their stock, but they also like to show for good premium money to help pay the expenses they must incur in making such an exhibit.

We think that the management will realize this fact when it comes to comparing this show with former ones. It was not nearly up to the high standard heretofore found at Springfield. While there were some grand birds, there were not near as many good ones as we usually find there.

This department was under the management of Hon. James Frake, of Chicago, and he proved to be the proper man for the place, one who looked after the interests of all the exhibitors and conducted things systematically. He was assisted by C. B. Blodgett, of Downer's Grove, Ill., who has been in this department for a number of years.

W. S. Russell tied the ribbons and did it to the satisfaction of all. We heard less complaint among the exhibitors as to the management and placing of awards than usual. Everything went off smoothly and everyone seemed satisfied.

Among the principal exhibitors were E. G. Roberts, of Fort Atkinson, Wis., who was on hand with his usual string, and it would be easier to name the varieties he didn't have than those he did, but will say that he walked off with a big bunch of ribbons and had a grand collection of birds. He breeds and exhibits more varieties than any man in this country and knows a good bird from a bad one.

C. P. Gundlach, of Lincoln, Ill., was there with his string of mammoth Light Brahmas, and was the most prominent man down that aisle. When it comes to size he certainly has it. He showed two hens that tipped the beam at twelve pounds each, with the proper shade and that clear white under color that we like to see. His cock birds were also Jumbos in size, and ran the scales up to the fourteen-pound notch. He had a fine lot of pullets that were well matured and splendid in color and shape. He walked off with first and second in this class. His first pen was a nice even bunch and showed careful mating. The Brahma class was one of the largest, being some forty birds in all.

James Christopher, of Heyworth, Ill., made a neat exhibit of Barred Rocks and showed some nice birds. His young birds were not developed enough to make a good showing, but they had the proper color. He has some 250 head of youngsters for sale, and you can look out for him at some of the winter shows, as he will be among the winners.

Frank H. Thomas, of Jacksonville, Ill., was there with his Indian Games and Buff Wyandottes, the latter being a new addition to his yards. When it comes to Cornish Indians we will take off our hat to Frank, for he certainly has the right kind. His first hen was a handsome bird, penciled all over from back to hock, as was his first pullet. I might add that she is the best pullet we have seen this season. He captured every first in the class. His Buff Wyandottes were a nice lot and for a beginner he did well. He is agent for the Mann Bone Cutter at Jacksonville, Ill., and had an exhibit at the fair.

Niewold & Trenkle, of New Holland, Ill., made quite an exhibit of Black Langshans, B. P. Rocks and White Holland Turkeys, and came out with a string of blues to their credit. Their Langshans were exceptionally good, and received all the prizes on young birds. They had them with that rich greenish sheen that we always like to see.

They made a nice show of White Holland Turkeys. They also breed Pekin Ducks, but wish to dispose of all their turkeys and ducks, and they expect to close them out at "hardtime" prices.

Gietl Bros., of Springfield, Ill., made quite an exhibit of Spanish, S. S. Hamburgs, B. B. Red Games, G. S. Bantams and pigeons, winning the long end of it in each class. They have a grand lot of birds, and when it comes to pigeons they made a cleaning up, winning sweepstakes for the best collection of ten different varieties.

J. A. Leland, Woodside Farm, Springfield, Ill., made quite an exhibit of white birds. He breeds White Langshans, R. C. White Leghorns, White Cochin Bantams and White Holland Turkeys. He was the heaviest winner in each of these classes and nearly cleaned the platter. In the Langshan class he showed some grand specimens, and has made great progress in this breed. His R. C. White Leghorns were grand in color and size, and were easy winners in a good, hot class. In White Cochin Bantams he exhibited some fine little beauties. In White Holland Turkeys, he has birds with size equal nearly to the Bronze, and free from black spots.

In the Belgian Hare department there was a big exhibit and some excellent quality was shown from the most noted strains.

Mr. J. E. Palm, of Springfield, made the big win in this class and exhibited some of the best specimens in this country. He has one of the best strings stud bucks to be found any place, representing such noted strains as Fashoda, Lord Banbury, Yukon, and others.

He has the largest rabbitry in the central west, with a capacity of 12,000 young per annum, and can supply the trade with stock at any time, in any quantity and any quality.

*List of Winnings of A. P. J. Advertisers.*

E. G. Roberts, Fort Atchinson, Wis.—Too numerous to mention, but in all he won 196 firsts, 110 seconds, and 63 thirds.

C. P. Gundlach, Lincoln, Ill.—Light Brahamas: Cock, second; hens, first, second and third; pullets, first and second; pen, first.

Frank H. Thomas, Jacksonville, Ill.—Cornish Indian Games: Cock, first; hen, first and third; cockerel, first, second and third; pullets, first and second. Buff Wyandottes: Cockerel second; pullet, third; pen, second.

Niewold & Trenkle, New Holland, Ill.—Black Langshans: Hen, second; cockerels, first and second; pullets, first and second; pen, first. White Holland Turkeys, second pair.

Gietl Bros, Springfield, Ill.—W. F. B. Spanish: Cock, first; hen, second; pen, first. S. S. Hamburgs: Cock, first; hen, first. B. B. Red Games: Cockerel first; pullet, second G. S. Bantams: Cock, first; hen, first and second. Collection of pigeons, first.

J. A. Leland, Springfield, Ill.—White Langshans: Cocks, first and second; hens, first, second and third; cockerels, first and second; pullet, first; pen, first. R.C. White Leghorns: Cockerels, first and second; pullets, first, second and third; pen, first. White Cochin Bantams: Hen, first and second; cockerel, first. White Holland Turkeys: Old pair, first; young pair, first.

J. E. Palm, Springfield, Ill.—Belgian Hares: Buck, ten months old or over, first and second; buck, eight months old or over, first and second; buck, six months old or over, first and second; buck, three months old or over, first, second and third; doe, ten months old or over, first and second; doe, eight months old or over, first and second; doe, six months old or over, first and second; doe, three months old or over, first and second; herds of ten, any age, first and second.

———o———

Artificially heated poultry houses are not a success.

**SALE OF WINNERS AND BREEDERS.**

Owing to business reasons we will be compelled to sell our entire stock of

**White and Buff Plymouth Rocks,**
**White and Buff Wyandottes.**

***About 2000 Birds.***

Which include our famous winners and their progeny. If you are contemplating buying some show birds or breeders now is the opportunity of your life. Don't delay, but write at once. At Chicago and Indianapolis we won 38 first prizes out of a possible 49, and many 2d, 3d and 4th prizes in the past two show seasons on the above breeds. We are the only breeders that ever won every first prize on White Plymouth Rocks at Chicago. For information and list of prizes won write

***W. C. PIERCE & CO., Indianapolis, Ind. Office, 55 Virginia Ave.***

# THE HOUDAN.

## Special Features and Characteristics. The French Breed that is growing in Popularity with American Breeders.

By THOS. F. RIGG.

HOUDAN shape is distinct. The Houdan as a table fowl is the acme of perfection, the embodiment of all that is good. It is built upon lines wherein is found a carcass which loses less in transit from the flock to the table than that of any other fowl. A body of great depth and breadth, breast round and full, the whole being well proportioned, standing on short legs, the Houdan is fitted to meet the demand for a table fowl of the highest merit.

Of late years there has appeared in the show room a type of Houdan wholly foreign, so far as shape is concerned, to the true Houdan. These birds are up on their legs and approach near to the Langshan type. They are not beautiful. They are not desirable as market fowls or as egg producers. We must preserve inviolate the distinctive Houdan shape. When we fail to do this we sacrifice the most beautifully molded form in standard bred poultry, the natural shape and form of the perfect market fowl. These long legged Houdans we now so often see are, I think, the result of injudicious breeding for increased size.

The photo cut here shown is that of a Houdan hen approaching nearly perfection in shape. Had her head been turned a little more the desired fullness of neck would have been brought out by the photographer. Let us study this specimen section by section, and see if the whole does not constitute the ideal type of table fowl. One glance at this hen gives us the immediate idea of a massive body of perfect proportion, a body that would yield a carcass of the very best and most desirable type. Where can it be improved in this respect? There is no failing in any section. Note the wonderful depth and breadth of breast, the broad and sloping back and the breadth of body, both front and rear. Does it not fill completely the requirements of the perfect table fowl?

### SHAPE OF CREST.

When in company with another judge I was handling a class of Houdans in the show room last winter, the gentleman said:

> There is not a good shaped crest in the class. Seems to me that the Houdans I handled along from 1880 to 1890 were superior in crest shape to most specimens shown today. Why this change?

With the exception of a very few strains the Houdan crest of to-day partakes too much of the shape and character of the Polish crest.

This change has evidently been brought about in the effort to enlarge the crest, shape having been lost sight of in the progress of enlargement. There is as much difference between a properly shaped Houdan crest and a Polish crest as there is between the perfectly shaped rose and the loose, straggling bush which bears it.

HOUDAN CREST.
This illustration shows a crest of the desired shape.

The *Standard of Perfection* thus describes the Houdan crest shape:

> Crest, large, *compact* and regular, *inclining backward in an unbroken mass.*

The Polish crest shape of the Polish is described by the *Standard* as follows:

> Crest, very large, well fitted upon the crown of the head, rising well in front so as not to obstruct the sight, *and falling over upon both sides and behind,* * * *

Mark the distinction. The Houdan crest, which is irregular and falls over upon the sides of the head, is not at all a properly shaped crest. Such hangings of crest usually cause the crest to part in the center. A Houdan carrying such a crest should be rejected as a breeder. The crest here illustrated is nearly perfect in shape.

### SHAPE OF COMB.

The *Standard* description of comb is as follows:

> Comb, leaf, like the letter V in shape, of small size, resting against the front of the crest.

This description is certainly plain and admits of no misunderstanding. But the fact is that to-day we scarcely ever see a Houdan in the show room carrying a comb as thus described. We find only the horn comb. Photo. No. 3 shows a perfect comb of this character. It is the comb that the American breeders have been striving for years to perfect. The Houdans brought from England to this country carried a monstrous comb. It was neither attractive nor useful. It was, perhaps, a leaf comb, composed of two large serrated sections, in the center and a little to the front of which rested an ugly nubbin, similar in shape to a strawberry. This large, irregular and ugly comb could not be tolerated by the American fanciers. They would not have it. Largely through the efforts of Captain James B. White the comb description as we now find it in the *Standard* was adopted by the American Poultry Association. The idea and intent was to give to the American Houdan a small leaf

PROPER HOUDAN SHAPE.
The embodiment of all that is desirable in a table fowl.

comb shaped like the letter V, and to do away with "the mass of flesh" which adorned its ancestors. Mr. Harrison

THE HORN COMB
Now seen in the American Show Room.

Weir, the most profound thinker and ablest writer in the English poultry fraternity, maintains that the Houdan as originally imported into England from France carried the small V shaped comb, and that the large, irregular strawberry comb is an English invention. But be this as it may, the question before the American Houdan fraternity is not what was, but what is the most desirable comb. We have strongly fixed the horn comb upon the American Houdan. To my mind, the small leaf comb, V shaped, is the most desirable. I recall now as a most pleasant remembrance a pullet shown by Mr. Joseph B. Thomas, Jr., at an eastern show not long ago. She carried a perfect leaf comb, small, well defined and beautiful. Either the prevailing American comb or the *Standard* is wrong. We should right one or the other.

FIFTH TOE SHAPE.

The *Standard of Perfection* says:

Toes, five upon each foot, straight except the fifth, *which should be detached* from the others and curve upwards.

Too often we find the fifth toe attached to the fourth toe. There should be space sufficient between the fourth and fifth toes to allow the comfortable placing therein of the index finger. It is not only

Houdan fifth toe as it should be.

the demand of the *Standard*, but it gives us the desired effect as to shape, for a fifth toe firmly attached to the fourth toe cannot properly and gracefully curve upward. In a word, the fifth toe should start from out the leg and have no connection with the fourth toe.

While this article is given chiefly to shape requirements in various sections, I want to call attention to a matter of vital importance. It is the color of the shanks. Pinkish white shanks, evenly mottled with lead color, is nature's guarantee, her warrant, of the most perfect table fowl. This is a truth absolutely unassailable.

Another important consideration: The Houdan bone is small and of fine texture. There are no miscalculations in the great governing laws of nature. It is in accordance with these laws, fixed and determined, that the perfect table fowl should carry small bone.

The photo. cuts herewith submitted show, upon the whole, the desirable points as to Houdan shape, in various sections. The photo. cuts should be considered in this connection only as to shape of the section to which attention is called in each cut.

The Houdan is one of the most beautiful and profitable of fowls. Let us guard carefully its welfare.

# Blanchard's White Leghorns,

## The Leading Strain of Heavy Layers,

Are no experiment, having been carefully selected and bred for over 20 years, with results that fully justify the claim that they are **THE GREATEST LAYING STRAIN OF SINGLE COMB WHITE LEGHORNS IN EXISTENCE.** No labor or expense has been spared in building up and perfecting this strain, and while the production of large, pure white, fancy market eggs has been the main object, **STANDARD QUALITIES** have not been neglected. They are large, vigorous, active and handsome, unexcelled for introducing new blood or as foundation stock. No better anywhere at any price. Stock for sale.
Illustrated circular free.

**H. J. BLANCHARD, Box 997, Groton, N. Y.**

# I WANT MONEY, YOU WANT CHICKENS?

## 1000 YOUNG BIRDS FOR SALE 1000

## C. A. PORTER, Box A, Flat Rock, Ind.

**GOOD MORNING SISTER**

I AM READY FOR

**CHAMBERLAIN'S PERFECT CHICK FEED.**

**Dry and Always Ready for Use.**

**.....Little Goes Long Way.....**

*No Bowel Trouble Where CHAMBERLAIN'S CHICK FEED Is Properly Used.*

**100 lb. sack $2.50; 50 lb. sack $1.50; 30 lb. sack $1.00.**

SAVES TIME AND TROUBLE.

FOR THE BROILER MAN, THE FANCIER AND THE FARMER.

**MAKES EGGS.**

Chamberlain's feed for laying hens will not only start your hens laying but keeps them laying, changes the color of the yolk of the egg from a pale, weak color to a rich color. Makes the hen molt quick and gives them good health and rich plumage. Why buy poor feed when you can buy feed that gives results for the same money? Put up only in 100 lb. sacks for $1.75. GOODS SHIPPED FROM ST. LOUIS, MO.

**Manufactured by W. F. CHAMBERLAIN, Kirkwood, Mo.**

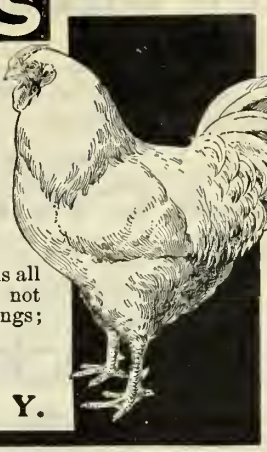
**CHICK FEED** Contains over 30 varieties of food.

Eastern Office No. 8 Park Place, New York City. New England office No. 34 Merchants Row, Boston, Mass. Northern Depot 323 Dearborn St., Chicago, Ill. Cyphers Incubator Co., Wayland, N.Y.

**HEN FEED** Contains over 20 varieties of food.

# HIGHEST HONORS

were awarded my birds at the Rochester, N. Y. Poultry Exhibition 1901; we won against the hottest kind of competition, all first prizes in our class, besides specials. That's what you can expect of the



**Majestic Strain WHITE YANDOTTES**

the handsomest, most profitable fowls in the world. My stock is all farm-raised from prize winners at the big Eastern Shows. They not only **look right,** but they **are right;** they come from proper matings; they are healthy and vigorous; they will make you money.

**Choice breeding and exhibition stock from this prize-winning strain at right prices. Satisfaction guaranteed.**

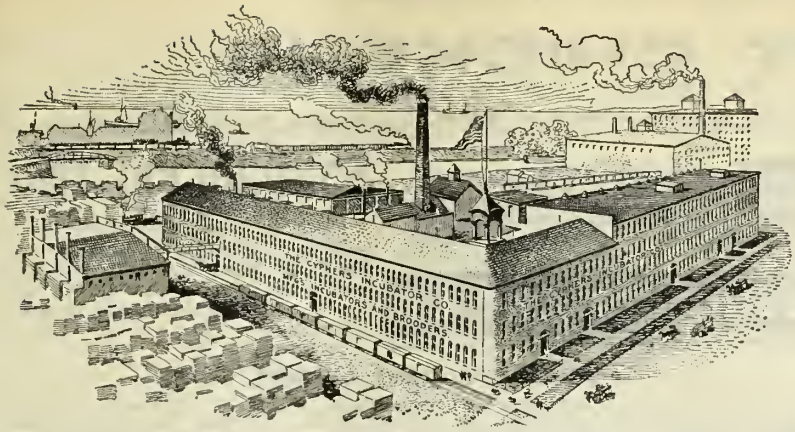
Mr. Grant W. Kinley, Upper Sandusky, Ohio, made the following winnings at the Wyandot County Fair: First pair of old White Plymouth Rocks and first on young pair. First on Silver Seabright Bantams and first on White Minorcas. We understand that the classes were well filled with good birds.



FACTORY AND HOME OFFICES OF THE CYPHERS INCUBATOR COMPANY.

On October 1 the factory and home offices of the Cyphers Incubator Company were moved from Wayland, N. Y., to Buffalo, N. Y., where the company now has ample space and every modern facility for manufacturing their popular line of goods and conducting a large business. The new factory and home offices are located at the corner of Court and Wilkeson streets, within half a mile of the city hall. The Buffalo Belt Line and Erie canal parallel their warehouse and shipping rooms on opposite sides. Their lumber is brought from the Michigan, Wisconsin and Canadian saw mills direct to the factory by boat, thus placing them in a position to buy the principal material used in their product at the lowest market prices. In this new location they have unlimited power and their equipment of machinery has been added to until their plant is now a model one. Herewith is shown a view of the building now occupied by this company.

Buffalo is an ideal location for the manufacture of incubators, brooders and other poultry appliances. This city has unexcelled shipping facilities both by rail and water. Buffalo is the natural gateway between the east and west, as much so as though an arch were built and people traveling east or west passed through it. The southwest and southeast are reached from Buffalo by direct trunk lines, while across Lake Erie and Lake Ontario lies the garden spot of Canada. Buffalo is the principal eastern lumber market and one of the leading woodworking cities in the Union. Skilled labor is available in all departments.

The progress made by the Cyphers company has been rapid and it is believed that this removal to Buffalo will prove highly beneficial to the company and its many customers. With its factory and home offices at Buffalo and branch offices and salesrooms at New York city, Boston and Chicago, the Cyphers company is in a position to fill all orders intrusted to it at an important saving to customers in both time and money.

A CORRECTION.

The ad of Porter Bros., Muscatine, Iowa, in October issue where it reads "60 percent lime" should read "96 percent lime." This refers to Porters' Star Grit, which has proven so successful.

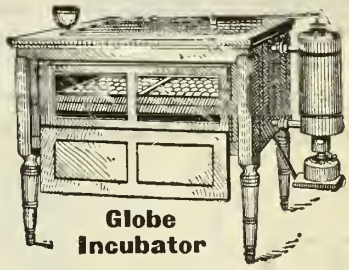
C. E. HOOVER, Pullman, Wash.

Big Money In Chickens

By Using a Globe Incubator Many Men and Women Add $500 a Year to Their Income.

Easy Work and Little Expense.

Any man or woman can raise chickens successfully with a Globe Incubator, and there is a lot of money to be made all the year round by the small as well as the large chicken-raiser. There is always a good cash market for chickens, and the Globe Incubator hatches out healthier, stronger chicks and more of them to the 100



eggs than any other incubator on the market. It is so simple to operate and regulate that any person can handle it successfully, and to-day hundreds of men and women, business men, preachers, teachers, mechanics, railroad men, clerks and day laborers as well as farmers and farmers' wives are adding a snug sum to their annual income with chicken-money and without any cash outlay to speak of. There are to-day many of the large chicken-raisers who number their profits by the thousands of dollars and occupy whole farms with their chicken-houses and yards who started with one Globe Incubator and it did the rest. Leisure hours with the Globe will produce chickens for family use and net a nice sum of pocket money besides, every year. Write C. C. Shoemaker, Box 447, Freeport, Ill., to-day and he will send you his price list and catalogue of Globe Incubators and tell you free how you can add $500 or more to your annual income in an easy, pleasant manner and not require much cash to start.

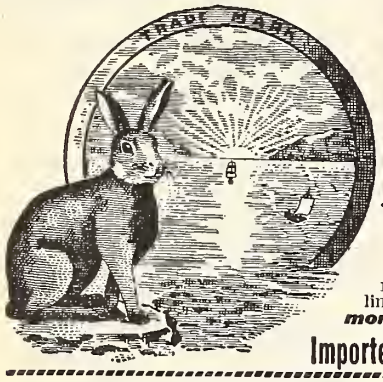
# WANT CHICKENS.

Will exchange a trio of magnificient Belgian Hares. Stock high, score good, pedigree fine, 2 imported does and one of the best American bucks—cost over $150. What do yon offer in chicks for eating purposes?

**W. T. GALLAWAY, 496 La Salle Ave. Chicago, Ill.**



**ENGLISH BELGIAN HARE CO.**

## $500.00 Per Year

made easily with small capital and a little time nights and mornings. $10 to $50 gets you a start with the best in the country. $10 down, balance in monthly payments if good references.

***Pleasure and Profit.***

For the small investor there is no field that will begin to equal it. As a business it is easily managed, rapidly increased; nothing can compare with it for the one whose time is partially taken up with other lines. ***DON'T WAIT! If you want to make yourself and family happy with extra money, purchase now. Send for Catalogue, FREE.***

**Importers and Breeders. Address B. C. SMITH, Mgr., Elmira, N. Y.**

# The BELGIAN HARE.

MONEY-MAKER WITH POULTRY.

EVERY breeder of fancy poultry will agree with me that Belgian hares can be raised with large profits on a poultry ranch, as there is always plenty of room for these small animals to be associated with the poultry business. At present, several of our largest cities have taken to the breeding of the little animal. It is, therefore, easy to arrive at the conclusion that the business is yet in its infancy, and the people who go into it now will receive the largest profits. It will be some time before this animal will be known in all sections of this country, and until all parts of the country are supplied with breeding stock, the high prices will continue. It has made such a great record for itself, wherever it has been introduced, that the raising of Belgian hares for the market and for the fancy is recognized today as a profitable industry, especially when connected with poultry.

Suppose you purchase a doe and have her bred, in thirty days from that time she will kindle a litter of, perhaps, eight young. When these little ones are five weeks old, have the doe bred again, and in thirty days she will have the second lot of youngsters; and so on to the end of the year. Now, then, when the young reach the age of seven months, they can be bred. So you will readily see there is no other animal that is to be compared with the Belgian hare. The meat is white, like that of the breast of a chicken, juicy, and of a fine texture, and is superior to that of any other meat. You can figure stock four months old will weigh four pounds; five months old, five pounds; and you will find that one breeding animal will produce three hundred pounds of meat in one year, and this meat will bring 20 to 25 cents per pound, while the pelts will bring 50 to 60 cents for fur.

The Belgian hare business seems admirably adapted for the employment of women. To many it has already proven more remunerative and far easier than other vocations. It also offers opportunities to those having small capital, as it requires but little cash to make a start, and with close attention, only a short time passes before the runs will be well filled. Persons having ample means will find it a business worthy of special consideration, as it is practically new and the field is unlimited. We are receiving communications from all sections of the country regarding the Belgian hare, probabilities of the business, etc. People are becoming more and more interested every day in all sections.

*Elmira, N. Y.* *B. C. Smith.*

**BELGIAN HARES.**

Fancy pedigreed stock scoring 88 to 95 points, descendants of King Humbert. Two months old $3 per pair; 3 mos. old $4 per pair.

BROOK RABBITRY, Mt. Ayr, Ind.

***THE BEST BELGIAN HARES IN AMERICA***

Are in our hutches. Medals, Silver Cups, Sweepstakes and Specials all came our way in the great Eastern M. S. Exhibition. Our animals beat the Western breeders at Milwaukee, Wisconsin State show, taking every first and sweepstakes and the Silver Cup and Championship at the M. S. B. H. Club's show, and every 1st and 2d at the W. C. Agricultural exhibition.

We are the largest breeders and dealers in the world. We want energetic local managers to organize and take charge of branch rabitries all over the U. S., Canada, Mexico, West Indies, Central America, etc. J. V. Cortlez is our representative in Manila, Philliphes. Send stamp for FREE BOOK, Particulars, sample copy of best Belgian hare and Poultry paper in the world.

# News and Announcements of Poultry Associations and Specialty Clubs.

## JUDGES AND JUDGING AT THE CHICAGO SHOW.

The management of the Chicago show have selected to place the awards at their 6th Annual meet, the following named gentlemen:

Mr. W. S. Russell, Ottumwa, Ia.
Rev. E. W. Rankin, Cedarville, Ill.
Mr. M. F. Wurst, East Cleveland, O.
Mr. A. B. Shaner, Lanark, Ill.
Mr. Thos. F. Rigg, Iowa Falls, Ia.
Mr. Frank W. McKenzie, Concord, Mich.
Mr. D. T. Heimlich, Jacksonville, Ill.
Mr. Chas. McClave, New London, Ohio.
Mr. William E. Knight, Fishkill Landing, N. Y.
Mr. R. F. Jones, Flat Rock, Ind.
Mr. E. J. W. Dietz, Downer's Grove, Ill.
Mr. D. A. Stoner, Rensselaer, Ind.
Mr. L. W. Schimmel, Detroit, Mich.
Mr. Henry Tiemann, Baltimore, Md.
Mr. Robert Joss, Peoria, Ill.

Negotiations are now in progress with others and it is probable that there will be additions to this list.

Pigeons, Dogs, Cats, and Pet Stock will be judged by the comparison method.

In the Poultry and Belgian Hare departments the method of judging will be decided by the exhibitors as per the following rules, adopted by the Board of Directors.

"The entry blanks, prepared for exhibitors, shall contain a column, marked 'Method of judging.'"

"Exhibitors shall be requested to indicate, in such column, for each specimen, the method by which the exhibitor desires such specimen shall be judged."

"As soon as the entries are closed, the secretary shall examine the entry sheets and ascertain therefrom the wishes of the exhibitors in each variety; and each variety shall then be judged by the method desired for the largest number of specimens in each variety.

If in any variety there shall be a tie, or if all the exhibitors in the variety shall fail to indicate the method by which they wish the specimen in the variety judged, then the committee on judges shall determine the method by which such variety shall be judged.

## THE CEDAR RAPIDS POULTRY SHOW.

The Western Poultry Fanciers' Association, of Cedar Rapids, Ia., which has given some of the best and most enterprising poultry shows in the country, will hold its 7th annual show in the Coe Audltorium in Cedar Rapids, Jan. 13 to 18, 1902.

Everything gives promise of a great show at the time. Judge Theo. Hewes and J. A. Tucker, have been engaged to judge the poultry. There will also be departments of Pigeons, Hares and Pet Stock. This association owns its own coops and will coop the show. Breeders all over the west should exhibit at this Great Show, and poultry lovers visit it. Liberal, special and percentage prizes will be offered and all premiums paid promptly. This is the record of this association.

Write the secretary for a premium list, Dec. 1, 1901.

## INTERNATIONAL BANTAM BREEDERS' CLUB.

The International Bantam Breeders' club has been organized, and will hold a meeting at the next Chicago show, Jan. 20 to 25, 1902. The officers are Mrs. A. J. Kimmey, Morgan Park, Ill., president; Miller Purvis, Chicago, Wm. S. Cobb, Jackson, Mich., A. E. Blunck, Johnstown, N. Y., vice-presidents. E. J. W. Deitz, of Downer's Grove, Ill., is secretary and treasurer of the organization. This is a step in the right direction, and we predict that this club will develop into one of our most prominent poultry organizations. There is a widespread and constantly-increasing interest in the various varieties of Bantams, and they all have merit to recommend them.

## AMERICAN LANGSHAN CLUB.

Our club is making a great effort in behalf of the Langshan, and we hope that every breeder will lend us their assistance. By joining us you can accomplish more than by individual effort, for in union there is strength. Look over our list of shows and make it a point to attend them; also, exhibit with them. By so doing the Langshan classes will be well filled, which adds largely to their popularity.

Below you will find a list of our state shows, with secretary's name. Write them for a catalogue, which will be cheerfully sent you. Also, do not neglect to send for our club catalogue if you have not received one. It is free.

The North End Missouri Poultry Association, Dec. 3-6, 1901, L. G. Sanderson, secretary, Bowling Green, Mo.

Fostoria Poultry, Pigeon and Pet Stock Association, Dec. 9-12, 1901, Chas. Mann, secretary, Fostoria, Ohio.

Western Poultry Fanciers' Association, Jan. 13-18, 1902, E. E. Richards, secretary, Cedar Rapids, Iowa.

Keystone Poultry, Pigeon and Pet Stock Association, Dec. 28, 1901, Jan. 2. 1902, Jas. Cheston, Jr., secretary, Philadelphia, Pa.

Kansas State Poultry Association, Jan. 6-11, 1902, Geo. H. Gillis, secretary, Topeka, Kansas.

Milford Poultry and Pet Stock Association, Jan. 7-10, 1902, John A. Twiss, secretary, Milford, N. H.

Arena Poultry Association, Dec. 26, 1901, Jan. 1, 1902, L. A. Kline, secretary, Rock Falls, Ill.

California, at Oakland, Cal., December, 1901.

Wisconsin, at Oshkosh, Wis., in connection with Wisconsin State show.

A. H. ASCHE, Sec'y, Princeton, Ill.
BEN S. MYERS, Pres., Crawfordsville, Ind.

## SECOND ANNUAL MEETING OF THE WESTERN LIGHT BRAHMA CLUB.

The second annual meeting of the Western Light Brahma Club will be held at Bloomfield, Iowa, Thursday afternoon, Jan. 2, during the week of the Iowa State Poultry Show, for the purpose of electing officers for the ensuing year, and transacting any other business which might come before the meeting. All members of the club who possibly can, should attend this meeting. And we would urge every Light Brahma breeder in the west to join our club before the meeting as the club will offer a $25 cup to the member showing the best cock, Cockerel, 4 hens, 4 Pullets. This will be worth winning, and will be a great advertisement for the one that wins it. The ten Brahmas that win this cup will have to be extra fine. The Light Brahma is the foremost variety of all the Asiatic class, and is a grand all purpose fowl when treated right. They are practical, and for beauty cannot be excelled by any breed of fowls, I care not where they come from. Other breeds have their specialty clubs. We have ours and want to make it the strongest specialty club in the west, and we can do it if we all work together, for in union there is strength. So earnestly urge every breeder of Light Brahmas in the west to come with us and help push this grand old breed of fowls to the front where they belong. For copy of constitution and by-laws address the secretary.

W. S. GREGORY, Secy.-Treas.
Keota, Iowa.

## THE BOSTON SHOW.

The next Boston show will be held in Mechanics Building, Boston, Mass., during the week of Jan. 14-19, 1902. The premium list will be ready for distribution after Dec. 1.

*The Classification* will include all standard breeds, as well as novice classes for same; and in addition to this many breeds and varieties not included in the standard, land and water fowls, Pigeons, Pet Stock and Cats.

We wish to call special attention to the novice classes, which are open to any breeder in the world who has not won a first or second prize at Boston. These classes are intended for the encouragement of the amateur or the fancier who would love to exhibit his stock in line with others and only compete with those of like experience with himself. It is the new exhibitors' show in the same hall with the other, and cooped in line and alongside of the open classes.

REGULAR AND SPECIAL cash prizes at Boston have always surpassed any offering at any show in America. This winter we shall offer more cash specials than ever before; on every breed and variety will be placed liberal specials for the benefit of exhibitors. All winnings payable at the

White Wyandottes,
EXCLUSIVELY.
April, May and June chicks, hatched from winners at Milwaukee, Wisconsin State Fair, Erie, Ill., and Chicago. A few good breeders to spare.

treasurer's office in the exhibition hall, on the last day of the show.

Many specialty clubs have voted to meet and exhibit with us; all are cordially invited to come. There are a number of rooms at the disposal of those wishing for meetings in the hall, and we are always willing to lend our assistance to a pleasant meeting of such organizations.

For premium list, show catalogues or information of any kind about the show, address,

A. R. SHARP, Taunton, Mass.

### THE PHILADELPHIA SHOW.

*Editor American Poultry Journal.*

Your readers may want to know what the Keystone Poultry, Pigeon & Pet Stock Association's secretary is doing, now that the show season is fast coming on. Let me assure them that like old Santa Claus, he will have a great many handsome prizes for the boys to compete for around exposition time.

A large amount of money has been secured and set aside for cash specials in all departments. The offerings this year will be much larger than last season, which in a measure were the banner specials of the year.

Mr. T. Farrer Rackham will again have absolute charge as general superintendent.

POULTRY DEPARTMENT.

The following clubs will meet in Philadelphia: Black Minorca Club, National Wyandotte Club, Silver Wyandotte Club, American Plymouth Rock Club, Brown Leghorn Club, Eastern White Wyandotte Club, National Pouter Association.

There will also be special meetings of the American Water-Fowl Club and American White Plymouth Rock Club.

All these clubs will offer handsome specials, and added to the Keystone Association's specials, will make a most attractive list for which the boys are to compete.

The judges in poultry as secured to date, are as follows: C. F. A. Smith, T. F. McGrew, Chester E. Howell, H. S. Ball, J. F. Crangle, D. J. Lambert, A. A. Parker, Geo. H. Northup, A. C. Smith, Geo. O. Brown.

The known ability of these gentlemen and their popularity, speaks for itself. The Black Minorca Club's secretary wishes me to say that they will offer over $230 for cash specials. This does not include the Keystone Association's specials, and should draw out the largest entry of Black Minorcas ever seen at any show.

THE PET STOCK DEPARTMENT.

The plans for Belgian Hares and other pets will be announced later, as soon as the leading Belgian Hare people have been communicated with, and their choice of judge decided upon.

INCUBATOR, BROODER AND SUPPLY PEOPLE.

The Association has set aside in the Auditorium Hall, the absolute center in the heart of the building, 10,800 sq. ft. of space and already 8,000 sq. ft. have been taken, which shows the interest of the supply people **and their appreciation** of the space allotted them, such desirable space never before having been given to the supply people by any association. So great has been this interest, that I am happy to be able to announce that the home industry will not be the only competitors for the popular favor, as a German firm will be with us and make a very handsome exhibit. This should naturally interest all would-be exhibitors, who have not yet made up their mind, to do so at once and communicate with the secretary before it is too late, for the Association intends to make the supply department one of the greatest attractions of the show. The secretary will be glad to hear from any one having novelties of any kind, and desiring to make a display of them.

Yours very truly,

JAMES CHESTON, Secretary.

### THE ELGIN, ILL., SHOW.

In the fall of 1899 the interest in thoroughbred poultry was felt to such a degree among us that a meeting was called to organize an association. About thirty members were soon secured, and with the usual vim that characterizes a thorough attack of "chicken fever," they determined to hold a chicken show.

The second show—1900—was without doubt the largest and best poultry show ever held in Illinois with the exception of those held in Chicago by the National Fanciers' Association. Over 1,000 entries were made and the attendance exceeded 10,000 for the four days, thus placing a balance of five hundred dollars ($500.00) to the credit of the association, with which they will endeavor to make the coming show of December 24-28, 1901, a record breaker.

Cash premiums will be placed on all classes and with the well known and popular judges, Theo. Hewes and Ben S. Myers, and with our invitation to all breeders and all lovers of standard-bred poultry

# 15000 To Pick From.

Choice White Wyandottes, Mammoth Pekin Ducks, Red Belgian Hares $1.50 each. Money makers. Green cut clover, best winter green food $1.50 per 100 lbs. $2.60 per 200 lbs. $6.50 per 500 lbs. Clover Meal 30c per 100 lbs. higher discounts on large orders. Samples and circulars.

For further information and premium list address the secretary, H. E. Denison, Elgin, Ill.

### MICHIGAN STATE POULTRY SHOW.

The next annual meeting of the Michigan State Poultry & Pigeon Association, will be held at Battle Creek, Mich., Jan. 7-10, 1902, with Jas. A. Tucker and Sharp Butterfield as judges. Breeders in every part of the state are taking a universal interest in the coming show, and from present indications this will be the finest and largest display of fancy poultry ever held in Michigan.

The management have decided to spare neither money or labor to make the show a success, and judging from the number of letters from parties who have signified their intentions of visiting the show it will be a grand convention of the representative poultrymen of the state.

A large and artistic premium list will be issued and distributed liberally in the central west. A certain amount of the space in the catalogue is now offered to advertisers at five dollars for full page, three dollars for one-half, and two dollars for one-fourth page. Address all communications to

L. G. NICHOLS, Secretary.
Battle Creek, Mich.

### THE BIG SCORE-CARD SHOW.

INDIANAPOLIS, IND., Dec. 4-10, 1901.

This show will be held by the Fanciers' Association of Indiana, who will this year depart from their usual custom of opening their show on Monday and closing on Saturday, and instead will open on Wednesday, December 4, and close the following Tuesday. This will enable all exhibitors to ship their stock, both to and from the show, so as to not necessitate its being held over Sunday by the express companies, and it is a plan that is meeting with the hearty approval of prospective exhibitors.

S. B. Lane will judge the Mediterranean class and Wyandottes; Ben S. Myers, the Asiatic class and Plymouth Rocks; Wesley Lanius, Games and Game Bantams; H. C. Green, Turkeys, Ducks and Geese.

For premium list or other information address the secretary, C. W. Hackleman, 818 Majestic building, Indianapolis, Ind.

Columbus Grove Poultry & Pet Stock Association of Columbus Grove, Ohio, will hold their first annual exhibition December 16-21. Although this is a young organization their show promises to be one of the best held in the state this season. The membership is very largely made up of amateur breeders and fanciers who are pushing things vigorously. This show will be an unusually good one at which to make sales of stock and should, therefore, be well patronized by exhibitors. Liberal class and special cash prizes are offered. The catalogues are now ready. J. F. Garber, Columbus Grove, Ohio, is corresponding secretary and Andrew Herring, of West Cairo, is recording secretary.

The exhibition of the Kansas City Fancy Poultry Club will be held at Kansas City, Mo., December 6, 7, 8. W. S. Russell and T. W. Southard will place the awards. Special inducements are offered to breeders to join the club and exhibit with them. A call has been issued and western breeders are invited to attend the convention of poultrymen, which will be held December 7 for the purpose of forming an Inter-State Show Association and to hold annual exhibitions in Kansas City, but which shall be controlled by a board of directors outside the city. Premium list and other information address C. S. Hunting, secretary, 3817 East 13th Street, Kansas City, Mo.

The exhibition of the Muscatine Poultry Association will be held at Muscatine, Iowa, January 8-11, with Shellabarger and Warnock as judges. Cash prizes amounting to $500.00 will be offered and the association expects to have one of the largest shows in the state. Any one desiring a copy of the premium list may obtain same by addressing G. M. Porter, Muscatine, Iowa, secretary.

The exhibition of the Burlington Poultry & Pet Stock Association, Burlington, Iowa, will be held December 16-21. Among the special premiums offered are a cup for best pen in the Asiatic class; a silver cup for best pen of Minorcas and gold medals for best pen in the Mediterranean class, American class and for the best Barred Plymouth Rock. In addition to these prizes $150.00 will be given in cash specials. This will, undoubtedly, be one of Iowa's best shows

## DAVIS'

## S. C. Brown Leghorns,

Barred, Buff and White Rocks and R. I. Reds, winners at Taunton, Fall River, New Bedford and Boston. Young stock for sale after Oct 1st.

**ARTHUR W. DAVIS,**
**54 Dighton Avenue, Taunton, Mass.**

## Enterprise Poultry Yards.

**S. C. White Leghorns, Barred Rocks.**

April and May hatched stock for sale at low prices. Eggs $1 per 15.

***JOHN OLSON, Downer's Grove, Ill.***

## One Hundred Points!

My birds do not score quite that, but they are good ones. They are of the best strains and are equal to any. I sell stock and eggs at reasonable prices and give you a square deal. If interested in Buff Rocks, Buff Wyandottes or Single Comb White Leghorns, write me.

**HENRY R. INGALLS, Box 32, Norton Hill, N. Y.**

## COCHINS.

Buff and Partridge. Winners at Illinois State and other big shows. Young stock for sale from 1st and 2d prize Partridge Cochins at Philadelphia last season. Right stock at right prices. ## Volga Valley Poultry Yards

**MRS A. L. HEATH, PROP.,**

**Fayette, Iowa.**

The home of Heath's Barred and Buff Rocks, also Buff Cochin Bantams. Have made two exhibits—won four 1sts, four 2ds, two 4ths, three 5ths and two specials. Eggs and stock in season. Write your wants and mention A. P. J.

and should be liberally patronized by breeders. Mr. John A. Dehner, secretary, Burlington, Iowa, will send premium lists to all those who request it.

The Third Annual Show of the Hoopeston Fanciers Association at Hoopeston, Ill., December 16-20, promises to be larger and better than ever. The membership has increased one hundred per cent the past year and more interest is being manifested by all members.

In addition to the poultry show a baby show will be held one day and two band concerts during the week.

D. T. Heimlich has been engaged as judge. The premiums, as usual, will be paid in full. For catalogue address A. L. Knox, secretary.

The Western New York Fanciers' Association will hold its second annual show at Jamestown, New York, January 10-14. This association succeeds the Jamestown Poultry & Pet Stock Association. It has always paid its premiums promptly and is now in a very flourishing condition. George H. Burgott and Theodore Johnson have been secured to place the awards. The scorecard system will be used.

The Jewell County Poultry & Pet Stock Association will hold its next show December 31 to January 3 at Burr Oak, Kansas. The outlook is excellent for a large and prosperous show. Thomas Kirk, Jr., is secretary.

Mr. Theodore Faulstich, secretary of the Gem City Poultry Association, Dayton, O., informs us that arrangements have been perfected for the third annual exhibition of this association. It will be at Dayton, Ohio, December 2-7, 1902. The association claims that this will be the best show ever held in this section of Ohio. James A. Tucker will place the awards. Very liberal cash and special premiums will be offered and paid in full as in the past. There were one thousand entries at the last show and it is confidently expected that the display will be much larger this season. Premium list will be out December 1 and a copy may be had by applying to the secretary.

The Butler County Poultry, Pigeon and Pet Stock Association will hold its third annual show at Hamilton, Ohio, Dec. 12 to 16. The aim will be to please all exhibitors and we solicit the highest quality of stock. We urge all breeders to send their best birds. We expect to have one of the largest shows in the state. The best of treatment will be given the exhibitors and their birds. The best birds will win whether they are accompanied by their owners or not. C. W. Rudolph, secretary. Hamilton, Ohio.

The second annual exhibition of the Grand River Valley Poultry & Pet Stock Association will be held at King City, Mo., December 9-14, 1901. C. H. Rhodes will judge the show. A fine list of specials will be offered and the indications are that this will be an unusually large and enthusiastic meeting of fanciers. Premium lists may be had by addressing Mr. R. R. French, secretary, Ford City, Mo.

The Ypsilanti Poultry Association will hold its eighth annual exhibition at Ypsilanti, December 31 to January 3 inclusive. One of the best shows in the history of the association is promised and this means a great deal. James A. Tucker, of Concord, Mich., will act as judge. Premium list and full information may be obtained from L. M. Olds, secretary, Ypsilanti, Mich.

The St. Clair County Poultry & Pet Stock Association is arranging for a banner show and will holds same at Belleville, Ill., January 15-19, 1902. C. A. Emery, of Carthage, Mo., will place the awards. H. R. Heimberger, of Belleville, Ill., is secretary.

The Saline County Poultry Association will hold its seventh annual show at Salina, Kan., December 30 to January 4, 1902. D. T. Heimlich, judge. L. D. Arnold, secretary.

The Athol Poultry Bench and Pet Stock Association will hold its next show December 24-26 at Athol, Mass. J. E. Burt, secretary.

The Springfield (Ill.) Fancier's Association will hold their annual show Dec. 9 to 14, 1901. They claim that this will be the largest show in the state outside of Chicago. A number of the best judges will place the awards, and it is the intention of the association to make their premium list the best ever given by any association in the surrounding states. It will be ready for mailing Nov. 15, and a copy can be

## BUFF ROCK BARGAINS.

This season's breeders at $5 per trio; $2 per pen. MUST make room for young stock. Every bird guaranteed. Write if interested.

**R. L. JACKSON,**

**Marshall, Mich.**

(Aluminum)

## Improved Leg Bands

The best and cheapest band on the market. Stay on when others fall; eight sizes; thousands in use. Prices, postpaid, 12, 16c; 25, 30c; 50, 50c; 100, 80c. State breed. Circular and samples for stamp.

G. W. SWORD, Mfg., Box A, Lanark, Ill.

## Bennett's Buff Rocks

**Champions of the West.**

Winners at Chicago Two Years in Succession.

Yearling breeders for sale now. Young stock in the fall. Send for free circular.

DR. O. P. BENNETT, Box 328, Mazon, Ill.

"Burdick's Nuggets Pure."

## High Scoring Barred P. Rocks.

Two yards of high scoring birds. Rapp strain. Eggs $1.50 per 15. Satisfaction guaranteed.

**C. H. SIDDLE,**

**Bowling Green, Mo.**

## Eggs For Hatching.

From my great laying strain of S. C. White Leghorns. Plenty of range makes them large, hardy and vigorous. Egg record kept so we know that we are breeding from the very best. Also Rhode Island Reds, without doubt the best general purpose fowl known; best winter layers on earth. Eggs $1.50 per 15.

**WOODSTOCK POULTRY FARM,**

**J. W. Mick, Prop. Woodstock, Wis.**

## 50 Per Cent Off.

On what we have left. 6 S. C. W. Leghorn hens at 65c each; 2 Barred Rock hens scored 91 as pullets, at $2 each; 5 Barred Rock hens, not scored, good breeders, $1 each. This closes out all of our Leghorns and all the Rocks we can spare, but we have some some fine young Rocks which will soon be ready for you. Write for show record and prices.

E. J. HORTON, Alida, Ind.

## Roger's Barred Plymouth Rocks

Are line bred. Have been winners for six years. Won at South Bend, Ind., Nov. 26 to Dec. 1, 1900, 1st, 2d, 3d hens, 1st, 2d, 3d pullets, 2d cock, 2d pen. At Goshen, Ind., Dec. 4-7, 1900, 1st cock, 1st, 2d hen, 3d pullet, 2d pen. Some show birds for sale.

**JOHN M. ROGERS,**

**Box 365, South Bend, Ind.**

## *Barred Plymouth Rocks.*

**Also Buff Cochins.**

**AMOS SCOTT,**

**Macomb, Ill.**

FENCE Steel or Wood

POST ACME CEMENT BASE.

Turns to stone; is indestructible; especially suitable for poultry yards. Made on the farm at little expense. Write to-day.

W. R. WILLIAMSON,

313 35th Street, - - Chicago, Ill.

## Light Brahmas.

One pen of Light Brahmas, 6 hens, 1 cock, scoring up to 95½ points. Am closing out my Brahmas and will sell this, my last pen, for the low price of $20, worth $40.

**J. W. BELL, Congress Park, Ill.**

procured by addressing Louis M. Gletl, corresponding secretary, Springfield, Ill.

The eighth annual exhibition of the Manchester (N. H.) Poultry Association will be held Jan. 21, 22, 23, 24, 1902. N. H. Walker, president; W. B. Sanford, secretary. The judges are D. J. Lambert, C. A. Bullou and J. F. Watson.

The ninth annual Silver Cup show of the North Central Indiana Poultry Association will be held at Logansport Ind., Jan. 15 to 21, 1902. James A. Tucker and S. B. Lane will be the judges. W. A. Graffis, Logansport, Ind., is secretary.

The Montgomery County Poultry Association will hold its second annual show at Litchfield, Ill., Dec. 10, 11, 12, 13, 1901. W. G. Warnock has been secured as judge. All breeders of standard bred poultry are cordially invited to exhibit at this show. Any one wishing space in the premium list, or desiring to offer special premiums should address the secretary immediately. Premium list will be out Nov. 15, and copy may be procured by addressing S. E. O'Bannom, secretary, Litchfield, Ill.

The Buckeye Poultry, Pigeon and Belgian Hare Association will hold its next annual exhibition Nov. 27, 28, 29, 30, 1901, at Mansfield, Ohio. All premiums will be paid in cash before the close of the show. The management solicits exhibits from breeders everywhere with the assurance that the birds will be given the best of care.

The next annual exhibition of the Kentucky State Poultry Association will be held Jan. 6 to 11, 1902, at Louisville, Kentucky. This association has one of the best halls to be found in which to hold their show. Last year's show was a great success and the association is working for still greater success this year. The premium list will be ready about Nov. 1. The special premiums will be larger than ever before and breeders who are interested should send in their name and address for a copy. The association has secured the services of H. A. Bridge, Columbus, Ohio, and Sharpe Butterfield, London, Canada, to officiate as judges. All correspondence should be addressed to John H. Good, secretary, Louisville, Ky.

I. T. Dabney, Bloomfield, Iowa, has been elected secretary of the Iowa State Poultry Association to fill the vacancy caused by the resignation of S. J. Henderson, Waterloo, Iowa.

The next annual exhibition of the Southwestern Michigan Poultry Association will be held at Kalamazoo, December 16-20. H. A. Bridge, judge. J. S. Carr, secretary.

The Torrington, Conn., show dates this year are Nov. 27 to 30. All the fanciers who sent birds to Torrington last year were well pleased with the treatment they received, and the association has been in receipt of many appreciative letters, coupled with announcements of intention to "come again." This year there will be an entry fee of 50 cents and coops will be furnished. D. A. Nichols and D. J. Lambert will do the judging. The management believes, and seemingly not without reason, that the Torrington show this year will be a record breaker and one of the best to be held in New England during the season.

The exhibition of the Osceola Poultry Association will be held December 3-6. L. P. Harris will officiate as judge. J. A. Lash, of Osceola, is the secretary and will send premium lists to all who are interested.

The Webster City (Iowa) Poultry Association will hold its first show December 30 to January 4. Thomas F. Rigg will place the awards. The association has about $200.00 in cash and specials already placed and all premiums will be paid at the show. They expect to have one of the largest shows in the state this season. Premium list may be had by addressing Fred Hahne, secretary, Webster City, Iowa.

The Sixth Annual Exhibition of the Elmira Poultry Association will be held in Elmira N. Y., December 17, 18, 19, 20, 1901. We have secured Stancliff Hall and shall be able to coop 2000 birds without crowding. Already many cash and special premiums have been offered which in addition to the regular premiums will make it worth your trouble to show with us. Mr. J. H. Drevenstedt and Mr. George H. Burgatt will place the awards and all birds will be scored unless disqualified. This association has held very successful shows, and paid all premiums in full. This year we propose to pay premiums the last day of

**KEYWORTH'S BUFF PLYMOUTH ROCKS.**

are as near **SOLID BUFF** as has ever been produced. They have been bred in line in a practical and scientific way for years and no time or money has been spared to have the best. While at Evanston, Ill., inside of one year they showed their quality by winning at the great Chicago show the **GOLD SPECIAL** for display besides other regular prizes. At the Wisconsin State Fair on four entries 1st cock, 1st hen, 2d cockerel and 2d pullet. At the Illinois State Fair won every first but one in a large class. At Indianapolis in December, in a class of nearly one hundred birds of the world's best, our strain won 2d cock, 1st and 2d hen, 3d pullet (score same as 1st) 2d cockerel, 2d pen and special for best cock, hen, cockerel, pullet and pen, thus winning more prizes than any other exhibitor. We have some cockerels and pullets that are practically solid buff and they are sure to do some one some good in the show room. A grand lot of breeding stock to select from at prices that are very low and within the reach of all. Write for prices on our great **LAYING** and **EXHIBITION** strain of Buff Rocks.

***KEYWORTH BROS., Sandy Hill, N. Y.***

***DON'T GO AWAY BACK AND SIT DOWN.***

You can get into the front row and stay there if your stock is right. It pays to have the best. We have a surplus of that quality in

*Barred Rocks and Brown Leghorns,*

as shown by our record for five consecutive years. Quality considered, our prices are low. Try us. Perhaps a cracking good male is all you require. One that will win and breed winners.

***C. A. DAMON, Grove St., Morgan Park, Ill.***

the lion's share of ribbons at State Show and Chicago. A few hens to spare and young stock ready to ship out.

JOHN COOLIDGE,

Galesburg, Ill.

**CHICAGO WINNERS** *for three Years.*

Don't place your orders until you see our prices on stock bred from first prize winners at the big Chicago show. Our show birds are all in our yards and are the parents of young stock for sale. Bronze Turkeys, Toulouse Geese, Buff Leghorns, Golden Wyandottes. Remember we made a clean sweep on some of these varieties at Chicago. Circular free.

**B. F. HISLOP, Milford, Ill.**

Mrs. B. F. Hislop, Sec. National Bronze Turkey Club.

the show. We own a fine line of exhibition coops and shall take great care in arranging them. Should you conclude to show with us we can offer you some strong competition. Your money if you win and a good time if you will attend. Our premium list will be out November 15. Hope we shall have the pleasure of hearing from you. Very truly,

*H. E. Benedict, Sec'y.*

The Southern Minnesota Poultry Association will hold its second annual show at Mankato December 31 to January 3. Their last show was a great success and all indications point to even a more successful show this season. The officers of the association are J. W. Coleman, president; R. F. Neubert, vice president; F. O. True, secretary and John T. May, treasurer.

The Jefferson County Poultry and Pet Stock Association will hold the next annual show at Valley Falls, Kan., December 17-20. C. H. Rhodes, judge. Both officers and members are putting forth every effort to make this their most successful show. Any information regarding premium list, etc., will be cheerfully furnished by the secretary, E. S. Mitchell, Valley Falls, Kan.

The coming exhibit of the Peoria Fanciers' Association, Peoria, Ill., promises to be most excellent, both as to quality and quantity of stock to be exhibited. At the last meeting of the organization it was voted to give nine silver cups as specials, in addition to the many specials donated by poultry merchants and home breeders. These, together with the cash prizes, will make competition interesting. Premium list will be ready November 15 and may be had by addressing Dr. H. D. Manchester, Peoria, Ill.

Much interest is being taken by the members in the coming exhibition of the Flint Poultry Fancier's Club, Flint, Mich. The show will be held January 1 to 14. Thomas F. Rigg has been engaged as judge. All communications point unmistakably to a most successful show. Michigan poultrymen should not fail to write for premium list to the secretary, Frank Bovee, Flint, Michigan.

The fifth annual show of the North Western Missouri Poultry Association will be held at Cameron, Missouri, November 26 to 30. The association offers $75.00 in class sweepstake premiums, besides other cash premiums. R. V. Glenn, secretary, Kingston, Mo., will send premium list to all who write for same.

The ninth annual exhibition of the Eastern Iowa Poultry and Pet Stock Association will be held at Davenport January 7 to 10. W. G. Warnock will place the awards. The premium list of the association will be ready for mailing November 10 and a copy may be had by addressing H. Regennitter, 802 W. 5th avenue, Davenport, Iowa. The association offers quite a number of very liberal and cash special premiums. They should and, no doubt, will have a large and interesting show.

The annual exhibition of the Merrimack Valley Poultry and Pet Stock Association will be held at Haverhill, Mass., December 10, 14. Mr. George S. Divion, secretary, Groveland, Mass., will send premium list to all applicants. The quality of the stock found at the Haverhill show is always of the best and premiums won there are valuable.

## A HANDSOME, HELPFUL BOOK.

"More Money From Your Hens," is the title of a new book issued by the Stratton Mfg. Co., of Erie, Pa., manufacturers of the well known line of Dandy Green Bone Cutters. It is attractively printed in two colors, well illustrated, and goes into the question of making poultry profitable in a very thorough manner. Of course it places special emphasis on the value of freshly cut green bone as an egg producer and growth promoter. There is no doubt in the minds of poultry raisers that a little green bone added to the feeding ration is productive of the very best results in two ways; it not only saves in the grain bill, an important feature this fall when grain is high, but it also makes the poultry more productive in every way. It is a double-headed money maker.

The "Dandy" Bone Cutter has been on the market a number of years with increasing popularity. It has an automatic feeding device, is strongly and substantially built, has a large cutting capacity and we know that numerous of our readers have demonstrated that it is a satisfactory machine in every way. You will be interested in the handsome book which they send free.

## Cheaper than Dirt--Wyandottes.

Black, Silver and White. 1 trio Blacks $5; 1 trio Silvers $4; 1 pen (5) Silvers $6; 1 trio Whites $5; 1 pen Whites $6. The males in above are worth all asked, but as I will keep only America's Finest Dark Brahmas in the future must sacrifice every Wyandotte.

CLARK E. ADAMS, Racine, Wis.

# Light Brahmas, Light Brahma Bantams

Fine Light Brahma cockerels that can win the **BLUE** and **RED** in hot competition, and they are bred from "Wonder," 95½, highest score ever given a Light Brahma. "Midgett" Light Brahma Bantams that win wherever shown. Fine birds for sale. Circular free.

GEO. W. HILLSON, Box 400, Amenia, N. Y.

# Wright's White Plymouth Rocks

## *Have a Fine Show Record.*

***300*** typical youngsters for sale, all bred from my prize winners. They will win for you.

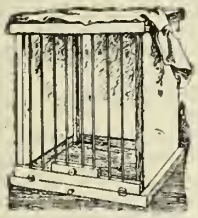
E. B. WRIGHT, - - Birmingham, Mich.

# I SHIP C. O. D.

See your birds before you pay for them. Toulouse, Embden and Brown China Geese, Pekin Ducks, White, Golden and Silver Wyandottes, Bronze Turkeys, R. C. B. Leghorns, Light Brahmas, white and Barred Plymouth Rocks and Bantams. My birds are as good as can be found and I will ship them C. O. D. and allow examination at express office. I am the only C. O. D. poultryman in Ohio. Write and tell me what you want.

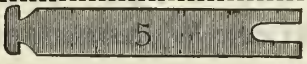
P. B. McCORMAC,

Maysville Ave., Zanesville, Ohio.



## *The Price*

of this splendid Exhibition Coop



## *is Only $1.*

If you have not our catalogue, send for a copy at once. It describes and gives lowest prices on all articles used by poultrymen. We are printers of catalogues, stationery or anything you may wish. The use of a big line of poultry cuts free.

This is the new style Leg Band manufactured by us. It is unequalled. Price, post-paid, 17c per dozen. State breed of fowl. Write us your wants and we will make you estimates.

J. A. & W. S. HARRISON, Box C, Henry, Ill.

# CONKEY'S ROUP CURE CURE GUARANTEED.

**CONKEY'S ROUP CURE** is the only positively known remedy that will cure roup in all its forms as long as the fowl can see to drink. Simply put the cure in drinking water and the fowl takes its own medicine. **For Canker,** especially in pigeons, it excells all others. One 50 ct. package makes 25 gallons of medicine. Directions with every package. If it fails to cure, we refund the money. Postpaid, small size 50c; large size $1.00.

**Conkey's Louse Killer** never fails to kill. Try it; 25c. per package and 15c extra for postage.

**CONKEY'S POULTRY TONIC** will keep your fowls in perfect health and make your hens lay eggs in winter. 25c per package and 15c extra for postage.

**AGENTS WANTED.** G. E. CONKEY & CO., Cleveland, Ohio. Eastern wholesale office, No. 8 Park Place, New York City. Pacific Coast ageuts, Petaluma Incubator Co., Petaluma, Calif. For sale by all Poultry Supply Houses. Do not send stamps.

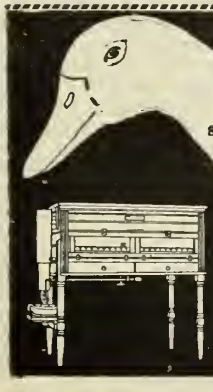
# *Arnold's Buff Leghorns*

**Are the Oldest Strain in America,** and have **WON SINCE 1891 at NEW YORK, BOSTON, PHILADELPHIA, WASHINGTON and HAGERSTOWN, 314 Regular Prizes and 74 Gold and Silver Specials.** We made our last exhibit at **Madison Square Garden** in 1900, and won on Buff Leghorns, **2 Silver Cups, 5 Gold Specials, 1st and 2d Pens, 1st and 2d Cocks, 1st and 2d Hens, 3d, 4th and 5th cockerels, 1st, 4th and 5th pullets.** Our stock better this season than ever. We don't show and will sell the best show birds. Have your orders booked early.

# *Arnold's Buff Plymouth Rocks.*

We bred from the **1st NEW YORK COCK** all season. He won 1st at New York in 1901 and beat 13 of the best cocks in the East. Besides over 100 sittings of eggs from our own breeders we have the chicks from four sittings of eggs from the yards of the best breeding cock in the East and a large number of eggs from the four best males in the west. And, remember, in the fall of 1899 we went up to the yards of H. S. Burdick and got the pick of his old and young stock at big prices. A noted Western breeder and judge says we have the finest females he saw in the East. We wont show but will sell our best exhibition birds. We have also the finest collection of **WHITE, BLACK and BLUE BELGIAN HARES** in the world: **also Silver Grays and Silver Blues.**

***AUG. D. ARNOLD, Box 77, Dillsburg, Pa.***



## Ducks from Door-knobs.

Some incubators promise everything in sight; either ducks from door-knobs, or chicks from china nest eggs, and a full grown bird in a week or two. The

# PETALUMA INCUBATOR

won't do that. It's just a good incubator—made for hatching eggs in the best possible way. **It is made on scientific principles, of good honest material, by honest workmen.** Consequently it will do all that a good incubator ought to do. We think our construction is a little **better than any others;** we are sure we take pains; we know we **please the people.** If you are looking for a machine that will hatch all the fertile eggs, you'll be interested in **THE PETALUMA.** Our large illustrated catalogue is sent **free** upon request.

**We pay freight anywhere in the United States**

We make a good brooder too.

Petaluma Incubator Co., Box 150, Petaluma, Cal.

F.B.W.Co.

### COOKED FEED.

While there is always economy in cooking stock feed, it is especially profitable in times like these, when feed of all kinds is high. We therefore are sure we do not need to argue with our readers as to the advisability of equipping themselves immediately with the most approved appliance for preparing feed. One of the best and most practical feed cookers on the market is the pattern illustrated herein, made by the Rippley Hardware Company, of Grafton, Ill., and styled the "Reliable." From all we can learn it deserves its name. It cooks the feed quickly and thoroughly with a miuimum amount of fuel. The fire box is extra heavy and the boiler is made of

No. 22 galvanized steel, which is practically indestructible. It burns wood or coal equally well and can be fired with cobs or other light fuel if desired. Many medals and premiums have been awarded to the Rippley people, the latest being first premium at the South Dakota State Fair, at which there was a larger number of exhibitors than usual, so that the award is all the more honorable. The Rippley people are regularly advertisers with us and are well and favorably known to hundreds of our readers with whom they have had dealings in the past. We can, and very gladly do, recommend them as deserving their confidence and any dealings had with them will be satisfactory we are sure. They have a large line of goods which should be in every day use on many farms and if you will write them today for their catalogues they will be gladly sent. Please mention this paper in corresponding with them.

### "MAKE HENS LAY."

Such is the caption of an advertisement that appears not only in the local, but many leading agricultural papers, and which suggests the propriety of a few thoughts upon the subject. It may be laid down as a rule that most people indulge in raising poultry not for the pleasure it gives, but for the profit that is realized from the same, which must come from young chicks or eggs, and since the chicks must come from the eggs, the real profit may be traced to egg production, so the advice given in these words is of vital consequence to the poultry raisers. "The advertisement referred to recommends Sheridan's Condition Powder to make hens lay, and so do we," says M. A. F. Hunter, poultry editor of Farm-Poultry. A hen to lay prolifically must be in perfect health, must be in condition, and here is based the true theory of the value of Sheridan's Condition Powder—it promotes the general good health of the fowl, gently quickening digestion, and stimulating all the various organs of the body as well as the ovaries, to perform their functions." At this season of the year the use of Sheridan's Condition Powder is very valuable for laying hens and young pullets. By its use now they will get to laying earlier when the price for eggs is very high. I. S. Johnson & Co., Boston, Mass., the only makers of Sheridan's Powder, will send for 50 cents two 25 cent packs, five packs for $1.00; or for $1.20 one large two pound can of Powder, postpaid; six cans $5.00, express prepaid. Sample copy of the best poultry magazine sent free.

Little is thought and less is known by the average man concerning the lives and aims of the 400,000 men and boys who delve under the surface of the earth in places of darkness and danger ,where hardly a day goes by without recording the death by falls of rock, coal or slate of more than one unfortunate miner. An article on this subject at once impartial and vitally interesting is contributed to The Cosmopolitan for October by John Mitchell, president of the United Mine Workers of America, whom every one recalls as the man who organized the miners and carried through to a successful termination the great anthracite strike of 1900.

**S. C. WHITE LEGHORNS**—Knapp strain.
They are finer this year than ever and I am better prepared to furnish breeding or exhibition pens, trios, pairs and single birds. They are large and vigorous, good winter layers and keep at it all summer. **No better birds exist for introducing new blood or as foundation stock.**
**L. F. DIDDIE, Chesterton, Ind.**

**White Rocks and Buff Cochin Bantams.**
Winners wherever exhibited. A fine lot of cockerels and pullets ready to win at the fall and winter shows. Some extra fine birds for sale at reasonable prices. Eggs $2 per sitting, reduction with large orders. Satisfaction guaranteed. Correspondence a pleasure.

## YORKVILLE POULTRY ASSOCIATION.

The second annual exhibition of the Yorkville Poultry Association will be held Dec. 2 to 6, 1901, inclusive. F. A. Shellabarger, judge; A. S. Tarbox, secretary. The association hangs up $5.00 in gold to the ten highest scoring birds by one exhibitor; also $2.00 in silver to the ten highest scoring birds standard breed by one exhibitor; also a valuable list of other specials. The premium lists are now ready and a copy will be sent upon application. The show will be cooped with the Ramsay coops.

## BUTLER POULTRY SHOW.

The Butler (Ind.) fanciers will hold their second annual show of poultry pigeons, pet stock, hares and dogs at Beeler opera house, Dec. 9 to 14, 1901. We will pay cash premiums in all classes and for the largest and best display will give a fine shetland pony, bred from imported stock, and no member of the association will be allowed to compete for this premium. By the outlook now our show will be one of the best in the west this winter. Send for premium list.
*D. D. Melroy, Secretary.*

## PERFECT CHICK FEED.

ARMINGTON, ILL., June 15, 1901.
*Mr. W. F. Chamberlain, Kirkwood, Mo.*
DEAR SIR: Inclosed you will find another order for your "Perfect Chick Feed," and again I will have to ask you to rush this order, as some of the parties are wanting it on account of their turkeys, as it has proved to be an excellent feed for little turkeys as well as chickens. I have never had a single complaint, but, instead, they all praise it highly, and I think in another year the people will learn, as I have learned, that Chamberlain's "PERFECT CHICK FEED" means perfect success in raising little chicks, and no successful poultry raiser can afford to do without it. If you could only visit my poultry yards and see the big, healthy fellows and then visit a yard where it is not fed and note the difference, then you would not wonder at me expressing so much gratitude over being able to procure such excellent feed.
*C. F. Lipsey.*

## "QUICK-MEAL"—STEINMESCH.

EXTRA QUALITY CHICK FEED.

Mr. S. Mark Dodd, St. Louis, General Purchasing Agent of the Missouri Edison Electric Co. (a million dollar corporation), has a seventy-acre farm near Ferguson, Mo., a suburb of St. Louis, where he raised 2,000 chicks last year on "Steinmesch Extra Quality Chick Feed." Not so bad for a beginner?

There is no question but what a revolution is impending in the method of raising and feeding chicks. "Steinmesch Extra Quality Chick Feed" is strictly up to date. It is prepared especially for the rearing of chicks right from the day they are hatched, until 10 weeks old. It is made up of twenty different kinds of small seeds, cracked grains, grit, beef and bone. Nothing better on the market. Feed dry. Handy. Economical. And always ready for use. *Try it*, and if you like it, *buy it*. Circular free. Agents wanted. See advertisement of STEINMESCH & CO., Manufacturers, and Agents for Cyphers Incubators and Brooders, St. Louis, Mo., elsewhere in this number.

# Questions and Answers.

**Our Subscribers are invited to make use of this department whenever we can be of service to them. All questions are answered in the order in which they are received. If your question is not answered in this number, look for it next month.**

*Editor American Poultry Journal.*

DEAR SIR: I have some hens in my flock that have developed a disease similar to "sore head." They have been apparently healthy until about a week ago, when I noticed that their combs and wattles had lost their natural color and had turned dark. Sores have developed on the combs and on the head near the beak. Upon examining some setting hens that showed symptoms of the disease I found a kind of louse on the head that looked like mites. I have been greasing their heads with a mixture of vaseline, sulphur and calomel.

*Malmo, N. C.* *J. W. M.*

Your fowls are afflicted with "sore head." This may be the result of roosting in damp and filthy quarters or it may be caused by mosquito bites upon fowls that are not in the best physical condition. The best cure is carbolated vaseline applied to the sores frequently. Continue this until after the scabs have dropped off and the sores heal. The species of louse to which you refer is, no doubt, the depluming mite, which destroys the plumage on the neck and head. Carbolated vaseline applied to these parts will remedy this trouble also.

---

*Editor American Poultry Journal.*

DEAR SIR: I have a valuable Barred Rock hen, eighteen months old, which is afflicted with some sort of leg trouble. For sometime she has shown signs of rheumatism, being unable to walk easily and falling over when trying to move rapidly. She has grown steadily worse until now she is unable to move at all, except to "flop" about. Would like you to advise me what I can do to relieve her. She has a good appetite and seems to enjoy life, regardless of her affliction.

*Jonesville, Mich.* *D. E. J.*

It often happens that over-fat hens become afflicted with leg weakness such as you describe, but in such cases the bird is so excessively fat as to at once suggest the cause of the trouble. Without examining the fowl in question, we should judge that her affliction is of a rheumatic nature. We would suggest that you encourage her to hunt or scratch for her living and bathe the legs and thighs frequently with some good liniment, such as St. Jacob's Oil or Mexican Mustang Liniment, either of which can be obtained at the ordinary drug store.

---

*Editor American Poultry Journal.*

DEAR SIR: I am in need of a little information and have been referred to you for same. I am now engaged in mercantile business, but it does not agree with me, and I have decided to try poultry raising and also handle a few cows and hogs. I have had considerable experience as a farmer, but have handled poultry only on a small scale. Will you kindly tell me as near as possible about how many of each would be best to start, say chickens, ducks, turkeys and geese, but most of all, where would be a desirable place to locate? Near Chicago, St. Louis, Kansas City, Des Moines, or near a smaller town, and make the shipments to the large places; also advise me what kind of land is best, or would you advise me to undertake something else? Is the poultry business overdone? These may be odd questions, but I trust you will give me your opinion. *H. A. B.*

*Audubon, Iowa.*

We again wish to state, as we have many times before in these columns, that the poultry business is not overdone. It is like any other business, in that it must be properly conducted. There is always a ready market for poultry and eggs every day in the year and there is a demand above the market prices for high-grade stock and eggs. We are speaking now from the standpoint of the market poultryman. Conditions are the same, however, with the fancier. If you will show us a poultryman who is unable to dispose of his stock at profitable prices, we will show you one who does not take advantage of his opportunities and conduct his business upon a business basis. The best location for a poultry farm is on sandy soil, although fowls may be successfully reared upon any kind of ground. One of the best practical poultry farms in the east is on ground so stony that it would be utterly impossible to plow it. Any portion of your state is suitable for a poultry plant. It is not necessary for you to be nearer the large cities you mention than a location anywhere in your state would place you. You have the mistaken idea, which is very common with most amateurs, that of starting with a variety of breeds. We would advise you to start on a small scale with one variety of fowls. You will not make a success in attempting to raise several varieties in addition to turkeys, ducks and geese. We would advise you to send for our book, "Why Poultry Pays and How to Make It Pay." This book was written for the benefit of just such persons as yourself and will save you much money and valuable time. It covers all points in detail. The price is 50 cents, or we can send you the book and AMERICAN POULTRY JOURNAL one year for 75 cents.

---

*Editor American Poultry Journal.*

DEAR SIR: I have heard it said that in setting eggs in an incubator the large end of the egg should be placed so that it will be a little higher than the small end, so that the chick may develop its head in this end and subsequently pip at the large end. Some say, "Keep the eggs in this position with the large end up for five days." Some say eight days, and some suggest still different periods. I would, therefore, thank you to let me know if there is anything in placing the large end of the egg up and, if it is the proper way, how long should the eggs be kept in this position? *H. K.*

*Smyrna, Ga.*

It is not necessary to place the large end of the egg up. In natural incubation the eggs in the nest are in all positions and the turning of them in the incubator produces practically the same result. You will get just as good and better results by letting the eggs occupy the position they will by merely turning them at the proper intervals.

---

*Editor American Poultry Journal.*

DEAR SIR: I purchased a pure bred

Barred and White Rock
COCKERELS.

I have an extra fine lot of youngsters, farm raised and bred from the winners of Wooster, Toledo and Fremont last winter. Now if these are what you are after drop a line to

**ELM POULTRY YARDS,**
**Box E, Hartford, Conn.**

Breeders, Shippers and Exhibitors of Line Bred S. C. White Leghorns, S. C. Black Minorcrs, Barred Plymouth Rocks, White Plymouth Rocks, White Wyandottes, and Light Brahmas.

White Wyandotte cockerel last winter and put him with common hens. Would it be all right to mate him to pure bred hens next spring and sell eggs for hatching? How old should a pullet be before the eggs are used for hatching?

*Cashton, Wis.* *E. J. T.*

The fact that the pure bred cockerel was mated to common hens will not in any way influence the offspring, if mated to pure hred hens. In fact, he could he mated to both at the same time, and eggs from the White Wyandotte females would produce just as good Wyandottes as though the common hens were not in the pen. The time when pullets' eggs may be used for hatching cannot be fixed with the age of the bird as a basis. The first few eggs laid hy a pullet are generally undersized. These should not be used. If the pullet has been mated previous to the time of laying it is safe to count upon about the fourth or fifth egg being all right. This may he depended upon as a general rule.

*Editor American Poultry Journal.*

DEAR SIR: Please inform me if pumpkins either cooked or raw are good for hens. Do you know the analysis of them and of a full grown dried cornstalk? *C. S. S.*

*Allentown, Pa.*

Pumpkins are not of much value as a food for hens. They contain 93½ per cent of water and six and one-half per cent of dry matter. The composition of the dry matter is as follows: Fiber, 1 per cent; ash, six-tenths of 1 per cent; protein, nine-tenths of 1 per cent; carbohydrates, 3 9-10 per cent; fat, one-tenth of 1 per cent. The nutritive value is 1:2.1. We have no records of easy access giving the food value of the dried cornstalk. It is absolutely worthless as a food for hens.

---

*Editor American Poultry Journal.*

DEAR SIR: I am figuring on buying a small plant for the production of eggs and broilers. About what size should I have houses with scratching sheds attached for fifty hens? How large should the outside runs he with an additional run for each two pens for providing green food, also what size pens and houses would be necessary for fifty broilers? What is the average cost of raising Barred Plymouth Rock cnicks to broiler size? What is the average cost of keeping a Plymouth Rock hen for a year and what is the average number of eggs she may be expected to lay?

This ten acres will be within three rods of my work, and in summer time will have about one and a half hours' night and morning to attend to the plant. What number of fowls should I start with? I expect to work up to the business alone.

*Maplewood, Ohio.* *R. W. D.*

We do not wish to discourage you in the business, but, unless you are in position to devote much more time to it than you state, we would not advise you to make the start, except on a very small scale. The successful management of a market poultry plant requires much careful and close application to the work. The incubators and the chicks need constant attention. The cost of raising chicks to broiler-size and of keeping a hen for a year depends largely upon special conditions. The cost will be reduced in such proportion as you can raise the feed for them. If all grain, etc., must be bought, the cost is, of course, greater than it would be otherwise. With ten acres of ground,

## Bluford, Ill.,

Will sell eggs for hatching after Feb. 1st from farm-raised Buff and Barred P. Rocks and S. L. Wyandottes. Yards headed by prize-winning males, scoring 94½ to 92, Stock raised from eggs purchased from me will not disappoint you. Correspondence promptly answered.

you should be in position to raise practically all the feed required and should be able to get your chicks to broiler-size at a cost from 10 to 15 cents each, and you should be able to keep a hen for $1 per year. The number of eggs which you could expect from your flock would depend upon the manner in which they had been bred, as regards egg production. Some poultrymen breed from their best layers only each season, and in this way secure a flock of birds which produces a very large egg yield. If you procure an average of 125 to 150 eggs per year per hen, you would be doing very well. We would not advise keeping more than ten or twelve adult fowls in a pen. A pen 10x10 is large enough for ten fowls. This sized pen, with a scratching shed of, say, 6x10, would give you good results with a dozen hens. The outside runs should be arranged so as to give each fowl 100 square feet of space. This would make runs 10x100 feet. The pens for furnishing green food should be as large as you can make them; the larger the better. We would advise you to start with not to exceed thirty or forty fowls. The chicks grow so rapidly that it is impossible to specify a given amount of space for a given number of chicks. You can start by putting in the brooders about one-half the number of chicks they are supposed to accommodate, and increase the space in this proportion as they grow older. The idea should be to give the chicks all the room you possibly can rather than make it as small as you can and have them thrive. If you are taking up the matter with a view to making a business of it, it would be a good idea for you to visit a plant near you, if there is one to be found, and in this manner you can get many pointers, which you could not get in any other way, because by doing this you would come in contact with the actual problems in the business.

---

*Editor American Poultry Journal.*

DEAR SIR: I would like some advice in regard to mating my chickens. They are six months old, cockerels and pullets. I would like to know if I can mate them together or should I get new blood? Would it be better to wait until next spring to mate them? I know absolutely nothing about the chickens and am anxious to learn. I hatched them with an incubator and have had fine luck with them. *E. C. B.*

*Rockville Center, L. I.*

It is not advisable to mate cockerels to pullets, and especially if they are from the same parents. We would suggest that you get at least one new male bird. Your birds are too young to mate at this time. You should wait until about the 1st of January. They should be mated about ten days before you wish to use the eggs for hatching. It is better to keep cockerels from the pullets from the time they are about four months old until they are ready to place in the breeding pen, but, if you have not sufficient room to care for them in this way, you can handle them by letting them all run together.

---

*Editor American Poultry Journal.*

DEAR SIR—I have a Rose Comb Brown Leghorn cockerel that is afflicted in the following manner: He has something growing on his comb like warts on a person's hand, except that they are hard and seem of a blackish cast on top. His tongue is covered with a whitish substance, which seems to bother him in

When Eggs are High

Begin to feed Sheridan's Condition Powder to your flock early in the fall and your hens will coin money for you during fall and winter months when eggs are high. It makes hens healthy and makes them lay abundantly.

SHERIDAN'S Condition Powder

Used and endorsed by prosperous poultry raisers for over 30 years. Sold by druggists, grocers, feed dealers. If you can't get it we send one pack, 25c; five, $1. A two-lb. can, $1.20; six, $5. Express paid. Sample Poultry Paper free.
I. S. JOHNSON & CO.,
Boston, Mass.

You Want Them

You do want every day a nestful of eggs from September to April, when they will command the highest prices per dozen in the large markets, and are in great demand.

Getting eggs when you want them is a matter of choice. You can have them or not. It depends wholly upon the care, feeding, and management.

Four essentials are absolutely necessary to succeed, as follows:—

1st. Hatch your chickens in the months of March, April and May.

2d. Keep them growing so the pullets will mature early and lay by October.

3d. Help your hens over the molting season, so that all will lay early.

4th. Follow the example of successful poultry raisers, who by the use of SHERIDAN'S CONDITION POWDER in the mash food, as directed, are doing all of the above, and increasing their profits yearly. It is a powerful food digestive. Therefore, no matter what foods you use in the mash, mix with it daily SHERIDAN'S POWDER; it assures perfect assimilation of the food elements needed to form new plumage; to make pullets mature early; to make hens lay when you want eggs.

C. B. fowls, 1st and 2d B. C. B. chicks. Birds for sale. Write what you want. Satisfaction guaranteed or money back. Address

WATT & CAMPBELL, Lacon, Ill.

eating. He does not seem to be sick or mopish, but eats well, only he has to stop at times, as if it was hard for him to swallow. Will you kindly inform me what the trouble is and give me a cure for it; also kindly inform me if a clipped wing has any effect on the bird in the show room; if so, how much?

*Fort Wayne, Ind.* *F. P.*

Your cockerel is afflicted with "sore head," which is always prevalent at this season of the year. The trouble in his mouth indicates a mild attack of canker. You will find instructions for curing "sore head" in our reply to "J. W. M.," elsewhere in this department. The trouble in the throat should be treated by swabbing it three or four times per day with peroxide of hydrogen. The bird in the show-room with a clipped wing is cut two points for the defect. If both wings are clipped, the specimen is debarred from competition.

---

*Editor American Poultry Journal.*

DEAR SIR—Please tell me through the columns of A. P. J. what is meant by single mating and what is meant by double mating. *H. F. R.*

*Chicago.*

Single mating as applied to the breeding of fowls refers to the mating of a pen of birds, from which it is expected to obtain the highest grade of exhibition birds of both sexes. The birds thus mated to be high-grade exhibition birds themselves. Double mating is the mating of one pen of birds to produce exhibition males and another pen for the production of exhibition females. The two pens being made up of birds, in which there is a different quality of the male and female lines. The matter can be more easily illustrated by referring to the practice in the mating of Barred Rocks. In the single mating plan exhibition birds of both sexes are mated together, from which is produced exhibition birds of both sexes. Under the double mating system a male bird too light in color is mated to exhibition females for the purpose of getting females of the proper color. In order to get males of the proper color an exhibition colored male is mated to females too dark for exhibition purposes. The tendency in the Barred Rocks is for the females to come too dark and the males too light, and the advocates of double mating claim that their system is the only one by which exhibition birds of both sexes in any great number can be obtained.

---

*Editor American Poultry Journal.*

DEAR SIR: I had a young cockerel sick with what I thought was canker of the throat. The throat was covered with a white substance that accumulated around the windpipe until the bird choked to death. I also had a pullet affected the same way, and, not knowing how to treat her, I cut her head off. Please let me know if this was canker, and if it is contagious. I would like to have your advice about mating my Barred Plymouth Rocks. Last spring I purchased a pen, consisting of one cock bird and eight pullets. I have a nice lot of young stock, some of the pullets being Standard color and some darker and the males lighter in color. Do you think I can study the Standard and mate two pens of this stock, one for cockerels and one for pullets, as per instructions in the August number of the JOURNAL, in the articles by J. E. Taylor and T. F. McGrew, or would you advise me to employ a judge to mate these pens for me?

What do they usually charge for such work and at how early an age can young stock be scored? *Mrs. A. M.*

*Chariton, Iowa.*

It is very probable that your two sick birds had diphtheria or diphtheretic roup. Canker is distinguished by a yellowish, cheesy substance in the throat. Both of these diseases are contagious, especially where the birds drink from the same vessels. The sick birds should be removed from the well ones and their throats swabbed three or four times each day with peroxide of hydrogen, which may be obtained at any drug store. Relative to mating your Barred Plymouth Rocks, will say that you will learn practically nothing by reading the Standard. The articles that you refer to contain many valuable suggestions, and in view of the fact that you know what proper color should be, we would suggest that you mate your birds along the lines laid down by Messrs. Taylor and McGrew. We do not know what a judge would charge you for mating your birds. There is no fixed price. Some judges work cheaper than others. It would hardly pay you to hire a judge to mate your birds unless you could arrange with one that was attending some show near you. Young stock cannot be intelligently scored until it is matured, which varies from eight to ten months, the age varying with the breed. In order to get the true score of a bird, it should be fully developed, as regards shape, hence it should be matured.

---

*Editor American Poultry Journal.*

DEAR SIR—Kindly send me a specimen copy of your Journal and say where I can buy it in this city. I am told there is a poultry college in Rhode Island. Can you give me the address? Is there one nearer New York?

*New York City.* *H. P. I.*

We have mailed you a copy of A. P. J. You can procure it at any of the principal news stands in your city. The subscription price is 50 cents per year, and you can get the JOURNAL cheaper, get it more promptly and be sure of always getting it by sending us that amount and subscribing for it. The poultry college in Rhode Island is a department of the Rhode Island College of Agriculture and Mechanic Arts. It is located at Kingston. The director in charge of the poultry department is J. A. Tillinghast. You will find an announcement of the course elsewhere in this number of the JOURNAL. There is no school of the kind nearer you.

---

*Editor American Poultry Journal.*

DEAR SIR—I wish to purchase a trio of White Wyandottes to use as breeders. Will you kindly tell me how old the birds should be for best results and how long eggs should be kept for hatching? *Mrs. A. B. S.*

*Memphis, Tenn.*

You should procure birds at least a year old. A yearling cockerel mated to two-year-olds hens makes a good breeding pen, or a year-old or two-year-old cock mated to yearling hens will give good results. Eggs should not be kept longer than two weeks. They should be turned daily and kept in an even temperature. Eggs will hatch if kept a month, but for best results we would not advise to keep them longer than two weeks.

---

*Editor American Poultry Journal.*

DEAR SIR: Will you kindly answer the following questions? What are the duties of a poultry judge and what is the usual fee? *J. S. D.*

*Brooklyn, N. Y.*

The duties of a poultry judge are to place the awards at exhibitions where he may be able to secure employment. We do not know whether or not we thoroughly understand your question. It would seem that the title, "poultry judge," would at once suggest the duties of the person holding it. Poultry judges are also employed by people to visit their yards and score and mate their birds. The amount of fees differs. Some judges work cheaper than others. Your second question is about like asking what a lawyer's fee would be. It depends entirely upon the man. Some judges will judge a show for $25, and some get $100 for the same service.

**MAMMOTH BRONZE TURKEYS.** Grand in Size. Superb in Markings.

Fine birds from the noted tom, "Western King," 1st prize tom at the great Cedar Rapids show of 1899, 3d largest show in the U. S., scoring 95½ by Shellabarger. He was also sire of the 1st, 2d, 3d prize pullets at same show in 1900. Also big boned fellows descendants of "Mammoth Giant" the noted tom which weighed 52 lbs. at the Cedar Rapids show of 1898, where he won 1st prize. This grand old fellow also won "cash special" for being the largest turkey in the Dubuque show of 1898. If you wish M. B. turkeys from one of the best flocks in the land, get your order in soon. # A LITTLE OF EVERYTHING.

### TREATMENT OF FOWLS.

A few days ago I took a short drive through the country looking at the chicks and at one farm where I visited the young man had a flock of seventy chicks. They were hatched in May and I was surprised to see the size and also to see how tame they were. The owner could pick one up as easily as you could a pet cat. The next farm at which I called there was a flock of about forty. They were hatched in April, but were at least one-third smaller and wild as hawks. Both flocks had received the same kind of feed, but not the same treatment. Moral: Treat your flock gently, if you want them to attain good size. *Fred Keith.*
*Lansing, Mich.*

### GREEN FOOD.

The wise poultryman foresees the coming of winter and sows a nice patch of rye. It should be from three to six inches high by October 15 to insure a good strong stand for the cold weather. Now, also, is the time to gather up all the second and third grade cabbage, rutabagas, stock beets, garden beets, and a little later the turnips, for the poultry and secure it for winter use. These suggestions are to be heeded if we are to have winter eggs. *Jesse E. Morgan.*
*Lemont, Ill.*

### EXHIBITION COOPS.

Now is the time to see that your coops are clean and in good repair for the late fall or winter shows. The floors should be painted with some good lice killer to disinfect and kill any stray lice. Those who will have to buy coops had better do so at once, and those who wish to build their own as I do, should give the matter their attention at once, so as not to be in a rush just before the time they wish to use them. *Robert Black.*
*Raymond, Neb.*

### LOOK OUT FOR THE ROUP.

Do not let the young stock crowd together in a bunch. Make them roost in an open shed. Sweating at night and going out in the cold frosty mornings will give them colds. Cared for in this manner they never catch cold, because they roost alone, and do not crowd, and are never subject to quick changes. If you let your birds roost in trees, it will be much better. They will become accustomed to all kinds of weather the same as wild birds, and you will never have any trouble. *John M. Sontag.*
*St. Charles, Ill.*

### DON'T LET THEM CROWD.

This is the time of year when hundreds, yes, thousands, of fine chicks are ruined by over-crowding. I go to our dry goods merchant and buy the largest boxes he has, which are about 3½x4x5 feet. I take off the top and about half of one side; then make a good steep, tight roof out of other lumber, letting the roof slant both ways. I then board up the gable ends, put in a couple of good, flat roosts about eight inches from the floor and I have a good, dry house that will shelter a dozen birds nicely until the freezing weather comes. *J. N. Young.*
*Whitefield, Ill.*

### FILE YOUR PAPERS.

Every poultryman should file away his papers for future reference. Often in the rush of work some of the best articles are not read. If the papers are conveniently filed, they can be referred to during the leisure hours.
*Freeport, Ill.* *John M. Wise.*

### THE LATE BROODS.

Remember the late brood of chicks. They are worth saving. When real cold weather begins, give them good comfortable quarters, liberal feed and fair care. Some of the finest Houdans we ever owned were late-hatched, but they were well cared for. If you have cracks in the building, batten them inside and out. Laths will do for the inside. It makes them very tight and costs but little. *John M. Wise.*
*Freeport, Ill.*

### POULTRY HOUSE FLOORS.

Our poultry houses have board floors. They are always dry and we prefer them to any other kind. Before winter sets in all bedding is removed and the floors swept with air-slacked lime, which finds its way into all the cracks. It disinfects and places the quarters in good order for winter. Then the floors are thickly bedded with nice, clean litter. It pays to do this regularly. *John M. Wise.*
*Freeport, Ill.*

### BREEDING AND FEEDING.

Our experience in breeding is that we have made much greater gains toward the ideal bird since we have practiced line-breeding, also in the killing of all disqualified birds and giving the good birds plenty of room and range. It does not cost any more to feed a good bird than it does a disqualified one. We should, therefore, add to the beauty of our flocks by discarding all such stock.
*Hoopeston, Ill.* *George S. Duffin.*

### PREPARING BIRDS FOR SHOW.

Now is the time to prepare birds for the coming shows. We are feeding ground beef scraps, ground bone, oats, corn and ground feed with good results.
*Washburn, Ill.* *Thomas McKee.*

### A CLEAN HOUSE.

How little trouble it is to keep the house clean, if we go about it right. If your chickens are white feathered, I believe sand is the best cover for the floor

and dropping board. I keep from one inch to an inch and a half of sand on the floors and boards in my White Wyandotte houses. I made a rake by driving six penny wire nails half an inch apart through a piece of pine and with this I can clean the boards in bushel baskets for three or four houses in about fifteen or twenty minutes every other morning. I find this arrangement a very satisfactory one.

*Lemont, Ill.* *Jesse Morgan.*

### SOMETHING GOOD.

We have this year had a large bronze turkey hen rearing Buff Leghorn chicks. She was not a success as to nnmbers, as she started with eight, but it was the worst time of the season and we neither fed nor watered the chicks. It was the beginning of the drouth, too, so she is excusable. She has one chick left, but it is a skipper and the pride of its turkey mother. She does not associate with any of the other turkey mothers, but goes alone with her one chick. It sits beside her on the fence at night and sometimes upon her back. *B. F. Hislop.*

*Milford, Ill.*

### ONE BREED.

The cheapest and most profitable way to keep standard-bred poultry either on the farm or town lot is to keep one breed only. You save in fences, buildings, time and caring for the birds and a certain amount of uncomplimentary language.

*Frank W. McKenzie.*

*Concord, Mich.*

### CONTROLLING SEX.

Last year I made a special mating of two fine White Rock hens with an exhibition cockerel and the result was a majority of pullets better than their parents. This year I mated those pullets to their sire and the result was a majority of cockerels that promise great things. Now the question is: Can hens be depended upon for a majority of pullets and pullets depended upon for a majority of cockerels? I also had one pen of the pullets mated to a cockerel that gave a majority of cockerels. This has been my experience for years.

*Toledo, Ohio.* *George Hamilton.*

### LOOK OUT FOR COLDS.

This is the season when your young birds are very apt to catch cold. Feed a tonic in the mash at night and when you notice a discharge at the nose catch the bird at once and inject kerosene into the nostrils. Cull your flocks closely and give the good birds all the room and attention. It pays. *U. R. Fishel.*

*Hope, Ind.*

### GRUMBLERS.

I see many topics discussed in the columns of the JOURNAL each month, but so far have seen nothing regarding a class generally known as chronic grumblers.

I wonder how many who advertise in the JOURNAL have not at some time or other received letters from some who ordered eggs, stock, etc., grumbling because the order was not filled at once—immediately—by return mail, etc.

I wonder if persons who make such grumbling orders ever think that hens must have time to lay eggs for hatching.

In the matter of shipping stock, etc., those advertisers and dealers near rail-

roads can ship quick enough; but how is it with those who live off in the country ten or fifteen miles from nearest shipping point? They generally ship once a week, and attend their stock and farms the rest of the time.

While my business is not the selling of eggs and stock, being that of a printer, nevertheless it is one in which the "chronic grumblers," at times, "kick" because their orders are not filled at once—immediately—by return mail.

I book all orders as received and opened. First come, first served. I have to do the work of printing the stationery before I can mail it to the customer. Some times I receive four or five orders in one day. I cannot fill them all at once by return mail. It takes time to do nice work. It takes time for hens to lay eggs. I say, let the "grumblers" think before they kick, then they won't do it.

*Hardin Springs, Ky. J. R. Hudson.*

### *FEEDING OLD AND YOUNG STOCK TOGETHER.*

Do not feed the yearling hens with the young stock and expect many eggs this winter. The laying hens should be housed and fed by themselves. To encourage them to lay they should be given green-bone, wheat and oats and a bran mash with corn occasionally. This kind of food will fill the egg basket, provided the house is kept well littered, so that the birds may keep their feet warm. Clover hay and fodder are good for them to pick over.

*La Harpe, Ill. Mrs. Nellie Bullock.*

### *THE SECRET OF SUCCESS.*

Give the growing chicks range and plenty of sound food and especially grit. Give them plenty of house room and keep them warm. Do not make the mistake of over-crowding, and success is yours.

*Burlington, Wis. W. F. Worth.*

### *FEEDING FOR PROFIT.*

Box-system of feeding far excels the old ways so much advocated in the journals. I have fed a bunch of White Wyandotte pullets and cockerels, April hatched, and in five months got pullets up in weight and some over-weight and cockerels nearly up in weight. During sixteen days I kept an account of weights and they gave an average of thirty ounces each or nearly two pounds in nearly sixteen days during the last half of the fifth month. They had free range and feed before them all the time. I now feed all my birds that way and have met with great success. I have had less sick fowls, have given less feed and labor and have received more eggs. Why do not the journals advocate this system of feeding and drop the plan which nature never intended should have been adopted? Good, common sense will tell us that this is right.

*Des Moines, Iowa. J. D. W. Hall.*

### *A GOOD EGG YIELD.*

We wish to report the total egg production of our thirty Houdan hens, which we keep on a town lot. From March 1 to September 1, when they began to molt, the total egg yield was 3,684 eggs. We realized from the sale of eggs $55.55. The expense for feed was $13.30. The feed consisted wholly of oats, wheat and corn. We have quit mash or ground feed, as being just that much money thrown away, for we have observed that within three hours after feeding mash, the hens become hungry and demand more substantial food. The last week in August they began to molt and by September 1 two had died. We sold one and ate one, so that left us twenty-five, from which during the month of September we received 198 eggs. We never had hens molt so early and rapidly. We want to repeat here what we said in a former communication, that is, we do not see why more town lot people do not grow this superior, yes, the "ne plus ultra" of egg and table fowls.

*Drs. J. H. and F. A. Waddell.*
*Wauseon, O.*

**Light Brahma Bargains!**

I am closing out my this year's breeders at very low prices for quality. Write me, I will please you.

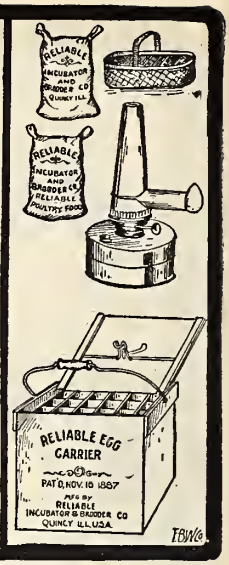
**Box A 1 Quincy, Ills.**



## HUMPHREY

There is no one thing which has done more to make poultry raising **profitable** than the feeding of green bone. There is no onething which has done so much to make feeding green hone possible as the **HUMPHREY Green Bone and Vegetable CUTTER.** Why? Simply hecause the Humphrey is the only machine which a poultry raiser can use without deciding that it is more trouhle than it is worth. That's why the Humphrey is so rapidly displacing all other machines. You find no Humphrey machines standing idle in the back yard. People who buy them, use them. It is the simplest in construction (only three working parts) and the easiest turning bone cutter made. It's the open-hopper machine—no chopping hones to pieces with an axe to pack them in a cylinder. If the Humphrey isn't the best machine, you don't want it. Try it and see.

**We Guarantee that it will cut more bone, in less time, with less labor** than any other bone cutter made; that it will cost less for repairs and give better general satisfaction all around. If it doesn't do it, you get your money back. Try it for yourself and see. It's simply great for cutting vegetables and kraut. **Send for our Book;** it gives much valuable information, also contains blanks for a year's egg record.

**We send it free on request.**

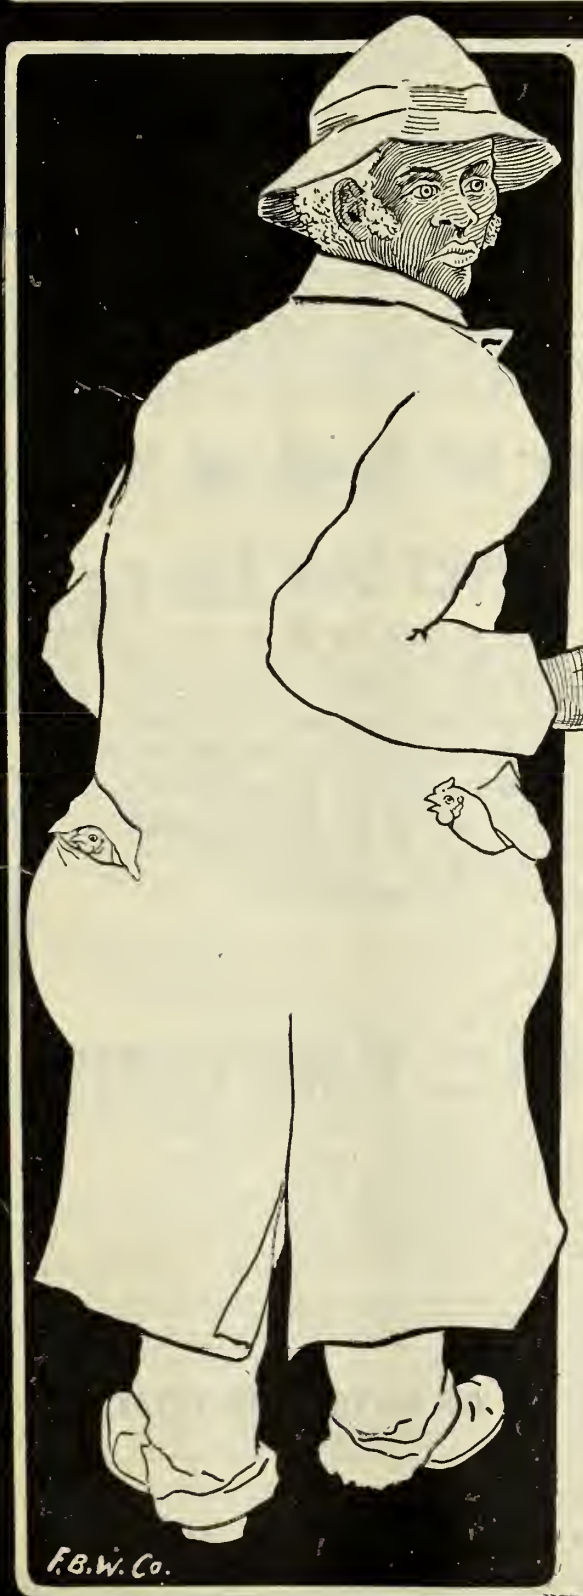
# POCKET YOUR POULTRY



—that is, get *all* the profit from your flock. A good incubator is a money-saver and a money-maker—a profit-producer. A poor incubator is a source of annoyance and loss. The

## Successful Incubators and Brooders

(*Life-Producers and Life-Savers*)

help poultry raisers make money, because they are operated with less trouble, at less expense and with greater certainty of results, than any other machine on the market. Here is what one experienced and successful poultry concern says (and there are thousands of others who tell the same story):

MANOR DUCK COMPANY, LIMITED.
Manor Station, Pa.
CAPACITY 12,000 PER YEAR.
BREEDERS OF ACME PEKIN DUCKS, AND WHITE WYANDOTTES. EGGS IN SEASON.

August 11, 1901.

Des Moines Incubator Co., Des Moines, Iowa.

GENTLEMEN;—As a result of years of experience we are now operating "Successfuls" exclusively, and we are sincere in our belief that for economy in fuel, hatching ability, simplicity in operation and neatness of construction, the "Successful" stands to-day without an equal. Yours truly,

MANOR DUCK CO., LTD.

Per Harry O. Steiner.

That's it—simplicity, ease of operation, certainty of results, durability and neatness of construction. What more can you ask? Our heating system and our regulating system give absolutely perfect control of the temperature, insuring the hatching of every fertile egg. We have a new poultry book and catalogue, full of valuable information on incubation and the general care of poultry. It describes in detail our full line of hot air and hot water incubators and brooders. Sent for 4 cents to pay postage. Address nearest office.

## TO MAKE EGGS

and lots of them, the hen must be supplied the proper materials properly combined. Just here

## RUST'S EGG PRODUCER

comes in. It is the one perfect egg food on the market. It contains all the elements in just the right proportions. It imparts vitality so that the eggs surely hatch and produce strong, lively chicks. It makes a hen healthy and keeps her up to her work and it costs only 20 cents a year to feed her with Rust's Egg Producer. Five sizes, 25c, 50c, etc., (if mailed, 44c and 94c). Rust's other poultry preparations are of equal merit. If your dealer does not have them send us his name and receive our booklet free.

Wm. Rust & Sons, Box 11, New Brunswick, N.J.

**A Big 42 Oz. Package**

for 25c; a 25 lb. pail for $2. Not only the largest but the best. No meal or cheap filler in Lee's Egg Maker. We use Granulated Blood (deodorized) as a base or body for the spices, salts, roots, herbs, etc. It supplies meat food; keeps fowls healthy, vigorous and profitable; brings the eggs when all else fails. If not on sale in your town don't take cheap substitutes but send to

GEO. H. LEE CO., - - Omaha, Neb.
Or 8 Park Place, New York.

## Chunks and Hunks.

Some bone cutters gouge bones into chunks, hard for fowls to swallow. Others crack bones into splinters and slivers, fatal to fowls. The best bone cutter—that's always the

## Stearns

reduces the bone to a fine granular meal, which fowls of all ages enjoy and thrive on. Our

## New Model No. 7

**With Ball-Bearings,**

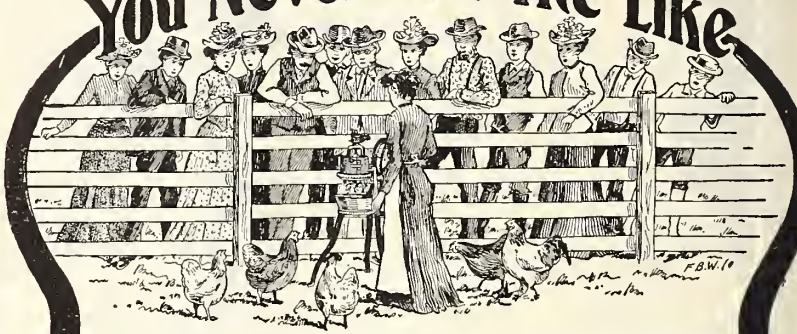
is without question, the easiest running, most rapid cutting machine made. Don't buy a cutter until you have investigated this new model. Ball-bearings make it turn easily. Back-geared 3 to 1, makes it powerful and rapid. Automatic feed; entirely self-regulating. We make eight other models for hand and power.

**"How to Make Poultry Pay"** is our new book, full of timely hints and suggestions. May we not send you a copy?

**E. C. STEARNS & CO., BOX 15, SYRACUSE, N. Y.**

*"Don't keep hens—make them keep YOU."*

## You Never Saw The Like



You never saw another bone cutter cut so rapidly nor with such ease. You never saw another bone cutter produce food of such good quality; You never saw another bone cutter give such general satisfaction in every way, as does

## MANN'S 1902 Model BONE CUTTER

New design, open hopper, enlarged table, new device to control feed. You can set it to suit any strength. Never clogs. The really successful bone cutter. Compare it with others and see for yourself.

It has an automatic feed. You turn the wheel and it does **all** the rest. You don't have to use one hand to manage the feed.

It has a self governing feed which adapts itself to the power operating it, making hard bones cut as easily as soft bones—in fact, you don't know whether the bones are hard or soft. With other machines you have smooth sailing one minute and hard tugging the next. The **Mann's never** stalls nor clogs.

Its self governing device is adaptable to any strength. You can set it to run as easy, as fast or as slow, to cut as coarse or as fine as you like. No other machine has this device.

Its special cutting device, its special hopper, allow none of the bone and none of the adhering meat or gristle to escape uncut. Others allow slivers of bone and hunks of gristle to work in between the cutter plate and the hopper, clog the machine, make turning hard, waste good material and endanger the lives of your fowls. The **Mann's 1902 model** cuts it **all**, and so makes more and better food from the same material than does any other machine.

## SENT ON TEN DAYS' FREE TRIAL.

No money asked for until you prove our guarantee on your own premises, that our 1902 model will cut all kinds of bone with adhering meat and gristle, easier and faster and in better shape than any other type of bone cutter. If you don't like it, send it back at our expense.

**Our New Catalog** explains the **how** and **why**, describing in detail the new features of our 1902 model. You'll be glad to get a copy—we'll be glad to send it. It is free for the asking.

# GOLD MEDAL

—and—

# HIGHEST AWARD

—at the—

# PAN-AMERICAN, 1901

WERE PLACED ON

# THE CYPHERS INCUBATOR

We do not attach great importance to medals and awards, no matter by whom given. What we do swear by is the fact that the Cyphers is to-day used with uniform success on ***TWENTY-SIX GOVERNMENT EXPERIMENT STATIONS*** in the United States, Canada, Australia and New Zealand; also by America's foremost poultrymen and by many thousands of persons in every walk of life.

## *Endorsements by Disinterested Persons in Official Positions:*

"The Cyphers has been in constant use and is giving the utmost satisfaction."—Prof. G. M. Gowell, Poultry Dept. Maine Agricultural Experiment Station, Orono, Me.

"A better incubator than the Cyphers, or a more honorable and liberal firm to deal with than the Cyphers Company, I do not expect to find."—E. A. Bishop, Supt. and Agriculturallst, Talladega Agricultural College, Talldega, Ala.

"We have used the Cyphers Incubator another year with continued success. It has worked satisfactorily in all respects and has given us no trouble."—H. H. Wing, in charge of Poultry Dept., Agricultural Experiment Station, Cornell University, Ithaca, N. Y.

"The incubator and brooders obtained from you last year have given complete satisfaction."—J. H, Stewart, Director W. Virginia Agricultural Experimental Station, Morgantown, W. Va.

"We had a ninety-two per cent. hatch—all chicks strong and healthy. Yours is the third machine we have tried in the past four years—others have been flat failures."—S. M. Emery, Director Montana Experiment Station, Bozeman, Mont.

"We used lucubators of several other makes with results much inferior to those obtained with your machines."—William P. Brooks, Prof. of Agriculture, Hatch Experiment Station, Amherst, Mass.

"The 220-egg Cyphers Incubator in operation at the Michigan Experiment Station is giving very good satisfaction."—J, D. Towar, B. S. Agriculturalist, Michigan Experiment Station.

"Your machine has given us very good results. I write this after using your No. 2 lucubator during more than one year."—Frank Ruhlen, Assistant Agriculturalist Ohio State University, Columbus, Ohio.

"The past season has added to our appreciation of the good points of your Incubators, We find that in ease of operatiou, regularity of temperature and streugth and vitality of the chicks they are nearly perfect."—Roderick W. Dallas, Manager Poultry Dept., Conneticut Agricultnral College, Storrs, Conn.

"We are now using two of your machines, both of which are giving satisfaction. For ease of management, method of heating and ventilating and controlling the temperature your machines are certainly very fine."—W. R. Graham, B. S. A., Manager Poultry Dept., Ontario Agricultural College, Guelph, Ont.

"I am pleased to report entire satisfaction with the work of your incubators and brooders at three experimental poultry stations conducted by this Department at Ottawa, Ont., Bondville, Que., and Truro, N. S."—F. C. Hare, Director of Poultry, Department of Agriculture, Dominion of Canada.

"I have found the Cyphers gives the best results."—Prof. A. G. Gilbert, Poultry Manager Central Dominion Farm, Ottawa, Ont.

"I receive on an average a dozen letters a week asking me to advise what incubators to purchase and I say 'A Cyphers' always."—James 1. McCue, Manager Poultry Dept., Hawkesbury Agricultural College, New South Wales, Australia.

"After using your incubators for three years I find they are the most up to date machines I ever worked, and as I have used eighteen different makes of incubators in my life time, I think I am competent to offer an opinion."—W. I. Green, Poultry Expert, Government Experiment Station, Momohaki, Waverly, New Zealand.

The foregoing are sample endorsements from men in responsible positions, who are wholly disinterested, excepting their appreciation of a properly constructed and successful incubator, and their common interest with us in advancing the poultry business along correct lines. ***SOLELY ON THE EVIDENCE*** we claim that the Cyphers ***NON-MOISTURE*** (original and only genuine) ***SELF-REGULATING,*** (diffusive principle fully covered by patent) ***SELF-VENTILATING*** Incubator is to-day

# THE STANDARD HATCHER OF THE WORD.

It is used in every country on the globe where poultry is produced for market, and is giving satisfaction "The World Around." (Ask for foreign testimonial sheet.) ***EACH CYPHERS INCUBATOR IS SOLD UNDER A POSITIVE AGREEMENT*** that it will do satisfactory work in the hands of every purchaser who will give it a fair trial, or the machine can be returned ***AND THE PRICE PAID FOR IT WILL BE REFUNDED.*** Agents for the Cyphers Incubators are authorized by contract to stand back of this guarantee ***IN EVERY PARTICULAR.***

Illustrated, descriptive, 32-page circulars, English, German or Spanish, ***FREE ON REQUEST.*** Complete Incubator Catalogue, 164 pages, 8x11 inches, and copy of 64-page Poultry Supply Catalogue "Everything for the Poultryman," ***10 CENTS*** in stamps ***FOR POSTAGE.*** Ask for book No. 5 and address our nearest office.

# Are You At The End Of Your Rope

for this season on account of the drought and crops burning up? If so, let go and drop on an incubator. This is a **Sure Hatch that hatches sure** and you can make enough money out of your poultry to pay for your groceries, taxes, and perhaps interest, and still have money to spare. We know this to be a fact, for thousands have done it. The poultry industry in the United States is making wonderful strides and the prices are steadily going up, on account of the increased demand for eggs and fowls. The **Sure Hatch Incubator** has pleased thousands in every state in the Union, and many foreign countries. It is manufactured of California redwood and will not warp, crack or open at the seams; has three walls enclosing our patent 12 oz. cold rolled copper tank; is equipped with Hydro-Safety lamp and Climax Safety Boiler, which absolutely insures against all risk of fire; is regulated with the celebrated corrugated wafer regulator and is fully guaranteed to last for years and to hatch every hatchable egg put in the machine. Our system of regulating, turning the eggs and manipulating the machine is so simple that a child can run it. Our new mammoth catalogue contains hundreds of pages of practical poultry information; hundreds of photographs of the **Sure Hatch** at work, and the names of thousands of people who voluntarily testify to the merits of the machine, together with full description of our complete line of **Sure Hatch Incubators** and **Common Sense Brooders.** This book costs us thousands of dollars, yet we send it free. Write at once, addressing nearest house.

According to size, shape, markings, legs, beak, comb, etc. All bred from my laying mating pens. Stock bred since 1888 for great egg production from fully developed, early maturing birds.

**FREE!** ***One cockerel FREE with every 12 females bought. This offer holds good till DECEMBR 1st only.***

## Exhibition Stock

Now ready. Look up last issue, and see what I offer yor; also watch this space next issue. If you **WANT TO WIN** write me your wants. Elegant 32 page descriptive catalogue free.

**ELM POULTRY YARDS,**
**Box E, Hartford, Conn.**

Breeders, Shippers and Exhibitors of Line Bred S. C. White Leghorns, S. C. Black Minorcs, Barred Plymouth Rocks, White Plymouth Rocks, White Wyandottes, and Light Brahmas.

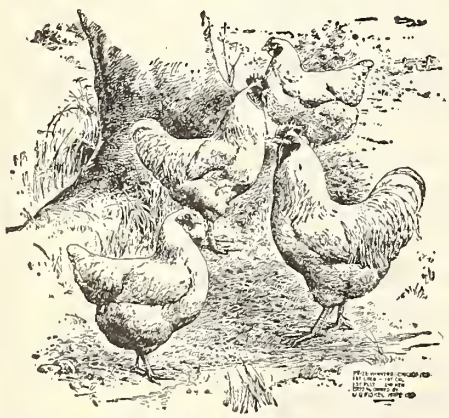
# "THE BEST IN THE WORLD."

Rather a broad assertion, it is true, but facts will prove it. Never since I have bred Fancy Poultry has my matings proved so successful. Look where you may on my 120 acre farm and your eye will rest on some of the several thousand

# FISHEL

White Plymouth Rocks. They are BRED RIGHT, are grown right, and will do more than please all that buy them. Their great size, combined with typical Plymouth Rock shape and beautiful chalk white plumage make them leaders of all White Rocks. The record that my

# WHITE PLYMOUTH ROCKS



*White Belgian Hares.*
*Fox Terrier Dogs.*

have made in the past few years has proven their claim as the "Best in the World." Did you ever stop and consider the great unparrelled record made at the Great Chicago Show last season. 1st, 2d and 3d cockerel, 1st, 2d and 3d pullet, 1st 2d, and 3d cock, 2d, 4th and 5th hen, 1st, 2d and 3d pen; the American Poultry Association Silver Cup for best 2 cocks, 2 cockerels, 2 hens, and two pullets in the American Classes (all Rocks and Wyandottes competing); the RIGG challenge Cup for the Best Display, all American Breeds competing. In fact, every special but one. Then at the Great New York State Show, 1900, my birds won 8 out of a possible 10 prizes. At the great St. Louis Fair they made a CLEAN SWEEP winning every prize offered. A record never made by any other White Rock breeder. At Indianapolis, Ind., 13 regular and 10 special prizes. While in the hands of my customars they are winning the leading prizes at every Show of note the country over. Why breed inferior stock when you can have the "BEST" and at about the same price. I will not show this season so have Exhibition Birds fit to win anywhere. I am offering for sale

## 2000 Select Breeders and Show Birds 2000

Birds that will reproduce themselves and birds that can win the ribbons for you. Remember the utility part of my White Rocks has never been lost sight of while breeding them so near standard requirements. My 24-page Catalogue is FREE. It tells how to feed, how to breed winners and how to prepare them for the show room. A beautiful color plate of my Chicago winners sent for 5 2c stamps. Write me, for it is a pleasure to get acquainted with all White Rock admirers.

"As Good as the Best."

# Silver Laced Wyandottes.

Winners of first prizes at Madison Square Garden, N. Y., Hagerstown, Md., Atlanta, Ga., Asheville, N. C., Columbia, S. C., and others. Can and will suit buyers in exhibition and breeding stock at reasonable prices. Satisfaction or no sale. Eggs in season $3.00 per 15 from excellent matings.

THEO. E. F. HOLZHAUSER,

Broad River Poultry Yards, Columbia, S. C.

# Rhode Island Reds

## The General Utility Fowl of the Twentieth Century.

Our WINNINGS the PRESENT year demonstrates without a doubt that we have MORE PRIZE WINNERS than any breeder in the country. Having won in 1900, nine firsts and sweepstakes for best male, Concord State Fair, Concord, N. H. Eight first and second, nine entries, at Brockton Show. Two firsts and special for best R. I. Red male bird in Fall River. Six first prizes, six entries, Malden, Mass. Forty-two prizes Philadelphia, including the special offers of $50 in gold and $25 in gold; also including nine firsts and nine seconds out of a possible ten each.

—1901—

Boston Show in the hottest competition, forty-eight prizes, including four firsts, three seconds and eighteen specials. At New York, seven firsts, five seconds, which is a result unequalled by any breeder of any variety of any fowl. If you desire to obtain stock from the very best that there is, state what you want and write us for quotations.

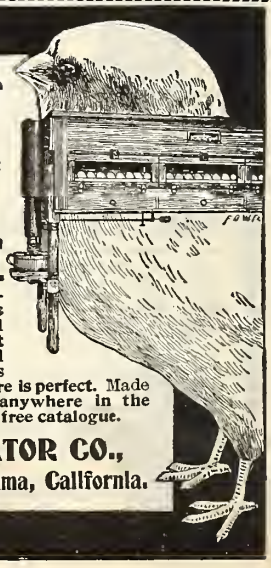
## PETALUMA INCUBATOR

### WHY IT HATCHES

**...HIGH PER CENTS...**

Success in an incubator depends upon two things: the right principle and the right construction. The uniform success of the

**Petaluma Incubator**



is not a mere "happen so." It hatches **100 per cent of fertile eggs because it's built on the right principles; it is scientifically correct,** and because the very best skill and workmanship obtainable are put into its making. **It is built right; it does its work right.** We put a guarantee behind it which means something. It is a hot air machine, and has demonstrated that **its regulation of heat, air and moisture is perfect.** Made in four sizes—from 54 to 324 eggs. We **pay the freight anywhere in the United States.** It will pay you to **send for our attractive free catalogue.**

**PETALUMA INCUBATOR CO.,**
**Box 150 Petaluma, California.**

## Cedar Grove Poultry Farm

## 1.50 WHITE & BUFF WYANDOTTES, (1883) BARRED ROCKS (1901)

to $5.00 for choice early batched cockerels and pullets bred from prize winners scoring to 96. White Wyandottes are direct descendants from our famous cock Henry of Navarre, score 95¼ by Hewes. Other varieties also descended from a grand line of ancestors. Send for prices and circular showing how we won **EVERY FIRST AND SPECIAL** on W. and B. Wyandottes with a total of 33 awards at Peoria, Ill., Dec. 1900, in hot competition, Hewes, judge. All **HAWKINS STRAIN.**

**S. F. FLINT & SON, Peoria, Ill.**

***Golden Buff. Golden Buff. Golden Buff.***

## KEYWORTH'S BUFF PLYMOUTH ROCKS.

are as near **SOLID BUFF** as has ever been produced. They have been bred in line in a practical and scientific way for years and no time or money has been spared to have the best. While at Evanston, Ill., inside of one year they showed their quality by winning at the great Chicago show the **GOLD SPECIAL** for display besides other regular prizes. At the Wisconsin State Fair on four entries 1st cock, 1st hen, 2d cockerel and 2d pullet. At the Illinois State Fair won every first but one in a large class. At Indianapolis in December, in a class of nearly one hundred birds of the world's best, our strain won 2d cock, 1st and 2d hen, 3d pullet (score same as 1st) 2d cockerel, 2d pen and special for best cock, hen, cockerel, pullet and pen, thus winning more prizes than any other exhibitor. We have some cockerels and pullets that are practically solid buff and they are sure to do some one some good in the show room. A grand lot of breeding stock to select from at prices that are very low and within the reach of all. Write for prices on our great **LAYING** and **EXHIBITION** strain of Buff Rocks.

***KEYWORTH BROS., Sandy Hill, N. Y.***

## White Wyandottes

**Exclusively.**

Our strain is bred for utility as well as fancy points. They are shapley and large, healthy and vigorous, good foragers and good layers. Pullets began laying in September. With hundreds to select from we can please you in quality and price.

***MILLER BROS., Box 18, Nashville, Ind.***

## COOLIDGE'S WHITE WYANDOTTES

***WON***

the lion's share of ribbons at State Show and Chicago. A few hens to spare and young stock ready to ship out.

**JOHN COOLIDGE, Galesburg, Ill.**

## CONKEY'S ROUP CURE

**CURE GUARANTEED.**

**CONKEY'S ROUP CURE** is the only positively known remedy that will cure roup in all its forms as long as the fowl can see to drink. Simply put the cure in drinking water and the fowl takes its own medicine. **For Canker,** especially in pigeons, it excells all others. One 50 ct. package makes 25 gallons of medicine. Directions with every package. If it fails to cure, we refund the money. Postpaid, small size 50c; large size $1.00.

**Conkey's Louse Killer** never fails to kill. Try it; 25c. per package and 15c extra for postage.

**CONKEY'S POULTRY TONIC** will keep your fowls in perfect health and make your hens lay eggs in winter. 25c per package and 15c extra for postage.

**AGENTS WANTED.** G. E. CONKEY & CO., Cleveland, Ohio. Eastern wholesale office, No. 8 Park Place, New York City. Pacific Coast agents, Petaluma Incubator Co., Petaluma, Calif. For sale by all Poultry Supply Houses and Druggists. Do not send stamps.

## Arnold's Buff Leghorns

**Are the Oldest Strain in America,** and have **WON SINCE 1891 at NEW YORK, BOSTON, PHILADELPHIA, WASHINGTON and HAGERSTOWN, 314 Regular Prizes and 74 Gold and Silver Specials.** We made our last exhibit at **Madison Square Garden** in 1900, and won on Buff Leghorns, **2 Silver Cups, 5 Gold Specials, 1st and 2d Pens, 1st and 2d Cocks, 1st and 2d Hens, 3d, 4th and 5th cockerels, 1st, 4th and 5th pullets.** Our stock better this season than ever. We don't show and will sell the best show birds. Have your orders booked early.

## Arnold's Buff Plymouth Rocks.

We bred from the **1st NEW YORK COCK** all season. He won 1st at New York in 1901 and beat 13 of the best cocks in the East. Besides over 100 sittings of eggs from our own breeders we have the chicks from four sittings of eggs from the yards of the best breeding cock in the East and a large number of eggs from the four best males in the west. And, remember, in the fall of 1899 we went up to the yards of H. S. Burdick and got the pick of his old and young stock at big prices. A noted Western breeder and judge says we have the finest females he saw in the East. We wont show but will sell our best exhibition birds. We have also the finest collection of **WHITE, BLACK and BLUE BELGIAN HARES** in the world: **also Silver Grays and Silver Blues.**

Richmond, Ind., July 1st, 1901.

Natural Hen Brooder Co.

Jno. M. Sontag. My Dear Sir: I want to let you know the results of your invention, the Natural Hen Brooder. On first sight of your catalogue and the brooders we received of you, we could not believe your statement. We supposed you were like all the rest of the brooder manufacturers, and that we were up against it good and hard again. But a fair test has proven us to be wrong and your brooder a dazzling success. It is still a mystery to us that we ever wrote or bought brooders of you, as we had sworn to never use brooders again. But it has proved to be the luckiest thing we ever did, and has turned our thoughts to a subject we never contemplated before. This is the broiler business; we have seen several fail in this line, and thought it was impractical, as no brooder ever raised half of the chicks. But when we tried your patent invention, we caught the bee in our bonnet, and wish to try your brooder house system. We have come to the conclusion that you know more about poultry and diseases, brooders and incubators than any one we ever struck, and your book, Nature and Its Laws, is worth $100 to any breeder of poultry, it is the best book on the subject we ever read, as your teachings are up to nature, and common sense is used in feeding, housing, etc., and your blue prints are surely worth the price of a brooder. These plans are certainly good, and we don't regret the price, $20, paid for your brooder. We are happy and perfectly satisfied. It is worth $20 alone to know that there is a brooder on the market that raises all the chicks. We want them by the dozens later on. We will say this for your brooder: It is the only one that can and will raise all the chicks put in it, and it is cheap at twice the price asked for it. You are at liberty to use this voluntary letter, and we will be pleased to answer, personally, all queries we may receive, if stamped envelope is enclosed and addressed. We hope you will meet with the success you deserve.

Yours respectfully,
GEO. A. PIERCE & SON.

Ransomville, N. Y., July 17, 1901.

Natural Hen Brooder Co., St. Charles, Ill.

Mr. Jno. M. Sontag: After using your brooders the past season, we are happy to state that it beats them all, and we would not be bothered with the others if they would give them to us free We never were able to raise over fifty per cent. of chicks in any other brooder, but in your brooders we have raised most every chick. We raise thousands of ducks and chickens every year. Your brooder raises large, strong, hardy and healthy, vigorous chicks, such as we never saw before. Why, they are out of sight. It beats the old hen, surely. We want your brooder house heating system in the fall. Your book is the best we ever saw or heard of, by far. We predict for your brooders an enormous sale, and ask you if you could give us this territory as agents for your brooders? We can sell hundreds. Wishing you success, we remain, Yours truly, W. R. CURTIS & CO.

LaCrosse, Wis., April 24th, 1901,

Mr. Sontag: Your book, Nature and It's Laws, so much desired, was welcomed this morning. I have read it and shall often read it, as we think it is the best book on the subject we ever saw. Your idea is correct. You follow nature, and that's what the people want. We intend to go into the broiler business on a large scale. Your brooders raise most all, even the weakly ones. Everybody who raises chickens ought to have your book. We can see where we made a thousand mistakes by following other books. Please give me your prices on brooders, ducks, geese, poultry, etc., in large lots; also some White Holland turkeys. Enclosed find stamps for reply. Very respectfully yours, MRS. C. L. HOOD.

Iowa Poultry Park, Charlton, Ia., Apr. 29, 1901.

Natural Hen Brooder Company,

Mr. Sontag, Dear Sir; Your brooder is the most wonderful invention I ever heard of. The beat is just like the hen, not the kind that kills and dries up the chicks. I have tried your brooder side by side with other makes and the contrast is appaling. In your brooder the chicks are as healthy and lively as can be, while in the other they are dying like sheep. I take out from six to a dozen dead ones every morning, and it makes me sick; while in your brooder there are no dead ones, but the healthiest kind of a brood of live ones. I want the agency for Iowa state. I can sell dozens for you, because they are just as represented. Thanks for past kindnesses, Respectfully, MRS. C. W. BROWN.

Puxico, Mo., June, 1901.

Natural Hen Brooder Co,

Mr. Sontag, Dear Sir: Your brooders are cheap at any cost. After trying your brooders and heating system for brooder house, can say that there are none better or half as good. I lost but two ducklings in the 60-ft. brooder house, and did equally as well with the chicks. I know from experience that a cheap brooder is a death trap for chicks, and means sure failure to those that get them. I shall want 20 more of your brooders in the fall. Your house heating system is the handiest, cheapest and most practical on the market. It is a money saver, and keeps chicks warm in zero weather. Truly, C. E. REED,

Niagara Poultry and Duck Ranch, and Poultry Supplies,

(The largest plant in New York.) Ransomville, N. Y., Sept. 21, 1901,

Natural Hen Incubator and Brooder Co., Jno. M. Sontag, St. Charles, Ill.

After trying half dozen of your No. 3 brooders, we now want the Eastern Agency and a brooder house, and a carload of your out of doors brooders and your sectional 3 department brooders. Your incubators beat all I ever saw in our experience, and your brooders raise all the chicks in 1,000 lots. Such healthy, growing chicks I never have experienced. You have a fortune in your incubator and brooder. It certainly beats the hen. Inclosed find $70 for two incubators. Will order a carload of brooders soon. This proves what we think of your inventions.

W. R. CURTIS & CO.

W. R. Curtis & Co. are our Eastern agents. It saves freight to Eastern poultrymen.

# The Book, "Nature and Its Natural Laws," *by Jno. M. Sontag,*

**$1.00 without Blue Prints, or with Blue Prints $1.50.**

New catalogue and book combined 25c. Orders booked now. This catalogue and book will be out some time in December. You get 16 years experience and knowledge on nature's laws and a thousand other valuable hints, never written before.

# AN INTERESTING STORY.

## How One Man Made $413.59 Profit in One Year from Poultry on a Town Lot. Continued from Oct. and Nov. Numbers of A. P. J. By J. W. Morse. Part III.

AT THE opening of the spring of 1875 I commenced experimenting by crossing a Single Comb Brown Leghorn cockerel on a Barred Plymouth Rock pullet. So far as hatching was concerned, most every egg proved fertile and the chicks proved very hardy and vigorous, but when these chicks came to full maturity the cross proved a dismal failure. Some were black with bluish-black legs, others took after the Leghorns in color and a few after the Barred Plymouth Rocks, and they were of all sizes.

I was so disgusted with these chickens while growing and when full grown that I sold the fourteen pullets I raised to a neighbor for 50 cents each, and that was their full value, for they were no better than the common barnyard fowl and certainly looked much like them.

I was informed about a year later by the neighbor who bought them that they were excellent layers of dark tinted eggs, but that they proved persistent setters and that the broilers raised from them when mated to a Brown Leghorn cockerel were worthless and hard to sell, as they were of all colors, mostly a very dirty rusty black with bluish legs. He said his poultry dealer asked him why he did not try breeding crows, as the meat would be just as good.

Since 1875 I have made, if my memory is not at fault, twenty crosses, but never one so utterly unsatisfactory as the Brown Leghorn male mated to the Barred Plymouth Rock female. I have often wondered how it would work to mate a Barred Plymouth male with a Brown Leghorn female and have often thought I would try it, but remembering my experience with that first cross, my courage has always failed me.

During the year 1875 we raised nothing but Barred Plymouth Rocks and from this cross we set every egg the E. C. Comey hen laid, but it was the same old story; eggs not fertile, no chicks, and in the fall I sold her with all my Light Brahmas.

About this time I remember my wife got hold of a book written by a man by the name of Burnham. I have lost the book and forgot the title, but I now believe that book was of great value to me. One of the rules he laid down, I remember, was that if a breeder was breeding two or more varieties he never should allow the males and females to mingle, but that the males should be kept separate until ready to be mated for the season's breeding, and I believe he was right, but I think if he were alive today he would make it read: "Keep your males and females separate at all times, except when actually breeding them," for I think one gets more fertile eggs by so doing and the males and females do better, especially the pullets, as they grow faster.

The year 1875 proved an excellent one with us so far as money profit goes, although an old gunshot wound, received at the battle of Winchester, Va., during that awful battle summer of 1864, put me out of the game about the first of July, caused by a fall, which opened the wound and laid me on my back about eleven weeks, throwing the whole care of the poultry on my wife.

During the spring of 1875 I had the incubator fever, and would have bought one, but, hearing that a man in an adjoining town had one, and was running it, I concluded to investigate and went to see him.

I found that he had purchased the plans and had constructed his machine by those plans. He had seen the advertisement, so he told me, in some agricultural paper, and he offered to make me a machine like his for $50. This machine was very creditably built and was a hot-water machine, having a tin tank with copper bottom, I think.

I told him I would think it over, and while I was thinking it over his buildings caught fire from his machine and burned down, and this frightened my wife so badly that it was five years later before she would listen to any proposal about purchasing an incubator.

I wish just here to say I have known of quite a number of buildings being burned and the fire was caused by an incubator, but in every case it has been proved that the incubator was a home-made one and not one single case have I known where any of the standard incubators built by reliable companies have caused loss or damage by fire, and I have known of their being run from cellar to attic, in barns and wood sheds, and I would not hesitate to use a dozen in my house, either incubators or brooders, and this I affirm after about twenty years' experience with several makes, both hot air and hot water.

Incubators are no more dangerous than leaving lamps burning all night or leaving a fire in stove or furnace night and day. They are perfectly safe, if properly run.

We raised during 1875 about 400 chicks, and all but 25 (crosses) were Barred Prymouth Rocks, and a fine, vigorous lot they were. I don't remember of losing hardly any, none by sickness. We were very careful to feed nothing but good, sweet food and give pure water and not crowd.

They were plump and fat at three months from the shell and my customer gave me one cent more per pound than he was paying my neighbors who bred the common or Dunghill variety (if Dunghills can be called a variety). They grew and thrived like little weeds.

As I remember those Barred Rocks, they were darker than the Barred Rocks bred now, the barring shaded more on the black than the blue.

Among the 375 Barred Rocks I raised that year was one pullet almost as light as the cockerels, and she grew larger than any of the others, and I kept her for a breeder.

What a craze those early Rocks started. We sold $291 worth of eggs from them for setting, commencing in February and selling as late as August, having no trouble in getting

$3 per 13, and some breeders asked and got $5, and it was hard to fill orders at that.

We sold 162 broilers (alive) for $81, but some of the eggs we sold were from our Light Brahmas.

There was a Frenchman living over in the north part of the town and he bought a setting of Barred Rocks eggs for which he paid my wife $3 after spending about one half day trying to beat her down.

In about four weeks he returned bringing three eggs back. He could not speak very good English, but after much fuss trying to understand him, I made out that he had got ten chicks from his setting, and that these three eggs did not hatch, and that he had a hen wanting to set and wanted three eggs in place of the three which did not hatch, but, said my wife: "We don't warrant every egg to hatch. I think you got a real nice lot of chicks from your setting. Do your own eggs hatch ten chicks from thirteen eggs?" He replied: "Me no know, but me pay you $3, me expect every egg give me one chicken."

But I have since discovered some Americans who were fully as unreasonable as this poor French wood-chopper, and I don't think I am the only one who has discovered them, either.

I had a very beautiful and intelligent Scotch Shepherd female. We thought the world of her, and when my wife killed any poultry for our table, she would give Flora (the dog) the legs.

There was considerable chicken stealing going on. Several of our neighbors had had their coops broken into and chickens stolen, and nights I would turn Flora into the hen house to watch. One morning when my wife went out to feed, she found a fine Plymouth Rock hen lying on the ground with her legs eaten off. Flora had pulled her off the roost during the night and done the mischief. After that I put Flora in the shed nights, but one day while we were away she caught a chicken about two-thirds grown and ate her legs off. I hated to part with Flora, but felt compelled to sell her.

When I came to take an account of stock January 1, 1876, I found my wife had done most of the work, and it looked as if she would pocket all the profit, but I had the consolation of knowing she had well earned it and deserved every cent she had got, for that old gunshot wound had been troublesome until late in the fall.

I found on taking an account of stock that the account stood: Expended for feed and all other purposes, three hundred and twenty dollars and forty-one cents ($320.41), and our total receipts were seven hundred and forty-three dollars ($743), leaving a clear profit of four hundred and thirteen dollars and fifty-nine cents ($413.59).

This account is taken from my old book, which I kept at that time, and I will say here I have always kept an account with my fowls, giving them credit for eggs, poultry, feathers and manure sold and charging them with feed, houses, fences and everything needed to carry on the business, but never giving them credit for eggs or poultry used in my own family.

I had January 1, 1876, 100 Plymouth Rock pullets and 60 cockerels, 3 2-year-old Plymouth Rock hens and 4 year-old cocks, making 132 females and 64 males, all Plymouth Rocks.

All my other stock I had sold, and my wife suggested that we build a 50-foot addition on to our hen house to accommodate our increase of stock and that I should give up working in the shop and come home and work out for the neighbors what spare time I had, as my wound hurt some, running a heavy machine by foot power, and I could favor it more at home and give it a chance to heal permanently. She offered to build the addition, and I agreed. It was built, and she paid for it, and we had a fine hen-house 100 feet long.

It will readily be seen that so far during our experience my wife had borne the brunt of the battle. We were not wealthy, and if she had been like some women, fond of ease and gossip, I should certainly have failed in the chicken business. It would certainly have been a fizzle like countless others, for a man can't be in the shop, earning money, and care for chickens at home, nor can he lay on the lounge nursing a painful wound, and care for chickens either.

January 1, 1876, I was down to one variety—the splendid Barred Plymouth Rocks. No wonder they still retain their place at the front as a general utility fowl and fanciers' fowl as well. I have not bred them for some years, being interested in their great rival—the Wyandottes—but I never see a well-bred flock of Plymouth Rocks but I feel like taking off my hat and making my best bow to them.

The man who originated them will certainly take his place in history beside the originators of the Baldwin apple and Concord grape. All these have, and will continue to be, a great benefit to mankind.

*Epping, New Hampshire.*

(To be continued.)

# A Question and Its Answer--By. H. S. Babcock,

THE question, "Has the specialty breeder greater chances of success than the breeder of several varieties, as regards prominence and high prices for stock and eggs; if so, why?" is a good question and one that needs to be asked by every poultry breeder. As limited, it is a reasonable question and ought to be susceptible of a reasonable answer.

The answer may be twofold, first from experience and second from the nature of the case, but to answer this question from either viewpoint and to make the answer perfectly respousive and intelligible, it is best to define the terms of the question. What does it mean? To the writer a specialty breeder is one who devotes his attention to a single variety to the exclusion of all other varieties, and the question asks whether such a breeder has or has not better chances of becoming prominent and of obtaining high prices for his fowls and for the eggs produced by them than does the breeder who devotes his time and attention to several different varieties. As so defined, this will be the writer's answer.

First. Does experience shed any light upon what the answer should be? We think it does. For some years Oakland Farm, Taunton, Mass., bred Buff Cochins exclusively, and the Buff Cochins of Oakland Farm gained for the breeders a continent-wide reputation which enabled them to sell one cock for $250 and to sell other fowls at extremely high prices, as well as making a wide market for their eggs at $5 per setting. E. R. Spaulding was known for years as a breeder of Black Breasted Red Games and for years Spaulding's Games and eggs commanded the highest prices. I myself saw him sell one cock for $150 and another cock and hen for $150, and I know that he obtained top prices for many of his birds. August D. Arnold devoted himself to Buff Leghorns exclusively and they gained for him a reputation that was bounded only by the limits of the continent. They were known where the waves of the Atlantic ocean beat upon the eastern shore, and where the Pacific ocean rolled its long surges upon the western boundary of the nation. The fowls and eggs brought the highest prices.

Even breeders of several varieties are best known from a single variety, as I. K. Felch and Philander Williams as breeders of Light Brahmas, and their experience seems to teach that as specialists upon this variety the specialty breeder has the best chance of obtaining prominence and of obtaining high prices, and the list of specialists and semi-specialists might be greatly extended, and the extension would but add cumulative evidence to the fact that the specialist has better chances of obtaining prominence and high prices than the breeders of several varieties. One thing is to be especially noted, that when a man who has natural gifts as a breeder has devoted his time and attention to a single variety through a succession of years he has never failed of becoming prominent as a breeder and of obtaining high prices for his stock and eggs. Unless a man has natural gifts as a breeder and unless he persistently follows the bent of his gifts, he cannot expect to obtain prominence or to sell his stock and eggs for high prices. The answer from experience, therefore, I think must be given in the affirmative.

Second. What answer is to be expected from the nature of the case? Will that confirm the answer from experience, or will it refute it? It is not to be denied that breeders of several varieties have succeeded admirably, although they usually have at first made a success with a single variety, as has been instanced under the first part of the answer. William Ellery Bright won his reputation as a breeder of Brown Leghorns, but his Plymouth Rocks are also well known. Oakland Farm added Light Brahmas to its collection of Buff Cochins and Oakland Farm Light Brahmas have figured conspicuously in the list of prize winners. Williams and Felch have excellent reputations as breeders of Plymouth Rocks and other varieties as well as Light Brahmas. So much must be conceded, and yet we think this part of the answer must also be in the affirmative.

1. Because the specialty breeder will make a more thorough and conscientious study of his single variety than he could of several varieties. He will learn all of its history, its peculiar breeding tendencies, its liability to faults, its habitual excellencies. He will learn how to mate it for the most perfect results and how to feed and care for the young to secure the most perfect development. In a word a single

variety will give him the opportunity of mastering perfectly all of the details of mating, hatching and rearing so that he can produce the very best stock of that variety. And when the best stock goes into an exhibition, it, if competently judged, is bound to win. And the man who breeds sure winners is the man who gains prominence and makes sales at high prices. People must have his stock or be relegated to the rear, and people are not fond of being sent to the rear.

2. Because the specialty breeder when he introduces fresh blood can afford to purchase better specimens than the breeder of several varieties. If a breeder has ten varieties and he needs to purchase ten cocks, and if he can spare but one hundred dollars for this purpose he can buy ten dollar birds and that is all, but if he has but a single variety and has one hundred dollars with which to purchase a cock he can secure about the best specimen that can be purchased. While the ten dollar birds may beget good stock, the one hundred dollar bird is likely to beget better stock, and this better stock will continue to keep the specialty breeder to the front and will enable him to continue his sale of higher-priced stock and eggs.

3. If a man keeps several varieties a would-be customer will write him and get a circular in reply. This circular will describe the excellences of the several varieties, truthfully we may say, but the customer is thrown into doubt as to what he should buy. He then writes to a specialty breeder, sends his circular devoted to a single variety, finds it to set forth what he wants, and he buys of the specialty breeder.. If all customers knew just what they wanted, the circular description of several varieties would not create any doubt in their minds, but the fact is that thousands of customers do not know what they want. One variety is as good to them as another. They want good hens. They are meat to the specialty breeder, because his hens are good and they don't have to weigh merits and compare advantages. It hurts many men to think. Thinking is hard work and is dreaded, but they don't have to think when the specialty breeder's circular is received. Again, such people reason in this way: Mr. A. is a prominent breeder. He breeds White Plymouth Rocks. Because he breeds this variety exclusively he must think it the best variety, and if he thinks it the best variety it must certainly be the best; therefore they conclude the White Plymouth Rock is the fowl to purchase. In making sales men must be taken for what they are and the specialty breeder has a better chance of making sales to a large class of men than the breeder of several varieties.

Scene at the yards of H. Pfaunkuchen, College Hill, Ohio.

4. There is another class of men who are sticklers for absolute purity in blood. They fear a mesalliance almost as they fear death. Upon the premises of the specialty breeder there is no chance for crossing several varieties, while with the variety breeder a chance mating of different varieties is possible. Men of this class, therefore, give their orders with confidence to the specialty breeder and withhold them from his brother with several varieties. Where numerous buyers are these prices tend to appreciate, and this fact helps sales and prices for the specialty breeder.

5. The specialty breeder has a better chance of rearing exhibition birds than the breeder of several varieties, and exhibition birds are the ones which bring the highest prices. If H. breeds a single variety and if twenty-five per cent of the chickens of that variety are exhibition birds, out of 200 chickens, he can raise 50 exhibition birds. If T. breeds ten varieties and the same percentage of exhibition specimens prevail, out of 200 chickens he will be able to raise also 50 exhibition birds, but that will give him but five of each variety. Such a small number of exhibition specimens will hardly enable him to make a decent exhibit of his stock, and as for sales he will have but very few to dispose of. His chances, too, of superlative excellence will be much less than will be those of H.

Exhibition birds vary in excellence and if one has 50 to pick from he has a strong chance of getting a very high score, while if he has but five from which to make his selection his chances of getting his "cracker jack" is very small. If he gets a 92 point bird he does well, but the other is quite as likely to get a 95 point bird as he is a 92 one, and the difference in value between a 92 and 95 pointer is tremendous. For sale or for personal exhibition the specialty breeder has a very strong and marked advantage. He can make a full exhibit, while the other can exhibit in only one or two classes; he can make more and better winnings; he can obtain higher scores; can realize better prices; can obtain better material for a "taking" advertisement. In fact, the variety breeder is surely handicapped by the fact that he can have so few exhibition birds from which to select his exhibit.

6. The specialty breeder has great advantages in advertising over the breeder of several varieties. If each uses a card of four inches the specialty breeder has space to set forth the merits of his stock in a manner to gain public favor and general prominence, while the breeder of several varieties can do little more than enumerate the names of the varieties. If he takes space in proportion to the number of his varieties it will be expensive and his sales will hardly warrant the expense. And then, too, the best sort of advertising is that which associates the name of the breeder and the name of the variety. If there be but one variety when the name of the breeder is mentioned, that of the variety will be suggested, and vice versa, the name of the variety will call up the breeder's name. For example, if one mentions the name of Frank Heck, the White Plymouth Rock is suggested, or if one names the White Plymouth Rock Mr. Heck's name at once is called up. This is not possible except with a single variety, or at least not so fully possible. Mention Bradley Bros. and you think of Barred Plymouth Rocks, mention I. K. Felch and Light Brahmas are thought of, and it requires a certain mental effort to think of him in connection with the other excellent varieties he breeds. In this way through advertising a single variety the specialty breeder gains considerable prominence, and this prominence leads to increased sales at enhanced prices.

The voice of experience and the voice of reason, therefore, tell the same tale. The specialty breeder has greater chances of success than the breeder of several varieties, as regards attaining prominence in the poultry world and seeking sales of his stock and eggs at high prices. The reasons why are clear and grow out of facts. They do not have to be forced by special pleading and by indulging in sophistries, because the specialty breeder can spend more thought and more money and more care upon his own variety than the variety breeder can upon his several varieties, and because care and thought supplemented by the judicious use of money count for much in the race of prominence, the specialty breeder, other things being equal, has the better chances and must win.

———o———

A certain amount of food is necessary to sustain life and produce an egg. If the hen does not get it the egg basket suffers the loss. You cannot steal from nature without paying the penalty.

———o———

One hundred and fifty eggs a year is a fair record. There are more hens laying less than 150 than there are laying more.

# Preparing Birds for the Show Room

**How to Properly Condition birds to make them win. The Effect of Various Foods and the Importance of Special Care. By T. F. McGrew.**

CONSIDERABLE necessary preparation must begin prior to the mating of the birds, the eggs from which, we hope, will produce exhibition stock of quality. Parent birds of inferior quality or in bad physical condition cannot produce stock that will have the quality or vigor that will allow of their advancement within the possibility of a winner in strong competition. Vigor plays so strong a part in proper conditioning of a high-class show specimen that an expert will seldom begin the preparation of a fowl that lacks it.

To come within the possibilities of a winner the specimen must be properly grown, from the egg to the finish; a backset of any kind will more than likely destroy all chance of winning. While many are hunting a cool, shady spot for comfort, during the heat of the sweltering days, the owners of the to-be-winners are looking after the comfort of their growing chicks, so as to be assured that *they* have plenty of food, water, shade and comfort at hand. Those who succeed continually are those who keep everlastingly after success. The cold weather fanciers are just about at the three-quarter pole when the winner comes in.

Such a vast multitude of our fanciers never see what would be called a high-class show specimen, and so very many lack the experience that might enable them to select those which might make winners, that the task is a difficult one when it is attempted to tell upon paper how to grow, select and finish for the show room. Almost any breeder can select the best from his flock, or he can go into the yard of his neighbor and select the best there; he may be able to decide as to the one that is the best which he has ever seen and at the same time not be able to say whether he has the quality to make a winner in the strongest competition.

Such ability is the first qualification demanded to assure success, the presence of which is so unusual that we must endeavor to show how it is possible to gain the highest quality that can be gained from the material at hand.

### SELECTING THE BEST.

Study well your flock and select ten or twelve of the very best you have; when selected, place these in some exhibition coops—which all must have for the purpose, if they seek success. Go over each with even more care than can be expected from the judge. Remember that the ones which look the best going about will not always prove to be the best show specimens. Give them your attention as often as possible for two or three days so as to be fully satisfied as to which are the best.

In this way select from three to five or more of your best and place them in small houses that have open runways; not more than five females in any one apartment; males separate if possible, and so located that they can see each other, for company's sake. Never keep males with females that you expect to exhibit. Have these runways and houses scrupulously clean, with several inches of sand on the floor, which should be covered with hay or straw, for smooth shanked birds to dig and scratch in, as it improves the color and finish of the shanks and feet.

If any of the birds selected have rough shanks they should be thoroughly cleaned at once. If combs and head belongings are lacerated, pay special attention to their care; if feathers are broken remove them in time for others to grow in their place; do not allow a single short-coming to escape your eye, for by so doing all chance of winning may be gone.

### TO REMEDY FAULTS.

If the comb or any part of the head or face have been injured dress it with glycerine; this is preferable because it can be easily washed off, if it gets on the feathers. Glycerine is always preferable when grease must be used about fowls, because it readily dissolves in water. Rough shanks and feet should be well soaked with kerosene twice a day for several days. Follow this with a good wash made of warm water and soap, and scrub them with a stiff brush. Wash as clean as possible, dry and anoint with glycerine twice a day for several days; wash again in the same way, and rub again with glycerine.

Fowls that have feathers on shanks and toes can be treated in the same way, and in addition to this remove all broken feathers from shanks and toes at least two months prior to exhibition time. Do not give them any hay or straw to dig in; feed in boxes or troughs, so they will not scratch or dig. Fine dry sand or sawdust is the best for the pen or coop where they are kept. Every care should be given to the growth of leg and toe feathering as called for on specimens that have same. Do not use vinegar or alcohol or anything but water on the comb, face, wattles or even lobes, to clean them during preparation. Both have a tendency to make these sections peal off in white scales when used. Both will add luster for a day, and may be used the morning of the day they are to be judged.

### HOW TO FEED PROPERLY.

Fowls in preparation should have plenty of exercise; grit, fresh clean water and green food; good solid grain of the very best quality and all varieties and kinds. They should be fed three times a day all they will clean up; they should never be overfed. Three times a week boil flax seed meal in enough water to make it about as thick as jelly; use this hot to mix their mash; put into the same mash a teaspoonful of red carbonate of iron to a dozen fowls. This will add luster to the plumage of all dark colored fowls, but should *not* be used on white or parti-white colored fowls, as it injures the color.

Sunflower seed is good for the plumage of all fowls; all grain, like oats or barley, should be fed without the husk; hulled oats or barley is best. The main object to be gained in preparation is good flesh, bright plumage and fine condition prior to the time when it becomes necessary to place them in coops or pens for finishing. To do this, the best of food only should be fed with care and judgment, and there should be no unusual work demanded of the digestive organs of the fowls; for this reason, no husks or dry clover should be fed.

### PEN TRAINING AND FEEDING.

For best results, all fowls intended for exhibition should be trained in coop manners. To gain this knowledge the fowls should be confined in a coop as near like those made use of at shows as possible. Many confine them in these coops for weeks with good results. This can be continued so long as the fowls continue to eat well and digest or grind up the food. Dry grain food is best for fowls in confinement; they must be induced to take plenty of grit, which can be mixed in the feed cup with the grain. Green food cut small, cooked meat cut into small pieces should both be fed at regular intervals and in regular quantities. Do not over-feed a fowl in confinement; neither need you be afraid of giving too much green food of good quality.

While in the pens teach them to stand in the most presentable position; teach them, as it were, to pose for a picture, every time any one comes to the pen. Gain every advantage possible in this way, for it has great influence, both with the judge and the general public. The specimen that can present its claim for superiority in this way has the greatest advantage over one that looks frightened every time any one comes to its coop.

### TROUBLE FROM FEEDING.

More trouble comes from irregular or careless feeding and watering of fowls in confinement than from confinement itself. The fowl that is permitted to become over-hungry will overfeed. If deprived of water till almost famished they will gorge. If either happens but little success will come with the specimen so treated. When confined in coops, clean, fresh water must always be within their reach. They must be fed at regular hours in sufficient quantity to fully satisfy. It is not so much what you feed as how you give the food to fowls so confined. Regular habits and cleanliness must be applied in their care.

Above all grain, wheat should be valued as food for fowls in confinement. Some corn should be given, also hulled oats. These three with sunflower seed would do for preparation if nothing else were fed but grit and green food. A full or stuffed crop gives no advantage; all they need is sufficient to supply the continuous demand of the gizzard for just enough to keep it busy. Plenty of grit and sufficient grain fully supplies this mill and keeps it at work. Too much food and an oversupply of water disturb the natural workings and cause trouble.

### FINISHING TOUCHES.

Foul feathers that disqualify are never found on specimens that win. Those who know of their presence and permit them to remain usually have the satisfaction of having the specimens disqualified; whether it is right or wrong to rid the plumage of all bad feathers that can be removed is not the question; the simple facts are, that if they are found the specimen is out of the race; if not there, no one can find them.

Shanks and feet must be thoroughly cleaned and free from any bad color. They can be polished with alcohol that has some wax dissolved in it; five drops of butter color in an ounce of sweet oil can be used to polish the shanks; some use iodine to stain the scales; all these can be used so no one can detect and prove their use. Or they can be so carelessly used as to soil the plumage or dye the shanks. A little alcohol on the finger or on a cloth will quickly detect the use of any of these if poorly done. It is often said that faking is wrong if the fakir is caught, but if not discovered, a winner; it is always by far the best to win on the side of honor. Let it always be borne in mind that others will win over you if they can.

Nothing brings equal brightness to the comb and head belongings as does a good clean wash with soap and water. Alcohol vinegar or any strong wash makes a bright appearance for a short time. Oil on the shanks looks well for a few hours, but a high polish gained by rubbing with a chamois or a cloth looks better and lasts longer. Nothing adds so much to the appearance of a fowl of any kind of color as a good, thorough washing well done. It improves the black fowl quite as much as it does the white. No one can know just how much dirt the plumage of a fowl contains until he has seen one properly washed.

All that is needed is a tub of warm water to wash the fowl in, another to rinse it in and another of cold water for a final plunge. Place the fowl in the tub of warm water, thoroughly wet the entire plumage, wash the shanks and feet with a stiff brush and soap (use Ivory soap). Then wash the head and neck by rubbing between the hands; then rub the entire plumage full of the soap and wash and rub with your hands and fingers so as to work the soap through the entire plumage. Success depends on the bird being washed perfectly clean and all the soap rinsed out. When this is accomplished dip the bird into the tub of cold water to close the pores. A little blue should be used in the rinse water for white fowls, the same as for white clothes.

When thoroughly washed and rinsed, stand the bird upon a table, work out all the water possible with a sponge, always rubbing the way the feathers lay. Follow this with a towel, rubbing the same way until all the water that can be dried out is gone. Then place the fowl in a coop in a very warm room or in front of a fire, but not so close to the fire as to cause blistering of the plumage or combs. Watch until dry or nearly so, when the fowl can be moved away from heated room into the light, where it can plume itself and web out its feathers. If nicely washed and dried the fowl will be greatly improved in appearance.

# The Pan-American Poultry Display

### A Wonderful Gathering of Beautiful Fowls. Meeting of the American Poultry Association. By our Special Representative, T. F. McGrew.

Since poultry became a fad nothing like the Pan-American display has been seen in the land. Within a dozen barns were penned 5,161 entries. Poultry, pigeons and pet stock gathered from twenty-five states, covering an area included within the lines of Minnesota, South Carolina, Maine and California, and from the extreme limit of each boundary came specimens that won honors at the hands of the judges. No one locality had a sweep. To Ohio went the honor of best Barred Plymouth Rock pullets, and to California went three of the awards on Brown Leghorns. The distribution of awards must forever sweep from sight and thought the notion that all good poultry roosts in any one locality.

The cooping of a show so scattered was a most difficult job, but Mr. Rackham of Spratts Patent proved himself to be the champion of all, and we feel that it should be conceded on all sides that he is the most competent man for superintendent of a poultry show in all the land. Superintendent Burgott did his work in a masterly manner, compared with his expenses, which, after all, is the main dependent at such times.

All kinds of stock were shown, a list of which we give for the benefit of our readers and for future reference:

| | | | |
|---|---|---|---|
| Plymouth Rocks | 361 | Dominiques | 10 |
| Javas | 24 | Cochins | 90 |
| Brahmas | 91 | Leghorns | 282 |
| Langshans | 32 | Minorcas | 51 |
| Anconas | 13 | Polish | 115 |
| Andalusian and Spanish | 35 | Red Caps | 14 |
| Hamburgs | 79 | English | 68 |
| French | 61 | Game Bantams | 166 |
| Games | 250 | A. O. V. Classes | 105 |
| Variety Bantams | 207 | Turkeys | 63 |
| Displays | 3 | Breeding Pens | 184 |
| Water Fowl | 199 | Pigeons | 1,845 |
| Sundries | 111 | | |
| Pet Stock | 383 | Total entry | 5,161 |
| Wyandottes | 319 | | |

In the item of sundries we include Guinea Fowl, Pea Fowl, Pheasants, Ornamental Ducks, Frizzles, Sultans and Orpingtons; also Rhode Island Reds. All this display was divided among the cattle barns; in addition to this was one building full of incubators and poultry supplies.

The Plymouth Rock classes were extraordinarily good for this time of year, the Barred variety leading in numbers and quality. All of the leading birds were unusually good, and we are inclined to think that if they were put in proper show condition the hen that won the second prize would be the best of the whole lot.

The Buff variety were not in as good feather as a whole as were the Barred. The Whites were shown in very good condition, and the number of breeding pens in these varieties so fine that unusual care was necessary in selecting the best from among them.

We presume that the Wyandotte classes as a whole were among the best shown for some time. The Silver Laced pullets, first and second, were by all odds the best that we have ever met with in any show up to the present time. The display of Goldens was not what it should have been. The White Wyandottes were very strong as to numbers, excellent as to quality, and the result of the judgment in placing the awards was kindly received by all of the exhibitors, proving the unusual ability of Mr. Smith at placing awards in this variety.

The shape, color and condition of the Buff Wyandottes were more than might have been looked for at this season of the year; and the winning hen was pronounced on all sides to be the VERY BEST ever shown. In fact, all of the winning hens, pullets and cockerels of this variety were very meritorious specimens.

The new varieties of Silver Pencilled Wyandottes and Partridge or Golden Pencilled Wyandottes were wonderful classes for such new varieties. The Silvers seemed to attract more attention than has been bestowed on any new variety for many years. The quality of the Partridge or Golden Pencilled was excellent; first and second cock birds beautiful specimens. The winner of second will be much better when in full plumage; his shape, color, comb and shanks very strong in standard quality. We feel that it is fully due to Beaver Hill Farm and to Mrs. L. R. Hodges that special mention be made of their display in this variety, the quality of which was very good; but the birds themselves were not in full feather, nor were they in as fine condition as were the winners of the higher prizes.

The quality of the Black and Buff Laced Wyandottes was very good.

The display of Javas and the American Dominiques was unusual both in quality and number, few of them having been shown in recent years.

The display of Asiaties, including the Black and White Langshans, was a surprise in many ways—some 215 shown. An unusually large number to be presented so early in the year. The quality of the Brahmas, Buff, Partridge and White Cochins was unusually good. The Langshans were not quite equal to the usual display made at the two eastern shows in the winter.

The display of Leghorns would be a credit to any winter show all along the line, including the Browns, Whites, Buffs, Blacks and Mottled Anconas. The number, quality and condition was very good—without question the very best Buffs yet shown were present. The winning cockerels and pullets showed a great advancement over last year's. The judge stated that some of the very best White Leghorn females that he had ever passed judgment upon were at this show. Among these the most meritorious were four in the breeding pen which won second place, losing the first position from the inferior quality of the male as compared with one in the first pen. The Black and White Minorcas were very good, the Whites unusually so. The competition was very keen indeed between the exhibitors from New York and Canada, honors being divided equally between them.

The Andalusians and Black Spanish were good classes and were quite a surprise to some who had never seen so large a display of these varieties.

Polish, Hamburgs, Red-caps, Houdans, Creve Coeurs, La Fleche and Dorkings outnumbered any like display of these

varieties made in several years. We do not believe that there has ever been so many of them shown outside of Boston at any point in this country. The size, finish and feather of the Houdans and Dorkings were more than might have been looked for at this season of the year.

The display of Favorelles, the new French breed, attracted much attention. They are very large in size, even in color and marking, and give promise of being the best table and egg producing fowl ever brought from France to this country. These fowls were considered as somewhat of a novelty, and they were penned near the Frizzles, Sultans, Silkies, Orpingtons and such like unusual and new breeds or varieties.

The Game classes came from a very wide extent of country, and the prizes were contended for fiercely by the exhibitors from the United States and Canada, all of whom had their birds in the finest fettle ready for the battle royal that was on for supremacy in these beautiful fowls. Morley of Canada, Brooks and Hoffman, and Blunck of New York, and Barber and Crowe of Canada, with Eugene Sites from Ohio, fought to the finish for the best places. Mr. Vance of Canada also took a hand in some of the varieties. Mr. Cornman, who judged the Game Bantams, gave general satisfaction in the placing of the awards, as did the Hon. Alex Pierce in the Standard Games. The Indian Game classes were passed upon by Mr. Thompson of Missouri, who had a difficult task in selecting from among the large number of good ones the best in each class. We doubt if a more difficult task has been before a judge in these classes up to the present time, and the general satisfaction given by this gentleman settled the fact, and he is to go to New York this winter to judge the same classes. The display of Malay and Sumatra Games was much larger than is usually seen at any of our shows.

GAME AND VARIETY BANTAMS.

The Black and Red Game Bantams are very strong classes. In all forty-five specimens were shown. The selecting of the winner from among so many was well done. Few, if any, of the experts could recommend any reasonable changes that might be made in the classes. The Brown Reds could not be called equal to either the Birchen or the Black Reds. Duckwings were unusually strong in number and quality, the winning pullet carrying off the prize for the best Game Bantam in the show, and the honor, we believe, was not disputed save by one exhibitor, who rather favored another specimen. The thirty Pyle Game Bantams shown were a good lot through and through in size, form and color; the young stock, especially the pullets, attracting unusual attention. An enthusiast said of the Birchens: "They are a wonderful lot, grand in color and beautiful in lacing." A. O. V. Game Bantam classes numbered twenty; among them the Whites stood out strong as to shape and color.

In the Variety Bantams, Sebrights, Rose Combs and Japanese ranked very high. The Buff Cochin Bantams were as fine a lot of forty-two as one might hope to see; but the gems of the Cochin Bantam classes were the winning cock, hen and cockerel, three birds that far excel in quality any Cochin Bantams that we have ever met with of any kind or color. The one fault that might be laid against any of the three was that the shanks of the hen were not quite as clear in buff color as they should be, but her wonderful shape, feather and color would win for her in any class that we have ever met with. The Black Cochin Bantams as a lot were rather oversized. The best cockerel in the display had a tendency to carry his tail a little to one side, which spoiled him for a fine appearance in the exhibition coop. Should he recover from this seeming coop habit he will make a wonderful specimen at later shows. Light Brahma Bantams, Polish Bantams and Booted Bantams were all good classes and were fairly represented as to numbers.

TURKEYS, DUCKS AND GEESE.

These outnumbered any like display. The quality of the Aylesbury, the Rouens, as well as the Cayugas was unusual for an American show. We presume that some of the best that were ever raised in England were among these classes.

The 184 breeding pens occupied one of the barns in which the birds were shown. No one building in the whole poultry display attracted more attention than did this building. If one could have gone amongst this fine lot of fowls and have made his own selection from among those gathered there he might feel assured of winning almost anywhere the coming winter.

The display of Pigeons, especially in some of the finer breeds, was a wonderful sight. It is seldom that one has the opportunity of viewing nearly two thousand at one time as were shown here. Superintendent Twombly is an expert at gathering together and caring for a Pigeon display. The pet stock department was favored with the presence of some of the best Belgian Hares, Flemish Giants and Lop-Eared Rabbits ever shown. Very nearly every kind of Cavies, Rabbits, Cage Birds and Cats were included in this display.

Another building was set apart for incubators, brooders, poultry supplies and all manner of poultry appliances. Here the many thousands who visited the grounds could examine at their leisure and select at their pleasure such manner of machines or supplies as best suited their purpose.

## Meeting of American Poultry Association

Friday evening the members of the American Poultry Association met in the hall of the New York State building. The largest membership yet gathered came together here. For some unknown reason roll call was omitted and the number present was not announced. Mr. Chat Howell took a list of all members present, so that a record of the same could be kept. Soon after convening, the Association took a recess to permit of a meeting of the Executive Committee for the election of members and other business.

After presenting the applications for new members Mr. Bridge resigned his position on account of ill health and Mr. T. E. Orr, of Pittsburg, was elected to fill the vacancy, he to enter upon the duties of the office as soon as the transfer can be made.

After the committee had finished its work the meeting was called to order and regular business resumed. The financial report showed about $1,700 on hand, but when all the obligations in sight are paid there will not be much over $1,200 left. Another year of unguarded expenditure would about land the treasury in bankruptcy. It is not best to form too many committees and to agree to pay their expenses, for by so doing the candle burns fast at both ends.

The Wooden resolution carried with it the forming of a committee of seven, whose expenses were to be paid. This was changed to a committee of five, including the President and Secretary, and the only expenses to be paid by the Association were for postage and paper to be used in correspondence. The committee appointed to devise means for a better revising of the standard reported no progress. This was thought to be a poor result from so important a committee, that might have reported to this large meeting rather than to the few that must of necessity come to Charleston, where more than likely only one or two of the committee will go, as their appointment does not cover any expense accounts.

A donation of one hundred dollars was voted the retiring Secretary, who will turn over the business of the Association to the new Secretary and Treasurer as soon as possible. After some few remarks on several subjects, new business was taken up. The Association was asked to admit the Silver Pencilled Wyandottes to the Standard, which they declined to do, and the application was placed on file to be acted upon at the Charleston meeting.

President Kimmey stated that he had given some thought to the matter of an illustrated Standard and drew attention to the many advantages of such a book. He estimated the cost at about $15,000 and gave it as his opinion that 5,000 breeders would purchase a copy the first year, paying $5 per copy for it. A committee consisting of F. L. Sewell, T. F. McGrew and Theo. Hewes was appointed to investigate the matter.

Truly the remarks of Mr. Frank B. White were fitting to the occasion when he said that we were not living in the nineteenth century. Presumably because the slow ways of days gone by would not meet the wants of the present. One need but take a glance at the present condition of cash on hand to fully realize that the pace is pretty hot, even for the quick moving present.

If the Wooden amendment is properly handled as it now stands good results may come of it, but little good can come from any movement that is burdened with cumbersome committees. There is another feature that has come strongly to the front in the past few years and that is the inclination of a few to attempt the control and to dictate the working of the Association, and unless broader lines are followed there may be another and stronger Association.

One of the pleasing features of the week was the presentation of a gold watch, chain and charm to Superintendent Burgott by Mr. Crawford, from the breeders present, all of whom had most willingly subscribed to its purchase. William McNeil of Canada spoke in his usual witty way for his countrymen, Mr. Harrington speaking for Mr. Burgott. Followed as this was by the announcement that the money for the judges was ready for them at the office, caused all to join in loudest applause at the good treatment received. If it might be possible for these large gatherings to come together oftener great good might be done.

Complete awards will be found elsewhere in this number.

---

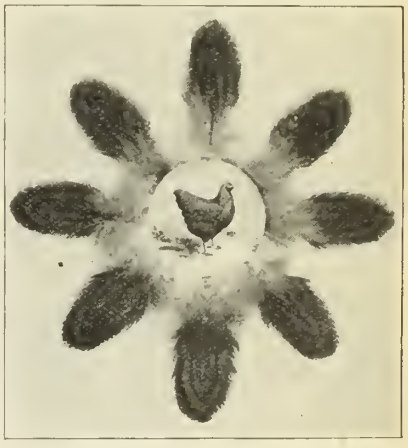
There is nothing saved in buying cheap grain. It requires more of it to produce results.

# Proposed Changes in the Constitution of The American Poultry Association.

**Motives Prompting them and a Statement of what they are Expected to Accomplish. By Frank Heck, Editor American Poultry Journal.**

The time has arrived when the American Poultry Association can no longer disregard the criticisms of its policy of inaction, which are so freely voiced by both members and non-members. During the past twelve months its shortcomings have been so prominently forced to the attention of poultrymen as to cause widespread comment. The searchlight of public inspection has been turned upon it and has revealed a state of affairs that is wholly inexcusable and is anything but a credit to those of us who are responsible for it and who, as legislators, have it within our power to at least make an effort to remedy existing evils. It is to be regretted that in certain quarters there exists a well-defined policy to discourage any reform movement. The guiding spirit is born of a selfish desire to be the whole thing or prevent anyone else from receiving consideration. In other words, nothing is good that does not originate with us, and if you won't play our way we won't play at all. It is a wise man who knows the limit of his strength and influence and many a good man has gone wrong because of his inability to correctly determine his true position. It would be the better plan for this opposition to join in putting into effect an unquestionably advantageous reform rather than hold to ideas that are so clearly out of harmony with actual conditions as to plainly demonstrate the weakness of their position. There is also an element in the American Poultry Association similar to that found in all organizations. It is the one that will not listen to progressive ideas and the adaptation of one's business methods to conform to the demands of the times. To them the old rut is good enough and they do things because their fathers before them did likewise. The list of failures and nonentities in all walks of life is made up largely of just such people. The American Poultry Association in its present lethargic state is only tolerated by poultrymen because they have nothing else to depend upon. There must be a Standard or an apology for one, and this is the only hold which the association has. Even this is growing weaker, as is evidenced by the fact that various specialty clubs have set up ideals of their breeds and their pictorial interpretation of the Standard is acknowledged by breeders to be the model of a perfect specimen. A picture of any breed, to be ideal, should be approved of by the American Poultry Association, as much so as should the written description. Local poultry associations and judges all over the country ignore its recommendations and rules and openly defy it in this respect. For the benefit of those who are not aware of this fact we will mention two instances, namely, the rule requiring solid colored birds and birds without weight clauses to be handicapped 1½ points in competition with other varieties and the rule instructing judges and associations to require birds to score specified amounts before they may be awarded first or second prizes. Other instances could be mentioned, but these are sufficient to illustrate the point. No well informed poultryman can conscientiously claim that the American Poultry Association is other than a mere figurehead as it exists at present. No one is to blame, except the association itself. It compels poultrymen to take the law into their own hands and voluntarily lapses into a condition that is slowly but surely suicidal in its outcome. There are a few well meaning but misguided friends who resent all attacks made upon the association, but their defense is necessarily weak and is detrimental rather than beneficial. "The good old association" and other sentimental expressions will not excite the proper sort of sympathy, and denouncing those outside of the organization for not joining it and suggesting plans to increase its efficiency is poor policy. We who are in it are the ones to cure its ills, and certainly we make ourselves ridiculous in the eyes of all intelligent people when we use such methods of condemning those whose assistance we need and should have. We should make some effort to place the association where it belongs and to harmonize internal dissensions before expecting support from the outside. It cannot be denied that these deplorable features exist. A prominent Western editor and member also takes occasion to criticise the association and the Standard at each meeting. Mr. T. F. McGrew, who is as representative an Eastern member as we have, states in this number of A. P. J. that unless certain changes take place there is a possibility of a rival and a stronger association being organized. At the late Buffalo meeting the secretary-elect actually refused to serve unless he was given some assurance that the association would wake up and do something. Think of it! A position that should be a most coveted honor is not wanted and the association must beg a recipient to accept it. We presume that all members present at that meeting, which was the largest in the history of the association, were of the same mind as Mr. Orr, for not one resented what was the most humiliating blow any organization could receive. But what is the use to further dwell upon its shortcomings? The writer is numbered among those who are accused of

We present herewith an illustration of a group of Partridge Wyandotte feathers from birds of this variety bred by W. A. Doolittle, Sabetha, Kas., and E. O. Thiem, Denison, Ia. These gentlemen are among the originators of the variety and are aiding each other in still further perfecting their respective flocks. They have obtained a degree of excellence which might well be envied by breeders of some of our older varieties.



This half tone illustration is of the first prize Partridge Wyandotte pullet at Chicago last season and shows by the feathers taken from her, the most excellent markings of plumage. She was bred and is owned by W. A. Doolittle, Sabetha, Kas.

revealing the defects and not suggesting a remedy. The ills are so numerous and of such serious character that many changes must be introduced and they must be given a reasonable time to become effective. As an evidence of good faith we have concluded to suggest a few which, in our opinion, would form the foundation for a widespread beneficial movement. One of the first and most imperative needs of the association is the co-operation of a sufficiently large proportion of the fraternity to enable it to command the respect and support of the poultry press, local associations, specialty clubs and other agencies that are interested in promoting the expansion of the business. Such representation is, for several reasons, one of the essential elements of success, not the least of which is that it would afford breeders an opportunity of legislating in their own behalf. Under present conditions a dozen men, and sometimes less, constitute the lawmaking power for thousands who have had no voice in their selection. This is un-American and unjust and will never be popular. It has been demonstrated that this and other methods are grotesquely inadequate to the demands of the times and that radical changes must be made if the association is to occupy its rightful place in the poultry world. The writer has no desire to pose as a reformer, but we believe, with others, that the time is ripe for action and we have offered the following for the consideration of the members of the American Poultry Association at the next regular meeting:

MR. H. A. BRIDGE, Secretary American Poultry Association:

DEAR SIR—I believe that it is clearly evident to all thoughtful members of the American Poultry Association that the organization is not to the fullest extent representative of the fraternity. This is particularly noticeable when we consider the almost insignificant number of poultrymen who are members of it, as compared with the thousands who are not affiliated with it. This condition of affairs tends to curtail the usefulness of the association and greatly hinders it in building up and fostering the poultry industry and promoting the interests of those who are engaged in rearing standard bred fowls. We believe that in order for the American Poultry Association to fulfill its mission it should have as members a creditable number of those people engaged in poultry raising, and that measures of some kind should be immediately adopted which will bring about the desired result. At present the association needs the support of those outside of it more than do those out of it need membership in the association, and conditions should be just the reverse. We believe that the association should be held in such esteem and should be of such service to poultrymen as a whole that every breeder would realize that it was to his interest, socially and financially, to join the organization. The experience of the association since it was organized nineteen years ago shows conclusively that this support can never be obtained with the methods that have been and are being employed. One of the changes which we believe should be made and which would be a step toward accomplishing the above mentioned beneficial result is in the present membership fee of ten dollars, which amount is considered by poultrymen generally to be exorbitant and wholly unreasonable. The rank and file of poultrymen cannot, will not and should not be expected to pay a fee of this kind.

Believing, therefore, that for the best interests of all concerned, and in accordance with and as provided for by Article Seven (7) of the Constitution of the American Poultry Association, I beg to respectfully submit herewith the following proposed changes in the constitution of the said association, these to be acted upon at the regular annual meeting of the association, to be held at Charleston, South Carolina, during the month of January, 1902.

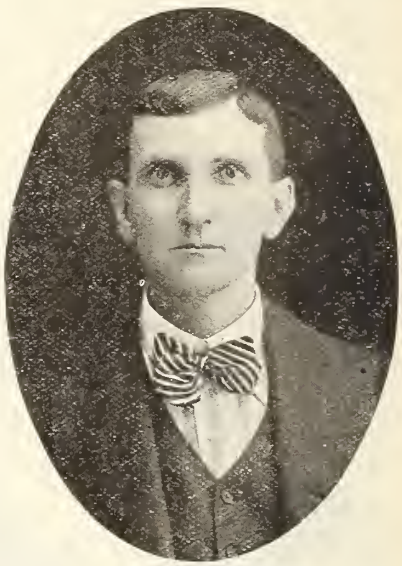
First—That Section One (1) of Article Three (3) be amended and changed to read as follows: The individual membership fee of this association shall be $3, and at or before each annual meeting after date of membership each individual member shall pay to the secretary-treasurer one dollar ($1) annual dues. Failure upon the part of any member to pay said dues any year not later than the time of the annual meeting shall operate as a suspension of membership. The secretary-treasurer shall notify a member upon his failure to pay the dues, and the deliuquent member shall not be entitled to cast a vote or enjoy any other privileges of the association. The secretary-treasurer shall each year notify all members of the time when the dues must be paid, and such notice shall be given at least thirty (30) days prior to the time of holding the annual meeting. A suspended member may be reinstated upon payment of all fees due the association and by receiving a majority vote of the members of the Executive Committee present at any meetiug. If any member shall fail for two (2) consecutive years to pay the annual dues the Executive Committee shall have the power, by majority vote of the members present at any meeting, to declare the membership forfeited and to authorize the secretary-treasurer to drop the name of the delinquent member from the membership list. Members who, prior to the adoption of this amendment, have paid the life membership fee of $10 shall not be required at any time to pay annual dues or other fees.

Second—That Article Two (2) of Section Three (3) be amended and changed to read as follows: Local organizations, the objects of which are to further the interests of standard bred poultry, shall be entitled to membership and accepted as members upon payment of a life membership fee of ten dollars ($10) and by receiving a majority vote of the members of the Executive Committee present at any meeting. This will entitle the organization to membership as a whole. It may be represented at the meetings of this association by a regularly appointed or elected delegate, who may vote and act in other capacities as though he were an individual member. All organizations thus admitted to membership shall be governed by the constitution and by-laws, and shall be assisted in every consistent way by this association in making their organization and their exhibitions successful. No membership in this association is transferable.

Any organization which may become a member of this association and which may disband or cease to exist will be dropped from membership. If it be reorganized it may again be accepted to membership by complying with the rules goveruing the admission of local organizations. Any organization which for two (2) consecutive years shall fail to hold a public exhibition of standard bred poultry shall by such failure forfeit its membership in this association.

Organizations devoted to the interests of any one breed of fowls, and which are commonly termed "specialty clubs," shall be entitled to membership in this association upon the payment of a life membership fee of ten dollars ($10) and by receiving a majority vote of the members of the Executive Committee present at any meeting. This will entitle the organization to membership as a whole, and it may be represented at the meetings of this association by a regularly appointed or elected delegate, who may vote and act in other capacities as though he were an individual member. All organizations thus admitted to membership shall be governed by the constitution and by-laws of this association, and they shall be given its hearty co-operation in promoting their welfare. No organizations which may be received

E. O. THIEM, DENISON, IA.
Breeder of Partridge Wyandottes.



W. A. DOOLITTLE, SABETHA, KAN.
Breeder of Partridge Wyandottes.

as members in this association shall at any time be required to pay annual dues or other fees other than the original life membership fee of ten dollars ($10).

Third—That Section One (1) of Article Six (6) be amended and changed to read as follows: Membership fees must be paid at or prior to the time when application for membership is acted upon by the association. Failure to comply with this rule will make an election void. If any application be rejected by the Executive Committee the fee shall be returned to the applicant. The Executive Committee, by a majority vote of all the members, either by mail or in open meeting, may for cause expel from or restore to membership any member of the association.

Respectfully submitted,

FRANK HECK.

Chicago, Ill., November 1, 1901.

# BUFF PLYMOUTH ROCKS.

**By Dr. O. P. Bennett, Mazon, Ill., President American Buff Plymouth Rock Club.**

IT IS the purpose of the writer to discuss the Buff Plymouth Rocks in a series of articles, which will appear from time to time in the AMERICAN POULTRY JOURNAL, taking up their name, origin, general characteristics, shape, defects and disqualifications, also giving his idea of color and matings.

NAME.

That this variety was fortunate in securing a popular name is evident to us all. The word Plymouth Rock is magical in itself, but when prefixed by the word buff it is all the more so, for it immediately brings to our mind a fowl with all the good qualities of the Plymouth Rock variety, with the beautiful buff color.

It really makes no difference whether any Plymouth Rock blood was used in their make up or not, so long as they have the general characteristics of that variety they are certainly entitled to the name.

That they have all of the good qualities of *any* or *all* of the Plymouth Rock family is evident to those who are at all familiar with them. In fact, in many ways I consider them superior, and in no way are they inferior.

The buff color has always been and always will be one of the most popular in the show room, on account of its brilliancy and beauty. From the combination, then, one can easily see why in the Buff Plymouth Rock we have such a very popular variety.

If any other reason were needed we could state that they are distinctly an American production, and to raise prize winning specimens requires enough thought and study to hold the most exacting fancier captive.

ORIGIN.

In 1888, Mr. J. D. Wilson, of Worcester, N. Y., learning of the popularity of the Buff Leghorns in England, conceived the idea of a Buff Plymouth Rock fowl.

In the yard of a relative he found a male, the result of a Buff Cochin-Light Brahma cross, which Mr. Wilson writes had good Rock shape and was of an even, golden buff color except tail, which was nearly black. He had clean yellow legs, a small comb and weighed twelve pounds.

From the same yard he selected two hens having even surface color and with as litle feathering on the legs as he could find. This trio was the foundation of the Wilson strain of Buff Plymouth Rocks, and from them and their chicks, carefully selected and mated, were produced the World's Fair and Madison Square Garden winners, shown by Mr. Wilson.

In 1889 Mr. R. G. Buffington, of Fall River, Mass., while visiting in the southern part of the state, looking over flocks of Rhode Island Reds for material to help perfect the Buff Wyandottes which he had been working on for several years, found some Reds with single combs, but with good buff color excepting black in tails and hackles. The males were of a reddish color.

Dr. Aldrich, a friend of his, suggested that they breed them with single combs and call them Golden Buffs. It occurred to Mr. Buffington that to call them Buff Plymouth Rocks would make them more popular with poultry fanciers. To test the matter, he exhibited several specimens at the Rhode Island Poultry Show, held early that winter, and called them Buff Plymouth Rocks, while Dr. Aldrich showed some of the same stock of equal merit as Golden Buffs.

The result was, Mr. Buffington writes, that everybody looked at and talked about the new variety of Plymouth Rocks, while the Golden Buffs were hardly noticed.

This settled the name and from that on they were called Buff Plymouth Rocks.

From these Reds were originated the Fall River strain of Buff Plymouth Rocks, specimens of which received considerable attention at the Philadelphia and New York shows as early as 1893.

Experiments were made by others to build up strains on different lines, but were abandoned.

Great credit must and should be given Messrs. Buffington and Wilson for their work in originating this variety, as well as others who have done much to develop it later on.

Perhaps no one person has done more to perfect them and make them popular than the late Mr. H. S. Burdick, of Rome, N. Y. It was my pleasure to have known him intimately for a number of years and, in my opinion, no truer friend or more thorough fancier ever lived.

Benedict, Denny, Hamm, Shepherd, Foster, Essex and others have also done much for their development and popularity.

GENERAL CHARACTERISTICS.

As a general purpose fowl none can excel the Buff Plymouth Rock. They possess all of the requirements of a good market fowl, having clean yellow legs and skin, a plump carcass, with no ill-looking black or white pin-feathers. Their meat is rich, tender and juicy.

From the egg to the adult fowl they are healthy, vigorous and always ready for market, whether as broilers, spring fries or roasters. They are extremely hardy, good foragers and in size are as large if not larger than any other general purpose breed. Having a kind and loving disposition, they enjoy being petted and handled. They make good mothers and are always contented, whether roaming the fields or in confinement.

As egg producers they are superior to any of the larger varieties and with proper care will equal the smaller and non-setters. I have raised Barred and White Rocks, Black Langshans, Light Brahmas and Leghorns and the Buff Rocks in my hands beat them all.

They are good winter layers and their eggs, being large, smooth and brown, find ready sales at top prices.

SHAPE.

The shape of the Buff Plymouth Rock is the same as of the White or Barred variety. It would seem that the description of it given in The Standard was as plain and complete as words could express, still judges and breeders interpret it differently. They agree sufficiently, however, to distinguish the Rock shape from the compact Wyandotte or rangy Brahma.

Personally I prefer a bird with good length of body, well-rounded breast with legs of medium length.

If you are unable to form a correct idea from the Standard look over the various illustrations of the Plymouth Rocks in the poultry journals, nearly all of which have characteristic shape, or, better yet, get cuts of the ideal Plymouth Rock, male and female, adopted by the American Plymouth Rock club.

While it has been more difficult to bring the Buff Plymouth Rock to the true Rock shape on account of the various breeds used in its make-up, years of careful selection and breeding have brought success, and now, in competition with the Barred and Whites, they have been awarded specials for most typical shaped Plymouth Rock in the show.

At this time I do not believe a fancier is justified in using any specimen as a breeder, no matter how good in other respects, unless it be of fairly characteristic Rock shape.

It has been well said that "the shape makes the breed, while color is simply the emblem of the variety."

In the score of points as given by the Standard for the American class shape is given about 60 points, while color is allowed only 40. From this one can easily see that the shape should be of more importance than color.

BUFF ROCKS.

In the Buff Plymouth Rock of today we find a much different fowl than at the time they were first offered to the public, also than at the time they were admitted to the Standard in 1893. At that time shape and size varied greatly, some being of a short, chunky, compact type, which were about 1½ lbs. under weight, while others were long, gaunt and drawn out and were nearly as much over weight. Today this is vastly different of the Plymouth Rock type; we find the greater majority up to the weight the Standard calls for. This insures quick growth, as it is a recognized fact that no variety or breed of fowl will average as great an equal weight at a given age, whether it be the broiler, roaster, or matured fowl, as will the Plymouth Rock.

The Buff Rock Club catalogue contains many interesting and valuable articles relating to them and will be sent to any address by the secretary of the club, W. C. Denny, Rochester, N. Y.

# Advice From Prominent Judges.

**Timely Hints of Interest to Breeders, Exhibitors, Spectators and Show Managers. Opinions by J. H. Drevenstedt, Thos. F. Rigg, G. D. Holden, I. K. Felch, D. J. Lambert and D. T. Heimlich**

## DREVENSTEDT'S IDEAS.

Briefly speaking, my opinion regarding the judging and conducting of shows is as follows:

1st. Uniform coops and only one hird in a coop.

2nd. Perfect classification, i. e., cocks together, cockerels together; no scattering of hirds of one class or variety all over the show room.

3rd. Judging hy qualified men in each class the first day of the show. All judging to he finished hefore visitors or exhibitors are allowed in the huilding.

4th. A catalogue of all entries or at least cards or signs over the coops designating the varieties penned.

5th. No handling of hirds by other than judges or owners.

6th. Good light, good air, and good humor on the part of every one.

7th. Judges to stay after awards are up and important information given to those who seek it.

8th. Pay all prizes as soon as clerks can foot up the winnings.

9th. Thank the management for doing a lot of hard work for the henefit of exhihitors without compensation to themselves. *J. H. Drevenstedt.*

*Johnstown, N. Y.*

## RELATION OF EXHIBITOR AND JUDGE.

In the history of any show seasou it is no douht a fact that scarcely a show is held that does not number among its exhihitors one or more who are dissatisfied with the placing of the awards. Among such exhihitors are those who seem to find solace in the making of disparaging remarks concerning the judge, as to his honesty, ability, etc. That such remarks are in had taste and generally uncalled for hrings up the question of the relations of exhibitor and judge and what each has a right to expect of the other.

An exhibitor has a right to expect that a judge shall be careful in his work, both conscientious and honest, judging the birds on their merits, "regardless of ownership"; that he shall be courteous in his treatment of such exhihitors as may come to him regarding matters pertaining to the judging of their hirds; that he shall he a gentleman in language and deportment, and not reflect discredit upon the associations that may engage him.

All premium lists sent out by our different associations contain information as to who will he the judges, and every exhihitor virtually agrees to ahide by the decisions of such judges when he makes his entries, and a judge has a right to expect that his awards will be respected, when made in good faith and according to his hest judgment. But in case they are not, and some exhibitor is dissatisfied, the judge has a right to expect that such exhibitor will come to him and presen t his case in a friendly and gentlemanly manner, when in nine cases out of ten it will be satisfactorily explained. It should he the aim of every judge to place the awards where they belong, and the spirit of every exhihitor to wish to see the awards so placed. Let a spirit of fairness control the actions of hoth judge and exhihitor and hut little trouhle will he met with in the show room.

In the successful management of a show certain things must he considered. The officers must he well qualified for their different positions. A well lighted room in a good locality should be secured. The exhibition coops should be uniform and attractive. The exhibit should he well arranged and tasteful, and the birds given good care. Introduce as many attractive features as possihle to draw the puhlic. Advertise the show well. Get up the awards promptly and pay premiums and other hills promptly. Arrange for the comfort of out of town exhihitors. Consider every detail of the show in a husiness-like way. Give due attention to the social features of the show, as it is one of its strongest. Let every department he so conducted that each exhihitor will he pleased with the show and anxious to come again. Treat everyhody right. *G. D. Holden.*

WHITE WYANDOTTES.

A trio of winners at Chicago and the Ohio State Show, scoring from 95 to 96. Bred and owned by Ira C. Keller, Prospect, O.

## THE EXHIBITION OF STOCK HAS A TRIUNE RESPONSIBILITY.

The exhihitor's duty and self-interest surely is in presenting for the prizes none but really first-class specimens—in first-class condition; clean and properly cooped.

The exhibition management, if they furnish coops, are in duty hound to furnish those that are suitable and large enough that the specimens can stand in a perfectly upright and in a normal poise, for, unless these conditions are honestly furnished, the hest specimen may fail to win.

Tap a specimen on his head, or put him in a coop where his head hits the top, and tell me, is he the same to the appearance as when in the yard? Then who is to blame, if he fails to win?

Unless hirds are shown clear and in coops high and long enough, so they can be filled in the hottom, so the specimen's hody is in the center of the coop, and then room enough so he can stand free and clear all around, the exhihitor has no right to censure a judge's decision in the awards, hecause the coop prevents the judge from heing able to force the specimen into such a condition.

The judge should handle every specimen for color and hold the specimen to the demands of the Standard in weight, shape and color. Either is of as much importance as the other. The judge should have no fad. The Standard is his law. When he hreaks the law, then only is he open to protest. The just judge has no friends to protect. If exhihitors were Standard readers there would be less censure heard. But a selfish man is never satisfied unless he is partially favored. Exhibitors who are continually comparing the excellent points of their exhihit with the defects of their competitors' exhibit will never he satisfied until the judge does the same thing.

The fact is, we judge the specimens under strange and unfavorahle conditions. There is not one judge in twenty-five that dares pass a coop and refuse to adjudicate hecause the specimens are grossly cooped. But when every judge takes this stand and refuses such, then will the nuisance stop. This applies more to our fall shows, I am aware, hut it is not wholly eliminated from our winter shows. I have seen comhination coops eighteen inches high have Brahmas, Cochins, Plymouth Rocks and Bantams in them.

Tell me, when a society says specimens unfavorahly cooped will be rejected, then will they cut off half of all the fault found at our exhibitions? Coops for Brahmas should he thirty-three inches high, Cochins and Plymouth Rocks thirty, but all should be thirty inches long.

Specimens with large and flowing tails, like Dorkings and Hamburgs, thirty inches in length and not less than twenty-six inches in height. When exhibitors demand these things or furnish them themselves, and when exhibitions are so arranged that each and every specimen can be judged under the selfsame light, and that with the sun to the judge's back, then will there be no fault, except that which comes from the selfish chronic kicker, which, like a barking dog, has no bite, and generally does himself the most harm. *I. K. Felch.*

## LAMBERT'S VIEWS.

I do not think that I have any complaints to make regarding exhibitors whose birds I am called upon to score and judge at the shows. The exhibitors complain sometimes because I do not score their birds higher, but these are mostly beginners who have not learned what defects are and are looking only for merits. I ofttimes think that a score card, giving credit for excellencies, instead of cutting for defects, would give better satisfaction and be more easily understood.

One of the greatest mistakes in conducting poultry shows is to formulate a set of rules and then make exceptions to many of them. The rule relative to closing entries is most often ignored, and entries will come straggling in several days after the advertised date of closing and the secretary's work is delayed in consequence. I would fix a date of closing as near the opening of the show as possible to allow the secretary and assistants to make proper entries on the books and make out the coop cards, etc. All entries received after the closing date or bearing a later postmark should be for exhibition only. Entry cards suitable for filling out before the show, with blank spaces for attaching the prize or award if any after the birds are judged, will hasten these matters in either a score card or comparison show.

The only best way to coop a show is singly, each bird by itself, each sex and class together. This showing a number of birds, sometimes the majority of the young males in one coop, as is frequently done in the west and south, should be discouraged, and while we as judges are not looking for the finest coops, it pays to show nice birds in nice shape, and they surely do not remain in nice shape long when crowded into small quarters with other, perhaps inferior, birds whacking them around at every opportunity. When the sexes and classes, cocks, hens, cockerels and pullets are shown separate, a judge can soon go through one class and make the awards, perhaps within two or three hours after the opening of the show, while, where there are three or four hundred of one variety, with the different sexes sandwiched in as they arrive, it requires nearly two days before the awards on that variety can be decided, if birds are scored.

If we will make all the entries single birds, shown singly, we can let the average score of the four best females added to score of best male comprise the breeding pens, if exhibitor has paid the additional entry fee required for pen. Where one has to select their own pens the exhibitor showing the best five birds does not always win unless he is fortunate enough to know just where to put them. I fail to see why there is not as great an inducement to show large numbers under this rule as any other. The exhibitor showing the best five birds ought surely get credit for them. If we want a large number of entries, we can get them by offering specials for largest entries in the most popular classes.

At one show where I officiated as judge last season, breeding pens were shown all together and quite a number of them. They competed for none other than the pen prizes. Some of these pens contained disqualified birds; this of course disqualified the whole pen in every instance. The judges were instructed by the management not to score the remaining birds in a disqualified pen, so that an exhibitor showing a pen of Barred Rocks containing a bird with enamel in lobe or the smallest feather on shanks or feet had nothing to show for his trouble and entry money but a score card with "disqualified" written across it. This one fact alone caused more growling among the exhibitors than all else connected with the show. Had the balance of such pens been scored they would have been satisfied.

There are some exhibitors who are loyal to a judge so long as their birds win most of the prizes, but when some other fellow's birds get the cream they will claim to "have never seen such scoring or judging before in all my experience." A few years ago a friend of mine (all of the exhibitors are my friends before the awards go up) said in my hearing, the first day of the show, "Anything that Dan does is all right." It so happened that he was showing a nicely colored bird with a seemingly plucked tail, and only about one-fourth grown out again. Of course I had to cut this specimen severely for shape of tail, which caused him to lose the place the owner had designed for him. The remaining days of the show this friend would turn up his nose every time that I looked at him, and continued to do so, as far as I know, until the bird, which, by the way, I afterward learned, he had owned but a few days, turned his tail up over his back like a squirrel and silently stole into oblivion, then all the ill feeling that the man had against me went out of sight with the bird. Yours fraternally, *D. J. Lambert.*

## MR. RIGG'S VIEWS.

"What an exhibitor has a right to expect from a judge, and the judge reasonably expect from the exhibitor?"

The exhibitor has the right to expect that the judge thoroughly understands his business; that he be absolutely honest; that he is a temperate man and seeks to store his head with facts regarding poultry instead of his stomach with the product that has made Kentucky famous.

The judge has the right to expect that the exhibitor will accord him honesty of motive. No judge can reasonably complain of gentlemanly criticism on part of an exhibitor. This thing of judging poultry, of subtracting from a perfect specimen, and naming the difference in cold figures is, after all, only a question of judgment.

We will always have the knockers with us—the mean, contemptible fellows who question not only the judgment but the honesty of the judge. They are the men who are never true to the judge, the association or to principle.

What we need more than anything else in the conduct of American poultry shows is a great deal more discipline—discipline of exhibitor and judge. The truth of the matter is that our shows are conducted most carelessly, and the wonder is that out of them comes the good we now derive. Let me suggest some reforms which I believe are absolutely necessary:

Each and every bird should be cooped in a single coop.

Each and every specimen should be banded with a sealed band. This leg-band number should be the record of winning, and so reported by the judge and recorded by the secretary. Under the present system in comparison shows coop number constitutes the record. What is to hinder the changing of coop specimens. We all remember this was done at an exhibition held in a western city recently and that the reputation of two fanciers was ruined.

The judging should be done the day before the show room is opened to the public. While judging is being done no one other than the judges and their assistants should be allowed in the room. The ribbons should all be posted before the doors are thrown open to the public. This would remove all trouble of embarrassment for the judges, give them an opportunity for better work and save time. It would give the winning exhibitor the benefit of a week's advertising—a thing to which they are entitled. *Thos. F. Rigg.*

*Iowa Falls, Iowa.*

## POULTRY INSTRUCTION.

J. A. Tillinghast, of the agricultural department of the Rhode Island College of Agriculture and Mechanical Arts, Kingston, R. I., sends us a circular giving a brief outline of the course in poultry keeping to be given at the college during the coming winter. This course is designed to give instruction in the art and science underlying successful poultry keeping, also the latest and best in practical management as given by the most successful specialists in the various lines of work. The students are thus enabled to gain a large amount of practical knowledge as well as theory, for they come in direct personal contact with men ranking high in the poultry fraternity. The course embraces work on the following subjects:

Zoology, anatomy, physiology and embryology, sufficient for a foundation for the course.

Fowls, origin, kinds and breeds; principles of breeding, mating, care and management.

Special breeding of water fowl, turkeys, etc.

Incubation and brooding, natural and artificial (actual practice).

Foods, chemistry of, feeding.

Egg and flesh production.

Caponizing, fattening, killing, dressing and marketing.

Diseases, prevention and cure.

Poultry plants, location, drainage, buildings, planning and drawing plans, specifications, estimates and construction.

Ventilation and heating.

Records and accounts.

Bees as a side issue with poultry.

Crops raised in conjunction with, also for, poultry.

Application for enrollment should be made at once, as the number must necessarily be limited. Address J. A. Tillinghast, Kingston, R. I.

# WOMEN'S DEPARTMENT.

This department, while of interest to all breeders, will be conducted with a view to making it especially interesting to the women, who, if the truth were known, are responsible for the success of many a husband. The matter herein will be edited by Mrs. Myra V. Norys and will consist largely of instruction and advice in response to requests from readers. The sympathetic feeling of the gentler sex for each other should make this department of more than passing interest to our lady readers, and the demonstrated ability and wide reputation of Mrs. Norys makes it all that could be expected as regards the practical value of the information contained therein. Every line of thought and work in which women may be supposed to be especially interested will find space for discussion here, and all who desire to ask questions, no matter how elementary, or wish advice upon what to do to overcome the difficulties peculiar to their case, are urged to make use of this department. Address all letters to Mrs. Myra V. Norys, Ridgewood, N. J.—[EDITOR.

### A PRIMER TALK ON FEEDING.

Manifestly it is not the best business policy to bring forward one's best and strongest ideas first. If I can be said to have a hobby, I think it is the subject of feeding, from the woman's standpoint of interest in it. And so convinced am I of its essential value that I shall discuss it now, even at the risk of presenting "the best first." I do not mean that more people fail with chicks in the feeding than at any other point; far from it. But I do mean that no woman ought to dare to try to be cook, poulterer or fancier without making a most earnest effort from the very first to understand feeding in its elementary principles.

But feeding is such a broad subject, you say, that it belongs quite as much to general work as to the women's special column. Not so! Man must needs feed his stock and poultry, and if he makes blunders therewith his error is not capital, even though it rank as cruelty to animals and touch himself in that tender spot, his purse; woman, on the contrary, may feed the lower animals if circumstances thrust this duty upon her, but she *must* feed man and his children. It is therefore little less than a crime, in my estimation, for her to neglect to probe into the secrets of an occupation which affects the whole race, not only physically, but morally and spiritually.

### BEGIN AT THE BEGINNING.

There is a large class of products, animal and vegetable, but largely the latter, which may be grouped under the general head of food stuffs, and a very large number of these supply food for both man and beast. In connection with feeding discussions, the words "nutritive ratio," "nitrogenous," "albuminoids," "proteids," "carbo-hydrates," appear at once, and ninety out of an even hundred readers are scared and run away. In other words, they skip the big words for something "more interesting."

There isn't anything more interesting to woman, and there are very few things simpler, if we begin at the beginning. And I care not what you attempt, if you try to begin in the middle or at the wrong end you will get into a pretty tangle before you are fairly started. The beginning, the foundation on which we will step out valiantly, is nitrogen.

Let me make you acquainted, then, as a sort of introduction, with nitrogen. Look up this word in any talk about food values, and pretty soon you will come also to "proteids," "proteins" and "albumen" or "albumin." In a minute or two your brain begins to whirl. But wait; for your purposes these three words are virtually interchangeable. That is, albumen is a nitrogenous substance; protein is a special form of albumen and is nitrogenous too; proteid is defined as one of a class of nitrogenous principles. Now, if you let all these words mean nitrogen to you (though it may be in a little different form) you have nothing to struggle with. Nitrogen is the starting point.

There is only one more big word to bother with, namely, "carbo-hydrates," which means nothing more or less than carbon plus water. And carbon is what burns and produces heat. Odd, to find it tied up in a bundle with water, is it not?

### HOW MUCH PROTEIN—HOW MUCH CARBO-HYDRATES.

Noah Webster, of honored memory, will tell you: "All foods are nitrogenous (i. e., proteid) or non-nitrogenous." The last means, of course, without nitrogen, but if any writer uses the word loosely when meaning foods which contain only a little nitrogen don't let it worry you. It is only his little way of speaking.

All foods in which the nitrogen is in large or unusual proportion will be generally spoken of as protein foods (even though science knows now that this is not quite the best word to use; there was a time when she did not know this, and the word got into use then), and all foods in which the carbo-hydrates are in comparatively large proportion will be spoken of as carbo-hydrate foods. When we talk about stock or poultry we generally say "feeds," as so much of the stuff under consideration is compounded by millers and dealers and called "feeds" of one sort and another. Speaking generally, then, "feed" is food for beasts, usually compounded or mixed. All seeds or grains contain both proteins and carbo-hydrates and foods are compared with one another and looked at very sharply to see how much of each they contain. Why is this done?

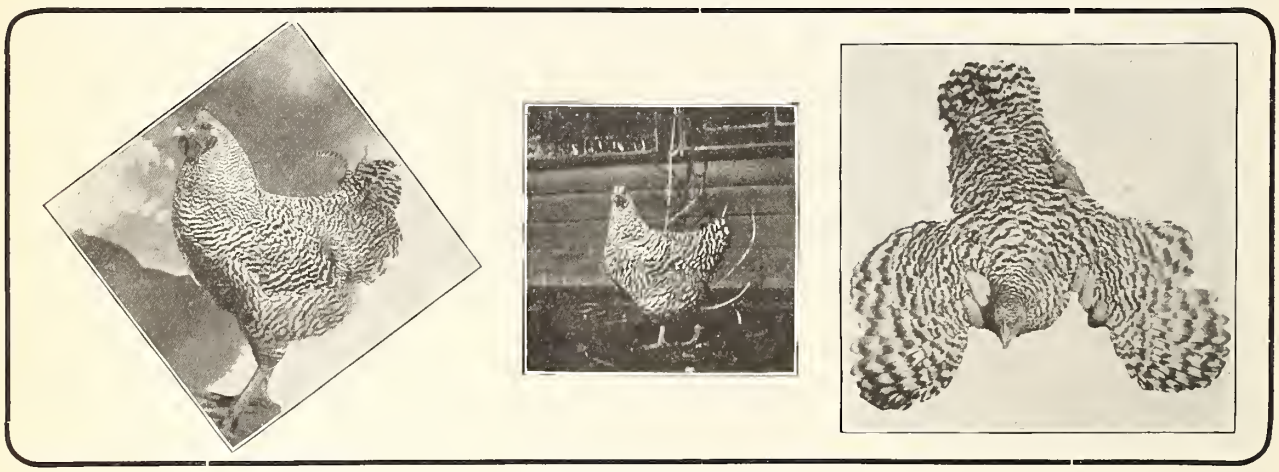
### NO GROWTH WITHOUT PROTEIN FOOD.

We come now to the very kernel of the matter, which is, in the language of Mr. Webster, that "no tissue can be formed without the proteid foods." The R. I. Station puts it more specifically, in this way: "Flesh, blood, nerves, tendons, horn, hair, wools and the casein and albumen of the milk can only be formed from such foods as contain protein (nitrogenous matter)." Stock, and not poultry, was under consideration, which accounts for white of egg (pure albumen,) etc., being left out of the list.

I wish I knew how to make this so forcible that every woman who reads should realize that when she gives her own family a table ration not large enough in the proportion of proteid (nitrogenous) elements she is depriving them of the power to make blood, nerves and muscle flesh; because, like the Egyptians, she is expecting bricks without straw. If a child is thin and scrawny, if it is a lump of fat, if its teeth decay years before they ought to do so, the chances are very large that the table diet is responsible. If not, there is still the chance that the child, by selection according to its own whim, is leaving out of its ration the very thing needed for development or taking in excess something which is injuring it daily.

### FOOD LAWS FOR MAN AND BEAST.

Almost every word of the above will apply just as closely to the fowl (or even to the barnyard stock) as to the family. I have based it on the family needs, partly as a matter of conscience and partly because thus we may formulate feeding rules which shall serve as a feeding law for everything which has to be fed. There will necessarily be a difference of proportion in the nitrogenous and other elements, because we require growth



BARRED PLYMOUTH ROCKS.

These illustrations show the kind of birds that are bred by F. A. Edgeworth, Downers Grove, Ill.

and sustenance for ourselves, milk from the cattle, eggs from the hen, etc. Theoretically it is as simple as primer arithmetic; in fact, it is not so simple as this, because, unfortunately, we do not know everything, nor do we control every condition which may affect results.

The matter of division and provision of food stuffs works out like this: Man prefers certain portions only of the grains for his table needs and palate pleasures, certain other portions for his arts and manufactures; these leave a large residue. This residue may be waste or it may be put to use in feeding the lower animals. It usually happens, in the long run, that he finds some way to utilize that which is "waste" so far as the first process of manipulation is concerned. I am fortunate in having a new instance of this to illustrate my thought, which will be found under a separate heading in this department. On the farm this process of division and selection is familiar enough in the grinding of wheat. Man takes the fine starch and smoother flour for himself and turns the expensive protein into the barn feeding-bin as bran and middlings.

*(To be continued.)*

CHICKEN-POX AND SELLING FOWLS.

A. M., Iowa, in a very pleasant and kindly letter concerning the new department, in which she says she is "glad that a photograph of the editor of this department is printed, so we know it is really a woman," mentions one of the snags she has struck. She says: "I have always been compelled to do something to help provide for the needs of the family, and, living on a farm, poultry is about the only thing to be thought of. I have raised market poultry for years and made it pay, too, but as my husband objects to the caponizing operation I concluded to try fancy poultry, and, verily, I have jumped from the frying pan into the fire. I had pens made and houses built, going to considerable expense and hard work, and I now have several hundred strong, vigorous young birds to sell. At least they were so until a few days ago, when I noticed several among them showing what I had never seen before, but I know from reading that it is chicken-pox."

The birds have been treated with vaseline (which is well to carbolize), but the inquirer wishes to know whether she is barred from selling the well birds, and whether she may sell those now affected, after all signs of the trouble have disappeared. Chicken-pox is a very erratic disease, and not so often serious except at the south. Filth and autumn conditions of dampness and huddling are supposed to be predisposing causes. It may happen that, without any quarantine, only a few in a flock will be affected. Birds not running with those affected and free from the trouble will probably not be a source of infection, and could, I think, be safely sold, particularly as the disease seems rather epidemic than really contagious, though it may be infectious. Birds that have recovered and that show no remaining sign of scar, etc., may also be considered all right. They might, however, be reserved for later sales (since the owner has a large flock from which to select), as they may have lost a bit in flesh.

A PROSPECTIVE NEW POULTRY FEED.

Among the new things which offer a promise to the poultryman, and in which women may be considered to be especially interested is a new feed now being sent out for trial. A number of the experiment stations are using it, and our own fowls have had it, in alternation with meat, for some two months past. All who are interested know the value of milk curd as a feed for young chicks and for fowls. For one man who uses it, however, there are probably a hundred women, if not five times as many. And to save even the one man work spins əsnoy ǝɥʇ of uɐɯoʍ ʎldɐqoɹd ǝɥʇ the milk. Women, then, will be particularly interested to learn that a product of manufacture, which not only resembles curd, but which is actually curd, is on trial and may be offered to poulterers very shortly. It has heretofore been a waste product, and two things remain to be shown: that it can be re-handled cheaply enough to make its protein economical, and that the fowls find it palatable and harmless. The birds eat it fully as well as they do meat; indeed, I think better, and if there is no treatment in the first manufacture which renders it deleterious it should be a better food than meat for the birds; but its nitrogen contents will not be so high. It comes now as a coarse, dry, hard, white product, which does not absorb water very readily. I think this is the first notice of this new product in the public press. I am watching it with a very unusual degree of interest. If we get it and it fulfills its promise the pigs can have all the milk "and welcome."

WILL POULTRY PAY A MORTGAGE?

Dr. S. L. Roberts, of California, one of the most brilliant of present-day poultry writers, tells the story of how it has done so, and that in the hands of a woman pretty well discouraged to start with. Besides being a farmer's daughter, married to a city man, she had a semi-invalid husband on her hands and mind. General farming failed, and hired help took the profits. A big mortgage took the place of a little one, and still the husband was unfit for work, and things looked pretty dark. Just here a friend presented them with five White Leghorns, and from this as a beginning this plucky woman has built up a home trade that paid off the mortgage the third year after "getting down to business," as she says.

There were plenty of trials behind what seems such an easy story: at one swoop they lost 300 birds through disease; and the daily struggles do not come into the story. But it's a good story—a story of pluck; and of luck, too, if you choose to call it so. For it turned out that the ailing husband was a good salesman, and the outdoor work just suited his case. Sometimes the lack of a good salesman hinders success just when it is within the grasp. Then they found a chance for restaurant refuse, which saved half the cost of feed. But they weren't Micawbers. They didn't wait for things to turn up, but went to work vigorously and *turned* them up. Result, happiness, as of old!

Speaking of restaurant stuff, Mrs. Byron said that they lost many birds by not cooking it and mixing it with other feed at first. Probably this was because of the salt, at least partly. Possibly there was too much meat in it—possibly too much sweets. "Attenuating" it helped all these things. Restaurant refuse is a matter to be handled with judgment. Dr. Roberts concludes by saying that there are lots of men who might score such a success, but *they don't know how.*

No single variety is worthy of being designated as absolutely the best.

# STARTING WITH GEESE.

*Editor American Poultry Journal.*

DEAR SIR: I would like to ask how many geese I should start with on 2½ to 4 acres of ground, or should I put part of it in corn or other feed? How many goslings could I accommodate with the above amount of room? How many young geese does one usually raise from one goose? I have a creek running through part of the farm, and I am making a pool in another corner. I intend getting the farm all in grass, part of it being in grass now. Should I sow some clover? I intend sowing some water grass and wild rice in the pool and creek if advisable. I have had some experience in raising wild geese, but have not had good success. Can geese be raised in large flocks? How should I manage to keep the young geese in bounds until they get some size? How many hen's eggs take the same room in an incubator as one goose egg?

*Jeffersonville, O.* *G. E. P.*

[The above queries were referred to Mrs. B. F. Hislop, of Milford, Ill., and her reply is given herewith. Mr. and Mrs. Hislop have a national reputation for the high quality of geese produced on their plant and for their success in raising these fowls.—EDITOR.]

---

We have never raised geese by confining the flock to a certain amount of ground and can hardly say how many birds could be accommodated on 2½ to 4 acres the entire season through, but if the land is kept producing all the grass or other green forage it will, there could be quite a flock kept in this space, but there is one thing sure: to get the best returns from geese they should at all times have an abundance of green food during the warm season or while the stock is breeding and the young stock growing. Old geese can rough it and can stand very short rations in the winter, and we really believe that they are better breeders on account of it, although we give our birds quite good care since we became interested in the fancy. Were we to start, as your correspondent proposes, we should start with about two pens, not more than three. I say "pens" because one has better success all around by mating one male with from two to four females before the mating season commences. Keep the flocks separate during the breeding period. After all the eggs are set, the first two clutches are all a big breeder can afford to set, as late ones require too much care, the old birds can then be run in one flock, saving room and trouble. The number of goslings raised from one goose is affected so much by conditions that we can hardly give any certain number as a rule. If there is an average of twelve, we should consider it excellent. The most we have ever raised was seventeen. We had five others that we let die by not knowing how to care for the late hatched ones, but we only had one female mated to the male. This was not because we think single mating is the best, but because there is always better success with a small flock. This is true of all domestic fowls. We would sow clover, as it is hardy and produces abundantly, but mixed with other grasses we find that bluegrass as a body makes the best pasture. Water grass and wild rice will, no doubt, be fine for the pool. The goslings, unless the weather is quite warm, should be permitted to swim in the pool. They may be kept within bounds by a fence of wire netting, 1½ to 2 feet high, or a 12-inch board will pen them till they are big fellows. We do not approve of keeping them in close quarters after they are ten days or two weeks old. Exercise is good for them as well as other fowls, although they can be reared with very little. In such cases, however, the vigor is not all that it should be. The goslings may be driven or coaxed anywhere and are so easily handled that in case of a rainstorm they can be driven to shelter and will most likely seek it themselves if taught to do so. Unfeathered goslings cannot stand much rain. Do not feed grain till the young are three days old, but see that they are well supplied with green food, drinking water and grit. During this period we feed them cornbread or mash. We have never set goose eggs in an incubator, but would give a chicken hen six to seven goose eggs that would ordinarily cover fifteen hen eggs. We would suggest that your correspondent write to the manufacturer of the incubator he is using, relative to hatching goose eggs in it. In starting, a breeder is supposed to start with good vigorous birds. Females should be two years old if he wishes to raise quite a number of goslings from each goose. The birds should be given care, range, water, grit and a little grain during the breeding season. The females should not be permitted to set on the first clutch of eggs. The goose is a good setter and a good mother, but we prefer to rear the young with the domestic hen. We presume that a brooder would be just as satisfactory, if properly managed and cleaned, but cleaning it would be quite a chore. Besides, they only require a mother for a short period. Generous feeding after the young once get thoroughly started is the making of a goose. The hen gets plenty of food with the goslings and soon commences to lay and leaves her flock. Unless the weather is unusual, she is not needed, but the young should be shut off at night in a good warm coop with a board floor. We always take care of ours in this manner and have never lost a gosling from rheumatism or weak legs. We never count on losing one after it is out of the nest, unless from accident or it is hatched a weakling. We have often saved one by looking after it just in time. Last summer we found one lying on its back in a V-shaped trough and almost drowned. It could move only its head, but we dried it and warmed it up and it ate its supper by lamplight. The next morning we were unable to tell which was the affected one. The young are very awkward and unable to help themselves out of even the smallest difficulties, so the breeder must use special care in guarding against mishaps. In a future issue we shall be pleased to give our method of raising as large a percentage of late goslings as early ones.

*Mrs. B. F. Hislop,*
*Secretary National Bronze Turkey Club.*
*Milford, Ill.*

WHITE WYANDOTTE COCK.

Second at New York, 1901, sire of 2d cockerel. Bred, owned and exhibited by Elm Poultry Yards, Hartford, Conn. These birds are line bred since 1888 for exhibition qualities and possess the most desirable features of the breed.

---

Too much care cannot be exercised in the selection of breeding stock, and outside appearances are not all that should be considered in this important work. Breeding birds should be of rugged constitution and the picture of health. Birds with hereditary tendencies toward disease should not be used under any circumstances.

---

Feed a variety of food. Too many poultrymen rely upon an exclusive grain diet to produce good results. Fowls should have green food during the winter. This can be supplied in the shape of cut clover or vegetables, such as turnips, cabbage, etc.

---

The farmer is the man to make money with turkeys. They require lots of range.

# Comparison Judging and Chicago Show.

**By G. A. Loth, Minneapolis.**

(A Bird of Paradise or an Elephant.)

("All Copyright Rights Reserved.")

"After all the fuss and feathers,
Postal cards and get-togethers,
The management at Chicago seems to be
Divided, front-collided,
Scoring system undecided.
The matter still is 'up' to you and me."

I believe that the main objection to the score card system, by a number of our judges, is the reluctance to put themselves on record over their signatures.

And no doubt it would be a mortifying test, to a great many of them, if they were obliged to duplicate the score of twenty fowls, by card, as a consideration of their fitness to score the different varieties of an ordinary exhibition. This matter of issuing score cards in duplicate is a sticker to a whole lot of judges, and if it was made a basis of determining the qualification of a great many, together with their knowledge of various colors, in their different shades and tones, there would a whole lot of them go out of the business.

Most any of them can tell the color of a running gear to a wagon, but when it comes to distinguishing the slight variations of soft, or harsh, effects, in the coloring of the plumage of a bird, their ideas of the beauty and almost indetectable differences of shade and tone are not finely enough defined to detect the difference, and a score card is more apt to show it than an off-hand guess would be.

A good per cent of our judges, if given a card of twenty different colors, could not name them, and no doubt the fewer duplicate cards these are called upon to make, the longer will be their popularity as judges.

Of course there are exceptions, but the judge who pushes the theory of comparison judging to the extreme of saying it is the only safe method, that he knows it, because he has judged all varieties under that method satisfactorily, causes me to think that some of those "all varieties" were as intelligently passed upon as the "lobster by the village blacksmith."

The "village smithy," or cross-roads blacksmith shop, in former years, used to be a great place to congregate for discussion; as in those times the blacksmith was usually regarded as an "oracle" by all the people for miles and miles around.

And when weighty matters were to be discussed, or knotty decisions were to be forthcoming, the "oracle" of the cross-roads smithy was appealed to, and his knowledge placed in decision was regarded as final and supreme.

He knew it all and had no hesitancy in proclaiming himself a "know all," and so thoroughly were the people impressed in their belief of his learning that all matters were brought to him for adjudication. Whenever a matter was brought him to be solved the people would gather from miles around to see him look wise, and compare the matter in question.

It happened one day that some of the good people of his bailiwick ventured to a distant village to sell their basket of eggs, etc.

On returning home they spied beside the roadside a large red lobster which had fallen from some fish monger's cart.

After viewing it at a distance for some time (for they had never seen or heard of such a thing) with a great deal of hesitancy, they put down their market basket and with the assistance of a long pole succeeded in pushing the basket up to the lobster and getting him into it.

Clapping down the cover, with fear and trembling lest it might be the devil, they carried it home.

Leaving it at the "smithy" the news was quickly spread and the people came from near and far to hear the wise blacksmith compare it to the devil or something lesser.

At last the basket was opened, the lobster rolled out to the gaze of those assembled, who waited breathlessly for the words of wisdom from the blacksmith, which would make it the dreaded creature or something lesser.

The blacksmith looked long and seriously at the lobster, then scratching his head, said in his wisest tone:

"Good people, you know I know all things, but I must confess this thing is

WHITE WYANDOTTE COCKEREL.

Winner of 2d at New York, 1901, sired by 2d cock. Bred, owned and exhibited by Elm Poultry Yards, Hartford, Conn., who have furnished many winners at the largest exhibitions in the country since 1888.

somewhat of a puzzler. Yet it is one of two things, neither of which I am absolutely positive of, but a comparison of it with these two things makes me decide it is either

*"A bird of paradise or an elephant."*

And so it is to a greater or less extent in comparison judging. You send a bird away to a show considering him a bird of paradise. He may have been nearly as good as the winners, but as he wasn't placed and no information regarding his standing is given you on his being returned (for usually after a comparison show there are no reasons forthcoming as to why a bird remained unplaced), the majority of the breeders are not on the spot to ask questions, and if they write the secretary of the show in regard to their birds, that individual knows nothing, only that the birds were not placed.

The judge has looked wise, and it leaves you wondering whether the bird yon banked on being a bird of paradise is in the elephant class or not.

And many a time a breeder will dispose of an equally as good a bird because he did not win at some comparison show, and buy the bird that beat him, which bird could not have won under the score card system.

For I say it is not reasonably possible for a judge to carry the defects of a dozen different birds in his mind's eye and say to a certainty which one has the greatest number, and the most serious ones.

While if you single them out, one at a time, and note down as by score card, you have it in black and white, and no recourse to a faulty memory.

You have a bird that wins first at some show. In what section was he strong and in which one weak? If you are in attendance while the comparisons are being made the judges can explain it to you, and you can explain it to me on selling me the bird by writing me, and embellishing your description over that of the judge as much as your enthusiastic estimation of your own stock inspires you.

The matter of substituting birds in selling them can find no greater protection under the comparison system than under the card system. If anything, there is an advantage in having a score card.

A bird may score 93 points at a certain show. I purchase him to be sent direct to another show at which the same judge is to officiate.

Now here is a chance for a duplicate score card in some of the material sections, if not all of them, allowing for differences of condition, etc.

While the same bird under the comparison system, under these same circumstances, could be dropped out at the second show, and there wouldn't be the ghost of an explanation as to the cause.

Judging by comparison will do where a lot of fanciers get together personally with their birds and an inspection of them takes place under their personal observation.

But for the fancier or breeder to send birds away, with a desire to know something of how they stood, the card system is certainly the only one that *furnishes anything.*

Now here's a chance for the comparison judge.

Please step up, and we will allow you your chosen variety, and give us twenty score cards in duplicate on as many different fowls. It may be the means of determining the cause for such a preference for the comparison system.

The point, if any, we have made in opposition to the comparison system may be one of personal preference, but our main objection to the comparison system will be given in later articles, in which we will contend that it has no legal standing under the "American Standard of Perfection."

---

Send some birds to a poultry show. That is the way to learn the value of your stock.

---

Sow rye for green food. Have two yards and keep the birds in one while the rye in the other is growing.

---

Don't expect to buy a breeder's best birds unless you are willing to pay a seemingly exorbitant price for them.

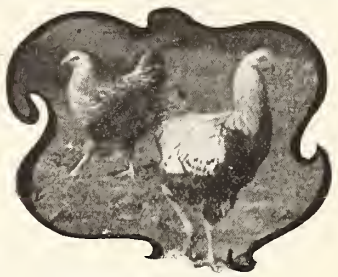
# A Trip in Indiana.

WHILE in central Indiana a few weeks ago it was our pleasure to visit a few of the poultrymen in that locality. Indiana is one of the best states for Standard bred poultry, and the interest is widespread in all sections of the state. We visited the plant of Mr. C. A. Porter, near Flat Rock, and found him located on a large farm almost covered with poultry and poultry houses. He is well fixed to handle the business and devotes his entire time to it. He gave us a most hearty welcome, and we stopped over night with him, enjoying a pleasant chat regarding past events in the poultry world and the prospects for business in the future. He thinks that the business is only in its infancy, and reports an increase in trade each season. Mr. Porter is not a new member of the fraternity. He has been breeding prize winners for several years and has won at the Indiana, Illinois and Kentucky state shows, in addition to others of importance. He breeds all the leading varieties in the American, Asiatic and Mediterranean classes. His birds are always among the list of winners, and he has built up a trade that would be a credit to any breeder.

First prize Barred Rock cockerel and pullet, Illinois State Show, Bloomington, 1901. Bred and owned by C. A. Porter, Flat Rock, Ind.

He showed us Barred Rocks by the hundreds and White Rocks, White Wyandottes, Brahmas, Cochins and Leghorns in large numbers. He also breeds Toulouse and Embden geese, Bronze and White turkeys. To describe all the good birds that we saw at Mr. Porter's would take more space than we can devote to the matter. In Barred Rocks he surely has the right thing. His winning Cockerel and Pullet at the Illinois State show last season shows that good care has been taken of them, and they will, no doubt, score as well now as they did a year ago. He showed us Wyandottes with clear open centers, and grand in shape, Brahmas that have size and color, Cochins that were shapely and up in size; in fact, we found a well cared for poultry plant with houses and yards built for the purpose. Mr. Porter believes in separate houses, and has all his buildings on the colony plan, with scratching sheds attached. One advantage he claims for this method is that disease will not spread among a flock like it would if the birds were confined in one continuous house. Purchasers in search of good stock will do well to write Mr. Porter. He will ship just what he agrees to, and he guarantees satisfaction or money refunded.

After leaving Mr. Porter we drove over to the plant of Mr. R. E. Jones, two and one-half miles west of Flat Rock. Mr. Jones needs no introduction to our readers, as he has established himself as a Wyandotte and Sebright Bantam breeder. He breeds the Silver, Golden and White varieties, and both varieties of Sebright Bantams. His Silvers were a fine lot, and we saw pullets laced like Sebrights and cockerels with the proper lacing on wings, body and breast. His hens were clear in back with the proper shape. He showed us six cock birds that were the best that we have found in one man's yard this season. His Goldens were equally as good and in male birds were better, we believe, than his Silvers, and that is saying a great deal. His White Wyandottes are white, and he has the size with good combs and bright yellow legs. In Sebrights he showed us an exceptionally fine flock, and our readers will have some idea of the quality when we call attention to the fact that Mr. Jones has never been beaten for first pen on these little beauties. He has 800 youngsters and is able to furnish his customers with anything that they want. In high-class exhibition birds he has better stock and larger quantity than ever, and our readers who want to buy winners will do well to correspond with Mr. Jones.



SILVER WYANDOTTES.
Property of R. E. Jones, Flat Rock, Ind. The pullet in this pair is a very promising bird and is laced like a Sebright from head to hock.

At the time of our visit he had just returned from a number of Fall Fairs, where he had been judging, including the great St. Louis Fair. He has judged at some of the largest shows in the country, and was making preparations to go to the Pan-American at Buffalo when we left. He is on the list of judges at Chicago for the coming winter and has several other shows booked. He is a good man for the work and knows the birds and gives satisfaction everywhere he has judged.

First prize Barred Rock cockerel at Indiana State Fair, September, 1901. Bred and owned by Geo. Muck, Edinburg, Ind.

We also visited Mr. George Muck, of Edinburg, Ind. Mr. Muck has bred high-grade Barred Rocks for the past twenty years, and has made a careful study of their characteristics and the mating of them during that time. While he may not be as widely known as some other Barred Rock breeders, he has bred as many winners as any breeder in the west, and has always won the big end of the ribbons wherever he has exhibited. At the late Indiana State Fair he captured every first but one and won both pen prizes. He has a large number of cockerels that are now up to weight. He has a remarkably fine lot of combs and the color on his birds runs clear to the skin. His females were the equal of the males. The old birds were not through molt, and were not in show shape, but they were far enough along to clearly demonstrate that they would make trouble in the show ring for the best of their competitors. Mr. Muck has about 500 surplus birds this season and is in an excellent position to ship his customers just what they may want.

White Rock cock, winner of 1st as cockerel at Indianapolis, December, 1900. Score 96 by Hewes. Bred and owned by John Landis, Edinburg, Ind.

He is thoroughly reliable and our readers can bank on what he tells them.

We also had the pleasure of calling upon Mr. John Landis, of Edinburg, Ind. Mr. Landis, as our readers know, is a White Plymouth Rock specialist. He is a whole-souled fancier and one of the kind whom it does you good to meet. He is always willing to show his birds and always has something worth a breeder's time to look at. We arrived at Mr. Landis' place a little late for dinner, but thanks to the good taste of Mrs. Landis and her ability in that direction, we were soon seated to a dinner that made us feel as though we would like to board with Mr. Landis regularly. After dinner we started out with him to inspect his plant and his birds. Judging from the number of birds we saw, he must have acres of them. They were running all over the place, and were developing into big, well-matured birds, white as snow. They were the pictures of health and we failed to see a single weak or sickly specimen in the lot. We were particularly interested in a number of cock birds which were partly through the molt and which Mr. Landis was giving special care. The breeder who wins over these birds this winter is going to

have something to be proud of. We believe that in cock birds Mr. Landis is able to furnish two or three winners at the largest shows, and then have a few more left equally as good. Among the lot were two birds that won first and second as cockerels at Indianapolis last winter, scoring 96 points each and pronounced by Theodore Hewes the best he had seen in years, and giving it as his opinion that two better birds could not be found anywhere in the United States. Mr. Landis is equally strong this season in his young stock. We saw scores of birds that were as white as could be and were up to weight at the time of our visit. They are remarkably fine as regards head points, having low even combs that will pass easily with a cut of

A promising White Rock cockerel bred by John Landis, Edinburg, Ind.

one-half point. This is a difficult section to get just right in Plymouth Rocks, but Mr. Landis certainly understands his business. We did not see a brassy colored bird on his place. Mr. Landis breeds his White Rocks in line, and has never shown a bird that he did not breed himself. He has a reputation for being a careful observer and experienced breeder. He personally superintends his plant and his customers are assured of prompt and careful attention to their orders.

Mr. J. E. Wheatly is another Edinburg breeder, who is well known to our readers. He has an ideal location, three and one-half miles west of town. We are indebted to Mr. Wheatly for a very pleasant visit.

He breeds Barred Rocks and Brahmas and has the highest quality in both breeds. We found some grand specimens in his flock, which will be the winners somewhere this coming season. He is making arrangements to give his entire time and attention to the Barred Rock, however, and wishes to dispose of his Light Brahmas. We wish to say in this connection that any one who is at all interested in Brahmas cannot afford to neglect writing to Mr. Wheatly in regard to the birds which he now has to sell. These birds are not only extra fine, but they may be procured at prices which will justify one in purchasing them as an investment. He wishes to sell his entire flock of 200 head, young and old, and will sell all or any part to suit customers.

In Barred Rocks we found a large number of specimens which showed that they have been intelligently bred, and they will maintain Mr. Wheatly's past enviable record. Some of his notable winnings were made at the Kentucky State Show at Louisville, Ky., last winter in competition with a number of the best birds it was possible to purchase anywhere in the United States. His males and females were barred alike, both having the close narrow barring and clear distinct color. His birds possess remarkably good shape and are real Plymouth Rocks in every sense of the word.

In addition to shape and color he has paid special attention to size and has young stock that is up to and above standard weight. Mr. Wheatly knows what a good Barred Rock should be and has the ability to mate his birds in such manner as to produce as good as it is possible to raise. He has about 600 head of youngsters and can furnish both show birds and breeders. Our readers will do well to bear Mr. Wheatly in mind when placing their orders for either Barred Rocks or Brahmas. He is the kind of a fancier who would rather have your good will than your money, and if anything connected with a trade is unsatisfactory Mr. Wheatly is the first to want to make it right. *George G. Bates.*

# Comments on Feeding.

The communication in the September number of AMERICAN POULTRY JOURNAL from Mr. T. F. McGrew relative to the manner of feeding at Elm Poultry Yards, Hartford, Conn., has brought out several questions from subscribers, and, thinking that further information would be of benefit to all of our readers, we print herewith one of the letters received from a subscriber and Mr. McGrew's answer to same.

"*Mr. T. F. McGrew.*

"DEAR SIR: I write you in relation to your article in the September number of AMERICAN POULTRY JOURNAL, in which you give the manner of feeding at Elm Poultry Yards. I note you say that feed is given once a week in self-feeding hoppers. You also state that the scratching shed plan of house is used and that the birds kept are Brahmas and Plymouth Rocks. I would like to ask if the birds do enough scratching when a part of the screenings are scattered in the litter in the sheds or are the hoppers used in winter? Do the Brahmas keep in good laying condition when allowed to run to the feed at all times? I have forty pens of laying and young stock and would like to reduce the labor of feeding. Would it be policy to adopt that principle at this season of the year? I have trouble in obtaining a good egg yield from about July 1 to February 20. I feed screenings in the litter in the laying pens in the fall and winter. In the morning I give the birds a warm mash of bran, shorts and cornmeal, with cut bone every other day. I also feed cut clover in the mash. What do you think of the value of clover-meal, dried blood and meat scraps for laying hens? Is there any horse-power machine to grind clover hay into meal? If so, please state the cost, if you know what it is. Do they have good success at Elm Poultry Yards in feeding screenings the year around? How would this method apply to capons in case they had all they wanted until they were put up to fatten? Could they be made to take on more flesh? Do the proprietors have any trouble in having hens die on account of being over-fat or do the birds get too fat to lay?

"*Connersville, Ind.* *E. E. P.*"

Mr. McGrew's reply is as follows:

"The majority of the fowls at Elm Poultry Yards are Leghorns, Plymouth Rocks, Barred and White; White Wyandottes and Black Minorcas. These are all fed winter and summer on screenings from the hoppers, where they continually go to help themselves. So far all the Brahmas have been kept at the West Hartford plant and fed as others feed. Not to exceed fifty or sixty Brahmas are kept.

"The colony houses are gable houses, having a door in front and a small door at the side for the fowls; the rear portion of the building is divided off into a roosting place; two and one-half inch slats are used for the division and are placed about two inches apart. The front portion is made use of during very bad weather for a scratching apartment, in which the fowls hunt and dig for the screenings that fall or fly from the hopper when they feed from it.

"When I saw the hens in July they were in good laying condition. Some of the old Plymouth Rock hens were a little heavy behind, but not so much so as some we see that are fed by rule. I was informed that this was the same all the year round; I feel confident that the statement is correct, as my informant originated this method some eight years ago, put it into practice and has had it under his own watchful care during this time and is still in charge of the plant.

"You have asked me some pointed questions, which I shall answer according to my own views, regardless of how they may strike you. You may have a bird cage filled with small birds in your house, with cups of food constantly before them, of which they eat as much as they want and when they want it, as much as they need and no more. They have been trained in that way for generations. It is just the same with the fowls at Elm Poultry Yards, and they live as they have been trained for generations. I do not believe you could introduce the methods employed at this farm into your yards with success the first winter, but I am fully convinced that all fowls could be trained to live and do well under this method, except the Asiatics, that will not hunt and dig if fully fed at all times.

"One thing you must remember; that is, all fowls thus treated at Vernon have free range every day in the year, at will. Nine months of this time they can find all the bugs and worms they need, also a full supply of grass, fruit and berries. This gives them a splendid egg ration during these nine months. The trouble with your hens laying poorly from July to February is the usual one the country over.

"I am not in favor of clover meal, for the reason that it forces into the fowl, with its mash feed, that which it may not need. It is far better to my notion to cut the clover hay as short as possible in a cutting box and throw it into the litter for the hens to dig and hunt among and eat all they need or want. It is better to allow the hen to balance her own ration in this way than to force her to eat more ground clover than is good for her. I may be wrong in this, but it would require more evidence than

I have had to the contrary to induce me to change my opinion.

"Your manner of feeding should bring good results. I prefer ground green bone or nice, clean, sweet, well prepared beef scrap, because one knows just what it is. Meat meal and blood preparations that are ground into meal can be too easily adulterated to suit my fancy. If trained to that manner of living, in my opinion capons would grow very well so long as the supply of fruit, berries and bugs lasted. After that they should be fed stronger food. I do not know of any clover grinder, but would suggest your writing Foos Manufacturing Company, Springfield, Ohio, asking if they could tell you where to get one. Bear in mind that half the fowls living at Vernon are found under the fruit trees, among the grass, and find food all about in the shape of fruit, berries, bugs and worms; all the land being planted in fruit.

"I am only too glad to furnish you this information, if it will do you any good. I also wish to add that the egg yield looked for and obtained at Vernon is about 150 eggs per hen. Respectfully,

"*New York City.* *T. F. McGrew.*"

# The Economy Club.

In this department each month will be recorded the proceedings of the Economy Club, the object of which is to assist our lady readers in devising ways and means of making home attractive and of providing for the table in an economical and at the same time pleasing and plentiful manner. The various problems will be discussed in an interesting way and solutions given which will materially aid the housewife in making her work a pleasure rather than a burden. We believe it fair to devote this space to matters somewhat foreign to poultry in view of the fact that our thousands of lady readers are vitally interested in the subjects under discussion.—[EDITOR.

HOW IT BEGAN—(CONTINUED).

The newcomer was a tidy, compact little woman, alert and brisk in every motion. At first sight you thought her face a little grim, but there was a twinkle in her keen gray eyes that belied the seeming sternness. To sum her up in regard to other things, it is only sufficient to say that a living embodiment of good, sound, common sense, with a "right smart sprinkling" of a hundred other good qualities was and is Jane E. Conomy, for she is no fancy sketch, but lives and moves and has her being today.

Hearty greetings were exchanged; then quoth Jane:

" I suppose you don't know, Patty that your pansies you are so proud of have got a lift you wasn't calculating on, by the way of your neighbor Jones' hens."

"The miserable creatures!" ejaculated Aunt Patty, dropping the clean crash towel with which she was wiping her hands, and starting toward the door.

"Come back, woman, come back!" cried Jane; "you don't suppose a hen of 'em lingered after I came by, do you?"

"I do get so out of patience," said Aunt Patty in a discouraged tone. "It's enough to try all the Christian fortitude one has."

"That's a fact," said Jane; "I often think that when St. Paul wrote 'Live in peace with all men,' he meant to stop there; then he thought of neighbors' hens and knew it couldn't be done, so he added on 'as far as in you lieth.'"

"Well, never mind the hens now," said Aunt Patty, "but take off your things, Jane, and stay and have dinner with May and me."

"Stop to dinner?" answered she, meditatively; "I suppose I could as well as not. Ezra won't be home to dinner today, and the children took theirs to school. Think likely I will."

In less than a moment's space she had divested herself of shawl and hood, laid the same snugly away in the kitchen bedroom, seated herself in the straightest-backed, hardest bottomed chair in the room, and pulling a partially completed red woolen stocking out of her pocket, proceeded to make her polished steel knitting needles fly until one could almost see the sparks dance from their ends. You see, to say and to do is the same thing with Jane, and the doing never hangs fire, while again. to use her own words, "she never could abide being waited upon."

Aunt Patty began immediately a brisk going back and forth between pantry and cook stove, when all at once there arose a great stamping of feet and noisy rapping in the front part of the house.

"Good land of love!" exclaimed the old lady, "who is coming now?"

There was a throwing open of doors, a bustle and clatter through the house, and a cheery, jolly voice cried:

"It's us! Is there anybody at home?" and directly entered two more women, so wrapped up in cloaks and veils that it was difficult to say what manner of beings they were. Aunt Patty knew, though.

"Mrs. Squire and Mrs. Editor, I do declare! I'm glad to see you."

"Distress!" exclaimed Jane. "Is there any more of you out there? I thought by the racket you made there must be at least a dozen."

"No, there isn't any more of us, but what there is have come to stay," said Mrs. Squire. "Here, Mrs. May, you come out to the gate and help me bring in some things."

So saying, she hurried out, and May skipped out after her, both presently returning with arms filled with packages.

"Well, I would like to know!" exclaimed Aunt Patty, as one after another of said packages were laid on the table. "Is this a donation party, or do you take me for an orphan asylum? What does it all mean, anyway?"

"It means we've come to dinner and brought part of our dinner along. As

Partridge Wyandotte plumage as found on the birds bred by E. O. Thiem, Denison, Ia.

to what it is: that's a can of sweet cream, and this is a piece of some pressed chicken I made yesterday, and here is a bowl of pickled apples, and yonder is a bunch of celery, and as for your making believe you're astonished at it after you and I have swapped dinners a dozen times a year for the last twenty-five years, that is a bit of company manners you can dispense with in a company like this, as well acquainted with each other as we all are. How do, Jane? Couldn't stop to speak to you before; the horse wouldn't stand, and I had to send John home with him as soon as I could."

While talking both of the new comers were being unbundled and presently stood forth as they were. There is no space for lengthy description of the two friends. Mrs. Squire was one of the jolly, cheery, breezy women everybody likes. Mrs. Editor—they called her that because for many years she had conducted a household department in a popular weekly newspaper—well, there can't be much said about her, for, "not to deceive you," if you want to know who is editing the chronicles of this going-to-be Economy Club, at this present writing, she is "it."

These four—Aunt Patty, Mrs. Jane E. Conomy, Mrs. Squire and Mrs. Editor—were friends of many years' standing. They had pioneered together through the vicissitudes of the settling of a new country in their younger days and had now come to the quiet afternoon of life, still bound together in the bands of a friendship that would be warm and strong, even to the very end.

I would like to tell you of all the merry conversation and noisy bustle that ensued, but if this record is ever going to tell you anything besides how this "economy club" began it is time it is getting at it. It's strange how these things stretch out when you try to write 'em down.

In the first place, everybody began to help get dinner. May Rose set the table, and Mrs. Squire made coffee, and Jane baked a Johnny cake, and Aunt Patty warmed up potatoes deliciously and cut cold ham and pressed chicken, and set out sauce and pickles and pumpkin pie, and fried cakes and honey and cheese, and a store of good things besides, while Mrs. Editor sat in a corner and slyly took notes of it all. Pretty much all she's good for, anyway!

You can fancy the getting of the dinner and the eating of it was a merry time, and when it was all over and the work done up, of which "many hands made light work," you may be sure, all gathered in the cheery sitting room, and with needle-work and knitting drew around the bright, warm fire.

A time of breezy, cheerful, housewifely chat ensued—there isn't a gossip in this whole crowd, and when they meet they find something better to talk of than their neighbors, always. A brief lull in the conversation was broken by May Rose.

"Do you know, my dear friends, I've been thinking!"

"For sure?" said Jane E. Conomy; "the days of wonders will never cease!"

May made up a little face at her and went on:

"I've been thinking that there is entirely too much wisdom going to waste in this room, when here sits in your midst an ignorant little out-sider, in heaten darkness, as it were."

"Wisdom? No end of it!" said Mrs. Squire. "Just tell us what you want to know, child, and we'll all turn to and fill you so full of wisdom that all you'll need to be a perfect encyclopedia will be a leather cover and some gilt letters on your back."

"Bound in calf," murmured Jane E. Conomy, pretending to be very busy counting stitches.

May pinched her sharply and went on: "But, honest, you all know so much, and I am such a little ignoramus. Educate me, please. I'm just hungering and thirsting after knowledge."

"What do you want to know in particular, girlie?" said Aunt Patty. "Specify."

"The whole science and art of housekeeping. Like the man in one of Dickens' books, I want to know, you know."

"Bless you, child," said Mrs. Squire, "you don't suppose the art of housekeeping is like a barrel of molasses and we can turn it into you with a funnel, as if you were a little brown jug, and fill you up full to the neck in one short afternoon, do you? How many years, all told, do you suppose, it has taken us old women to learn what we know? You've got to *learn* it, child, and by slow degrees. Tell us some one thing and we'll proceed with your education with the greatest of pleasure."

"I want to know anything that will make Will's life less a desert and a howling wilderness than it is now. Make the bills less and give him something fit to eat. Say, I've another bright idea. It's getting late for today and I must go home and warm up the house. Let's have a Housekeepers' Club and have regular meetings. That will give you time to educate poor little me, and give me space for the slow degree business Mrs. Squire tells about."

"All right," said Mrs. Editor, "and I'll report the meetings for some of the department work I do. The AMERICAN POULTRY JOURNAL, for instance. They want something in that line this coming year."

"Mercy!" said Jane E. Conomy, "the idea of putting all our women's clack in a magazine. I should feel as if I were sitting in a glass showcase in a store window."

"I'm agreed to try it," said Mrs. Squire, "if the housekeepers who read the AMERICAN POULTRY JOURNAL will send in their experiences, and let us have the benefit of them. That would be something really valuable and worth while. I won't agree that we five, or I might say, four, for I don't suppose May Rose thinks she counts for much, shall run the thing all alone."

"I'll agree to that, too," said Aunt Patty.

"And so say we all of us," said Mrs. Editor.

"And you are all invited to my house one week from today, and we'll name it the Economy Club," said Mrs. Squire; "and there's John with the big lumber wagon, so let's call this meeting adjourned, and get on your wraps, Jane and May Rose, and I will take you home. Had a splendid time, Aunt Patty."

The Economy Club had begun!

*(To be continued.)*

## CONTRIBUTED RECIPES.

*Roast Turkey with Oyster Dressing.*—Chop very fine sufficient bread crumbs for the purpose. Scald a pint of oysters in their own liquor, season as for the table and let them cool before using. Put them whole into the bread crumbs with one beaten egg, a little butter, salt, pepper, sage and a little mace. Wet with the oyster broth, being careful not to make the bread too moist. It (the bread) should not be wet at all before chopping. Prepare and stuff the turkey in the usual manner. Put some turkey fat or butter in the bottom of the pan and but *very* little water, and baste very often while baking. *Mrs. P. H.*

*Chicken Pie.*—Two young chickens, cut in pieces and stewed until tender. Make a rich baking powder biscuit dough and line the sides but not the bottom of a four or six-quart pan with this, rolled one-fourth of an inch thick. Put in the chicken well seasoned. Make a thin but rich gravy of the broth and pour over, filling very full, before putting on the top crust, which should be made very short with good butter. Bake one hour in a moderate oven. Be sure to have plenty of gravy saved to serve with the pie. *Mrs. H. S. H.*

*Michigan.*

*Brown Bread.*—One heaping coffee cup each of cornmeal, rye and graham flour. Sift the three kinds together and beat together with two cups of New Orleans molasses, two cups of sweet milk, one cup sour milk, one dessert-spoon soda, one teaspoon salt. Pour into a tin form and place in a kettle of *cold* water and boil four hours. Do not think the batter too thin. Give it room to swell. Any tin pail with close cover will do.

Be careful that the water does not boil up on top of the form, or that the kettle does not boil dry. This never fails. *Callie M.*

Goslings, like ducks, grow very rapidly and come to maturity far in advance of chickens. While it is not absolutely necessary that they be provided with a large pond, it is advisable to keep water before them at all times. After the young are half grown give them free access to the pond or stream.

Never sell your best birds unless you intend to go out of the business. They are worth more to you as breeders than you can get out of them by selling them. This applies to the cream of the flock and includes the few birds each season which are just a little better than any we ever raised before.

Good housing has much to do with the successful rearing of fowls. The houses should be warm and dry and well built. These points may be embodied in the plans at no greater cost than that incurred by many breeders who have neither of these desirable features in their buildings.

A yellow skinned fowl is supposed to possess a superior quality of meat, but the demand for the yellow skin is a fad pure and simple. The yellow skin presents a nicer appearance, and this has created the demand.

When shipping a bird to a customer lay aside prejudice, forget that the bird is yours, look it over critically and decide in your own mind how you would be pleased if some one were to ship it to you at the price you are charging.

A fowl should always be kept in a condition suggestive of a good appetite, but should not be allowed to go actually hungry.

# Failure or Sucess.--By. J. W. Whitney.

In the pursuit of any avocation certain fundamental principles must be in evidence to warrant success. Where these are absent, as a whole or in part, only the most fortunate circumstances permits of a partial success. As two and two make four, so these important factors referred to go together to form a successful whole. There is no promise of success except to the one who is master of and fully conversant with his avocation. Nothing is great or commendable in us or our business only as we by our intelligence, our natural or acquired skill, make it so.

Nothing of great or lasting benefit has ever been accomplished except by hard labor. The best things in life come to us in this manner only. Money or natural ability accomplishes nothing unless intelligently applied. Somewhere, in some manner either directly or indirectly, there must be in evidence this principle of labor.

Applied to the production of thoroughbred fowls we find it a vital requisite to success. Work in the sense in which I refer is not mere brute exertion but an intelligent use of muscle and brain. Where either is deficient the degree of success achieved is directly affected.

Where one has succeeded, another who has labored more ardently has died a pauper; there must be an intelligent aim to our efforts. It is only as we are capable of using our knowledge or skill to our own benefit or that of others that we grow in wealth, position or ability. In all avocations we find the one-sided ones, successful in some branch of their calling but failing in another. Why have those whose names are familiar to every breeder of fancy fowls, such as Hawkins, Williams, Sharpe, Bradley Bros., Thompson, Mitchell, etc., made a name and success of fancy fowls? It is because they have grasped the full significance of what is required to succeed, have made every means of a greater success a part of their business.

The successful management of a large fancy poultry trade carries with it more of financial and executive ability than the average man is capable of handling, except as he gradually grows to grasp its many diversified duties by practical knowledge, acquired by years of familiarity. Occasionally a man of exceptional natural or acquired ability seems to grasp all phases of his calling almost intuitively. These are exceptions and should not be set up as examples suited to you and I to pattern after. The majority of mankind are of only average intelligence and ability. While these shining examples of what the few have accomplished are valuable in giving us new and increased zeal, we should use judgment in their application to our own needs and operations. The successful poultryman studies carefully the particular branch of the business to which he is best suited and bends every effort toward that end. In my limited acquaintance I can call to mind but few all around fanciers. Among them are several good raisers, a few judges, perhaps as many more who understand the later methods of mating and breeding quite well, and occasionally one who understands the probabilities and advantages of intelligent advertising and selling. All these requisites are required to make an all-around, up-to-date fancy poultry breeder, and few men possess all these requirements in an equal and high degree. Directly as they fail in their correct estimation of the different branches of the fancy, so they fail in achieving the high results, the large and prosperous trade of the few.

It is not the intention of this article to go into detail but to point out only in a general way why we fail. Conditions are so varied, abilities and methods so diversified, that what would be suited to one, and one locality, would be entirely out of place in another, but the vital principles of success remain the same under all conditions. An adaptability and capability must be in evidence to warrant any promise of continuous growth and success. In some this can be acquired only by years of earnest labor; others perhaps may find the pathway quite free from perplexities and discouragements, but there must be an earnestness and determination that stops at nothing short of a full and comprehensive knowledge of the requirement of every branch of business.

There is an inspiration, an atmosphere of enthusiasm that goes out to you from the acquaintance or contact with an earnest, successful fancier which you feel and appreciate; it gives you new determination, higher ideals, a deeper appreciation of the possibilities and dignity of the fancy. We need more of them. There is abundant room for their progressive labors and helpful examples of thrift and enterprise.

If we hope to achieve the highest measure of success for ourselves we must put enthusiasm, energy born of true sympathy, into our poultry operations, and retire with its attendant interest in our hearts and minds. Arise with increased determination to stop nothing short of the top leaders, not followers or half-hearted imitators of others. Each day will bring us its cares, its perplexities, its measure of the stern realities of life. Mingled with these should be some of the higher ambitions, some thoughts and hopes for better things farther on, tinges of those perfect specimens of gallinaceous beauty and the honors they shall achieve, etc. Like the reflection of the evening sun's last rays across the placid waters, they leave in our hearts much of cheer and hopefulness for the future.

# Low Prices and Cheap Goods.

EVERY breeder of Standard poultry must have read with great pleasure the remarks of Mr. Charles M. Brown, Fort Worth, Texas, in your last issue. He says:

I have noticed what seems to me to be an anomaly. A man gets the chicken fever. He sends off and pays $5 for a setting of eggs, and possibly $25 for a trio of birds. Those are good prices and should put him in possession of the best in the market. Now mark the result: In a couple of years we find him advertising and selling eggs at from $1 to $1.50 per 15, sometimes stretching it to 18, and a trio of birds for $5 from that very strain, and using the name of the original breeder who worked years to perfect his fowls and make a name for himself. I emphatically say this: If the eggs and stock he purchased in the first instance were worth the price paid, he should hold up the price, thereby holding up the Standard, in justice to himself and the original breeder."

Well, decidedly he ought to hold up the price, and if I am allowed to say so, the man who does not is decidedly lacking in business sense—unless indeed he is conscious that on the whole his stock is not worth more than "$1.00 to $1.50 per fifteen or eighteen eggs." Thinking the matter over, I came to the conclusion that probably the eggs and stock were really not worth more than possibly $1.00 per setting. Why?

Suppose that a man whom we will call Mr. A., has devoted much time, labor and skill in building up a popular strain, has taken first prizes repeatedly at hotly-contested shows, has built up a splendid reputation both for honesty and for strictly first-class stock, and he rightly deserves such a reputation. He is a skilled artisan, a successful business man, and a gentleman.

Now, on comes Mr. X., who has the hen fever, and knows probably nothing about hens. He pays a good stiff price and gets good stock from Mr. A. Later Mr. X sells stock raised by himself from stock originally obtained from Mr. A. Mr. A. sells eggs from his—well, I will call them, to avoid being personal—"Plymouth Legottes," at $5; while Mr. X sells eggs "from Mr. A.'s famous Plymouth Legotte strain" at $1 per setting.

Now, you know what you are getting when you pay $5 per setting from Mr. A. But do you always know what you are getting when you buy "A's strain" through Mr. X? It all depends, it seems to me, on what Mr. X's record has been at what shows he has exhibited. Let me illustrate.

Last summer I took a journey to Canada for the express purpose of seeing some famous chicken breeders at their homes in London, Canada. I went, among other places, to the yards of the famous "Billy McNeil." Billy is known to chicken fanciers of two continents. There I saw some birds that made my eyes open. "Of course these birds are not for sale," said I. "Oh, yes," was the reply, "any one can buy them that has the price." "Does he sell his best birds?" I inquired, incredulously. "Yes," was the answer, "and he meets the man in the show to whom he sold his best birds and almost always beats him in exhibition." "How do you explain this?" said I. "Simply because Billy knows how to breed, mate and rear birds better than the men who buy from him," was the answer given me by my informant who has a world-wide reputation as a breeder.

To go back to the case of X and A cited above. Mr. A's eggs are worth $5. Why? Because he knows how to handle, mate and rear first-class fowls. Are Mr. X's eggs worth $5? They may be and they may not. He may be young and green at the business, and does not really know the value of his wares. It may be that he wants to get what money he can as fast as he can, and get out of the business as soon as he can. But if Mr. X has had the courage to exhibit at

first-class shows and has won good prizes in warm company, his eggs, if from his best stock and carefully mated, are worth more than $1. If he is one of those rare creatures who is content to hide his light under a bushel and not set it on a hill, and sells really first-class stock at $1, he is decidedly lacking in good sense.

It is true that some eggs are not worth $5 and some are. It is true that some $1 eggs are worth more than $1, and others are not. But taking the general run of such eggs, it may be said that the chances are that eggs offered at $1 per setting are worth no more than $1, even if they are from stock hatched from $5 eggs.

Any man who has ever bred chickens for exhibition knows that prize winners, especially from different yards, do not as a rule, when mated produce prize winners. Every man who knows anything about the business knows that the science of the profession is in the mating of fowls. Fowls that the novice would think common, will, if properly mated, produce first-class birds, but they must be mated properly.

Does Mr. X know enough to mate his birds scientifically? Mr. A does, but it took him long years to learn the trick. And the mating is the whole thing. Granted that Mr. A and Mr. X have practically the same stock; but Mr. A understands mating, and Mr. X does not. What are Mr. A's eggs worth for hatching? $5. What are Mr. X's eggs for hatching worth? No more than he values them himself, that is $1.

Consequently, it stands to reason, that in spite of the strain, when the purchaser pays $1 for eggs from a $5 egg strain, he is, *as a rule*, getting $1 eggs, or just what he pays for them. Of course there are exceptions to the rule, but the exceptions prove that the rule is of general application.

*President of the Blue Andalusian Club of America.*

# The Silver Spangled Hamburg.

Why do we see so little of the Silver Spangled Hamburg in the poultry Journals? One can pick up almost any journal and see cuts of Plymouth Rocks, Wyandottes, Brahmas and many other Standard breeds of fowls, but how seldom do we see a cut of the Silver Spangled Hamburgs. Certainly this is not because they are not worthy of as much consideration as other breeds. I do not believe that there is any breed of fowls that will lay more eggs in a year than the Hamburgs, and although they do not lay quite as large an egg as larger fowls, still they make up in numbers what they may lack in size.

In my thirteen years of breeding the Silver Spangled Hamburg, with several other breeds, I have never found any breed that will do better, get into less mischief or lay more eggs in close confinement from one year's end to another than Hamburgs, and as for a table fowl they are the equal of any for quality of meat. They are not so small as some people imagine, although there are some strains that are much smaller than others.

During the last ten years, in which time I have been using only imported stock from England, I have had no trouble in getting large birds. My male birds generally weigh from 5 to 5¾ pounds and hens from 4 to 5 pounds, which weights compare well with the largest Leghorns. For beauty, where can we find any breed of fowls that presents a finer appearance on the lawn, in the breeding pen, or in the showroom than the Silver Spangled Hamburgs, and especially the male, with his fine shape and with proper Hamburg comb, which is the most typical of all the different styles of Rose combs? This comb should fit close and even on the head, be medium in size, square in front, level on top, the top covered with small points or corrugations and ending at the rear with a well developed spike, which I like to see turn slightly upward. Nice smooth white lobes of good shape form one of the most striking features of a fine Hamburg, and these with a comb as described above, and dark hazel eyes and red face, make an ideal head. The hackle of the male, as I want it, is a trifle different from what the Standard demands. I like to see the hackle of a cockerel spangled clear to his head, with back well spangled.

The tail of the Hamburg male is another section which, if not of proper shape and color, greatly mars the beauty of the specimen. The tail should be carried at an elevation of about 45 degrees and in color should be pure white, each feather ending with a large black spangle. I want the spangles in all sections with the exceptions of flights and main tail feathers to be of the same shape as nearly as can be on the different shaped feathers. I want the upper portion of the spangle to follow the web of the feather to the shaft and it always looks well to me to see the black extend a little up on the shaft above the spangle. This shows strong spangling

SILVER SPANGLED HAMBURG COCKEREL.

Winner of 1st at Ohio State Fair, 1899; 1st at Sunbury, O., score 95½, by Bridge; 1st at Columbus, O., State Show, score 95, by McClave, and 1st at Denver, Colo., 1901.

and a male thus marked is very apt to be a good pullet breeder.

I have worked hard and have succeeded well in getting the proper color in the tails of my males. What I call a proper colored tail is one which has no black in coverts or in any part except the spangles. How often do we see male birds good in other sections that have black tail coverts and side sickles. The attention of the reader is called to the cockerel "Superior" whose half-tone cut accompanies this article. He is the strongest spangled bird that ever I saw, being spangled on every feather clear to his head, and yet he has no trace of black in his tail, except the spangle and he has the clear white undercolor so much to be desired in breeding males. As long as I have the proper color on the surface of my males, I want all the white in under color that I can get to hold the dark under color down in my females, as the under color in the females is so much stronger than in the males, that if one uses a male with dark under color he will spoil all his pullets, for the under color will run out in the web of the feather clear to the point of the spangle, then the spangle of the feather in the next row just above [illegible] on a black surface and that spoils the color of the section. The under color should be confined to the fluffy portion of the feather, then there will be a section between the spangle and the under color that is white, and on this white space lies the spangle of the feather, just above, and this will show the shape of the spangle as it lays on the bird. Our present Standard demands a black or dark slate under color in Silver Spangled Hamburgs, and this, I say, is all wrong. I tried with the assistance of one of our best judges to get the late Standard as nearly right as possible on Silver Spangled Hamburgs, but our work on under color was unsuccessful. I defy any man to breed good Hamburgs from black under colored males and keep it up year after year. I hope to hear from other fanciers of this beautiful but much neglected breed of fowls. *G. G. Wherry.*

*Montrose, Colo.*

—o—

See that a good dust bath is provided for the fowls. Take two pieces of boards six inches wide and three feet long and nail them at right angles in the corner of the house so as to form a box. In this place clean road dust. The fowls will appreciate it and give better results.

There is money in bantams of any popular variety and they require very little room. From a fancier's point of view they appeal to many people who would not be attracted to the larger fowls. They are as good layers and for home consumption their eggs are just as desirable.

If anybody is in position to make money with poultry it is the farmer, and yet the farmer generally says there is no money in hens, this, too, in the face of the fact that he knows of poultrymen who are making the business profitable.

A poultry house is not as clean as it should be unless you can enter it without detecting an offensive odor peculiar to filthy chicken coops. There is no excuse for the air being other than pure and healthful.

Filth and lice are responsible for more disease than any other agencies. Overfeeding and crowding are also fertile sources of disease.

Do not adopt an ironclad rule for feeding, as regards quantity. Give the birds what they will eat up clean, whether it is much or little.

Keep an account with your hens and give them credit for the eggs they lay.

# OUR PROMISE

## To AMERICAN POULTRY JOURNAL READERS.

During the coming year we will give to our readers the most reliable and up-to-date instruction and information that it is possible to procure. We want poultrymen to fully understand what that means. It means that thousands of dollars will be spent in getting out the next twelve issues. The right kind of reading matter will be furnished in liberal quantities. This will be procured absolutely regardless of cost and we will have the best that money can buy. In attempting this we have overcome obstacles other than the cash outlay. Many successful breeders, experts in special lines and authorities on various subjects are in position where their time is valuable and they have not previously given their best thoughts and experiences to the public, because of a lack of time to do the matter justice. We have prevailed upon these people to make the necessary sacrifices to aid us in the work and we can now guarantee that our readers will be given the best and most complete publication that can be issued and that it will not only exceed all past efforts of our own, but will outclass any other periodical devoted to Standard-bred poultry. No poultry journal has ever had anything like the list of special writers that AMERICAN POULTRY JOURNAL now has.

***More than a Hundred will take part in making the Journal attractive and interesting the coming year, and every line of work will be fully and intelligently covered.***

We present herewith half-tone portraits of a few of these writers and we hope to furnish others from time to time in order that our readers may see the likenesses of the people who have been engaged in this important work. It should be remembered that the contributions from these scores of writers and practical, successful poultrymen are written especially for us, will appear exclusively in our columns and that their best efforts have been made to place before our readers what it has cost the writers much money and years of experience to learn. Surely from a multitude of these experiences there will come much wisdom.

# Some of the Subjects thus far Arranged for American Poultry Journal are as Follows:

The best and most thorough explanation of line breeding, with a detailed plan for establishing a strain, a clear and concise statement of the principles involved in developing the desired characteristics of the fowl and embodying the results of too close inbreeding.

—o—

The process of molting. Care of the fowls during this period. What to feed and why to feed it. Is delicate color and gloss of plumage affected differently by different foods? If so, how and why? A general treatise on the subject of molting.

—o—

The best method of starting a market poultry plant. The amount of money necessary to purchase stock and the profit to be expected from the outlay suggested. The amount of ground, number and size of buildings required and suggestions in regard to economical and successful management.

—o—

Preparing birds for the show room. Instructions which will enable the amateur to take advantage of the many little details, which add to show condition. How to feed and care for the birds during their close confinement in show coops.

—o—

Instruction to the beginner whose ambition is to get prominently before the public as a fancier and establish a paying business.

—o—

Has the specialty breeder greater chances of success than the breeder of several varieties, as regards prominence and high prices for stock and eggs? If so, why?

—o—

Rules to be observed in getting the highest percentage of fertile eggs. Hints on house room, feed, care, selection and mating, as affecting fertility of eggs.

—o—

How to advertise successfully. Points to be considered in selecting a medium. Conditions affecting an ad and hints on the advantage of continuous advertising.

—o—

Advice on management of incubators and the advantage of their use even though hens are available for the purpose.

—o—

Success with brooders. How to feed and care for the chicks.

—o—

We cannot call to mind ten other subjects which, as a whole, are more important than those enumerated above. They will be discussed at length, and two or more articles upon each subject will appear.

Other important questions have been and are now being written upon, and these valuable communications will appear each month. Each succeeding issue will be better than its predecessor.

A subscription to the AMERICAN POULTRY JOURNAL means a monthly talk with America's most successful poultrymen. They will clearly and surely point out the road to success. There will not be a line which is not instructive. Not an idea that is not practical. Not a bit of news or information that is not reliable and not a single subscriber who will not get many times the worth of his money. The subscription price is 50 cents. Nowhere else can you get anything like the same value for any amount. It is not to be found.

# SPECIAL DEPARTMENTS IN American Poultry Journal

## During the Coming Year.

THE department work in AMERICAN POULTRY JOURNAL will in the future be given special attention, and while each department will contain matter bearing directly upon the subject treated, and be of special value to those who are particularly interested in one department, still the matter presented to our readers in this form will be of such general value that all who are interested in standard-bred poultry will be able to derive much information and profitable instruction from the perusal of the pages devoted to this work. The best talent to be found will have charge of these departments, making each one a compendium of the best thought and experience of acknowledged experts. Our readers may rely absolutely upon the suggestions and teachings of these men and women, and we feel that these special features will be of untold benefit and fully appreciated by our readers generally.

AMERICAN POULTRY JOURNAL, 325 Dearborn St., Chicago, Ill.

## *A Little of Everything.*

This department partakes of the character of an experience meeting. It is filled with short paragraphs relative to all branches of poultry breeding. It is an exchauge of ideas such as might be heard where a large body of breeders are gathered together. The thoughts and experiences are always timely and seasonable and we solicit these from all AMERICAN POULTRY JOURNAL readers. The most prominent and successful breeders everywhere send these items for publication and the department contains more boiled-down meaty information in a smaller space than could possibly be given in any other way.

## *Fancier in the Poultry Yard.*

Mr. Thomas F. Rigg will present to AMERICAN POULTRY JOURNAL readers each month, in this department, an interesting discussion of the problems arising in the fancier's work. He will tell what should be done and how to do it. Vital questions influencing success will be fully considered and the amateur breeder will be led step by step through the year's work in such manner as will enable him to avoid the expensive and discouraging errors sure to be made by the inexperienced. This department will also serve to freshen the memory of the expert and be of aid to him in various ways.

## *Women's Department.*

This department, while of interest to all breeders, will be conducted with a view to making it especially interesting to the women. It will be edited by Mrs. Myra V. Norys. The sympathetic feeling of the gentler sex for each other should make this department of more than passing interest to our lady readers, and the demonstrated ability and wide reputation of Mrs. Norys makes it all that could be expected as regards the practical value of the information contained therein. Every line of thought and work in which women may be supposed to be especially interested will find space for discussion here, and all who desire to ask questions, no matter how elementary, or wish advice upon what to do to overcome the difficulties peculiar to their case, are urged to make use of this department.

## *Young People with Poultry.*

The care of poultry is to boys and girls a pleasing and profitable work both morally and financially. The most beautiful breeds make excellent pets and the ownership of something of this nature entirely his own and from which a revenue may be derived impresses young pople with the sense of responsibility and inculcates humane ideas, cultivates a business instinct and occupies time that might otherwise be devoted to less inspiring and educational thoughts. In this department we will tell the boys and girls how to feed and care for the fowls, how to build simple and cheap houses and fixtures and how to make money with their pets.

## *The Economy Club.*

(HOUSEHOLD DEPARTMENT.)

In this department each month will be recorded the proceedings of the Economy Club, the object of which is to assist our lady readers in devising ways and means of making home attractive and of providing for the table in an economical and at the same time pleasing and plentiful manner. The various problems will be discussed in an interesting way and solutions given which will materially aid the housewife in making her work a pleasure rather than a burden. We believe it fair to devote this space to matters somewhat foreign to poultry in view of the fact that our thousands of lady readers are vitally interested in the subjects under discussion.

## *News and Announcements of Poultry Associations and Specialty Clubs.*

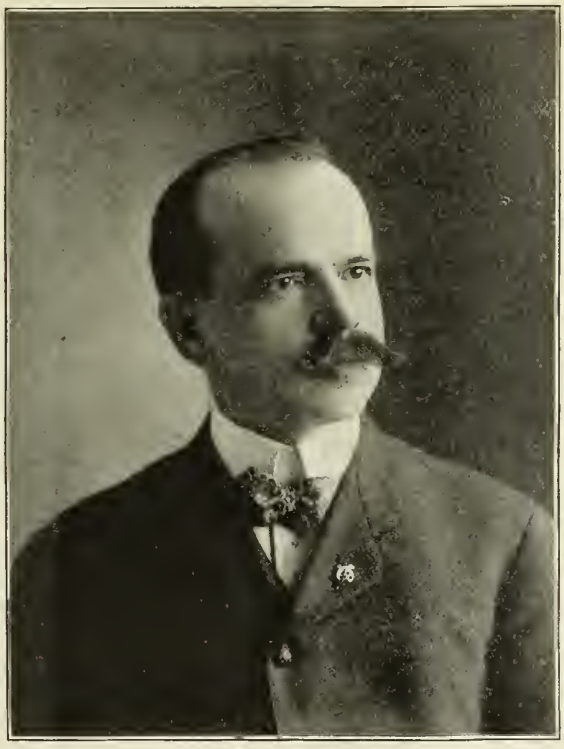
In this department each month will be found the latest as well as the most complete news of the various poultry organizations throughout the United States and Canada. Our readers who are interested in poultry associations and specialty clubs will at a glance realize the value of these columns. They form a sort of official organ for many prominent organizations.

## *Questions and Answers.*

For the benefit of our readers who may at times desire special information upon some special subject we conduct a "Questions and Answers" department, wherein is answered each month the queries that are received. We urge our readers to make free use of this department. There is no charge for the information. Ask as many questions as you desire, no matter how simple or how puzzling. Let us try to help you any time and as many times as you can use our services. Read this department each month. You may find just the question answered which has been uppermost in your mind.

## *The Belgian Hare.*

Belgian hares may be successfully raised in connection with poultry and the business is profitable if properly handled. In this department we will give to our readers the benefit of the advice of the most noted authorities treating upon the questions of feed, care, housing, diseases, and, in fact, complete instruction of a general nature which will be of real value to every breeder of this valuable little animal.



GEO. G. BATES.
Proprietor and Publisher American Poultry Journal.

FRANK HECK.
Editor American Poultry Journal.

I. K. FELCH.

T. F. McGREW.

### *Some of the Special Contributors to American Poultry Journal. for 1902.*

In addition to the proprietor and publisher and editor of AMERICAN POULTRY JOURNAL, we present herewith halftone portraits of four of the most prominent breeders and writers in the poultry world, whose services have been secured for the purpose of contributing to the AMERICAN POULTRY JOURNAL during the coming year and assisting us in giving to poultrymen the best publication that can be printed. Mr. Felch is so well and favorably known as a breeder, writer and judge as to have earned the title of "Father of the Industry" in America. Mr. Boyer is an experienced breeder and editor and is perhaps better versed in making poultry pay from a utility and market standpoint than any other man in the country. Mr. McGrew occupies an enviable place in the fraternity and his thorough knowledge of the various breeds and their characteristics, and his ability to treat the breeding of fancy fowls in an instructive and scientific manner, makes him a leader in his line. Mr. Rigg is one of the best known and most competent western judges, whose important engagements at the largest shows east and west speak more forcibly of his ability and reputation than we can present his claims in words.

M. K. BOYER.

THOS. F. RIGG

## To Would Be Judges.---*By. D. T. Heimlich.*

What constitutes a good poultry judge? is often asked and often answered like another question—"which is the best fowl?" The exhibitors who prove successful in the show-room as a rule credit the judge who gave them the awards with being best judge; like the answer to the other question. The best judge is he who is naturally qualified with a well balanced head, the gray matter of which has the quality and development that manifests its ability in tactfulness as he comes in contact with the many minds of all caliber composing the poultry fraternity.

If he has studied the history and development of poultry culture from its various sources, carefully read and digested the many facts that the books that have been written contain, read our best poultry journals, from which many facts and figures can be obtained, qualified himself by practical experience in selection, mating and breeding shapes and colors, watching results therefrom, thus gaining knowledge that as he progresses in his work as expert interpreter of the Standard by score card or comparison, he gradually qualifies himself to give in clear and concise words and language his reasons for his awards, so that any and all inquirers may be satisfied with the judgment and reasons given.

Time and practice will step by step lead him to where he feels secure in giving opinion or rendering a decision. The fact that he often is toadied to must not cause him to lose his head and cause him to imagine he is the whole show, for conceit falls sooner or later. To be a thoroughly qualified poultry judge requires a knowledge of the Law, which is the Standard of Perfection. That there may be demands in that book not fully up to his or her experience in describing fowls should not lead him to that very dangerous practice of becoming a law unto himself in its interpretation, but should lead him to become one of its legislative members and by a proper method have introduced the measure upon which he has the widest light and knowledge, so that reform may come through the proper channel and become a law that is authority for others to follow. The successful judge must lay aside all bias when officially employed; justice is what he should stand for and represent in his work, otherwise his career will be short. His likes and dislikes of certain features must not be the motive that prompts his decision.

A thoroughly acquired knowledge by study of the Standard and contact with the best and most perfect specimens shown, causes them to be fixed in the mind, so that when imperfections are measured, the lack of imperfections in sections, as a rule are pictured in the eye, and the mind, quick as a flash, makes the deduction, which when completed should leave the specimen conforming nearest in shape and color to what the Standard calls for and the specialty breeders of the variety are agreed upon, as coming within the possibility of reaching perfection. Thus each will be graded from first, second, third, etc., in quality. This may be done by the score card or comparison, but comparison gives the breeder nothing tangible to compare and the card does, hence in the end must lead to a better understanding of what is wanted and most desirable.

In any standard variety under consideration, every aspirant to judgeship should have a system which must be elastic enough to add to or take from as experience brings its lesson. This does not mean that he must have one system to work by at one show and another at the next, but he must lay down rules for himself to work by, that his valuation of the different sections of the fowls he handles will, when compared with cards made of the same quality specimens, prove uniform, so that by the reputation of the work his judgment in weighing shape or color valuation gives him a basis for which he builds or makes deductions. "Practice makes perfect" is an old saying that will not hold good in poultry judging, as no two fowls are found exactly alike, no two sections are exactly alike, yet in cutting for defects and comparing the cards with the specimens scored, must leave the best average of a class at the head, and the expert who does this wins standing and the confidence of the fraternity.

The lack of this acquired knowledge and just how to do it will make or retire the aspirant. There is ample room for more poultry judges who are willing to study and properly prepare themselves for the work. The best preparation is to exhibit and see the largest and best shows, carefully study the ways and methods of several judges who have had wide experience, become advocates through our poultry journals of a school for judges, and who have won their place and are given extensive recognition by the fraternity, should contribute to the columns of our journals and give endorsement to the progressive step for the organization of judges as well as the school for the would be judge. Every year are added men and women to our ranks that are of the educated and most influential communities; these and the thousands of our industrial centers all can be held and made feel the benefits to be derived from engaging in the breeding and perfecting Standard fowls. With the mighty changes in our economic relations and the rising prices of meats, of beef, hog and sheep, poultry and Belgian hares will in a great measure obviate the necessity for horse meat and other obnoxious flesh sold in other countries to the middle and poorer people. Perfecting fowls adds education and widens a field of knowledge desirable and useful beyond measure. Let more of our club members become active contributors to our poultry journals, for by reading and the study all grow together to become of general and mutual benefit to the fraternity at large.

*D. T. Heimlich.*

# In Defense of Rhode Island Reds.

### Exceptions Taken to Mr. McGrew's Comments in October American Poultry Journal.

By JNO. I. CROWTHER, Fall River, Mass.
ROBT. S. TAYLOR, Port Huron, Mich.

It is greatly to be regretted that a new breed of poultry possessing so many really good features as does the Rhode Island Red, should be so seriously handicapped at the beginning of its career by the rule or ruin policy at present being followed by those who should be most interested in its future success. The number of really excellent breeds now before the public makes it necessary that any new aspirant for recognition should possess good qualities indeed to enable it to make any marked headway in competition with the older and established breeds, and it would seem that common horse sense would demand that the friends of this beautiful and most useful new breed miss no chance of unitedly presenting its just claim to popular favor and using every legitimate means of establishing it as one of the very best breeds in the world today.

I am frequently asked wherein the Rhode Island Red is superior to either of our grand American breeds, the Plymouth Rock or the Wyandotte, and I would answer that it is not necessary that the Red be superior to either of these great birds to entitle it to a front seat in Poultrydom. It seems to be a quality inherent in fanciers to be jealous of their respective favorites and the writer fully realizes how difficult it is to present fairly and impartially the merits or demerits of the breed of our choice.

The Cochin devotee will see all that is admirable and desirable in this great Asiatic and can hardly understand why human nature is so perverse as to not see as he does. And so with the Leghorn, the Rock and Wyandotte, etc., etc. All are the very best to those who think so. Even our highest authorities in poultry matters, our judges, are not entirely free from this same prejudice, and some of them are open in their hostility to any new breed so unfortunate as not to have appealed to their individual tastes. As an illustration note the attack on Rhode Island Reds by Mr. T. F. McGrew in the October number of AMERICAN POULTRY JOURNAL. This, we believe, is as uncalled for as it is unfair. Because some have claimed unreasonable things for this breed can furnish no excuse for Mr. McGrew's attack upon it, since without exception, exaggerated qualities are claimed for any new breed, and not only new breeds bnt all breeds are given attributes by their respective followers that at times gives the truth a mighty severe strain, to say the least. This tendency to exaggerate the good points of the breed of our choice is world wide and no fancier can be said to be fully equipped who does not possess at least a fair quota of it. That the boom on the Rhode Island Red has abated is undoubtedly true and the writer is glad of it, but that good, healthy interest in this breed is dead or likely to die cannot be admitted for a moment, and the writer has sold more extra good specimens this season than ever before and has been compelled to refuse many flattering offers for his best birds. As to the Reds not breeding true can be attributed more to lack of agreement among breeders as to the correct color than to any inherent tendency of the breed. In single combs I venture the assertion that I can produce as large a percentage of uniform chicks as can the

breeders of Buff Rocks or Wyandottes, and in this I am not guessing, as I have bred them all and from the best obtainable. Mr. McGrew says: "All manner of kinds and colors and styles of comb will come from a single mating." As to this statement I can only hope this can be attributed to ignorance, as it is not pleasant to charge so distinguished an authority on poultry matters as is Mr. McGrew with willful misrepresentation. The Rose Comb Reds will sometimes throw single comb chicks the same as does the Wyandotte, but in no greater degree, and in over 200 rose comb chicks hatched this season the writer had less than 4 per cent of single combs, which even Mr. McGrew must acknowledge is often exceeded by the Wyandottes. In Single Comb Reds of all I have raised in years past I have never yet had a chick with other than a single comb. As to Mr. McGrew's statement that the Reds lay a smaller egg than the Rock, I dispute. I have bred Barred Rocks for many years, and good ones, and I am satisfied there is no perceptible difference between the size of eggs of these two breeds. I do not consider the Red better as a layer or superior to either the Rock or Wyandotte as a general all around good fowl. I do believe, however, they are fully their equal, and as I said before I do not deem it necessary that the Wyandotte or Rock be excelled to entitle the Rhode Island Red to an existence. While the Rhode Island Red Club has done much to advertise and place the Rhode Island Red before the people, there must certainly have been some feature possessed by these birds that appealed to the public fancy or there could never have been any boom in the first place, and I candidly believe that even Mr. McGrew himself will admit that the dazzlingly brilliant Rhode Island Red male is a truly handsome bird. There is no call for strife between the Reds and the Wyandottes or Rocks or any other breed for that matter. They do not seek to usurp the position of any others. They are themselves a first class general purpose fowl. Quick, vigorous growers, good layers and mothers, a yellow meated and attractive table fowl and the *only breed before the people claiming red as its distinctive color.* Then why should there be any conflict between the Reds and Buffs. A buff is not a red and red cannot be buff in any sense, and the sooner the breeders of both Buffs and Reds shape their course on these lines the better it will be for all interested. In conclusion it would seem that the splendid abilities of Mr. McGrew might be better employed in fostering and broadening the fancy than in belittleing any breed and tearing down the effort of others, always remembering that we do not all see alike, and while he may not see why the Red should attain so much prominence, there are many—very many—who see much to admire in the Rhode Island Red.

*Port Huron, Mich.* *Robt. S. Taylor.*

---

*To the Editor of the American Poultry Journal:*

DEAR SIR: I noticed in the October number of the AMERICAN POULTRY JOURNAL an article by T. F. McGrew, on Rhode Island Reds. I wish to state for the benefit of the JOURNAL'S many readers that most of the statements in it are apparently based on sentiment and not on facts. Mr. McGrew, in this instance, is troubled with the defect of seeing the mote in the eye of the Rhode Island Red and neglecting the beam in the eyes of his favorite fowl. He says it will take years of careful work, and the adoption of certain suggestions he has to offer to keep the Reds from falling flat, as it were. Let me say that the Rhode Island Red boom, which he speaks of as a matter of the past, is still on in all its vigor, and that the only breeder who thinks the boom is over is one who, owing to failing health and dabbling in too many breeds, is allowing his business in Reds to slip away. Yet even he has had different stories to tell about the Reds in different papers at the same time. For every breeder of Reds Mr. McGrew will name who thinks the boom in Reds is over I will name him a dozen who will prove by their books that their business is growing with unprecedented strides and not a little (in the seasons when they have anything to sell) as a result of advertisements they put in the AMERICAN POULTRY JOURNAL.

Mr. McGrew thinks the Reds should have a pea-comb and that females should be of a snuff brown color, and finds fault because Red flocks are not more even than they are. Carping has become a habit with him, under the stress of writing so much that he has not time to think or observe, and amid his valuable contributions to poultry literature his mind does not always look at things in a judicial aspect, though he has been trained to the law. For instance, he expects the R. I. Red to get to ideal development in a few seasons, while, I presume, he would not have the temerity to claim that his pet Plymouth Rocks or White Wyandottes, after twenty or more years of breeding to Standard, would produce more than "10 per cent" that are fit to show. He seems to forget in his anxiety to "crack" the Reds that rustiness in Barred Plymouth Rocks, yellowness in "White" Wyandottes, and stubs about and between the toes of both and lots of black feathers in the plumage (these are all removed, of course, before they reach the show room) are quite prevalent. I have heard people talk before about the desirability of having a pea comb on the Rhode Island Red, but the suggestion has generally come from those who had an ax to grind; from people who felt, directly or indirectly, "the unsuccessful attempt" to land the Red in the place occupied by the Plymouth Rock and Wyandotte. A pea comb was once tried on your favorite Barred Rock, Mr. McGrew, but the people would not have it. It is foreign to the American class and has no natural place among the Rhode Island Reds. To adopt it one has to get blood from a source which vitiates the practical qualities of the Red.

If "by the place occupied by the Plymouth Rock and the Wyandotte," Mr. McGrew means *the best all-round fowl*, the Rhode Island Red surpasses them, inasmuch as its carcass, when dressed, comes nearest to the most profitable size, from 4½ to 5 pounds. Ask the market men or ask me and I'll give you names.

By the way, Mr. McGrew concedes the table quality of Reds. What bothers him is that they are not the right sort of a "bundle of feathers" to suit his idea. Nevertheless I claim that there has been more improvement in the Red from a fancier's point of view in the last four years than the Barred Plymouth Rock has made in twenty years, if the opinion of Theodore Hewes is to carry any weight. According to him they (the Barred Rocks) have gone back in nearly every quality except the disposition to fatten like a pig in two years under any sort of fairly kind treatment.

Then again Mr. McGrew has no room to talk about structural difference of Rhode Island Reds in view of those existing in that first pen of Barred Rocks at Boston in 1900, which, I understand, he judged and about which there was so much unsavory comment, owing to the varieties in shape of the birds it contained.

He says that R. I. Red eggs are smaller than those of Plymouth Rocks. In order to settle this matter he can name any charity to which he is willing that a wager should go and I will put up a few dollars that Rhode Island Reds will lay eggs either for size or number against Barred Plymouth Rocks.

All we Rhode Island Red breeders ask is that critics shall be honest and fair. The Reds do not need anybody to push them along; they do that themselves. Their inherent qualities take with all who give them a fair trial.

In what I have said I wish it to be understood that I have no particular animosity against Plymouth Rocks or Wyandottes, but since Mr. McGrew has mentioned these birds in comparison I have made my references accordingly. Both are good varieties in the hands of those who like them. So are the Rhode Island Reds. There's no justification for slinging mud at any breed, whether it be Rhode Island Reds or Jersey Blues, simply because a man does not fancy them. Poultry criticism should reach a higher plane.

*John Crowther,*
*Secretary R. I. Red Club.*
*Fall River, Mass.*

---

## THE PLACE OF ANIMAL MATTER POULTRY FOODS.

Prepared foods put on the market are not intended to displace any of the essential materials—grains and vegetables—within the poultryman's easy reach, but rather to supplement these in accordance with the object desired. Prepared foods should be recognized only in proportion as it is desired to supply a deficiency in the foods usually available on the farm. This means that the feeder should have a fair practical knowledge of the essential ingredients of food—protein, fat and carbohydrates—usually recognized by the chemist in determining the comparative value of foods.

Of these three ingredients, Protein (or flesh forming matter) is the chief from the purchaser's standpoint. The fat and carbohydrates (heat producers) are found more generally in grains and vegetables. The richest and most concentrated sources of Protein known are in dried blood and meat meal. The best dried blood should contain about 95 per cent and meat meal should average at least 60 per cent of protein.

The value of poultry bone will largely depend on its richness in protein and phosphate (bone forming matter). The best green or raw bone should contain at least 30 per cent of protein and the balance (70 per cent) should be bone forming and essential food mineral matter. This food in combination with either blood meal or meat meal is universally recognized as a valuable supplement in making balanced rations with grains, mill products and vegetables.

*W. J. Thompson, B.S.A.*
*Care Swift & Company, Union Stock Yards, Chicago, Ill.*

Published the first of each month by
GEO, G. BATES, 325 Dearborn St,, Chichago, Ill.

FRANK HECK, Editor.

Subscription price 50 cents a year in advance.

When delivered by carrier in Chicago 60 cents a year in advance.

Payment for AMERICAN POULTRY JOURNAL, when sent by mail, should be made by money order, registered letter or stamps.

Write name and address plainly, and if JOURNAL does not come regularly and promptly, write us at once.

In requesting change of address, be sure to give the old address as well as the new one. This is important.

Advertising rates will be furnished on application.

The reliability of new advertisers must be ascertained before an insertion of an ad in the columns of AMERICAN POULTRY JOURNAL can be made. This is a business matter, the justice of which is readily seen, as protection to the readers who answer advertisements.

Alway say when writing advertisers, that you saw it in the AMERICAN POULTRY JOURNAL.

### To Advertisers.

Owing to the constantly increasing work in our office and the increase in the size of AMERICAN POULTRY JOURNAL it will be necessary for us to have copy for all advertising by the 15th of any month to insure insertion in the succeeding number. We aim to have AMERICAN POULTRY JOURNAL in the hands of the readers by the 1st of each month. There is a lot of work connected with the setting of the ads, the printing, binding and mailing, of so large a publication and we have to commence early in the month. You can prevent disappointment by sending in your copy before the 15th.

### Supplement.

We have been compelled to add a sixteen-page supplement to the JOURNAL this month. This was found to be necessary at the last moment on account of the heavy increase in advertising received and in order to carry out our policy of not allowing the advertising to encroach upon the reading.

### Views of Correspondents.

We wish to call attention to the fact that in publishing the many different views of correspondents, we do not necessarily indorse them or advocate the methods suggested in many cases. Some of the most prominent and experienced authorities differ in their views upon certain subjects and we give both sides equal consideration. The views of the JOURNAL are found in the editorial columns.

### Notes of Shows.

We have hoped each month to be able to devote sufficient space the following month to publish all the notes of shows sent to us by the secretaries of the various associations, but the items have been received in such quantity as to make it absolutely impossible. H lished all received this month it would have required nearly a dozen pages and we trust that our friends will realize the position in which we are placed regarding the matter. We have not and will not omit any notices sent us but we are compelled to cut out from the notices all matter that is not vitally important. The fact that AMERICAN POULTRY JOURNAL has a national circulation and is of benefit to associations everywhere, causes these organizations all over the country to send in their notices and we are therefore flooded with them. We must treat all alike and hope that our efforts will be appreciated.

### Anniversary Number.

The January number of AMERICAN POULTRY JOURNAL will be the thirty-third anniversary number and will exceed in value all previous issues. A mass of most helpful and interesting reading matter will be placed before our readers and no one who is at all interested in Standard bred poultry can afford to miss reading this number. Among the list of special timely articles will be one upon the subject of housing, feeding and mating to get the highest percentage of fertile eggs. This article will be of the greatest value to all who want lots of eggs that will produce hardy, healthy birds. Another most valuable communication will instruct the beginner in the best methods of getting a start in the business in the shortest possible time and pointing out the road to success, thereby enabling him to avoid loss of time and money and possibly failure itself. We will also present a treatise upon the subject of advertising which will reveal the secrets of success in this important branch of the business. This article will interest and instruct every breeder who has a desire to make money and obtain high prices for his stock and eggs. We believe it to be the most complete and most valuable article upon the subject ever presented to poultrymen. All the details are intelligently discussed and the right methods contrasted with the wrong ones. This number of the JOURNAL will not only be larger and better than any previous number, but the edition will consist of several thousand extra copies and will therefore be of added benefit to our advertisers. Many new ads will begin at this time and there already are a great many requests from present advertisers for an increase of space. All who desire to use extra space in this special edition should get copy of ads to us not later than the 15th of December and as much earlier as possible.

### Colored Supplement for January.

In the next number of A. P. J. our readers wil find a grand color plate of Silver Penciled Wyandottes. This illustration will be all the more pleasing and valuable because of the fact that the variety is a new one and that unusual interest is being taken in it. The birds are Wyandotte in shape and have the color and markings of the Dark Brahma. They are a sister variety to the Partridge Wyandottes and are without doubt one of the handsomest fowls that are bred. This is the breed which attracted such widespread attention at Buffalo and which the American Poultry Association will be asked to admit to the Standard at its next meeting at Charleston, S. C., in January. The pair which we will illustrate belongs to Mr. Ezra Cornell, of Ithaca, N. Y., president of the Cornell Incubator Co. and a fancier who has been a moving spirit in the fraternity for almost a score of years. The male bird is the first prize cock at Madison Square Garden, New York, 1901; also first at the late Pan-American show at Buffalo. The female is the first prize pullet at New York, 1901, which is the only show at which she has been exhibited. These birds were bred, owned and exhibited by Mr. Cornell. The painting from which the color plate was obtained was made by Mr. Franklane L. Sewell especially for this illustration for the AMERICAN POULTRY JOURNAL. This piece of work is one of Mr. Sewell's best and latest productions, and we believe it exceeds in beauty and artistic effect all his former efforts. All poultrymen, regardless of the variety they breed, will be interested in this picture.

### The Best Breed of Layers.

An excellent study in egg production is presented in the recently published report of the records made at the experimental farms of M. K. Boyer, Hammonton, N. J. There is not a more skilled or practical poultryman in the country today than Mr. Boyer, the able editor of *A Few Hens*, and the experience of years has been put into the rearing, feeding and housing of the fowls on his plant with the sole view of demonstrating the practical qualities of the breeds and the results possible of attainment in raising poultry for market purposes. The total number of birds was 110. The period covered was from January 1 to July 1, six months, including the natural laying season and a portion of the winter season. The breeds and the number of birds were as follows: Barred Plymouth Rocks 12; White Plymouth Rocks, 13; White Wyandottes, 34; Silver Wyandottes, 1; Light Brahmas, 37; Rhode Island Reds, 10; White Leghorns, 1; White Wonders, 2. The result shows to be true, what we have always advocated and found to be true in our own experience and what the unprejudiced breeder will acknowledge is the case, namely, that any breed of fowls is just what you make it as regards laying qualities. Intelligent selection in mating and proper feeding and housing will build up a strain which will excel in egg production the average specimen of the breed. It is generally supposed that Leghorns and other Mediterranean breeds are the heaviest layers and that Brahmas, Langshans and Cochins are the poorest. The White Leghorn in this contest laid 82 eggs during the six months. The White Wyandottes show the best average record, but this can be accounted for by the fact that in starting the plant, if we remember rightly, Mr. Boyer procured birds of this variety from strains of known value as egg producers, and there are a sufficient number in the contest to enable him to arrive at something like a fair average. One White Wyandotte laid 109 eggs, one 104 and another 101. These were the three highest records, all birds competing. The six poorest layers in the White Wyandotte class laid 280 eggs, or an average of 46 and a fraction each, and the poorest of them laid 42. There is not a variety in the contest but what some individual

specimen laid more eggs than the average of the six Wyandottes. The best record made by the Barred Rocks was 101, and the poorest 41. The best Light Brahma record was 96, and the poorest 30. The best layer in the White Rock class laid 93 eggs and the poorest 34. In Rhode Island Reds it stands 93 and 35. The highest individual record for the last month was that of a White Rock hen, she having laid 20 eggs. We believe that the above analysis of the report is sufficiently lengthy to illustrate the point we make. There is a never-ending stream of "records" and articles appearing in the poultry press to show that the writers' favorite breeds are the best layers. These are misleading and the amateur should have the matter placed before him in the proper light for the reason that the supposed egg production governs in a majority of cases the selection of the varieties to be bred. We have seen beautifully prepared tables, from a theoretical standpoint, giving the number of eggs which birds of each variety will lay in a year, but they are not worth the paper upon which they are printed. If two flocks of the same variety will be taken by the reader, and one be warmly housed this winter and fed a balanced egg-producing ration, the other be less warmly housed and fed an exclusive grain diet, the force of our remarks will be demonstrated to the reader's entire satisfaction We often read of two flocks of different varieties being kept by a breeder who as he states, gives them both the same care and attention, feeds them alike and, in fact, keeps them under exactly similar conditions. One breed will lay exceedingly well, and the other will hardly pay for its keep. The keeper therefore comes to the natural conclusion that one of the varieties is far superior to the other, and he becomes an ardent advocate of the one and the enemy of the other; generally discarding it and airing the matter in some poultry journal.

Some one else may have experimented with the same two varieties, and have obtained just the opposite results. He therefore relates his success with the breed which the first party claims as a failure. The uninformed beginner does not know which to believe, and both parties are accused of malice toward the breed which has not proven successful with them. In nine cases out of ten the trouble lies in the fact that one party has, for instance, Mr. Boyer's 109 egg strain and the other has the 46 egg strain. We have seen flocks of Brahmas that would lay two to one more eggs than some flocks of Leghorns. We have seen Plymouth Rocks that would lay close to 200 eggs a year and specimens of the same breed that would not lay 50 in the same length of time. We should therefore be slow to condemn any variety or to claim our own as the great and only. The amateur who is now turning the question over in his mind and racking his brain trying to figure out which breed to adopt may as well leave the egg question out of it entirely till he has made up his mind what he wants in shape and color of plumage. After he determines that, it is time enough to look around for birds of a strain which has been bred with a view to egg production.

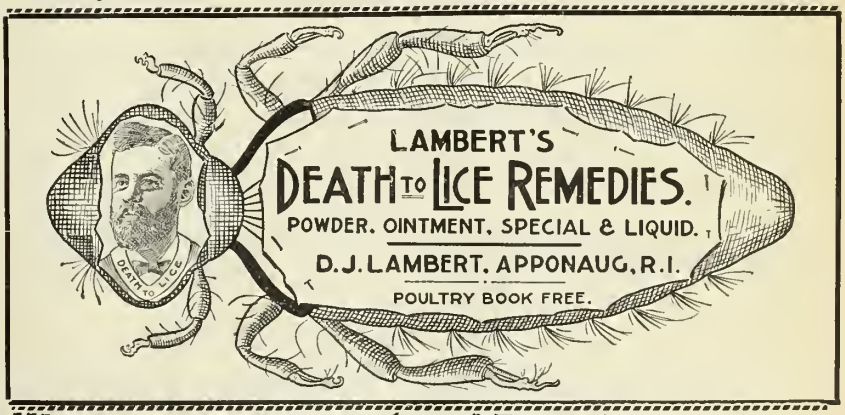
———o———

### *A Plea for Conservatism.*

Breeders of standard bred poultry need to consider more carefully the nature of the claims made for their birds when endeavoring to influence sales both in correspondence and advertising. It is not uncommon to read descriptions of birds which, if they could be substantiated, would make ideal specimens of the birds described. Such expressions as "true Plymouth Rock shape," "snow white," "solid buff" and numerous others, are misleading, to say the least. It is well to bear in mind that the perfect specimen has not yet been produced, and there are at present no indications of an early attainment of this end.

The amateur who is unfamiliar with the time, skill and patience necessary to produce our best birds, greatly underestimates the drawbacks met with, and he is encouraged in his ignorance by the extravagant claims of overzealous and unthoughtful breeders. He is led to believe that 95-point birds are plentiful and that they may be bought at ridiculously low prices. If he sends for a bird and it is not well-nigh perfect he becomes dissatisfied and trouble is the result. No one is to blame except the breeders themselves. They can do much to educate the uninformed if they will pursue the right course, and it is decidedly to their interest to do so. It is only a step from exaggeration to downright false statements, and we think that there are a large number of advertisers who would find it exceedingly difficult to produce the goods if called upon to make good their claims.

Hundreds of breeders have one or possibly a half dozen birds that are about as near perfection as it is possible to get the feathered tribe, but that does not justify claiming the earth for the flock. The few top-notch specimens to be found in any breeder's yard are not for sale unless he intends going out of business or perchance he is offered an exorbitant price and knows that he can produce other birds as good. An intending purchaser should not be led to expect more than he will get. Goodness knows he expects enough, and any statements made by the seller relative to the value of any section of a bird will be overdrawn rather than underestimated by the buyer, and this should be remembered. The buyer also should remember that highest quality in exhibition birds is not easily obtained, and when found it need not go begging for buyers at good prices. One of the most deplorable evils is the tendency to high scores. We have seen cases where, under existing conditions the judge was justified in scoring a bird 96 or possibly 96½ points, but under a literal and strict interpretation of the Standard, the bird never lived that could score 96 honest points and those to be found in the showrooms this season that can be made to legitimately score 95 points will be few and far between. We do not censure the judges who are in the habit of giving these high scores, for, as we said, there may be extenuating circumstances in some cases. A judge may see that his fellow-worker is lenient almost to the point of erring, and feel that in justice to the exhibitor he should be likewise lenient on the strength of the policy "when you are in Rome, do as Rome does." The language of the Standard is also faulty in some places, and, while the ideas of the framers of the book may be plain, the wording may be susceptible of more than one interpretation, and thus give a bird the benefit of a doubt. If there is anything that makes a breeder "sore" it is to have a competitor exhibit under one of these liberal judges and advertise high scores in competition with his own low scores obtained under a more conservative judge. The conservative breeder and the conservative judge are the ones who win out in the long run.



**We Have the Biggest and Best Flock of White Plymouth Rocks in This Country.**

We invite comparison **in either Show or Practical Qualities.** Our Birds are **White,** and have yellow legs and skins. The females are persistent layers, while the males are the best of market birds. **We Have Won Many of the Best Premiums** in the biggest shows, and have sent winners to all parts of the country. **We Have About a Thousand Sale Birds,** and shall be pleased to have you write and ask questions about them.

*JUDGES IN OUR $50 PRIZE ARTICLE CONTEST.*

# WINNERS IN THE CONTEST.

First prize was awarded to Jas. Shackleton. Short Hill, N. J., who wrote upon the subject of "How to Get the Highest Percentage of Fertile Eggs."

Second prize was awarded to J. E. Todd, Grand Rapids, Mich. Mr. Todd wrote upon the subject of "Advertising."

Third prize was awarded to Chas. M. Brown, Ft. Worth, Texas; who wrote upon the subject of "Incubators and their Management."

We will endeavor to present half-tone portraits of the winners in the January number.

## Editor Robinson Replies to Mr. Huffaker.

*Editor of the American Poultry Journal.*

DEAR SIR:—When the October issue of the AMERICAN POULTRY JOURNAL was received I noticed Mr. E. C. Huffaker's article entitled "The Inconsistency of Facts," but have not, until now, had time to give the matter attention.

I must confess that I am as much at a loss to understand either why a man of Mr. Huffaker's education and training should display such feeling in a discussion of this kind or how he was able to make such a perversion of my words as he does when he says, "Note particularly that the editor declares most positively that my proposition in regard to the depreciation in quality is certainly not correct."

As he had just quoted what I did say, it seems to me not reasonable to suppose that he did not know he was making an omission which left what he did say a misquotation. What I did say was: "Is either proposition correct *if made of general application?*" That in regard to depreciation of quality certainly is not."

As Mr. Huffaker's charge of inconsistency rests upon a seemingly willful perversion of my words, I do not feel that there is any occasion to attempt a reconciliation of different statements. If he, without perverting meanings, will point out what he considers inconsistencies in statements of mine, I will either show that he is wrong or admit that he is right and thank him for calling attention to the matter. Meantime, I beg leave to suggest to him that the only way he can straighten out his own inconsistent statements is by admitting that each was partial, and that when both matters are stated fully the seeming inconsistency disappears. In making such admission, he will virtually recognize the consistency of my statements. The explanation he has made does not explain.

As I read Mr. Huffaker's article it strikes me as very singular that in the same article in which he tries to build up a charge of inconsistency against me and by various hints and inuendoes to convey the idea that I am an untrustworthy person, he should twice use statements of mine as proof of his assertions. This seems to me to show still another sort of inconsistency on his part. It also suggests to me that he is not very familiar with his subject, if he cannot find corroboration of his views without going to a source which he professes to discredit. Either that or the charge of inconsistency is not made in good faith. It pains me to see a man reduced to such straits in argument.

A correct version of that statement of mine which he misquoted leaves Mr. Huffaker's article as a whole without point, but there are several things in it which, considered independently, seem worthy of comment.

Writing of the alleged doubling of the egg yield of the Italian hen transported to the north of Europe he says: "The evidence is not conclusive, perhaps not very strong or even weak, but on the other hand the only rebutting evidence we have is that the editor of *Farm-Poultry* finds it does not agree with what he sees in America." Will Mr. H. kindly produce evidence that Italian hens in the north of Europe either double their yield or diminish it? He admits that there are no facts to be had. Then as there are facts in abundance indicating that this theory is incorrect—not to say absurd, which is really the better description of it—the burden of proof would seem to rest with those who advance or use the view which is absolutely unsupported by any evidence worthy the name.

But to me the most interesting part of Mr. H.'s contribution is the little lecture at the end. The illustration which he introduces with the observation that, "basing our conclusions on the supposed unreasonableness of facts is a very unsafe proceeding," is not a happy one, for the "Van Dreser affair" (as he calls it) was one in which the unreasonable things did not turn out to be "substantially correct." If Mr. H. thinks they did I would suggest that he sit down and read in order, (1) the original account of the Van Dreser farm in the *Practical Farmer;* (2) the criticism of it in *Farm Poultry;* (3) the Farm-Poultry account of the farm; (4) the account in the *Practical Farmer* of Mr. Hunter's visit

to the farm; (5) the original account of the farm in the *Practical Farmer* again.

The dissertation on editorial duty also strikes me as unique. *"Especially must an editor accept many statements and proceed upon the assumption of their accuracy, which he in his own mind discredits."*

Now I have known some editors, among them some editors of poultry papers, who followed that policy—though so far as I am aware none of them felt that any necessity compelled them to it—but from what I have seen of the results I would not think it a good policy to follow and would avoid it even if Mr. H.'s indorsement of it had any weight with me.

I find that after throwing out all that I am inclined to discredit, much still remains, which it is better to dispose of in some other way than by accepting it as accurate. Even then I am not always as successful as I want to be in excluding untrustworthy or misleading matter.

Another item of interest from Mr. H. is the sweeping statement, "All progress comes through the endeavor to reconcile apparently irreconcilable facts." According to Mr. H.'s way of reasoning, it is my duty if I discredit that statement, to disprove it. According to my way of regarding such matters it is his duty, in presenting such an unreasonable generalization, to prove it, and mine, if I disbelieve it, and the matter is of sufficient importance, to challenge it.

It is largely due to the general failure to require proof of such assertions that (to quote Mr. Huffaker) "an erroneous notion often gets worked into the mass of accepted facts and theories, and to get rid of it at times requires the labor of a generation of men."

*John H. Robinson.*

*Boston, Mass., Oct. 28, 1901.*

## THOSE LEGHORN PULLETS FROM ITALY.

*Editor American Poultry Journal.*

My attention has been called to an article by Mr. E. C. Huffaker, of Tennessee, in the October A. P. J., in which Mr. Huffaker replies to some criticisms made by Editor Robinson, of *Farm Poultry*, upon a previous article in the July A. P. J. In the controversy between Mr. Huffaker and Editor Robinson my name is quoted as the authority for the statement as to the remarkable increase in egg yield of pullets brought to Belgium from Italy, and I desire to call the attention of both the above gentlemen to the fact that I simply quoted M. Van der Snickt, of Brussels, editor of *Chasse a Peche*, as authority for the statement. In *Farm Poultry* for July 15, 1897, in an article entitled "A Little Tour in Belgium," I wrote: "We were told that these Italian pullets were splendid layers and lay good, large eggs. M. Van der Snickt told us that they laid better in Belgium than if they remained in Italy, following out the law of nature by which organic life makes a great effort to perpetuate itself. The birds insinctively respond to the changed conditions of being moved from a warm and comparatively dry country to a colder, moister country, recognizing that they themselves cannot become acclimated there, and expending their physical energies in producing eggs—the effort of nature to perpetuate itself. In that effort the birds exhaust themselves the first year, and should not be kept longer than that; if kept over to the second year they are very poor layers."

This makes it clear that M. Van der Snickt is the authority quoted and that I was only the medium through which the statement came to American readers, hence my relation to it is practically analogous to that of a newspaper which publishes a writer's statements. Unless my memory is at fault, I explained this in the "talk" with Mr. Huffaker to which he refers. I would like to say, also, that M. Van der Snickt is a gentleman of long experience and a close and painstaking observer, one of the most intelligent and careful poultry writers and editors it has ever been my good fortune to meet, and his statements were well supported by illustrative anecdotes and quotations. Very respectfully,

*Philadelphia, Pa.* *A. F. Hunter.*

# The Reliable Poultry Journal

*Published at Quincy, Illinois,*

HAS BOUGHT THESE TWO WHOLE PAGES OF AMERICAN POULTRY JOURNAL

IN HOPES OF

## INDUCING YOU, READER,

## TO SEND FOR A FREE SAMPLE COPY

**We have spent over $150 to get you to send for this free sample of the RELIABLE POULTRY JOURNAL. Will you not reciprocate by spending one cent, the cost of a postal card?** This card, with your name and address on it will bring you **Free by Mail,** a sample copy (*your choice*) of one of our **Big Special, Mid-winter Editions,** containing fac-simile color plate reproductions of **Recent Oil Paintings,** made exclusively for us by the world's greatest poultry artist, Franklane L. Sewell. The November issue, 1901, contains a **Color Plate Frontispiece** of a pair of **Prize-Winning White Leghorns;** the December issue, 1901, a **Color Plate Frontispiece** of a pair of **Prize-Winning White Plymouth Rocks;** and the January issue, 1902, will contain a **Color Plate Frontispiece** of a pair of prize-winning **Golden Penciled Wyandottes. Do Us The Favor** to send your name and address, *stating which number you prefer* as a free sample and it will be mailed promptly.

---

**THE RELIABLE POULTRY JOURNAL** has just begun a great work that should mean much to the poultry business as a whole. **This work is nothing less than bringing down to date in printed form, the best there is in poultry culture.** We have enlisted for this work the services of the best men available, experts in their line, every one of them. On this page is shown recent portraits of **the men who now are making the Reliable Poultry Journal.** For the work at hand we could not have selected a more capable staff of associate editors.

**MR. FRANKLANE L. SEWELL,** conceded to be **the world's foremost poultry artist** and a writer of singular ability, is now permanently associated with the Reliable Poultry Journal as artist and illustrator. Hereafter the product of his pen and brush **will be found exclusively in the Reliable Poultry Journal** and in the books published by the Reliable Poultry Journal Company. The poultry public may safely count on Mr. Sewell for more and better work than ever before.

**MR. I. K. FELCH, the "Nestor" of Poultry Culture,** is preparing for early numbers of the Reliable Poultry Journal a series of comprehensive articles on the history, development, present merit, true characteristics and proper mating of Brahmas, Plymouth Rocks, Langshans, Wyandottes and Leghorns, including pedigree, breeding and accurate record keeping, **all to be fully illustrated by Mr. Sewell.** These articles are meant to be Mr. Felch's legacy to later generations of poultrymen—they will be that good.

**MR. A. F. HUNTER,** (for ten years Editor of Farm-Poultry) is devoting special attention to the profitable production of commercial or market poultry. In the October number appeared a leading article by him, entitled "Profitable Egg Farming," with eight illustrations, reporting a special visit to the Van Dresser Egg Farm, Cobleskill, N. Y.; in the November number appeared another leading article entitled "Profitable Broiler Raising," with three illustrations, including a bird's-eye view, reporting a special visit to the Twining Broiler Farm, located near Philadelphia, Pa.; and in the December number appears still another leading article by Mr. Hunter, with six illustrations, reporting a special visit to the famous Mary L. Broiler and Egg Plant, Sidney, O., where six hundred squab broilers are marketed per day and where three thousand laying hens are kept. **Mr. Hunter's best poultry writings now appear regularly in the Reliable Poultry Journal.**

**MR. THEO. HEWES, assisted by Mr. Sewell,** is continuing his series of instructive articles on **the judging, scoring and successful mating** of the standard varieties **with copyrighted Hewes charts,** made by Mr. Sewell, illustrating and explaining what the Standard requires in all of the popular varieties, including shape outlines and the barring, lacing, penciling and striping of feathers, treated section by section. In October number was begun **his series on the Barred Plymouth Rocks,** running through three numbers **with thirty-six illustrations by Mr. Sewell.** Beginning with the February number, Mr. Hewes will treat the Light Brahmas in

the same manner. Thus far he has handled the Silver Laced Wyandottes and Brown Leghorns. Mr. Hewes is now regularly employed on the Reliable Poultry Journal, **devoting his undivided time and efforts** to the interests of its patrons. During the past few months he has traveled thousands of miles, east and west, **visiting the yards of well-known poultrymen,** and reporting in his original way what he saw and heard.

MR. GEO. H. POLLARD is preparing a **notable series of articles,** eighteen to twenty-four in number, that are to cover all branches of the poultry business, divided about as follows: **Duck Growing, Broiler Raising, Egg Farming, The Production of Winter Chickens or Roasters, Capons and Caponizing, The Breeding of Standard or Exhibition Poultry and the Management of Combination Poultry Plants.** Each subject will be treated in one to three articles, all to be well illustrated by halftones made from photographs taken on poultry plants in successful operation.

MR. W. S. RUSSELL, than whom there is no more painstaking and popular poultry judge, **is now contributing the best of his services to the Reliable Poultry Journal,** including reports of poultry shows and of visits made by him to the plants of well-known and successful poultrymen **throughout the central west.**

MR. ROBT. H. ESSEX, a poultryman of many years' experience, also a poultry judge and lecturer of acknowledged ability, is office manager for the Reliable Poultry Journal Company. He conducts regularly the "Questions and Answers" department, and is presenting to the readers **highly instructive articles on food problems** and the valuable work being done on **the Experiment Farms of this country and Canada.**

Men Who Make The Reliable Poultry Journal.

**THE RESULTS OF THE COMBINED EFFORTS** of these men will be a monthly poultry journal far in advance of anything the Reliable Poultry Journal has attempted thus far. The average **number of reading pages** has been increased from **forty odd to fifty odd,** or about twenty-five per cent. In future, as heretofore, expense will not be spared for heavy-weight, high quality paper and the best illustrations the market affords.

**THE SUBSCRIPTION PRICE** of the **RELIABLE POULTRY JOURNAL CONTINUES AT 50 CENTS PER YEAR.** If you, reader, are interested in the great work the Reliable Poultry Journal and its staff of editors have undertaken, please do us the honor to send for a **FREE SAMPLE COPY. This sample copy will speak for itself.** Or, if you wish to save time, permit us to say that you will be **perfectly safe in sending in your subscription** without going to the extra trouble of getting a sample copy.

**We suggest that you have your subscription begin** with the November, 1901 number, so that you will obtain fac-simile reproductions of **all three of the oil paintings** made by Mr. Sewell. **These three color plate inserts alone cost this Company upwards of $1,600.** Please send for sample copy promptly, (**or, better still, mail us your subscription**) before any one of these three big special color plate editions is exhausted.

**Address Reliable Poultry Journal Publishing Co.**
**BOX 5, QUINCY, ILLINOIS.**

# Poultry on City or Villags Lots.

We frequently hear this or a similar remark: "If I lived in town I would not keep chickens, especially fancy ones." It sounded all right to us, but lately we have changed our mind. While everywhere it is said, "Give the fowls range and plenty of it," we have found that unlimited freedom does not always produce the best birds. We will not deny tbat with plenty of room a fowl will do better, yet birds in close confinement have been successful in the show room. One thing is sure—that it requires care to bring out the bird that is not allowed to meander over plenty of ground.

Scene on the plant of H. J. Blanchard, Groton, N. Y

We bave visited a few places where the birds have not been allowed their full liberty.

JOS. P. HILLDORFER, CENTER AVENUE, ALLEGHENY, PA.

Tbis yard is on a sloping hillside, very steep in places, and to an ordinary observer unfit for the business wbich is being so successfully conducted upon it. The lot is 160x240, or about three-quarters of an acre. It is entirely occupied by bouses and yards. One hundred and fifty young birds are raised. In all 225 birds are kept on tbe premises. The yards have no grass. They are covered with a coarse gravel. In many cases we found birds which bad been confined in a coop less than twenty-four inches square all summer. These birds were in perfect condition, in fact, looked better than many fowls we have seen which had ten acres of range. Not only that, but these birds were Black Minorcas. A few White Wyandottes are kept. There is no secret about it. One word answers all—*care*. Mr. Hilldorfer is a butcher. Every day he secures tbe scraps of meats, vegetables, etc., in the market. These are boiled and constitute the principal feed of the fowls. This is not fed in a washy state. After thoroughly cooling it is made into a dry mash. Every house is cleaned daily. Owing to the inclemency of the weather we were not able to secure the photographs desired, but we are not slow in saying that Mr. Hilldorfer has some of as good Minorcas as there are in the country. His winnings at the Pan-American were: Hen, 1st, 2nd; cockerel, 2nd, 3rd; pullet, 2nd, 3rd; pen, 1st. All raised on a city lot.

T. TOOGOOD & SON, ROCHESTER, N. Y.

The day we visited this plant we were compelled to slight it some owing to a steady downpour of rain. The son—William—who is so well known to many of the poultry fraternity, has been sick since his return from tbe Pan-American. We found him much improved. He hopes to be out before many days. These fanciers have made quite an enviable record the past summer at the Syracuse State Fair and the Pan-American on their White Plymouth Rocks and Pheasants. We could not handle tbe birds, owing to the rain, but we saw quality of the highest degree. At Syracuse they won as follows, viz.: 2nd on White Rock cock, 1st on Golden Silver and English Pheasants and 2nd on any other variety. Pan-American: White Plymouth Rock cockerel, 3rd; pullet, 6th; pen, 4th; Golden Pheasants, male, 2d; female, 4th; Silver Pheasants, male, 1st; female, 1st. All prizes on English and Reeves. We saw some very promising youngsters in the Pheasants. Tbis is the largest and best collection we have seen in our travels. Messrs. Toogood keep Bantams for hatching tbe Pheasants. They believe in good stock, so their Bantams are exhibition birds.

H. E. BENEDICT, ELMIRA, N. Y.

While tbis Buff Plymouth Rock veteran keeps some of his old stock on a city lot, we can not classify him that way, as his birds are nearly all raised in the country. We stopped long enough at his home to take just a look at some old birds that were good and some promising youngsters. Mr. Benedict bad not brought in his youngsters, but what we saw were of the right color. It is always a pleasure to meet such a fancier. His loyalty to tbe club of which be has been an able president has meant much to the upbuilding of the Buff Rocks.

W. W. BABCOCK, CAMPBELL, N. Y.

For many years Mr. Babcock had a large place breeding several yarieties. At present he is living in town and making a specialty of Black and Rose Comb White Leghorns. His birds are above the average, as his winnings in good competition at the Pan-American will show: Blacks, cock, 2nd, 3rd; cockerel, 3rd, 5th, 7th; pullet, 2nd, 5th. Rose-comb White cockerel, 1st; pullet, 1st.

Mr. Babcock has many promising birds to sell. He will be on hand at some of the large shows this winter. Having given up all other varieties, be has two splendid pens of Hamburgs for sale. We can recommand tbe birds.

W. J. STORKE, GROTON, N. Y.

Real winter had visited this section and at the time of our visit the snow was from six to eight inches deep. We were up early and arrived at the home of Mr. Storke before he had finished breakfast. Mr. Storke has ten buildings devoted exclusively to Single Comb White Leghorns. The eggs are sold to a private, select trade in New York City, realizing the shipper a yearly average of 36 cents a dozen. In the summer time it requires the services of three men to handle the business. Each of the ten houses contains sixty laying hens. Not only does Mr. Storke handle a good market trade but he bas a splendid patronage in the fancy. At the time of our visit he was ready to ship ten birds to St. James, Auckland, New Zealand. We saw many youngsters, cockerels and pullets, that looked very promising.

H. J. BLANCHARD, GROTON, N. Y.

We were pressed for time and could not see as much of this plant as we would like. Everything being covered with snow, it was difficult and disagreeable to get around. We did see enough to promise you, fellow readers, that at some future time we will give you a description of what we call a first class money making poultry plant. Mr. Blanchard keeps 1,000 laying bens. Tbis year he has 1,500 young birds. The eggs are sold to a very select and refined trade in New York City at a fancy figure. Every egg is fresh.

Scene on the plant of H. J. Blanchard, Groton, N Y.

The son is only following in the footsteps of his father who had sold eggs in the New York markets for twenty years. While the deceased Mr. Blanchard never catered to the fancy we find the son has sold good exhibition birds at nice figures. Recently a cock bird was shipped which brought $10; a trio

to Wisconsin realized $15; twenty-five utility breeders brought $75. Mr. Blanchard told us he cleared $2,000 a year. This is saying a good deal as his buildings are very superior to the average poultry man's and have been built just as the income increased; that is, a certain amount of the gross earnings is used for improvements. The present season a $1,000 water system is being laid. A large building containing a one hundred gallon cement tank is the reservoir. The poultry houses are sixteen by forty four fect. Tbe walls are double with a four-inch air space. As an extra precaution, paper sheating is also used. The loft is filled with straw so that the building is practically frost proof. Tbe glass in the windows are double with a small air space between. The drinking pails are very cleverly protected by a rack built of slats which run to a point so the fowls can not roost on them. We saw over 500 cockerels and pullets in one house. All of them looked hale and hearty. Not a sick one to be seen. There was good quality on every side. In fact, birds could be selected from this flock that would win in the best of competition. Every house was painted red. We saw that plenty of enterprise had been used and realized that we had visited a poultry plant that had both market and fancy trade, a combination which was a real success.

CYPHERS INCUBATOR CO., BUFFALO, N. Y.

We spent a short time in visiting this firm which has just moved into their new quarters. While matters are a little unsettled, which might be expected in moving so large a business, we found workmen busy building machines by the hundreds. The company has a large department devoted to preparing "Cut Clover." We could hardly realize that so much is fed. Everybody was busy and hustling as business is more promising this year than ever.

DES MOINES INCUBATOR CO., BUFFALO, N. Y.

We found the eastern manager, Mr. W. C. Denny, in his office handling his mail, which we could see was quite a large amount. This is a new venture with this western house and we are sure success will meet their efforts as tbe machine is a good one and Mr. Denny is one of the most competent salesmen in the ranks. A car load of goods have been received so patrons can secure the article wanted near home, saving a great amount of freight. A full line of supplies will be handled. Several well known products will be controlled exclusively by this house. Several of the large shows will be visited this winter by Mr. Denny.

HARVEY SEED CO., BUFFALO, N. Y.

This is one of the oldest supply houses in the country. They were the pioneers in poultry journal advertising. Their trade is confined to no section of the country. One of the best products is the cut clover. Their goods are very meritorious. Supplies of all sorts are handled, besides grains, implements, etc.

JAS. FORSYTH, OWEGO, N. Y.

Nearly every breeder is familiar with the name of "Riverside Farm." If that has slipped his mind then "Jimmy" Forsyth has only to be mentioned. How quick will he remember the great, jovial, free hearted breeder who has been in the front ranks as a fancier for so long a term of years. The name "Riverside" is used because the farm is so near the river. Tbis soon will be changed as Mr. Forsyth now owns several hundred acres of land close to Owego. Already a model dairy farm is built and in operation. The new buildings for the poultry will be ready for occupancy by spring. On a recent trip to the poultry farm we were favorably impressed by the neat, convenient and ample houses and yards. While it is to be regretted that the same will be moved we are sure the new ones will be more nearly perfection. While the owner has plenty of enthusiasm his able and competent manager, Alfred Moss, deserves mention. Stock from Riverside Farm will be seen at the leading shows this winter.

W. B. GIBSON & SONS.

The first day of real winter found us at West Alexandria, Pa. Our object was to see how Barred Plymouth Rocks are bred by Messrs. Gibson & Sons. We found "Squire" Gibson at home. After a cordial welcome and a half hour's chicken talk we were invited to visit the plant. This we found in the village, nicely located on an ideal place. The first house examined contained the power, supply and feed rooms. Everytbing was in good order, nicely kept and while not expensive was very complete. The boiler furnished hot water for cooking. The morning air was cold and raw, hence the birds were not as spry as they would have been on a nice sunny day. The birds had not been culled, hence we had a chance of seeing the offspring just as they had been raised. It would have done any Barred Rock enthusiast good to have examined these birds. The pullets were in two or three flocks, while the cockerels were in even more yards. The color was very good; young birds large and barring as good as the best. Every yard is large, well laid in grass, and the houses are well built, roomy, and so constructed that draughts are not prevalent. Young trees have furnished abundant shade. We found five houses each 18x8 feet, with a front of 9½, with a rear of 6½ feet. A door and window is in each front, while the small door through which the fowls pass is protected by a board on two sides. We consider this a very ingenious device and is worthy of adoption by all who contemplate building.

The stock house is 12x32 fcet, and a brooder house of the same size comprise the plant. Taking the plant as a whole, we do not hesitate to say that it is one of the best equipped with supplies and birds of any in the country.

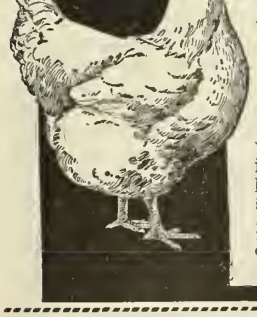
This firm raised about 1,200 young birds this year. They are now making

A bunch of Barred Plymouth Rocks as bred by W. B. Gibson & Sons, West Alexander, Pa.

preparation for the coming year which we hope will be even a greater success than the past, as it is deserved.

B. C. SMITH, ELMIRA, N. Y.

We have seen quite a few poultry farms which we would like to own, but none have been quite so enticing as this poultry and Belgian hare domicile. Situated along the city street car tracks, just in the suburbs, where fresh, pure air is always obtainable, are a few of the conditions which make the plant desirable. In the barn we found a complete rabbitry. We examined several of the animals. They were in good condition and many showed merit of a high order. In the basement or cellar of the barn is another rabbitry. This makes a first-class place for the hares. The poultry house adjoins the barn and is one of



**Pan American Winners.**

At the Buffalo Poultry Show, the greatest ever held in America, in strong competition with birds from the East and West, my

**White Wyandottes**

won 1st on cock, 8th on hen, 2nd on pen, special for best cock, special for best shaped male. I have hundreds of birds for sale from this kind of stock, all farm raised, large and vigorous. They are **right** in shape and color. They will win for you. They will make money for you. The Majestic Strain White Wyandottes lead all others. Write to-day for handsome free catalogue. Prices comparatively low. Satisfaction guaranteed in every case. No eggs for sale.

the buildings which can be called complete. The building is 180 feet long, 16 feet wide, with a 3-foot alleyway. This walk way is boarded to the ceiling, so that no draught can possibly reach the birds. The pens are also partitioned by solid boarded walls, so that each pen is a house of itself, and a door from the alleyway leads into each pen. The roosts can be cleaned and eggs gathered from the aisle. This is arranged by doors. The floors are cement and covered with litter. Each yard is 100x16 feet. The fences are built of netting nicely put up with a board at the bottom. Mr. Smith breeds White Wyandottes, Rose Comb White Leghorns and Belgian hares. His reputation is not confined to the United States alone. He has lately sent an order of $175 worth of White Wyandottes to Germany. At the Pan-American he entered five head of Belgian hares, winning one second, two thirds, one fourth. Four prizes on five head in a competition of 360 head is a very good record. Mr. Smith has about 400 Belgians for sale, but his supply of fowls is limited. The birds he has for sale, however, are strictly high grade and will please customers.

JUDD H. JOHNSON, ELMIRA, N. Y.

Mr. Johnson is in the coal business and the cold weather was making things lively for him; when we reached his office we found him quite busy. Finally a leisure moment came and we talked chicken principally. Single Comb Brown Leghorns are not only a hobby, but a real success with Mr. Johnson. He has made a sale of 125 birds in one order, which is a good record. During our chicken talk we learned that this has been a very successful year, especially for pullets and pullet bred cockerels. Mr. Johnson has over 200 young birds to sell.

G. M. DIVEN, ELMIRA, N. Y.

The last shades of evening were falling when we reached the barn lot of this noted Barred Plymouth Rock hustler and we were surprised at the spectacle before us. The cockerels had just received their last meal for the day and as the waning rays of light struck the barring we could not help becoming enthusiastic in our praise of his birds. Mr. Diven is not an amateur by any means. His matings are carefully made. This has been a successful year for him. The young stock is rounding to in fine form. Mr. Diven has his eye on some of the large shows and he will be royally welcomed in the Barred Rock alley as he is the type of breeder which is a credit to the poultry fraternity. Not only will the owner be welcomed, but his birds will bear watching. *C. J. Ross.*

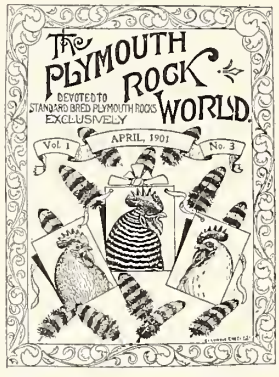
Wisconsin Poultry Journal



The above illustrations represent the cover pages of the latest purchases of the AMERICAN POULTRY JOURNAL. The purchase of the *Plymouth Rock World* was announced briefly a short time ago. *Poultry and Belgian Hare Pointers* was recently combined with the *Wisconsin Poultry Journal* and this purchase really means the acquisition of three publications. This adds a considerable number of subscribers and advertisers to our list and will enable us to make AMERICAN POULTRY JOURNAL more helpful to each.

All contracts for advertising will be taken care of by A. P. J. Subscribers will receive this journal each month for such time as they have paid to the other three publications, and those who are already subscribers to A. P. J. will have their subscriptions extended. To both subscribers and advertisers we desire to state that we will at all times endeavor to give you such service as will justify a continuance of your patronage, and we are pleased to add you to the already large family of A. P. J. readers and advertisers. We are arranging to greatly enlarge our field in every way and new plans which are to be adopted from time to time will make AMERICAN POULTRY JOURNAL all that a representative publication of the kind should be and will make it of undisputed value and of undoubted service to every breeder of poultry in the land. The liberal and undivided support now being accorded the JOURNAL by a majority of poultrymen everywhere is evidence of still greater results in the future.

# The Short Route to Success

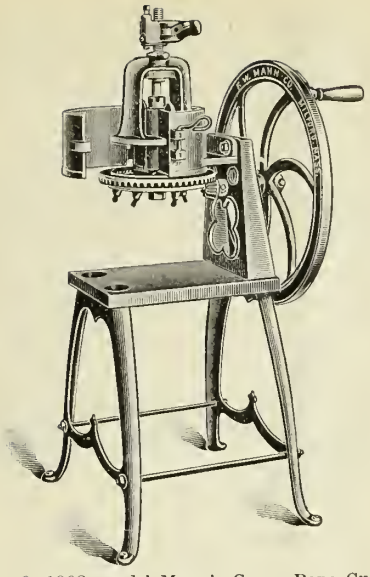
Our new book "Why Poultry Pays and How to Make It Pay," will tell you what you want to know and what you must know if you succeed with poultry. The book was written by Morgan Bates, who was for 14 years editor of **American Poultry Journal.** It is the newest book of the kind and has been pronounced by expert poultrymen to be the

**MOST COMPLETE AND THOROUGH TREATISE ON THE POULTRY BUSINESS**

which has thus far appeared. Chapters are devoted to various subjects, and just the points you desire to know are easily found. It tells how to start and how to keep going right after you have started. It instructs its readers in the methods of feeding and the best foods for layers, breeders and exhibition birds. It has chapters on "Diseases of Poultry," "Poultry Houses and Fixtures," "Success With Incubators," "Success With Brooders," and, in fact, covers every phase of the question. It is a complete and practical guide and directory to the best methods which have brought success to thousands of poultrymen. **It is a school for the amateur and a help to the expert.**

**GRAND SPECIAL OFFER** The regular price of this book is 50 cents. We will send it to you and give you a 12 months' subscription to American Poultry Journal for 60 cents, or the book will be given free for four subscriptions at the regular price of 50 cents.

Address **AMERICAN POULTRY JOURNAL, 325 Dearborn Street, CHICAGO, ILL.**



No. 9, 1902, model Mann's Green Bone Cutter.

Mann's 1902 Model Bone Cutter, which has successfully solved the bone cutting problem.

Every one who has had much of it to do knows that bone cutting has not been easy work, and that often it has been a task to be dreaded, even by those who knew best the great value of cut bone as a food. How to reduce the labor and remove this dread was the problem that confronted the manufacturer.

The difficulty had been to find some way to control the power or strength required to operate a bone cutter, making it possible for a slight, frail body to use it. The F. W. Mann Company has studied the problem for fifteen years and has at last successfully solved it. They first tried the hand feed, one hand doing the turning, the other holding the feed. At that time it was the best there was, but the feed hand would get tired, almost as tired as the one turning. That gave way to the automatic feed, which fed itself and left both hands free, making the work much easier. But automatic feeds had their drawbacks, too, notwithstanding they were infinitely better than the hand feed. The trouble was that the automatic feed would push the bone forward uniformly, forcing a hard bone along just as fast as a softer one, the knives cutting off as big a chip on one as the other, requiring much more strength for the hard bone, and, of course, tiring the operator more.

It was necessary to overcome this unequal strain. It took months and years of experiment, but at last the F. W. Mann Company hit upon the idea. They found that the feed must not be regular, that when cutting hard bones they should taking a lighter chip on the hard bones they cut just as easy as the soft ones.

Their 1902 Models all have this ingenious feeding device. It can be set for a child, a little girl, and she will cut a fair quantity of fine poultry food. Then by simply turning the screw which controls the governor it can be set to suit the strength of a vigorous boy, who in five minutes may cut as much as the girl cut in a quarter of an hour. By another turn of the screw it may be set to suit a man's strength, who will cut five times as much as the boy. By applying steam or other power it can be multiplied again by five or more. In other words, the capacity in every case is suited to the operator's strength. You can cut as rapidly as you like, and never need overtax yourself, for whether the bones are hard or soft, the machine turns with the same ease, the governing device seeing to it that soft bones are fed up to the knives faster than the hard ones.

This device is patented. No other type has it. It places Mann's pre-eminently at the head. Mann's does not waste the meat or gristle. There are no dangerous splinters to threaten the life of your fowls. Everything is cut without waste, and remarkably easy, considering the hard nature of bone.

Space forbids mention of the many other improvements, the open hinged hopper, extra table room to catch the bone, and the many other new features introduced by the F. W. Mann Company, Box 56, Milford, Mass. Their handsome new catalogue is free for the asking and explains all.

The next exhibition of the Nashua, Iowa, Poultry & Pet Stock Association will be held January 10-14, 1902. The management is working to make this show one of the largest in the state, and the indications are that they will succeed in their effort. A large number of valuable special prizes will be awarded, and among the lot are four silver cups. Premium list of the show is now ready for distribution.

One hundred anl fifty eggs per year is a fair record. There are more hens laying less than 150 than there are laying more.

**How to Build Poultry ..Houses..**

THE NEWEST, BEST AND MOST COMPLETE BOOK OF INSTRUCTIONS ON HOW TO BUILD POULTRY HOUSES, FIXTURES, INCUBATOR HOUSES, Etc.

Half the success with poultry is in proper housing. Any old thing with a roof will not bring best results. Many people fail for this reason and wonder why it is. This book does away with all experimenting. You don't have to guess at anytning. You get the results of years of experience and thousands of dollars spent in trying different plans of houses. There is no worrying, no scheming, no doubt, about the proper amount of space and interior arrangement. Everything is illustrated and thoroughly explained. The value of this book cannot be appreciated without a perusal of it. **It is of great value to the small breeder with a few fowls, and to the large breeder with his hundreds.** No time or expense has been spared to make it complete. Price 50 cents, postage paid.

This book will be given with a 12 months' subscription to American Poultry Journal for 60c, or will be given free for four subscriptions.

Address AMERICAN POULTRY JOURNAL, - - 325 Dearborn Street, CHICAGO, ILL.

# The BELGIAN HARE.

DISEASES AND TREATMENT.

The Belgian hare is not prone to disease, and when kept in dry, well ventilated and clean quarters and properly fed is not often attacked. However, under the most favorable conditions and when given what we deem careful attention, diseases sometimes occur. The first thing to he done is to ascertain, if possihle, the cause. It is well to remove the animal if with others to a separate hutch or inclosure, and especially so if the disease is infectious or there is any likelihood of its being so. Isolation from healthy stock is important, as neglect in some cases would cause great loss which would otherwise be avoided. We shall only touch upon the ailments common to the hare. No ironclad rule can he laid down regarding treatment and remedies, and as it is difficult to describe the symptoms of some rare diseases, and as it would require an exhaustive article and the use of technical terms, it would hardly come within our province.

SNUFFLES.—This disease seems to be one of the most prevalent, and especially hutches. While it is not considered fatal, it will, if not given attention and its course checked, result in death. The symptoms are so pronounced that it is not difficult to discover. Sneezing or coughing, followed hy a discharge from the nose of a white, glutinous matter of a variable thickness, is an indication.

A slight cold will sometimes develop into a case of snuffles, and for this reason we would advise one to notice particularly when any indication of this kind appears, and to give it immediate attention, as a drop of cure taken in time is more effective than a barrelful when the disease becomes fully developed. There are a number of remedies for this disease, but we give here a few that are simple, easily administered and that have proved effective:

*Treatment.*—Keep the afflicted animal in a cool, airy place, free from draughts. Keep the nose and forelegs perfectly clean by washing with carbolic soap. Use Lacto-Naphthol, a drop or two in each nostril. If the animal sneezes violently and ejects the mucus in the head or throat, as is most usually the case, wipe the nose and feet thoroughly clean and apply again. This treatment, augmented by a thorough cleaning of the hatch daily, will often prove effective. Spraying the hutch with the above solution will also greatly aid. Boracic acid, dissolved in water and blown up the nostril with a syringe, is recommended.

SLOBBERS.—This ailment occurs mostly among the young, though it sometimes attacks mature animals. It is easily distinguished by a running discharge of a watery fluid from the mouth; it has a scalding effect, often causing the hair to come off and giving withal a ghostly appearance to the animal; a wasting away and ruin of the general health, and finally death, if not checked, is the result.

As the cause is indigestion, usually brought on by wrong feeding, a radical change in diet, etc., a physic or laxative should be given. Syrup of figs, half a teaspoonful twice a day, will prove effective. Castor oil may be used instead. The mouth should be washed with alum water, which serves to contract the glands and stop the flow of saliva. An excellent way to do this is to saturate a small sponge with the alum water, put into the animal's mouth. After treating feed upon easily digested food. Salt is valuable to use at this time. The following treatment often proves effective: Five cents' worth each of the oil of juniper and sweet spirits of nitre mixed, ten drops, put into the drinking water night and morning.

SCOURS.—This another complaint that attacks the young mostly, and causes sometimes great and sudden loss. Loss of appetite, soft and stringy droppings, a crouching in the corner of the hutch and generally pinched appearance are indications, if caused by improper feeding too much green stuff, when wet with dew or rain, which is often the case. Correct this by giving something on the dry order and easily digested, as rolled oats, with a little arrowroot sprinkled with it. Don't give strong astringents; they do more harm than good, as they check the howels too suddenly, and constipation is the result. Remove the cause, assist nature a little, and you have about the hest treatment.

CONSTIPATION.—The symptoms are similar to the former, except that there is an ahsence of droppings and the belly seems somewhat distended. Treatment, a laxative; half teaspoonful of syrup of figs, castor oil or any good laxative twice a day usually relieves.

POT BELLY DROPSY.—This is an ailment to which young hares are liable. It is usually caused by feeding too much bulky food and at irregular intervals and too close confinement. Reduce the quantity of feed and let it be of a more concentrated kind; place in roomy hutches where they can get plenty of exercise. If off their feed, give something they like and of a laxative nature, such as carrot, a little dandelion or something of the sort. It is well to carefully guard against this complaint by feeding regularly and giving exercise to young ones. It sometimes occurs among fine stock and often spoils what would otherwise be a valuable specimen.—American Belgian Hare Association Catalogue.

### *The Natural Hen Incubator.*

The Natural Hen Incubator and Brooder, Which the Inventor Claims to Be One of the Greatest Discoveries and Inventions in the History of the Poultry Industry, Invented by John M. Sontag, St. Charles, Ill., President of the Natural Hen Incubator and Brooder Company.

Mr. Sontag has the following to say in regard to his inventions: After sixteen years of experimenting and at a cost of several thousand dollars I have invented a brooder and a brooder house system that has demonstrated to poultrymen that there is a natural hen brooder that has raised, and can raise all the chicks put into it. The poultry house lamp system is so arranged that any brooder may be heated separately, and it may be heated to any degree wanted to conform to the requirements, as in the case of chicks or ducklings being of different ages. The expense necessary in operating the system is 100 per cent less than that incurred with the hot water plan, and there is no night watchman or fireman needed.

There is always a steady heat regardless of the changes of weather, and a brooder may be heated in ten minutes to any degree wanted without any other heat than that furnished by the long tube lamps. One filling of the lamps

B. G. SMITH, Mgr., Box 184, Elmira, N. Y.

Earthen Water and Feed Dishes $1.00 per doz.

will last a week. They are automatic and all that is required is to open the faucet in the oil barrel. The burner will burn a full flame for ninety hours with two quarts of oil. This is about 75 per cent cheaper than a system where coal is used for heating.

Heretofore broiler plants have been failures, because the chicks could not be raised and the expense in operating the plant was too great. Severe changes would occur in the weather at night, and even with the best of care the heat could not be kept under entire control. The chicks would, therefore, get chilled and would die.

The single indoor brooders and outdoor brooders are so arranged that the chicks have a free range of heat and air in and under the "mother" without going outside. The "mother" is planned in accordance with nature. The chicks place their heads and back against the top cloth, where there is a heat of 90 to 100 degrees, as they may wish it. This prevents crowding, as the chicks will not pile on top of each other and crowd when they have sufficient heat. Our brooder also has a natural heat and not a hot dry one, which has a tendency to dry up the legs and lungs, poison the blood, cause weak lungs and bowel trouble, all of which causes that listless, sleepy look, which finally ends in wasting away. The brooder has center ventilation, and the air is pure and sweet and free from fumes arising from the lamp. The chicks are always supplied with an abundance of fresh air and are not compelled to breathe in and in the same foul air all night, which causes weak lungs and develops into consumption. The brooder may be heated up in a very few minutes, even in the coldest weather, and the chicks may be placed in it when first hatched. This is true with single brooders as well as in our brooder house system.

Hundreds of our customers report grand results, and are making arrangements to go into the business extensively. We guarantee 80 per cent of the chicks placed in them in winter and 90 per cent in the spring. Dozens of customers report that they have raised every chick, and in some cases the birds have been winners, as in the case of W. R. Curtis & Co., at the Pan-American show, who won with chicks raised in our brooders. The Natural Hen Incubator is as great an invention as the brooder. The ideas embodied in its construction are as in the case of the brooder, the result of tests made during the past sixteen years, in which nature's laws have been most carefully studied.

The new incubator is a round machine and weighs about three-quarters less than any other incubator of the same capacity. Only one size is made. This plan has been adopted for the reason that it requires just as much oil and time to run a fifty-egg machine as it does one holding 250 eggs, also more chicks can be hatched at a time. We believe that the whole secret of success is to hatch all the chicks you can in two or three months, and not continue hatching all through the summer. This enables the broiler raiser to get his chicks into early market. Those that are saved will be up to weight and will lay early. For these reasons we are making a 250-egg machine, but in some cases 300 eggs may be put into it, depending upon the size of the eggs, and whether they are duck or hen eggs.

The nest revolves and is round with no partitions in it. The bottom of same is covered with sand. Between the eggs and the sand is a fine mesh wire, so that the eggs are really on the sand, but can be rolled about with ease. They are not taken out for the purpose of turning or cooling. The machine is run with less time than with any other make, and is guaranteed to hatch every fertile egg that a hen can hatch, and that the fertile eggs will not die in all stages of incubation. The machine is as much like a hen as possible. It airs the eggs like the hen does and supplies moisture in the same manner. It also cools the eggs and dries them in accordance with nature. There are no ventilators to open or close at any time during the hatch. The company guarantees the machine to hatch more chicks and stronger, larger and better developed chicks with less dead chicks in the shell than any other incubator on the market. A boy 14 years old can run one, because the only work required is to keep the lamp filled. Anyone can hatch chicks in this machine giving it only five minutes of their time each day. It may be placed anywhere, in the barn, house, spare-room, etc., but we do not claim that it can be run in a dark, damp, mouldy basement, which is a regular germ breeder. The temperature of the machine is not affected by the weather, no matter how changeable.

We will issue what we claim to be the largest practical book and catalogue yet published in this line. It is now in the hands of the printer and will be ready for mailing on or before January 1. It is a book of 25,000 words, entitled "Nature and Its Laws." It compares the methods of hatching both by the incubators and hens. It tells how nature does the work, and how our discovery was made. It gives instructions which will enable anyone to make the poultry and the broiler business pay; in fact, it tells the poultryman how to be successful in all branches of the business. It is of value to the beginner as well as the expert. It gives the real cause all diseases. It tells why so many have failed, gives valuable information in regard to ducks and turkeys, tells how to feed and how to get eggs in winter and have them fertile. It gives the actual experience gained from twenty-five years of investigation upon a large and small scale. Send in your name at once and you will get a book and catalogue combined as soon as it is ready for distribution. It is worth at least $100 to everyone interested in poultry. A small portion of the cost of mailing, etc., must be borne by the applicant, and we, therefore, charge 25 cents for the book, and will refund this amount on the first order.

## A REMARKABLE FLOCK OF WHITE WYANDOTTES.

A good White Wyandotte is certainly a handsome and a useful fowl and their remarkable growth in public favor is well merited. Anyone who can admire fine birds will readily concede that this variety is worthy of all the praise given it. We had the pleasure recently of inspecting the flocks of Mrs. George M. Hanley, Hoopeston, Ill., and what we saw would make glad the heart of any lover of White Wyandottes. She has succeeded this season in raising about 500 birds to maturity, and we feel safe in saying that a better lot of birds cannot be found. There are good reasons, however, why this should be true. One of these reasons is that the foundation stock was the best that money could buy and that experience could produce. We refer particularly to that portion of her breeding stock which was acquired by her last season. With her characteristic enterprise she made up her mind to have the best regardless of price. She accordingly arranged with Mr. Arthur Duston for the purchase of his best pen of winning birds at the last Boston show. The fact that Mr. Duston exhibited them at Boston is evidence that they were what he considered to be his best birds, and the fact that they won is additional evidence of their high quality. With these birds as breeders it is not a matter of surprise that she has such a remarkable flock of young birds. The cockerels are big white birds and typical Wyandottes. The same is true of the pullets and both combine in the greatest degree the characteristics of standard bred birds. We have never seen a better lot of combs and we do not believe it is possible to grow better ones than the best to be found in Mrs. Hanley's flock. She has a couple of hundred young birds for sale that are sure to please her customers, for they are up to weight, strictly high grade in every respect and will win in strong competition. *Frank Heck.*

## A PRAIRIE STATE INCUBATOR FREE.

The *Michigan Poultryman* with its characteristic enterprise, is offering one of the best machines made by the Prairie State Incubator Co., free to the person securing the largest number of new subscribers to that paper before February 15, 1902. This is a great opportunity to secure a first-class Incubator free of cost, and a large number of subscriptions may be easily secured to that enterprising poultry paper by any one who will make the effort. The publishers will gladly send sample copies or do anything they can to assist those who endeavor to win the prize. Write the publishers at Ithaca, Michigan, for any further information.

## "WINNING ITS WAY."

The advertisement of the Iowa Incubator Co., of Des Moines, Iowa, makers of the round incubator, will be found in this number. Their handsome catalogue is just out, and contains valuable information along the line of poultry raising. They agree to send this book free to all those mentioning this paper. This company is establishing a world-wide reputation with the "No Cold Corner" incubator, The Iowa.

## BLAIRSVILLE INCUBATORS.

We are in receipt of the latest catalogue issued by the Blairsville Incubator Company, Blairsville, Pa. This is one of the neatest and most complete catalogues of the kind which we have received. It thoroughly describes this most excellent machine and contains valuable information for any incubator operator. It also contains testimonials from foremost breeders and publishers relative to the work which these machines will do. Our readers who anticipate purchasing an incubator this season should not fail to write for a copy of this catalogue.

## EXPERIMENTS IN POULTRY CULTURE.

The firm manufacturing the Cornell incubators and brooders includes several of the leading poultrymen of the country. Three members of the company have extensive poultry plants. These men are also carrying on at private expense and independent of the incubator business some most valuable and interesting experiments in poultry culture. Two very important lines of work, i. e. breeding and incubation, are already in progress and preparations are making for the third line, that of squab broiler brooding. The trained experts in charge of these matters have had large experience both in experiment station work and in poultry keeping. The plans are systematically and scientifically laid for comprehensive and consecutive work. Beginning with the breeding of fowls the foundation is to be laid on right principles. The factors which affect the development of fertile eggs are to receive searching investigation. Excellent and valuable results must ensue, which will be utilized by every practical and progressive poultryman in the country.

## WASHINGTON (D. C.) SHOW.

NOV. 19 TO 23.

(By Special Correspondent.)

The poultry display at Washington, D. C., brought together a meritorious lot of stock that was fairly well divided among poultry, pigeons, Belgian hares and pet stock. The American class was complete, all varieties being represented. White Plymouth Rocks led in quality, many of the females shown were gems of their kind. The winning pen contained three pullets that will be hard to excel, and the winning pullet was better still. It is seldom such good quality is found in the smaller shows. The White Wyandotte females were very good; first cock in this variety was a fine specimen.

The Asiatic classes strong in quality. Some of the Brahmas and Cochins would go to the front in any company. Brown Leghorns, Buff Leghorns and Black Minorcas unusually good in quality, ten or a dozen of the Black Minorca females simply wonders for size and color. All through the hall in many of the classes were specimens of most excellent quality. Pekin and Rouen ducks and Bantams were a superb lot. Some of the Pan-American winners had to divide honors with others here in the Cochin-Bantam classes, of which there was an unusually fine lot shown in Buffs and Blacks.

Belgian hares were strong as to number and quality. Quite a number scored close to 96 points. Some were sold at long prices. One of the visitors from the east bought all the best White Plymouth Rock Pullets, presumably for the Eastern Show circuit.

## THE WALLINGFORD, CONN., SHOW.

H. Haywood, Sec'y, writes that the Wallingford Show will be larger than ever this year. Fanciers can secure a premium list by sending their names to the Secretary, who will place them on the already large list. Their special prize cups, although elegant in design last year, will be far better this year and they can readily say that their show will be the largest between New York and Boston. They had more entries in the Rhode Island Red class and Langshan class than was entered at New York last year. The dates are December 29-January 1.

## KANSAS STATE SHOW.

Breeders who are desirous of exhibiting their birds in a show that will sell stock for them should not fail to send for a Premium List of the Kansas State Poultry Show, Topeka, January 6-11, 1902. Judges C. H. Rhodes and L. P. Harris are drawing cards and the association has a well-earned reputation for doing things "right" and paying all premiums promptly. Last year's exhibit was one of the largest west of Chicago and this year it will undoubtedly be much larger. Address Geo. H. Gillies, Secretary, Topeka, for all information.

There appears elsewhere in this issue the ad of the H. M. Sheer Company of Quincy, Ill., who are well and favorably known to the poultry fraternity through their line of specialties, which have been made and sold for years. Just now they are putting on the market a new regulator for incubators, which they have been working on for a long time, and now regard it as perfect in every way. Contracts have already been booked for supplying this regulator in large quantities to several leading incubator manufacturers, but the fact which is of the greatest interest to our readers is that this device can be attached to any incubator, and as there are thousands of machines all over the country which are not doing as good work as they should, by reason of defective or worthless regulators, this device of the Sheer Compnay will enable any one, at very nominal expense, to make their old incubator as good as new. The regulator has double discs, which makes it doubly sensitive. If you are needing anything of this kind write them at once for further particulars. The same people make a very fine safety lamp for incubators and brooders. Also leg bands, poultry markers, etc. Write them today, mentioning this paper. Address H. M. Sheer Co., box 10, Quincy, Ill.

The Christian County Poultry & Pet Stock Association will hold its next show at Palmer, Illinois, December 26-28. The premium lists are very attractive and are now ready for distribution. Copies may be had by writing to C. D. Simpson, Secretary, Palmer, Illinois.

BILL OF SALE.

Watertown, N. Y., May 1, 1901.

This is to certify that I have this day sold and delivered to Harry M. Lamon of Watertown, New York, what I consider the very best birds in my yards. I will recommend Mr. Lamon to those who are looking for first class treatment and quality in Barred Plymouth Rocks.

(Signed) *M. S. Gardner.*

From the above it will be seen that Mr. Harry M. Lamon of Watertown, New York, has made a valuable purchase from M. S. Gardner, the well-known breeder of Barred Plymouth Rocks. Mr. Lamon writes that he has pretty generally cleaned things up over in his section on old birds this fall. He exhibited no young stock in Buff Leghorns or in Barred Rocks. At the great Cambridge fair on Barred Rocks he won first cock, first pen in extra strong competition. At the New York state fair he won first cock, second hen on Buff Rocks. At Cambridge, second cock, first pullet on Buff Leghorns. First cock, first hen and first pen on Buff Rocks at the New York state fair. Second pullet on Buff Leghorns, first pen.

He certainly is in splendid shape to send out young stock of first class quality to those who entrust their orders to him. We can safely recommend Mr. Lamon in all dealings that he may have with AMERICAN POULTRY JOURNAL readers.

BUFF LEGHORN COCKEREL.

"New York Champion 3rd," winner of first at Madison Square Garden, N. Y., January, 1901. Also American Leghorn Club special for best colored Buff Leghorn male in the show. At the late Pan-American show this bird won 2nd as cock. Owned, bred and exhibited by Harry M. Lamon, Watertown, N. Y.

---

We are in receipt of the poultry supply catalogue issued by R. A. Pike & Co., 29 Bedford Ave., Minneapolis, Minn. This is a most complete book, in which our readers will find listed all kinds of poultry supplies, poultry books, etc. It also contains a chapter upon "How to Make Poultry Pay," giving instructions, relative to houses, scratching-sheds, fixtures, yards, the kind of fowls to keep, care of poultry, how to feed, in-breeding, etc. Copy will be sent free to all our readers, addressing the firm as above.

---

The Empire Leg Band, manufactured by G. W. Sword, of Lanark, Ill., is more popular and is having a larger sale this season than ever before. This band is a first class one in every respect. It is cheap, easy to put on, having a double lock, which makes it sure to stay. Mr. Sword will send a sample to all who are thinking of purchasing leg bands. He is also a breeder of high grade exhibition Light Brahmas and has them as good as the best. He is one of our oldest advertisers, having placed his first ad in AMERICAN POULTRY JOURNAL fourteen years ago. During all this time he has conducted his business on a liberal basis, which has made him more friends and increased his business each season.

---

We recently had the pleasure of a visit from Mr. C. H. Taft, traveling representative of the Petaluma Incubator Co., Petaluma, Cal. Mr. Taft reports better business this season than ever before. The Petaluma Co. are old patrons of A. P. J., and we have never heard anything except the very best reports relative to their machines. The company claims in addition to its large do-

mestic business to have exported more incubators than all other makes combined.

---

At the Rush County Fair held at Rushville, Ind., recently Mr. George O. Anderson of Rushville won first on cockerel and first and second on pullets in the Light Brahma class. In the Plymouth Rock class he had second cock and second hen. In Single Comb Brown Leghorn class, first cock and second hen. In the Bronze Turkey class he won first on pair. Mr. Anderson is starting in as usual this season, winning the desirable premiums.

---

John W. Yates, Burnet Junction, Wis., made the following winnings at the Dodge County Fair: First and second on White Wyandottes; first and second on White Rocks; first and second on Barred Rocks; first on Buff Cochins; first on R. C. White Leghorns; first on S. C. White Leghorns; and first and two seconds on three entries on Ducks; second on Toulouse Geese and first on Belgian Hares. He was also awarded special for best display in the county and special for best exhibit of Plymouth Rocks, making eighteen firsts and six seconds on eighteen entries.

---

We wish to refer our readers to the ad of Charles P. Glogger, Pittsburg, Pa., which will be found in this number of AMERICAN POULTRY JOURNAL. Mr. Glogger has been breeding Standard bred poultry for fifteen years. He is thoroughly familiar with the Standard requirements of his varieties and is in position to furnish customers with birds that will win. He breeds Silver Wyandottes, Barred Rocks, White Leghorns and Pekin Ducks.

---

Mr. Paul B. Harshman, of Sullivan, Ill., writes us that he has some extra fine early hatched White Rock cockerels for sale that will be ready for the early shows. Mr. Harshman has proven the quality of his stock by repeatedly winning in the strongest competition. At the Illinois State Show at Bloomington last January he won a number of the best prizes, including the Association special for the best display in the White Plymouth Rock class. All of his prize-winning birds were in his breeding pens this season, and the young stock he now has for sale is fully the equal of the parent stock and some of it is better. We have no hesitancy in recommending Mr. Harshman to our readers.

---

Mr. J. D. W. Hall, Des Moines, Iowa, writes that he can please the most critical in White Wyandottes and Barred Rocks. His young stock more than does justice to its parents and gives every evidence of maintaining Mr. Hall's reputation in the show-room again this winter. He has about one hundred and fifty trios of grand birds that will make excellent breeders and show specimens. He has a large number that are up in weight and a great many that are nearly so. His birds are remarkably typical as regards shape and his Wyandottes are as white as can be found anywhere. Mr. Hall informs us that some of his birds will be at the Buffalo show in the hands of eastern parties. This speaks well for the quality of his stock.

---

E. L. Famulener, an old A. P. J. advertiser and breeder of White and Buff Plymouth Rocks and Buff Cochins, has, owing to the introduction of rural delivery, changed his address from Cameron, Ill., to Galesburg, Ill., R. R. No. 3. Mr. Famulener's stock is doing splendidly, and he has in his yards some of the best exhibition stock he has ever bred. By referring to his ad. it will be seen that he is offering special prices on his Buff Cochins. There is nothing among these Cochins that will score less than 90 and up to 95. Mr. Famulener guarantees satisfaction and gives it. Old customers of Mr. Famulener should notice the change in his address.

---

S. F. Flint & Son, Peoria, Ill., write: "We have by far the finest flock of White and Buff Wyandottes this year we have ever had, and, when this fact is taken in connection with our past great successes in the show-room, it means much. As we have a large number of such goods birds, we are willing to furnish first-class stock at very low prices." See their adv. elsewhere in this issue.

---

Porter Bros., of Muscatine, Iowa, are manufacturing an especially good quality of grit for poultry, which they call "Star Grit." This contains an unusually large proportion of lime in a proportion of 96 per cent. A. P. J. readers should write Porter Bros. for this poultry yard necessity, and we believe that a trial only is necessary to result in a permanent use of this grit in their poultry yards.

---

J. B. McAllister, Palo, Iowa, makes an offer in his ad. this month, which should be considered by all our readers who desire to purchase Bronze Turkeys. The birds he is offering are of the best breeding, being sired by "Western King," the noted tom that won first at the Cedar Rapids, Iowa, show, 1899, which was one of the hottest turkey shows in the country that year. Some of the stock is also from a grandson of "Mammoth Giant," which was probably one of the largest turkeys ever grown. He tipped the scales at fifty-two pounds at the Cedar Rapids Show and his descendants are like him, combining both size and color. Mr. McAllister has over one hundred richly bred turkeys to dispose of.

---

Owing to ill health, Mr. H. Pfannkuchen, College Hill, Ohio, will greatly reduce his flocks, and will sell all his breeding and exhibition birds at remarkably low prices. His birds are described and the prices quoted in an ad. elsewhere in this number. He offers birds scoring as high as 96 points. He has White Leghorns, Buff Cochins, Barred Plymouth Rocks, White Rocks and White and Buff Wyandottes. The birds he has to offer are really fine specimens of their respective breeds, and this special sale is a genuine one, which no prospective buyer should overlook.

---

Every fancier of poultry is looking forward at this season of the year to the coming shows, and has great hopes and aspirations of winning some of the best prizes. His flock may be very promising indeed, with its rapid development and pleasing appearance, but when he has done all in his power in the way of care and attention and has the birds ready to take to the show, then the question arises: "In what kind of a coop shall he put them and how can he make them appear to the best advantage." Elsewhere in this issue will be found an advertisement of J. W. Sauer, Trotwood,

Ohio, manufacturer of the Gem Incubator, Brooder and Exhibition Coops. These coops are meeting with favor everywhere, and we would suggest that our readers send for free catalogue, containing free description and prices.

Ira C. Keller, of Prospect, Ohio, has about 1,200 head of the finest Golden and White Wyandotte chicks he has ever raised. He also has 100 fine Belgian Hares. These are really more than he wishes to place in his winter quarters, and will sell in lots to suit. A. P. J. readers well know the quality of Mr. Keller's stock, and should take advantage of this opportunity of buying good stock at low prices at this time.

W. S. Cleveland, manager of the new Cleveland Theater, Van Buren street, between Wabash and Michigan avenues, Chicago, would be wise to adopt a motto for the portals of this handsome playhouse something in substance as follows:

"If those who enter here will leave their worries, troubles and other mental afflictions in a bunch at the door, they will forget to pick them up upon their exit."

Mr. J. W. Rich, of Flanagan, Ill., has Brown Leghorns and Pekin ducks. In his ad he announces birds for sale at $1 each. While this price may seem so cheap as to give the impression of inferior stock, Mr. Rich writes that could AMERICAN POULTRY JOURNAL readers see the stock they would have far different opinions. Mr. Rich is offering bargains. He has exhibited for five years, and has never lost a first prize on cockerels, and the first prize birds have never scored less than 94½ by Hewes, Russell and Heimlich.

George J. Gleason, Elburn, Ill., has change of card in this issue. Mr. Gleason is a well-known breeder of Barred Plymouth Rocks, and has won many desirable prizes in the strongest competition. He writes us that his stock is finer this season than ever, and that he will not have the slightest trouble in picking out the kind of birds his customers will desire. He has quality and quantity combined, and is therefore able to guarantee satisfaction or refund money.

The A. I. Root Company, of Medina, Ohio, are perhaps the largest dealers in bees' supplies in the country. The firm has long been a leader in their lines. They issue a very handsome and complete catalogue, and their increasing business has made it necessary to issue the catalogue in foreign languages. One in the Spanish language is now ready for mailing.

Grant Mott, the White Wyandotte specialist, of Austin, Minn., has been very successful this year in raising an excellent lot of birds, and he is therefore in position to take care of a heavy season's business. He has decided to dispose of a limited number of young birds at special prices, but will not sell more than one cockerel and two pullets to any one customer at the prices quoted. These prices will be found in his advertisement elsewhere in this issue. He guarantees to give the values, as stated, and if a customer should feel at all dissatisfied he desires that the birds be returned promptly and the money paid for them will be cheerfully refunded. Those who are in need of White Wyandottes should write Mr. Mott, stating that they saw his special offer in AMERICAN POULTRY JOURNAL.

We wish to call special attention to [illegible] advertisers in AMERICAN POULTRY JOURNAL. Mrs. Nellie Bullock, of La Harpe, Ill., breeds some very excellent Light Brahmas and Bronze Turkeys, giving them earnest and conscientious attention. Buyers of these varieties would do well to write Mrs. Bullock and get further description of her stock.

M. G. A. Osborne, Leominster, Mass., has some excellent stock for sale in Barred Plymouth Rocks and Wyandottes. He is also agent for some of the most prominent poultry supply manufacturers and our readers can purchase bone cutters, clover-cutters, leg bands, incubators, etc., from him at manufacturers' prices.

H. A. Emmel, Ogle, Pa., recently won at Burgettstown, Pa., on Light Brahmas first and second cocks, first and second hens, first and second cockerels, first and second pullets and first pen; on S. C. Brown Leghorns first cockerel, first and second pullets, second hen and second pen. No Leghorn cocks entered. The prizes won on breeding pens were Asiatic and Mediterranean class sweepstakes, in strong competition with solid colored varieties.

Roycroft Stock Farm, Des Moines, Iowa, announces a fall clearance sale at greatly reduced prices for immediate shipment. Their ad. will be found elsewhere in this number.

With its characteristic enterprise the Cornell Incubator Co. has opened a branch house in Chicago with Mr. Frank S. Jones as western manager, located at 315 Dearborn street. This will enable the company to take care of its large western business in a more prompt and satisfactory manner.

Mr. John Brinkama, who is well and favorably known to the incubator trade, has taken charge of the Chicago branch of the Star Incubator Co., at 297 Dearborn street. The constantly increasing western business of this concern has made it necessary for them to open a western department.

In the November write-up of Mr. U. R. Fishel, of Hope, Ind., the printer made a sad blunder and the proofreader overlooked the same. We credited Mr. Fishel with building a new $25,000 house. Now we do not wish to do Mr. Fishel injustice by exaggeration, but we do desire to give him full credit for building a splendid new home on his new 120-acre farm at a probable cost of $2,500. This will be the home of Mr. and Mrs. Fishel and their family. It will contain Mr. Fishel's office with long distance telephone connected and the cellar of the house will be used for the incubator room, 16x32 feet in size. The house is on an elevation and commands a splendid view of all the poultry houses, runs and pasture land, where his White Plymouth Rocks are cared for.

In addition to other valuable prizes won at the Pan-American Exposition, Mr. George G. Brown, proprietor of the Roycroft Poultry Farm, East Cleveland, Ohio, won the following specials offered by the National Wyandotte Club: Spe-

cial for the whitest male bird in the Wyandotte class, special for the best display and special for the best cock, hen, cockerel and pullet. The mere announcement of the winning of these prizes is equal to a page of talk concerning his birds. What the judge says counts and what he has said in this case puts the stamp of approval upon Mr. Brown's birds that makes them leaders.

---

The American White Minorca Club meeting was held at Buffalo, Oct. 25, with President J. M. O'Neil, of Toronto, Canada, in the chair. A few changes in the By-Laws were suggested, which will be acted upon at the regular meeting of the club. The members present spoke very strongly of the necessity of each and every breeder showing his birds at as many of the coming shows this season as possible, in order that the White Minorca may be more prominently placed before the public, and that the claims made for them by their breeders may be practically demonstrated. The silver cup offered by the club at Buffalo was won by Mr. J. M. O'Neil, of Toronto, Canada. William Sapper, sec'y., Erie, Pa.

---

The Wenona Poultry and Pet Stock Association will hold its 4th annual show December 16 to 20. Special arrangements are being made for the welfare of exhibitors. U. G. McAdam, Wenona, Ill., is secretary of the organization.

---

Cedar Rapids has been chosen for the next state show of American Langshan Club. The club offers a silver cup to be competed for by members only and the Association offers $15 cash for the best pen of Black Langshans. Let every member that possibly can show at this show, for the larger the exhibit the more interest will be taken in our favorite breed.

Breeders that are not members should send $1.00 to Mr. A. H. Asche, Princeton, Ill., for membership in the club. In joining the club you help yourself, for in union there is strength. Yours for Langshans.—Merrill Bowers, Iowa. V. P. American Langshan Club, Cresco, Iowa.

---

Mr. W. S. Russell visited Lacon, Ill., November 7, and while there scored a number of birds for Watt & Campbell, who, by their pedigree system of line breeding, are rapidly coming to the front with Barred Plymouth Rocks. Mr. Russell handled quite a number of birds, scoring from 90 to 93 points. The members of the firm, in answer to questions of Mr. Russell's relative to breeding, could tell exactly the past history of the birds, and in most cases could show both sire and dam. The methods which are employed to insure this certainty are bound to count, and the success of Watt & Campbell is not to be wondered at. Their White Wyandottes scored from 90 to 94 1-2, but most of the birds are not sufficiently matured for a score card to show their real value. Mr. Russell also scored quite a number of birds for Mr. E. V. Lane, who is an extensive breeder of Single Comb Brown Leghorns. He has some excellent birds this season, and his cockerels are especially fine, scoring from 90 to 94 1-2 points. Mr. Lane's birds have the entire range of his farm, and they are extra large, vigorous specimens. Other breeders whom Mr. Russell visited were C. D. Gapen, breeder of the highest grade of White Plymouth Rocks; also Clouse Brothers, breeders of Barred Rocks. The Lacon breeders were much pleased with Mr. Russell, and wish him continued success as a breeder and a judge.

---

Mr. J. B. McAllister, of Palo, Iowa, writes that he has nearly 100 Mammoth Bronze turkeys for the winter trade. In size and good color they cannot be beat, as they are sired by two of the most noted toms in the West. "Giant" was used as a drawing card for the great Cedar Rapids show, where he tipped the beam at 52 pounds. Western King won first prize at the same show. Readers of the AMERICAN POULTRY JOURNAL, in writing Mr. McAllister, kindly tell just what they want. Those getting orders in early will, of course, get first choice.

---

Mr. R. S. Franklin, Urbana, Ill., made a remarkable record at the late Champaign County Fair on his Black Cochins and Black Cochin bantams. He made an absolutely clean sweep, and he has done this two years in succession. The quality of Mr. Franklin's stock is such that they would win for him in the strongest competition. Admirers of these varieties cannot do better than to place their orders with Mr. Franklin. We have seen his stock and can personally recommend him to our readers.

---

W. H. Fox, Hoopeston, Ill., is better prepared than ever before to take care of his customers. His Buff Rocks show the careful and intelligent study given them in the work of mating and rearing, and his young stock, which he has for sale at this time, will maintain Mr. Fox's reputation for raising birds that can win. Our readers who intend purchasing Buff Rocks should write Mr. Fox.

---

A visitor to a farm was especially struck by the great ruggedness and strength of one of the stalwart harvest hands and said to the farmer:

"That fellow ought to be chuck full of work."

"He is," replied the farmer, "or he ought to be, because I hain't never been able to get none out of him."

This man never fell in love with his work, and hence was regarded as a good-for-nothing by his employer.—December *Success.*

---

*Poultry Success*, of Des Moines, Iowa, offers a 200 egg incubator, standard make, to the subscriber who, during the month of January, shall produce from a pen of six pullets, any breed, the largest number of eggs. The December issue contains full particulars, sent free on request.

---

Charles G. Miller & Son, of Boonville, Mo., commence yearly advertising in this issue. They have 250 Black Langshan cockerels and pullets for sale to readers of the AMERICAN POULTRY JOURNAL from their prize matings, and these gentlemen were told by Judge Heimlich in August that they had the best stock he had seen this season, assuring them that they had the best prize winners in the bunch. "Black Beauty," first prize cock, Central Missouri Poultry Association, Missouri State Show, scored 95 1-4, by Heimlich, Taylor and Wade. Judge Heimlich said of him: "He is a fine bird and will be an easy winner in hot competition," and was glad that another judge found that cock bird as good as he himself had scored it. Stock from this mating will certainly produce winners, and Black Langshan breeders should not overlook this opportunity.

---

One of our new advertisers this month is the firm of Leemon Bros., Hoopeston, Ill., who breed white Plymouth Rocks, and who have an exceptionally fine lot of birds this season. In starting with this variety they purchased the best that money could buy, and their customers can feel assured of getting the same high quality. Their birds are large, vigorous specimens and will prove valuable additions to any flock.

---

Mrs. Thomas H. Bennett, Hoopeston, Ill., in her ad. in this issue, solicits the orders of our readers who may want something good in Barred Rocks. Mrs. Bennett will do just as she agrees to, and we know that she has good birds, for we have seen them.

---

George W. Hillson, of Amenia, N. Y., that breeder of splendid Light Brahmas, has some fine exhibition cockerels, large and strong colored, for sale. AMERICAN POULTRY JOURNAL readers who are breeding Light Brahmas certainly have no cause to say that they cannot find good breeding stock when such an opportunity as this is presented.

---

The Red Ear Stock Farm won every first prize on single comb White Leghorns at the recent show of the Terre Haute, Ind., street fair. They have the finest lot of single comb White Leghorns and White Plymouth Rock Cockerels that they have ever raised. Their birds are kept upon separate farms and they have no trouble in pleasing their customers with absolutely pure stock. They respectfully solicit a perusal of their ad. by all who contemplate purchasing stock or eggs. B. Howard Whitcomb, of Terre Haute, Ind., is proprietor and manager.

---

We wish to call the special attention of our readers to the advertisement of Joseph P. Hilldorfer, Centre avenue, Allegheny, Pa. Mr. Hilldorfer breeds Black Minorcas that have won some of the best prizes in hottest competition to be found in the country. At the late Pan-American Exposition he won 2 firsts, 3 seconds

**Exhibition Coops**

**GEORGE MUCK,**
Edinburg, Indiana.

**POULTRYMEN**

Who are not using the Automatic Poultry Feeder and Exerciser do not realize how much they are sacrificing both in egg production and time and labor saved. Send for circular and see what those who are using them say about them. Prices reduced. Entire satisfaction guaranteed.

AUTOMATIC POULTRY FEEDER CO.,
Genoa, Cayuga Co., N. Y.

and 2 thirds, including first hen and first pen, which latter prize is the most coveted and the most desirable that any breeder can win. He has won more prizes and cups in 1901 than any other Black Minorca breeder in the country. We know of no stronger evidence that Mr. Hilldorfer could produce to show that his birds are the best to be found. His customers are assured of fair and honorable dealing, prompt attention to their orders and the very best quality of stock at the lowest prices for which it can be consistently sold. We urge our readers who are interested in Black Minorcas to write Mr. Hilldorfer before making their purchases, mentioning that they saw his ad. in AMERICAN POULTRY JOURNAL.

---

The Christmas number of the *Delineator* is about the first of the special Christmas issues. It is a beauty. The cover is a most artistic production showing a beautifully gowned woman, standing gracefully in a brilliantly lighted salon. Two charming love stories, one by Cyrus Townsend Brady, plenty of advice regarding Christmas gifts, timely pointers on cookery, winter time care of plants, all the fashions of the day interpreted into simple language, can be found in the Christmas number of the *Delineator*. It is a splendid magazine, satisfactory inside and out. There is no magazine for women at present published that is more practical in all its pages. As a Christmas gift itself it bears its own recommendation.

---

In the December issue the great Millville Poultry Farm Co., of Millville, N. J., of which Mr. M. F. Delano is president, commences a yearly ad. In this they announce that at the Pan-American Exposition they added fifty-five premiums to their record of 205 prizes at Hagerstown, Philadelphia, Orange and New York last season. Their positive guarantee to please customers or return birds at their expense, refunding the purchase price, is one that should draw especial attention to this advertising. Any reader of the AMERICAN POULTRY JOURNAL who will write them, saying that they saw their ad. in AMERICAN POULTRY JOURNAL, will receive free their illustrated catalogue.

---

Mr. Ed. McCulloch, New Albany, Ind., is offering some special inducements which should not be overlooked by those of our readers who intend to purchase Barred Plymouth Rocks this season. Mr. McCulloch breeds winners and he breeds them to sell. He has gotten out a large flock this season, anticipating a very heavy trade, and he is, therefore, in position to send customers any quality of stock they may desire. He can furnish yearling birds, also some elegant young stock in cockerels and pullets fit to show anywhere. His prices are exceedingly reasonable and we would suggest that our readers write him.

---

It is to be regretted that Mr. W. R. Wooden, of Battle Creek, Mich., the well known secretary-treasurer of the Buff Wyandotte Club, could not find it convenient to make an exhibit of his birds at the Pan-American show. He would undoubtedly have been in the front rank, but was unable to devote the necessary time to the matter in the way of preparing his birds, etc. Notwithstanding his very busy life in the mercantile field, he has found time during the last few years to raise some of the best Buff Wyandottes ever produced and which have earned for him a national reputation by their winnings in the strongest competition.

---

The Wauseon Poultry Association will hold its third annual exhibition at Wauseon, Ohio, December 31 to January 3. This association is composed of progressive, up-to-date fanciers residing in Wauseon and surrounding country, and they annually put up one of the best shows in the state. A. W. McConnell is secretary of the association.

Arrangements have been completed for the first annual show of the Arena Poultry Association, to be held at Sterling, Ill., December 26 to January 1. The American Langshan Club will hold its state meeting at this show. A postal card request addressed to the secretary, L. A. Kline, Rock Falls, Ill., will bring a premium list to all applicants.

---

The Barton County Poultry and Pet Stock Association will hold its fourth annual exhibition at Ellinwood, Kas., December 17 to 21. Liberal premiums are offered. Premium lists are now out and may be had by writing to the secretary, George H. Moore, Great Bend, Kas.

# Exhibitors and Awards at the Pan-American Show.

For some reason the poultry press has not been furnished with an official list of awards at the Pan-American Show. We are indebted to the *American Fancier*, Johnstown, N. Y., for the following awards which were procured by them from the records of the show. This publication makes a specialty of reporting shows and covers the entire country, including Canada.

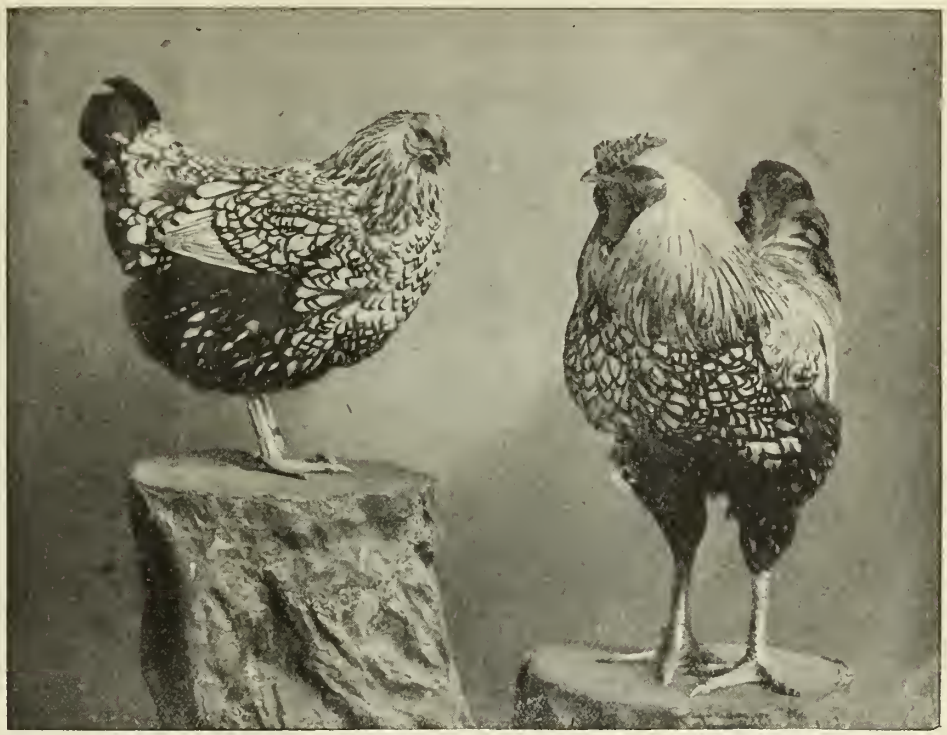
Cage Birds—All to Bostock.

———o———

Ducks do not require water except for drink. They always command a good price.



Silver Laced Wyandottes as bred by Jodrey & Gossard, Danvers, Mass. and Mo. Valley, Ia. Here is quality that will be appreciated at a glance by all who know what good birds of this variety should be.

We wish to call special attention to the illustration of Silver Wyandottes herewith. Comment is unnecessary. The picture shows quality better than words can express. This is a pair of fowls bred by Jodrey & Gossard. The firm is composed of John C. Jodrey, Danvers, Mass., and P. H. Gossard, Missouri Valley, Iowa. These gentlemen have been importers and breeders of Silver Wyandottes for many years and we are undoubtedly safe in saying that there are no better birds of this variety bred than those produced annually by Jodrey & Gossard. If there is a breeder in the country who has better birds, he can secure this firm as a customer. This is a standing offer and is made in good faith. Their stock has won the best prizes in some of the largest shows in the country, including Boston, New York and Chicago, and the firm makes no claims that are not substantiated by facts. In reporting the Boston show last winter we had the following to say of their exhibit: "This display ought to do a great deal to keep the S. L. Wyandotte moving along and to convince breeders that the variety is being improved. Here we found the pure white and black brought out properly in the difficult mixture the Standard makers have asked breeders to compound. The females shown by John C. Jodrey are certainly far in advance of the breed, as usually found, even in the best shows. It affords me genuine pleasure to testify to this man's ability as a breeder of this most excellent variety."

**OAK BLUFF LIGHT BRAHMAS.**

Just let me know what you want. I will send you a careful description of it and I am sure I can please you. I have 300 from my great winners at CHICAGO, MARSHALLTOWN, MASON CITY and PANORA that are of that clear coloring and elegant shape you all like. Choice Exhibition stock now ready for you.

## AN APPEAL TO BREEDERS OF BRONZE TURKEYS.

Every breeder and exhibitor of the Bronze turkey should become a member of our organization. We wish to urge all breeders to send in their dollar for membership in the club. They are cordially invited also to bring their birds to Chicago's great show in January and compete for the magnificent silver cup to be offered by the club, in addition to other valuable prizes. The meeting of the club will do all breeders good. We desire to make this great central show the largest turkey exhibit that has yet been held, and we can do so, if we will. We wish to offer a word of encouragement to the timid breeder. By all means place your turkeys in the show-room in competition. If they are not the equal of the best birds you will see where they are deficient and this will enable you to correct the faults in the future.

*Mrs. B. F. Hislop, Secretary.*
*Milford, Ill.*

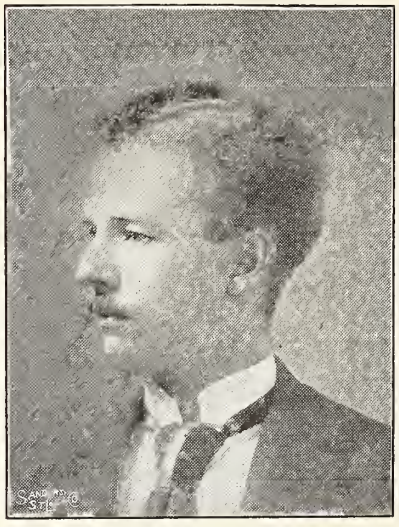
## THE AMERICAN BUFF LEGHORN CLUB AT THE PAN-AMERICAN.

A meeting of the American Buff Leghorn Club was held in connection with the poultry display at Buffalo, N. Y. The meeting was one of the largest and most enthusiastic ones ever held by the club.

The members present reported that the demand for good stock has never been better, and that their stock was improving each year.

The following officers were elected:

President, Chas. L. Thayer, Chicago, Ill.; Eastern vice-president, Harry M. Lemon, Watertown, N. Y.; western vice-president, Eugene N. Lacey, Kansas City, Mo.; secretary and treasurer, Geo. S. Barnes, Battle Creek, Mich; honorary vice prests., James Dundas, Deer Park, Ont, Can.; F. E. Olson, Galva, Ill.; C. A. Darling, Hopewell, N. J.; Richard Jones, Venetia, Pa.; B. F. Hislop, Milford, Ill.; George F. Curtis, Fenton, Mich. Executive Committee, Aug. D. Arnold, Dillsburg, Pa.; Thomas Peer, Fairfield, N. J.; James Dundas, Deer Park, Ont., Can.



L. E. MEYER.
Black Langshan specialist of Bowling Green, Mo., who prides himself in giving every customer their money's worth. He has 200 big farm raised birds for sale.

The executive committee decided to offer a fine silver cup in each state where there are ten members of good standing. Cup to be competed for by members only.

H. M. Lamon moved that the elegant cup offered at the Pan-American by the club be awarded to James Dundas, of Canada, and the same was presented to him by President Thayer. This is the first club cup that has ever gone outside of the states.

It was gratifying to the club to notice the grand display of Buff Leghorns on exhibition, and more so when it was discovered that as to numbers and quality none of the old-time Leghorns were in the lead at all, and some were far behind. The club is on the gain and desires to have all true fanciers become members. Send your name in at once and get on the list of membership that will be sent out by the club to all breeders in the United States and Canada.

*Geo. S. Barnes, Sec'y.*
*Battle Creek, Mich.*

## MUSCATINE POULTRY SHOW.

The Muscatine Poultry Show bids fair to be one of the largest in the state this year, as the breeders in this section are very enthusiastic and are leaving no stone unturned to make the show a pronounced success. Shellabarger and Warnock have been engaged to judge and every party exhibiting birds will be given square treatment.

The show will be held Jan. 8, 9, 10 and 11 and the association invites all breed-

ers to exhibit with them. Here are a few of the special prizes they are offering:

Twenty dollars for the best pen of Plymouth Rocks, any variety; $15 for the best pen in each of the following classes, Wyandottes, Brahmas, Cochins and Leghorns; $8 for the second best pen in Plymouth Rocks, Wyandottes and Brahmas; $5 for the second best pen in Cochins and Leghorns. For list of premiums and catalogue address the secretary, Geo. M. Porter, Muscatine, Iowa.

Unless all indications fail the annual exhibition of the Whitman County Poultry & Pet Stock Association, to be held at Pullman, Wash., January 15 to 18, 1902, will be the largest exhibition of standard bred poultry and pet stock in the northwest. The show will be judged by F. W. Hitchcock, which is a guarantee that prizes will be placed where they belong. Premium list will be the largest ever turned out by this association and can be had by December 15 by sending your address to A. C. Butcher, secretary, Pullman, Wash.

This is a day of scientific poultry raising. The man who makes his poultry pay depends largely upon some good, dependable supply house for many aids to his profit. Such a concern is the Harvey Seed Company, whose catalogue has just come to hand. This whole line of supplies is a good one, but the proposition they are offering this year in cut clover hay is particularly interesting, coming as it does when there is a general shortage of this crop. They are fortunate in having an abundant supply of superior quality and their advertisement shows that they are ready to give their patrons the benefit by selling at a reduced price. We suggest that every reader write for their catalogue, which is sent free. Address Harvey Seed Company, 30 Ellicott street, Buffalo, N. Y., and mention this paper.

HUGGETT'S PEKIN DUCKS.

Mr. Harvey H. Huggett, of Fall River, Wis., is having splendid success with his Pekin Ducks. On one pair he won first at La Cross last December. They were seven months old and weighed twenty and one-half pounds at the show. He has quite a number of young ducks for sale, also White Plymouth Rocks and Toulouse Geese. Photos of Mr. Huggett's Pekin Ducks show them to be of good shape and carriage and his show records prove that they are of the best breeding. At Dodge County Fair held at Beaver Dam, Wis., September 30 to October 4, he won first on old Pekin Ducks, first on old Toulouse Geese. No young geese were shown at this fair.

The Western Poultry Fanciers' Association, of Cedar Rapids, Iowa, which holds its seventh annual exhibition at Cedar Rapids, January 13 to 18, 1902, wish to call the attention of poultry fanciers to a few of the special attractions of their show. The meeting of the American Buff Rock Club and the American Black Langshan Club will be two of the special features. Theo. Hewes, of Trenton, Mo., and J. A. Tucker, of Concord, Mich., will judge the poultry; R. J. Finley, of Macon, Mo., will judge the hares and Henry Tieman, of Baltimore, Md., will judge the pigeons. Write for premium list December 1, 1901. E. E. Richards, secretary.

The annual meeting of the Single Comb Brown Leghorn Club will be held during the week of January 21 in connection with the Chicago show. Every prospective exhibitor should join the club at once and, therefore, be able to compete for the club prizes. The object of this club is to increase the interest in, and demand for, high-grade S. C. Brown Leghorns, and through the energetic efforts of Mr. C. M. Davidson, who is secretary of the organization, it is rapidly coming to the front and greatly benefiting the Brown Leghorn. Mr. Davidson's address is Morgan Park, Ill., and we urge all breeders of this variety to correspond with him relative to joining the club.

# Blanchard's White Leghorns,

## The Leading Strain of Heavy Layers,

Are no experiment, having been carefully selected and bred for over 20 years, with results that fully justify the claim that they are **THE GREATEST LAYING STRAIN OF SINGLE COMB WHITE LEGHORNS IN EXISTENCE.** No labor or expense has been spared in building up and perfecting this strain, and while the production of large, pure white, fancy market eggs has been the main object, **STANDARD QUALITIES** have not been neglected. They are large, vigorous, active and handsome, unexcelled for introducing new blood or as foundation stock. No better anywhere at any price. Stock for sale.
Illustrated circular free.

**H. J. BLANCHARD, Box 997, Groton, N. Y.**

# WHITE WYANDOTTES

## THAT ARE WHITE

and that means just what it says. They are not only white, but they are large in size, true Wyandotte shape, yellow legs and beak and will win anywhere. I am selling stock to some of the most prominent breeders in America and can please anybody. The young stock bred from my Chicago and Bloomington winners is a most remarkable flock of birds. I have 500 fine ones and can mate up pairs, trios or pens. If you want sure winners at reasonable prices, write me. My Silver Wyandottes are still leaders and will maintain my record made in the past which has earned for me the reputation of having the best in the west. My Silvers are the kind that are laced all over.

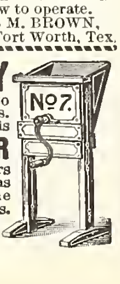
**IT MAKES HENS LAY**



in winter, when eggs are worth most, to feed them shredded roots and vegetables. Nothing prepares the food so well as this **BANNER Junior Root and Vegetable CUTTER** It shreds fine enough for chicks, broilers and ducklings. It shreds fast and turns easy. It will more than pay for itself the first season by the increase in eggs. **Send for special Booklet at once.**

O. E. THOMPSON & SONS, Ypsilanti, Mich.

M. K. BOYER.

Michael K. Boyer is not a stranger to the readers of the AMERICAN POULTRY JOURNAL, by any means. Some years back Mr. Boyer was a regular contributor to these columns. Of late years he has been compelled to give up outside work, as so much of his time is demanded for his experimental poultry farm, and at the editorial desk of his paper, *A Few Hens*. For some time we have endeavored to secure a series of articles from his pen, on practical subjects, but all efforts failed until quite recently, when he agreed to give us this service. Last month we gave the first installment, on the popular subject of "Houses and Fixtures." These will be followed by articles on trap nests, broilers and roasters, egg farming, ailments and simple treatment, practical view of the different breeds, and a special article on starting a market poultry plant.

Mr. Boyer is the author of a number of instructive poultry manuals, among which are "Broilers for Profit," "Profitable Poultry Farming," and "A Living from Poultry," all of which have gone through several editions. We understand that over 25,000 copies of "A Living from Poultry" have already been disposed of.

Mr. Boyer has been in the employ of I. S. Johnson & Co., the publishers, of Boston, Mass., for over ten years—first as special contributor, and afterwards as associate editor of *Farm-Poultry*. At that time Mr. A. F. Hunter was editor-in-chief, a team that made the publication the best *practical* journal in the country. Four years ago Mr. Boyer withdrew from *Farm-Poultry* to assume entire control of *A Few Hens*, a new paper issued by Messrs. Johnson & Co. This position he yet holds.

The entire effort of Mr. Boyer is in the line of market culture. His work runs solely in that channel, for which he has received the distinction of being the leading authority on commercial poultry.

In order that new methods may be tried, theories tested, breeds compared, etc., to gain knowledge, Mr. Boyer started an experimental poultry farm at his home—Hammonton, N. J. It has been said by different poultrymen who visited this place that Mr. Boyer does more experimenting in a year than any of the government stations, and that more appliances can be seen on his place than one might imagine existed.

At the present time four breeds are kept—Light Brahmas, White Wyandottes, Barred Plymouth Rocks and S. C. White Leghorns. Mr. Boyer annually ships hundreds of cockerels, hens and pullets of his breeds all over the country. This stock is bred for heavy egg and meat production. While not a fancier, he retains all the "trade marks" of a breed, while mating for eggs and meat, and then goes as close to the standard requirements as he can without hurting the practical qualities.

Mr. Boyer's poultry plant and residence are located on the main street of the town—Bellevue avenue—and is a very attractive and pleasant home. Such men as A. F. Cooper, of the Prairie State Incubator Company, and Wm. V. Russ, the poultry supply man, of New York city, declare that Boyer's food, beds and entertainment just suit their fancy, and they make annual trips that way, in consequence.

Mr. Boyer is also prominently identified in town affairs, being president of the council, a position which combines such duties as would fall to a mayor of larger cities. Twice Mr. Boyer was elected to the council, receiving more votes than any other candidate on the ticket, and twice was he elected unanimously to the chair.—[EDITOR.]

# EXHIBITION BUFFS.

Buff Rocks. Pens, trios, pairs and single birds for sale. February to May hatched. Parent stock have scores to 95½. They have won in several fall shows this year for customers. They will win for you in the fastest show.

**F. C. BAILEY, Reading, Mich.**

# STONE CITY POULTRY FARM.

Will close out my entire stock of Buff Cochins. Some very choice birds. Will keep nothing but B. P. Rocks. Will sell part of my breeding stock of B. P. Rocks to make room for young stock.

**R. D. No. 2. F. G. BEAN, Norristown, Pa.**

Ask for the Best Book ever Written on

# INCUBATORS

We have issued this year the best incubator book ever published. It is an interesting, readable, practical book, written by a man who has devoted 20 years to the subject. This man has made hundreds of accurate experiments. He has carefully tested every device used in any incubator. We have had him write the facts to aid you in buying one; to help you avoid a mistake.

You should read this book before buying. It is the lifetime's experience of the man who knows incubators best. You will know then what you need. You will know why some succeed and some fail. You will know how to make the poultry business pay. The book is free; write for it.

**RACINE HATCHER CO., Box 26, Racine, Wis.**

BUFF COCHIN PULLET.

The above is one of those splendid birds bred by H. N. Hanchett, Jackson, Mich. Mr. Hanchett takes for his motto "No Cochins like Hanchett's," and one could easily see that the statement is correct. This pullet illustrated here won first and medal at the big Battle Creek show last winter. This bird is of wonderful shape—fine cushion and short legs and tail. Clear, even buff from head to foot, with not a bit of black, and soft, massive feathering. The birds Mr. Hanchett is sending out are giving great satisfaction. He has just shipped five pullets to a breeder in St. Louis, which is the fifth order from this same man and is good evidence that Mr. Hanchett pleases his patrons. The above illustration is a fair specimen of Mr. Hanchett's birds and other specimens are shown in the splendid new booklet that he is sending out. Right here we wish to call attention to Mr. Hanchett's booklet and Mr. Hanchett's advertising in general. His ads are uniformly well written and convincing and the booklet that he is sending out is one of the finest that was ever put out by a breeder. Mr. Hanchett's success shows that it pays to write good ads and get up good literature, as he does, to send out to prospective buyers. A. P. J. readers should make it a special point to send for one of these booklets.

W. R. Curtis & Co., of Niagara Farm, Ransomville, New York, has a splendid stock of 500 tons of the best clover hay. They have capacity for cutting, sifting and bagging five to seven tons per day and will fill all orders for cut clover hay the same day they are received and guarantee satisfaction. Their clover cutter was made especially for their own use. Their ad gives prices and other information regarding this. All A. P. J. readers who wish to lay in a stock of cut clover hay should write them.

The first annual meeting of the Lake County Poultry and Pet Stock Association will be held at Grayslake, Ill., December 10 to 12. W. E. Waldon, judge; W. H. Emmons is secretary.

The premium list of the Big Rapids Poultry & Pet Stock Association is ready for mailing and a copy will be sent to all who will write for same, addressing B. W. Fellows, Big Rapids, Mich.

## HECK'S WHITE PLYMOUTH ROCKS CHANGE HANDS—CERTIFICATE OF SALE.

This is to certify that I have sold to E. L. Famulener, of Cameron, Ill., my stock, business and good will. I will in future breed only a few birds for my own pleasure, and respectfully urge my many customers to place their future orders with Mr. Famulener, as I have shipped to him my best birds, and, in fact, the best I have ever owned. He has been breeding this strain for the past few years, and has been unusually successful in the show room, which is evidence of his ability to mate the birds for best results and perpetuate the points of excellence which have enabled them to win in the largest national shows in the strongest competition. His large flock, combined with the cream of my own, places him in a position where I can conscientiously recommend him to all who were contemplating placing their orders with me this season.

FRANK HECK.

BUFF COCHIN HEN.

First prize at Indianapolis, 1901, Tucker, judge; first at St. Louis, 1901, Butterfield, judge. Bred and exhibited by J. B. Clark, 312 Evanston Ave., Chicago.

The next exhibition of the Augusta Poultry, Pigeon, Belgian Hare & Pet Stock Association will be held December 16 to 21. This will be one of the best shows in the south. Dr. S. T. Lea, one of the most prominent fanciers and judges in the south, will place the awards. Premium list may be had by addressing W. B. Love, secretary, 904 Broad street, Augusta, Ga.

Mr. A. R. Sharp, Taunton, Mass., secretary of the Boston Poultry Association, requests us to announce that he will gladly send a copy of the Boston premium list to all who desire same. The magnitude of the Boston show and the importance of a prize won there is so well known that comment is unnecessary.

Mr. W. E. Russell, of Danville, Ill., breeder of Buff Rocks, says that his stock is all right, and he has the goods to back it up. If Mr. Russell says this, readers of AMERICAN POULTRY JOURNAL can rest assured that it is so. He has about 200 head of youngsters that are "cracker jacks" that he will sell at reasonable prices. He has breeding and show birds, and will sell eggs in season.

**One Hen One Day One Mill**

It costs a mill a day—one cent every ten days—to make a hen a lively layer when eggs are high, with SHERIDAN'S CONDITION POWDER. Calculate the profit. It helps young pullets to laying maturity; makes the plumage glossy, makes combs bright red.

**Sheridan's CONDITION Powder**

fed to fowls once daily, in a hot mash, will make all their feed doubly effective and make the flock doubly profitable. If you can't buy it we send one pack, 25 cts.; five, $1. A two pound can, $1.20. Sample poultry paper free.

I. S. JOHNSON & CO., BOSTON, MASS.

Many successful poultry raisers have learned by experience that the cause of a very bountiful supply of eggs in the fall and winter, when prices rule high, is proper care, feeding, and management, which they have learned by experience includes the use in the mash food, once daily, SHERIDAN'S CONDITION POWDER. It helps to mature young pullets so they will lay when five or six months old.

**They Succeed Best**

In keeping poultry for profit, who study **cause** and **effect** carefully.

No matter what kind of foods you use, SHERIDAN'S POWDER is absolutely necessary to **cause** the desired **effect**, namely, a well filled basket of eggs daily. It gets old hens over molting period quickly; it develops to laying maturity the young pullets. It **causes** perfect assimilation of the food elements needed to **effect** growth, prevent disease, and produce eggs. Costs one mill a day per hen.

**Roup, Colds, Diarrhœa, Eggs.**

**AMERICAN ROUP CURE** is the cheapest and best cure for colds, roup and canker in fowls or pigeons. Simply put it in the drinking water, and they take their own medicine. One box makes 20 gallons of medicine. If it fails to cure we refund the money. Price 25c per box, 5 boxes $1, postpaid.
**FOR CHOLERA, DIARRHŒA and all BOWEL DISEASES**, the American Chicken Cholera Cure will effect a speedy cure. Price 25c per box, 5 boxes $1, postpaid. Keep these two excellent remedies constantly on hand for immediate use, and you will not lose a bird.
**AMERICAN CONDITION POWDER** is the greatest Egg Producer known. It starts the birds laying early in the fall, and keeps them laying all through the winter, when eggs are scarce and high in price. Try it and see. Price, 1 lb. box 25c; by mail 40c; 5 boxes $1 by express from New York. Egg Record, good for one year, free with each box. Please do not send stamps.

AMERICAN POULTRY REMEDY CO., Dept. B, 48 Cortlandt St., New York City.

**Heck's White Plymouth Rocks are now owned by E. L. Famulener.**

I have purchased the stock and good will of Frank Heck and now have the grandest lot of White Rocks in the country from which to select breeders and winners for my customers. I have birds for sale scoring from 93 to 96½ and can mate up pairs, trios and pens. I have the highest quality in Buff Plymouth Rocks and have left some grand bargains in birds that can win in the strongest competition. Write me for what you want. Note our new address.

FAMULENER POULTRY YARDS,
E. L. FAMULENER, Prop.,
Rural Route No. 3, Galesberg, Ill.

**Eggs For Hatching**

From Maish's Barred P. Rocks.

I have 4 breeding pens of B. P. Rocks, containing all my prize winners at last winter's shows. Birds score from 91 to 93½ points. 15 eggs $3; 30 eggs $5; I guarantee satisfaction. B. P. Rocks exclusively,

R. R No. 1. ED. N. MAISH, Frankfort, Ind.

**Buff Rock Breeders.**

Bargains in good birds. Buy now. Mason's Buffs are winners wherever shown. Young and old stock for sale.

H. P. MASON. Fayette, Mo.

**GREEN CUT BONE**

Contains all the parts of an egg. Will keep only in cold weather. Buy a Humphery Bone Cutter, $12.00, and have bone fresh when you need it. Easiest and fastest cutter made. Clover Meal, provides vegetable food for fowls and takes the place of grass, etc., that they get in the summer. 50 lbs., $1.00; 100 lbs., $2.00. Either fine or coarse. Our poultry supply catalogue is free.

## THE GREAT CHICAGO SHOW.

Present indications are that the coming Chicago show will be the biggest poultry gathering the National Fancier's Association has ever experienced. No reader of this Journal who wishes to stand in the front ranks as a breeder of fine fowls should think of passing this show, but make it a point to be there with the best his yards contain, and secure a record on his birds that will be world wide. With a third more floor space in the recently completed annex to the Coliseum building, the ssociation will have ample accommodations for the increased display that will be seeking honors.

C. A. Damon will serve the interests of both exhibitor and association as superintendent. This gentleman is too well known in the show-room as a successful breeder of fine fowls to need any introduction to the fraternity, however, to the prospective exhibitor it should be told that he is known among his associates to possess strong executive ability, originality, and honesty of purpose in everything undertaken. Having these qualities, coupled with untiring energy his superintendentship should assist materially in making the next Chicago show a hummer. The method of judging adopted by the management is, as a journal states editorially, "A unique one to satisfy exhibitors in the placing of awards, and there is no doubt but it will be appreciated."

The plan is simply to allow the exhibitor to decide how the variety he has specimens entered in for competition should be judged, each bird to count a vote, a majority in each variety to rule. This method will no doubt breed a few kickers, but with the truth before us that every progressive step in the world's past history has had to convert numerous fault-finders, there need be no fear that this system of judging the Chicago show will prove disastrous. The fact is that breeders throughout the middle west in particular are pretty evenly divided for and against the score card, and where you may find exhibitors in one variety strongly in favor of the score card, you will find a majority of the breeders exhibiting another variety radically opposed to it. Anyhow, the method of judging the next Chicago show is in the hands of the exhibitor, hence, do not forget to express your preference when making entries.

*C. M. Davidson.*

*Chicago Lawn, Ill.*

Milk in any form is one of the best foods for fowls. Mix the mash with it for growing young stock. It is excellent for drink, but cannot entirely take the place of water.

**I WANT MONEY, YOU WANT CHICKENS?**

**1000 YOUNG BIRDS FOR SALE 1000**

CAROLIUS I.

First prize Light Brahma cockerel at Lincoln and Carlinville (Ill.) shows. Score 93¾ by Shauer and Heimlich. Bred and owned by C. P. Gundlach, Lincoln, Ill.

## NO SHOW AT ST. LOUIS.

Mr. Henry Steinmesh informs us that there will be no show at St. Louis this season. This decision was arrived at after a careful consideration by the members of the St. Louis Fanciers' Association. It seems that the large exhibit of poultry, which is seen annually at the St. Louis fair is so largely attended that the public in general will not patronize the winter show. The Association has an invariable record for always paying its obligations in full, and when the shadow of a doubt arises as to their being unable to continue to do so, they prefer to step aside for one year rather than take the chances of incurring obligations which they may not be able to pay. The display of poultry at the St. Louis World's Fair in 1903 is being planned in such a manner as to insure a larger exhibit than has ever been seen before.

We are in receipt of a communication from Mr. J. W. Grier, of Cold Water, Ohio, in which he incloses a letter from one of his customers at Lebanon, Ind. This customer of Mr. Grier writes that he has just won first prize on a White Plymouth Rock male bird bought of Mr. Grier. This is the kind of stock he sends out, and a purchase from him is in itself a guarantee that the birds are of first-class quality and as represented.

Mr. J. W. Grier, of Cold Water, Ohio, has a change of ad. in this issue. He is well known to our readers as a White Plymouth Rock specialist. The cockerels which Mr. Grier is offering in his ad. are bred from Stay White birds for several generations. He not only has clear white color in his birds, but other points have not been neglected, and he is remarkably well fixed in shape, comb and color of legs. He has bred his favorites for several years and has made a close study of them. He gives all orders his personal attention and selects the birds himself to be shipped. He is in a position at this time to furnish both show birds and breeders.

The Napoleon Fanciers' Association is making arrangements to hold one of the largest poultry shows to be found in northern Ohio this year. The members of this association are most active and guarantee a representative show in every respect. It is worthy the support of exhibitors everywhere. E. J. Davis, Napoleon, Ohio, is secretary.

First prize Light Brahma hen at Illinois State Fair, Springfield. Bred and owned by C. P. Gundlach, Lincoln, Ill.

The fourth annual show of the Sandusky County Poultry and Pet Stock Association will be held at Fremont, Ohio, January 27-31. Many valuable cash specials are offered in addition to the regular list. Premium list will be ready for mailing December 15 and a copy will be sent to all applicants who address Richard B. Bowlus, Fremont, Ohio.

Fowls, like people, are affected by climate, and birds shipped long distances are very apt to show the results of the change by getting out of condition, falling off in egg production, etc.

**REV. JOHN HUGHS, Table Grove, Ill.**
**WIHTE PLYMOUTH ROCKS.**
Stock, yonng and oid, for sale at iow prices if taken soon. Now is yonr chance.

State Vice President American Bnff P. Rock Clnb.

**High Class S. L. WYANDOTTES.**
Jnst had my stock scored the 13th of Nov., 1901, and they scored from 89 to 93¾. The 71 head averaged 91½ points. Scored by Judge Shellabarger. Be said it was the best average flock of S. L. Wyandottes he ever saw. They have been line-bred for 10 years; they have the laced wing-bars, nice bay eyes and large open centers. I can furnish you show birds or breeding stock at reasonable prices. Everything as represented or money refunded. Mention this paper.

# OUR BEST

## Clubbing Offer for Season 1901-2

# 3 GOOD PAPERS for Only 85 Cents.

We take pleasure in announcing that we have made a remarkably favorable contract with the publishers of ***THE PRAIRIE FARMER and THE AMERICAN SWINEHERD*** by which we can send both of those good papers and our own—

## *All these for Only 85c a Year.*

This offer is open to our old subscribers as well as new ones.

## The Best Combination of Papers.

### *American Poultry Journal.*

AMERICAN POULTRY JOURNAL, Chicago, is the oldest, brightest, most up-to-date and most profusely illustrated poultry journal published. Generations of fancy poultry breeders have received their inspiration from its columns.

It was founded over a quarter of a century ago and has seen the poultry business grow from a mere fad of limited extent to an acknowledged business of no small magnitude and one in which the best and most intelligent people in all walks of life are engaged. While AMERICAN POULTRY JOURNAL is the oldest in years, it is the newest in up-to-date ideas and in giving to subscribers the results of the most modern research along the various lines that deal with making the rearing of Standard-bred poultry an occupation, combining both pleasure and profit.

### *Prairie Farmer.*

THE PRAIRIE FARMER is the oldest general farm paper published in the western states. It is the favorite paper in over 100,000 homes of the best farmers in the Mississippi and Missouri Valleys. It is clean, well edited, and has a department for all classes of general farm work, and especially good household and miscellaneous features. It was established in 1841, and has been published regularly every week for over sixty years. No farmer, fruit-grower or stock raiser can afford to lose what the best writers of the day have to say from week to week in the Prairie Farmer. We hope that every reader of the American Poultry Journal will read it the coming year.

### *American Swineherd.*

AMERICAN SWINEHERD, the leading authority on all matters pertaining to the breeding, feeding and management of swine. It teaches how to make a success of swine raising, how to get 15 lbs. of pork out of a bushel of corn. It is the swine specialist. It is practical, profitable and reliable. Every owner of a pig can afford to subscribe for it. Established 1885. 36 to 64 pages monthly.

Remember every subscriber to this paper can have all three of the papers mentioned above a full year for 85 cents. All orders should be sent to

**AMERICAN POULTRY JOURNAL,**
**325 Dearborn St., Chicago, Ill.**

# BARRED ROCKS.

If you want good birds at reasonable prices, write me. I have 250 cockerels and pullets that are good in color, shape and other desirable points. They are up to weight and over and are worth more than I ask for them. Will sell some extra fine specimens at a sacrifice until my flock is reduced,

**MRS. THOS. H. BENNETT, Rossville, Ill.**

# Light Brahmas--Light Brahma Bantams

I offer **Exhibition Cockerels** that have great **color, shape** and **style,** that can **win** in the fastest company. **Sired** by **"Wonder,"** score 95½, highest scoring Light Brahma male ever exhibited. **Light Brahma Bantams.** Won **2d cock, 1st hen, 1st cockerel, 1st pullet** and all **Specials** at the Pan American Exposition. Send for circular.

**GEO. W. HILLSON, Box 400, Amenia, N. Y.**

# Have a Look!

## Go Away Back and Sit Down.

Study it over, then send to **JONES** and get some winners. He can furnish them in

## Silver, Golden and White

# WYANDOTTES,

## G. S. and S. S. Bantams.

They are line-bred and have won more prizes than any other strain in America. In the hottest company, at Indianapolis, Springfield, St. Louis, Louisville, and in my customer's hands at Illinois State Show and Chicago, 1901. 800 head of good ones for sale. Toulouse and Embden Geese, Bronze and White Turkeys, Scotch Collie Dogs. Satisfaction guaranteed or your money back.

**R. E. JONES, Box A, Flat Rock, Ind.**

# SAY YOU!

If you are looking for a bargain in the very best line bred Barred Rocks and White Wyandottes write me. I have 40 good breeding ckls $2. 50 pullets $1.25 each this month. A few ckls and pullets good enough to win in any company $5 and up. At Henry, Ill., Jan. 1-4, 1901, I won on B. Rocks 2d cock, 1st ckl, 1st and 3d hen, 1st pen, 1st and 3d pairs, 135 birds competing. On White Wyandottes 2d ck., 1st, 2d ckl, 1st, 2d, 3d hens, 2d, 3d pul. 1st pen, 2d, and 3d pairs, 38 birds competing. Also Silver Cup sweepstakes for greatest number of points won, all classes and varieties competing. At Chicago I entered one pair rocks, won 5th hen. Satisfaction or your money back every time.

**J. N. YOUNG,**

**Box 209. Whitefield, Ill.**

# Black Langshans.

We offer for sale a limited number of breeding and exhibition stock. First come, first served. Score cards, by D. T. Heimlich, after Dec. 16th. Order at once direct from adv. Big value, extra cheap, considering high quality; bred from imported and exhibition stock. We have the finest birds we ever raised. All grand in typical Langshan shape and fine in color. We have imported more birds from Croad Yards than any other firm in eastern Illinois. (Retain this adv.)

***THE GEO. S. DUFFIN CO., Hoopeston, Ill.***

# Bennet's Buff Rocks.

## Champions of the West,

***O. P. BENNETT, Box 328, Mazon, Ill.***

***"Burdick's Nuggets Pure."***

Presideut American Buff Plymouth Rock Club.

# Arnold's White Wyandottes.

Prize winners at Chicago, Peoria, Danville, Springfield, Bloomington, Rockford, Streator and Princeton. Always winning where competition was strongest. Scores as high as 96¼. I have

## 300 Birds to Select From

and a better flock cannot be found anywhere. I will close out at once without reserve all my White Holland Turkeys, on account of not having room to raise them in the future. Every bird, prize winners and all, will be sold at a bargain. Finely illustrated half-tone circular free. Write for one to-day.

**CHAS. G. ARNOLD,**

**Box 45, Leland, Ill.**

## Do You Feel the Need of Help
### in Mating Your Breeding Pens

to produce prize specimens? **DO YOU WANT Private Scoring Done in an Honest and Correct Manner?** I am open for engagements to go anywhere and do this work.

My **Heavy-weight S. C. Brown Leghorns** are all sold, but I will have plenty of eggs after March 1st. I have some exhibition birds in **BARRED PLYMOUTH ROCKS** left, both sex, that are elegant. Who wants them? Address

**J. W. WHITNEY, Box A, Chatham, Ohio.**

---

**Adams' Famous Black Prince Strain**

# DARK BRAHMAS.

Winners at Pan-American, Cleveland, Oshkosh, International at Brantford, Ont., and many other large shows.

***FOR SALE***—10 grand full-feathered yearling males, 20 yearling hens and 200 fine chicks. Show birds and choice breeders a specialty.

**CLARK E. ADAMS, Racine, Wis.**

Secretary and Treasurer American Dark Brahma Club.

---

# A Bargain

for your money if you buy Buff Plymouth Rox of Arundale. Winners at Chicago and other shows. Farm raised; good layers. Stock for sale. Score cards after November 15th. No eggs. Burdick and Shepard strains.

**W. H. ARUNDALE,**

**Newark, Ill.**

R. R. No. 2. Telephone, Plattville, Ill.

---

# WHITE ROCKS
**and**
# White Wyandottes.

Judge Russell scored my stock in November and they are banded with the Smith Sealed Leg Band, so my customers will get the right bird with the right score. My Rocks were winners at Chicago for the last two years. My Wyandottes are pure Duston strain. 400 birds for sale. Incubator eggs till breeding season at $5 per 100.

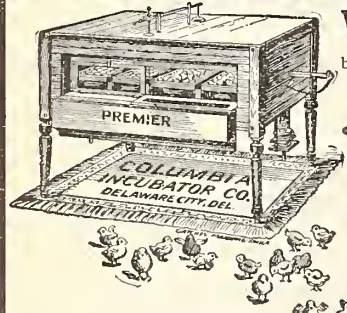
## Show Birds at Reasonable Prices.

**J. L. JEFFERSON,**

**Box A, Des Plaines, Ill.**

One of Jefferson's White Wyandotte Cockerels.

---



## Why Take a Chance

by investing money in a machine you know nothing about when you can have the

## New Premier Incubator,

delivered at your home, and run it until you are sure of what you are getting, **without paying us a penny.** The Premier runs longer on less oil. The Premier is absolutely safe. The Premier gets big hatches. The Premier is sold on its merits, after you know those merits. Do you suppose this company would have the courage to sell machines on this plan if we did not know just what the machine would do? Don't you want one of our beautiful art catalogues? It tells all about our selling plan, and also about the Simplicity Incubator. Sent for only 5 cents.

We have a line of scientific plans for building Brooders, Poultry Houses, etc., that we sell for 25 cents.

***Columbia Incubator Co.,***

R. E. JONES, FLAT ROCK, IND.

We are pleased to note the many prominent engagements as judge, which Mr. Jones is making this season. His long years' experience in breeding, mating and exhibiting the various breeds in the Standard places him in position to know a good bird from a bad one. He has made Standard-bred poultry a study practically all his life. Among the shows which he will judge this season are Chicago; the Indianapolis State Fair; Columbus, Ohio, and St. Louis, Mo. For business reasons Mr. Jones has heretofore not made an effort to work into judging extensively, but he intends now to pay more attention to the work and will in the future accept as many engagements as he can fill during the winter season, rather than decline them as he has in the past. We do not hesitate to recommend Mr. Jones to all associations and to breeders who wish scoring done and the assistance of a competent judge in mating their stock. Some years ago when Mr. Jones started judging he received the indorsement of some of the most prominent judges and breeders in the field and since that time his work has been such as to merit the approval of all who are competent to pass upon it. He has been selected as assistant superintendent of the poultry department at the Pan-American.

### ENORMOUS DEMAND FOR EGGS.

An egg merchant, who goes from house to house buying eggs, told us a few days since that he expected to have to pay 50 cents a dozen for eggs before Christmas. This is remarkable, when we reflect that this country has to import several million dollars' worth of foreign eggs. Our own egg raisers ought to have this money. The demand for fresh eggs for food alone far exceeds the supply. At 50 cents per dozen eggs are as cheap as beefsteak for food. Many persons who keep hens will probably not have an egg to sell when they reach 50 cents. Some one may ask, "What can a body do, when the pesky old hens stop laying, and the pullets refuse to begin until spring?" Why! do as Wm. H. Yeomans, of Columbia, Conn., editor of the Germantown *Telegraph*, did last winter. He says: "Last fall I made an experiment worth giving our readers. Until about Dec. 1 I was getting from twenty common hens only one or two eggs a day. I decided to try Sheridan's Condition Powder. I confess I had no faith in its value; for nine days saw very little effect. Then the hens began laying, and in three months laid 858 eggs. Part of the time the thermometer was 12 degrees below zero, and my hens were laying a dozen eggs a day, while my neighbors (who did not use Sheridan's Condition Powder) were getting none. I. S. Johnson & Co., Boston, Mass., the only makers of Sheridan's Powder, will send for 50 cents two 25-cent packs, five packs for $1.00; or for $1.20 one large two-pound can of Powder, postpaid; six cans, $5.00, express prepaid. Sample copy of the best poultry magazine sent free.

### HAVE YOU GOT IT?

A new and practical way to save money for our readers as well as supply means which are frequent and sometimes urgent, is the opening of a large house where you can buy small quantities at wholesale prices of high grade drugs, chemicals, perfumes, toilet preparations, household and homeopathic remedies, spices and flavoring extracts, hair goods, combs, brushes, soaps, nursery goods, rubber goods, trusses, abdominal belts and bandages, deformity apparatus and appliances, surgical instruments, electric belts, suspensories, plasters, absorbent cotton, gauzes and chest protectors, medical books, batteries and therapeutical appliances, veterinary instruments, books and remedies, dairy and poultry preparations, fertilizers, optical goods, spraying apparatus and chemicals, acids, drugs and patent medicines, cameras, druggists' sundries, bottles and glassware, chemists' supplies, paints, oils, varnishes and brushes. This house is the Heller Chemical Co., of Chicago, Ill., whose advertisement appears elsewhere in this paper. This is truly a long-felt want, as in many places people cannot buy at all the things in this line that they want, and if they do succeed in finding them they are often obliged to pay enormous prices for them, besides substitution is often necessary. But with this house it is not so, as they carry everything, and their sales being so enormous necessitates a replenishing of their stock continually, and this insures you pure, high grade goods. They sell in most cases goods at half the amount usually charged by others.

The Heller Chemical Co. is a large corporation in Chicago, doing both a wholesale and retail drug business in the territory covered by this paper. This establishment occupies large quarters, besides they have a number of laboratories located in the city of Chicago. Words cannot tell about their handsome catalogue; the goods listed are both of the old school and of the new, of the allopathic and homeopathic kind, and you can get anything that is made and which should be kept by all first-class druggists. Every family ought to have one of these catalogues, as it is a household necessity, and one can never tell when there may be a need of medicine, so that when it is needed it will be at hand. Much suffering and oftentimes life is saved by having such needed articles when they are required. This beautiful catalogue can be obtained by addressing the Heller Chemical Co., Chicago, Ill., U. S. A., and send ten cents to partly pay the postage, which they will refund upon receipt of your first order. When writing please mention this paper.

Mr. James Cheston, Jr., secretary of the Philadelphia show, requests us to call attention to the fact that their catalogue does not mention the elegant silver loving cup which will be given for best display of Games other than Pit Games. The cup is of solid silver and handsomely gotten up with three solid ivory handles. It is a work of art and is valued at $50.

# Oke Lawn Poultry Yards,

*Richard Oke, Prop., Box 361, London, Can.*

Breeder of high-class, prize winning White Plymouth Rocks, Partridge Cochins, Black Wyandottes, Black and Mottled Javas, Rose Comb White Leghorns, La Fleche, Creve Cœurs, Sultans, Gold and Silver Spangled, Gold and Silver Penciled and Black Hamburgs. **BANTAMS**—Gold and Silver Sebrights, Black and White Rose Comb, White, Black and Black-tailed Japanese. we know is made on right lines.

The Reliable

is a combined food cooker and water heater. The best of material, good workmen and experience make it the only one of its kind. 20 gal. $5.00, 50 gal. $14.00, 100 gal. $16.00. Don't buy a food cooker until you have investigated this one.

Rippley Hardware Co.,
Box 11, Grafton, Ill.

### STEINMESCH QUICK MEAL

Extra Quality Chick Feed.

Mr. W. C. Denny, the well-known secretary of the Buff Plymouth Rock Club, and eastern manager of the Des Moines Incubator Co., Buffalo, N. Y., has given the question of chick feed considerable attention and decided that the Des Moines Incubator Co., in their new departure of handling all kinds of poultry supplies, could afford to handle only the very best goods of all kinds, and therefore selected Steinmesch Quick Meal Extra Quality as the feed for his company to handle. It is the best feed especially prepared for the best trade. The Des Moines Incubator Co. are general easteru and New England agents, 101-105 Erie street, Buffalo, N. Y. Carrying a large stock, they can fill all orders promptly at regular St. Louis prices of $2.50 per 100 pounds.

### A LIBERAL OFFER.

George W. Brown, proprietor of the Ouachita Poultry Farm, Camden, Ark., has adopted a new plan in doing business. He makes a specialty of stocking new plants and selects the birds for best results. He takes the stand that his splendid show record conclusively proves that his stock is as good as the best, and to satisfy all purchasers, he agrees to furnish the best at the most reasonable prices, and guarantees not only that the birds will please, but that if they do not, he will refund the money and will pay the purchaser every cent of expense incurred in buying the birds. This leaves no room for argument. No breeder could do any more, and Mr. Brown must certainly have the right quality at the right price, or he could not afford to make this guarantee.

### A BIG WIN AT THE PAN-AMERICAN.

We had the pleasure of meeting Richard Oke, of London, Ont., while at the Pan-American, and "Had a Look" at his exhibit, which was one of the largest there. Mr. Oke breeds a string of good ones, from White Rocks to Bantams, and had an exceptionally fine show all through; as is proven by the large number of ribbons he won. He seemed to be the "whole thing" in the Bantam building, winning 5 specials as follows; *special* for best Black Rose Comb, best White Rose Comb, best White Japanese, best Black Tailed Japanese and best Buff Cochin, in the show. This is quite a win for a show like the Pan-American. His entire winnings were 38 firsts, 27 seconds, 12 thirds and 5 specials.

Mr. Oke is no new man at this business, as he always goes down to Madison Square show and gets his share of the prizes. He makes a specialty of high class exhibition and breeding birds and can supply your wants in the breeds he handles.

Look up his ad in this issue and when in need of anything he breeds write him. He is a square man and will guarantee satisfaction. *R. E. Jones.*

### THE AUTOMATIC POULTRY FEEDER AND EXERCISER.

By introducing the Automatic Poultry Feeder and Exerciser to the poultry fraternity, the Automatic Poultry Feeder Co., of Genoa, N. Y., says we are assured that we have done more to promote the interest of egg production than all other inventions combined. Every poultryman knows that exercise is the paramount necessity for winter egg production. The Feeder is recommended by the Rhode Island Experiment Station and endorsed by poultrymeu throughout the country. It solves the problem of keeping the fowls busy. You fill the hopper and the hens do the rest. Each movement of the levers causes a few kernels of grain to drop into the litter on the floor. Thereby the feeding time is lengthened and the hens are kept continually at work. A. P. J. readers should write for their catalogue.

Mr. A. G. McClintock, Burton, Ohio, made a remarkable record on his Houdans at the Pan-American, he winning more firsts than any other exhibitor and more prizes than all others combined, including silver cup for largest display and silver cup for best display, cash special for best cock, hen, cockerel and pullet, as well as other highly important premiums. These prizes were won in competition with the best breeders in the United States and Canada. In the face of a record like this, comment is unnecessary. It simply places the stamp of quality upon Mr. McClintock's birds and entitles him to claim the leadership in Houdans.

Mr. F. G. Bean, of Norristown, Pa., was among the most prominent winners at the Pan-American Show. In the Buff Rock class he won seven prizes and it will be readily seen that his stock must be of the very best quality to go into a class like that found at Buffalo and win as he did. In addition to the regular prizes won, he received silver medal for the best cock, hen, cockerel and pullet; also silver medal for the best hen in the show. In White Rock class he won 5th on cockerel and 3rd pen. His Buff Wyandottes were a most excellent lot of birds and received their share of the prizes. He also had a fine exhibit of Anconas, winuing first cockerel, first pullet, 2nd cock aud 2nd hen. His long list of winnings is conclusive proof that there are no better birds bred than those in Mr. Bean's yards. He was also a heavy winner at the Hagerstown Fair, which, as our readers know, is one of the largest shows in the east and ranks with Boston and New York for quality and number of birds shown. Mr. Bean is an old and experienced breeder, and his patrons are sure of getting stock which may be depended upon to produce the best.

Messrs. E. H. & S. H. George, Groveland, Mass., have started making another record this season by making a clean sweep of every prize offered at Essex County Fair at Peabody, Mass., also at the Amesbury Fair with Judge May placing the awards. Mr. May who is one of the most prominent Eastern judges of this variety, says that the birds owued by Messrs E. H. & S. H. George are the finest he ever saw both in shape and color. This is only one of the endorsements given to this flock of fowls. Their record at the last Boston show is unexcelled by any White Rock breeder in America. We have no hesitancy in saying that there are no better birds to be found anywhere thau those owned by this firm. Mr. E. H. George is the well-known ex-president of the White Plymouth Rock Club.

We are pleased to call the attention of our readers to the change of ad in this issue of H. H. Wallis, Box 17, Delavan, Wis. Mr. Wallis has for eleven years been breeding Black Minorcas and has made an improvement in them each season. He has an unusually fine lot of stock for sale this fall and can furnish cockerels, pullets and hens. He can mate them up iu any way to please his customers, and he guarantees satisfaction. Mr. Wallis is in the business more for pleasure than for profit and disposes of his surplus stock far below their real value. No lover of this variety should overlook the opportunity offered by Mr. Wallis to get birds of the highest quality at a low price.

Mr. George H. Burgott, Lawton Station, New York, requests us to state that Mr. Clifford W. Beaman, of Port Dickinson, New York, received through error a Single Comb Buff Leghorn cock from the Pan-American exposition. Mr. Beeman will gladly deliver the bird to the rightful owner. Mr. Burgott also wishes us to state that he has a few copies of the catalogue of the show and will send a copy to any one sending him 20c in stamps. If any of the exhibitors are short of prize ribbons to which they are eutitled, Mr. Burgott will send them duplicates upon receipt of a two-cent stamp.

Mr. Theodore E. F. Holzhauser, Columbia, S. C., reports the following winuings on his Silver Wyandottes this season. At Hagerstown, Md., 1st pullet, 3rd cockerel; at Atlanta, Ga., 4 firsts, 3 seconds, 3 thirds and one fourth prize; at Columbia, S. C., State Fair he made a clean sweep of all 1st prizes and all but one second prize, and also sold the pullet that won second at the Pan-American Exposition. These winnings are additional evidence that Mr. Holzhauser's Silver Wyandottes are all that he claims for them. He breeds this variety exclusively and has been giving them his close attention for years. We can heartily recommend him and his birds to our readers.

Mr. Edward W. Brunk, of Delavan, Wis., reports the following winnings at the recent Elkhorn, Wis., show. These premiums were all won in strong competition. In the Bantam class, there were over 200 birds in competition. He won 1st prize for pair of chicks on Black Langshans, White Wyandottes, Buff Wyandottes and Partridge Wyandottes, and 2nd on Barred Plymouth Rocks. On old fowls he won 2nd on Barred Plymouth Rocks and 2nd on Partridge Cochins. In the Bantam class, he secured 1st on Silver Sebright fowls and 2nd on chicks, 1st on Golden Sebright fowls and 2nd on chicks. He won 1st and 2nd on

**J. R. Brabazon, Jr. & Co., Box 2, Delavan, Wis.**

F. C. Wilcox, of Hickory Grove Place, Joliet, Ill., the specialty breeder of White Wyandottes, has a fine lot of Wyandottes this year, and AMERICAN POULTRY JOURNAL readers can certainly find no better stock than Mr. Wilcox's.

We wish to call the attention of our readers to the ad of L. F. Diddie, Chesterton, Ind., who is an old time breeder of Standard White Leghorns. He breeds "Knapp Bros." famous strain, noted for their large size and great egg production. He has hundreds of choice young stock for sale, all farm raised and can furnish pairs, trios, pens and single birds at reasonable prices.

Mrs. W. B. Popham, Charleston, Ill., has recently commenced a yearly ad in AMERICAN POULTRY JOURNAL and she writes that she has sixty of the largest and finest Mammoth Bronze Turkeys that she has ever raised. For vigor and early development she challenges competition. She has some choice exhibition birds for sale, including a 40-lb. adult cock and one yearling tom, weighing 33 lbs., a grand specimen of the Mammoth Bronze. Her Barred Rocks are line-bred and show good breeding. She has some especially choice cockerels for sale.

Harry M. Lamon, of Watertown, N. Y., has just issued a new circular, setting forth the merits of his Buff Leghorns, Buff and Barred Plymouth Rocks, in which he presents to the public one of the best show records possible for a breeder to obtain. This circular should be in the hands of every prospective purchaser of birds of these varieties and we urge our readers to send to Mr. Lamon for a copy.

Valley Farm, Simshury, Conn., was, as usual, among the heavy winners at the Hagerstown Show. In the White Rock class they won 1st cockerel, 2nd and 4th cock, 2nd pullet, 1st and 4th hen. In Houdans 2nd and 4th cock, 1st and 2nd hen, 1st cockerel. In Barred Rocks 2nd and 5th cock, 1st hen, 1st and 3rd pullet, 1st cockerel. Considering the quality and quantity of competition, which is always found at Hagerstown, these winnings are worthy of special mention. Valley Farm is the plant owned by J. B. Thomas, Jr., and managed by J. F. Crangle.

I beg leave to announce that the American Black Minorca Club will hold its annual meeting at Philadelphia, January 1, 1902. Through error on our part we failed to inform the secretary of the Philadelphia show of date of meeting, hence the change from that as published in Philadelphia show catalogue. There will be the largest number of Minorcas at this show ever brought together in America, and I earnestly solicit all members to send in a liberal number of birds to compete for the numerous specials offered by the Philadelphia management and friends of the club. As entries close on the 12th of December, it will be well to send in entries as early as possible. If you have not received catalogue of Philadelphia show, write James Cheston, Jr., Chestnut Hill, Pa., who will be pleased to send you one.

CHAS. L. BLANTON,
Secretary and Treasurer.

The next exhibition of the Bloomington Poultry and Pet Stock Association will be held at Bloomington, Ill., December 18-21. Prospects are for the largest show ever held in Bloomington. Premium list is now ready for distribution and copies may be had by writing to Israel Root, secretary, Bloomington, Ill.

Brockschmidt Bros., of Freistatt, Mo., had a splendid exhibit at Mt. Vernon recently of Partridge Cochins, Silver Laced Wyandottes, White Langshans, Barred Plymouth Rocks and Buff Cochins.

Mr. George Vail, of Henry, Ill., proprietor of Cedar Farm, is one of those farmer fanciers of Barred Plymouth Rocks and Poland-China hogs, who finds that it pays to have the best stock at all times. In carrying out this idea, he has procured the best stock that money could buy, and can satisfy his customers in every respect. His advertisement will be found elsewhere in this issue, and our readers would do well to write for prices and description of stock.

First Prize White Wyandotte pullet and third hen (tie second) at Indianapolis Show, Dec. 10-16, 1900. Bred, owned and exhibited by Fred B. Keifer, Marshall, Ill. Judge Hewes gave the pullet a score of 96¼ (only two cuts on shape—¼ on breast, ½ on tail); and the hen a score of 96 (three cuts on shape—½ on breast, 1 on back and 1 on tail)—no cuts on color. These birds are line-bred (mother and daughter). Each won first at the Marshall Show. Mr. Keifer is a White Wyandotte specialist.

H. E. Bates, of Galesburg, Ill., has a change of ad in this issue. He is offering choice young stock for sale with score cards by Russell. His young stock was raised from prize winning ancestors. Prominent judges have told Mr. Bates that his stock is as fine as they have seen anywhere this season. He can undouhtedly give his customers good value. He breeds Buff Wyandottes and White Plymouth Rocks.

S. F. Flint & Son, Peoria, Ill., won 1st and 2nd on pen in the White and Buff Wyandotte classes, and 1st on Barred Rock pen, at the Peoria Corn exposition Oct. 7th to 19th. Prizes at this show were awarded on pens only. Messrs. Flint & Son are keeping up their prize winning record.

The Logan County Poultry Association will hold one of the best shows in central Illinois, December 23-28, at Lincoln. They offer liberal regular and special prizes, including two large silver cups. All breeders who can possibly arrange to attend this show should place it upon their list.

# News and Announcements of Poultry Associations and Specialty Clubs.

The Missouri State Show will be held at Chillicothe, Mo., Dec. 7 to 12, 1901. Russell and Shellabarger, judges. The actual paid membership is now the largest in the history of the association, and the prospects for the show are the best that they have ever had. A slight mistake was made in the announcement of the "Grove Hill Trophy," which is a challenge cup, and therefore must be won at least twice before ownership can be claimed. This elegant silver cup is valued at $75, and is now on exhibition in Chillicothe. The merchants of that town are so enthusiastic of the "Chicken Show" that they have bought outright, 1,000 admission tickets which they are to distribute among their patrons and it is expected that in this way an extraordinary interest will be developed not only in Chillicothe, but all through Livingston County, and, in fact, the entire northern part of the state. Keep your eye on the Missouri State Show for 1901. Premium list will be mailed cheerfully to any one who will ask for it. Address,

C. W. Nuss, Secretary.
Tina, Mo.

---

The fanciers of Peoria, Ill., feel confident that their exhibition of poultry, pigeons and pet stock to be held December 27 to January 1 will surpass all past events. Many of the best breeders throughout the state have already promised to send their good birds to this show and some will attend the show in person. The premium list is now ready for mailing and every fancier who shows birds at all should send for one at once.

In the matter of special premiums the association has been very fortunate, having quite a large list to offer, among them many silver cups. The Peoria shows have always been known as good poultry markets, one exhibitor last year having sold over $200 worth of fine stock, not saying anything of the many others who sold past the hundred mark. As will be noted, the show comes during the holiday week, which, together with the fact that all railroads leading to Peoria will give special rates, will, no doubt, be the means of drawing large crowds to the show from the surrounding towns. Taking all these facts in consideration, Peoria is an ideal poultry show city and no one will ever regret having sent their best there to be scored by an expert judge and at the same time be viewed by thousands of people.

For further information address the secretary, H. C. Schwab, care of Dime Savings Bank, Peoria, Ill.

---

The annual meeting of the Water Fowl Club of America was held in connection with the Pan-American Exposition Poultry Show.

The report of the treasurer showed the club to be in a sound financial condition.

A free debate occurred over the question of needed changes in the American Poultry Association Standard of Perfection as pertaining to water fowl. Nearly all present took part and Mr. J. Fred Crangle was appointed a committee of one to suggest following changes to the A. P. A. and see if same would be granted to the club:

1. That black on the bean of females of all white breeds of ducks be stricken from the list of disqualifications, but be made a severe cut.
2. That the Standard shall distinctly say that the Call and East India ducks are Bantam ducks, and the smaller they are the better.
3. That three points cut per pound for under weight in a duck should be changed to two points to conform with other poultry.
4. That the Standard weight of the Pekin duck be raised one pound all around to conform with the Rouen.
5. That the China goose be declared a small goose, and that the weight read under 14 pounds. This will enable the small, pure China geese to win over African crosses.
6. It was the sense of the meeting that pure white primaries should disqualify the Toulouse goose.

The election of officers followed, and the following were elected for the ensuing year: T. Farrer Rackham, president; Charles McClave, general vice-president; Maurice F. Delano, secretary; J. Fred Crangle, treasurer, and W. A. Smith, M. T. Burn, E. E. Smith and the officers compose the executive committee.

A committee of five were appointed to report next day a list of five judges representing the various sections of the country, and who are officially endorsed and recommended by the club, to all associations as being capable and acceptable judges of all water fowl.

The committee on judges handed the following list to the secretary:

Dr. F. D. Kendall, Columbia, S. C., for the South.

Charles McClave, New London, Ohio, for the West.

M. T. Burn, Tilsonburg, Ontario, for Canada.

W. A. Smith, Whitney's Point, N. Y., and J. Fred Crangle, Simsbury, Conn., for the East.

All breeders and lovers of water fowl are cordially invited to join our club and help add to the widespread popularity, the beauty and utility qualities of our web-footed friends, are fast winning for them.

Application blanks and copies of our catalogue will be promptly mailed to all requesting same of

Maurice F. Delano, Secretary,
Millville, N. J.

---

Mr. George G. Brown, secretary and treasurer of the National White Wyandotte Club, sends us a list of twenty-two new members who were elected at the late meeting at Buffalo. This club, under Mr. Brown's management, is making phenomenal progress and some of the best White Wyandotte breeders in the country are giving it their encouragement and support. They desire the membership of every White Wyandotte breeder in the United States and Canada with the assurance that the membership will prove mutually beneficial. We would suggest that all who are interested in White Wyandottes write Mr. Brown regarding the club. His address is 704 New England Building, Cleveland, Ohio.

---

A special meeting of the American Plymouth Rock Club was held in connection with the poultry exhibit of the Pan-American in the Agricultural Building, Thursday, October 24, at 2 p. m. Meeting was called to order by the president, Dr. O. P. Bennett, who made some pleasant remarks upon taking the chair.

The roll call found twenty-one members present, including the majority of the officers and executive committee.

W. C. Denny made a few remarks on the loss we had sustained in the death of the veteran Buff Rock breeder, H. S. Burdick, and moved that a committee, consisting of Messrs. Arnold, Foster, Benedict and Shepherd, be appointed to draft suitable resolutions on the occasion. It was moved that W. C. Denny be added to the committee and so carried.

An interesting talk was given by F. C. Shepherd on the great improvement made in color, while H. E. Benedict called attention to the defect in color of eye, which must, with so many, be overcome.

Also interesting remarks by M. F. Delano, C. W. Beman and Eugene Sites.

The members extended a vote of thanks to W. C. Denny for the manner in which he had placed the awards at this exhibit.

It was then announced that our annual meeting would probably be held in connection with the Boston show.

W. C. Denny, Secretary.

---

The Wallingford, Conn., show will be held December 31 to January 2, 1902, and will undoubtedly be larger than ever this year. A number of specials and silver cups will be offered. Premium list may be had by addressing Mr. H. Haywood, secretary, Wallingford, Conn.

---

We are in receipt of the premium list of the Philadelphia show. Among the attractive features of this show is the fact that the total amount of special cash prizes amount to about $2,300. This, in addition to the regular cash prizes, makes certainly a very attractive list. The management of the Philadelphia association has worked hard and systematically for the success of their coming show since the close of the last one and they will surely be rewarded to a greater extent than they anticipate. A premium won at Philadelphia this season is going to be

**Eggs For Hatching.**

From my great laying strain of S. C. White Leghorns. Plenty of range makes them large, hardy and vigorous. Egg record kept so we know that we are breeding from the very best. Also Rhode Island Reds, without doubt the best general purpose fowl known; best winter layers on earth. Eggs $1,50 per 15.

We have the birds and can start you right or supply you with new blood. We guarantee everything we sell and our prices are reasonable. Stock raised on three farms. Eggs $1.50 per sitting. Prompt shipment. Young stock for sale. Also some high grade Pekin Ducks. Write for prices and circular.

CLOVER MEADOW POULTRY FARM,

J. K. AUSTIN, Prop., Onargo, Ill.

## Gleason's Barred Ply. Rocks

**and Open-laced Silver Wyandottes**

Can not be out done in the Show Room. A few good breeders for sale in hens and cocks. Young stock better than ever. Exhibition stock at reasonable prices, considering quality. Young or old breeders for sale from $2.00 up. Do not breed cheap stuff. Some choice Buff P. Rock cocks cheap to close out. Correspondence solicited. Meution A. P. J.

GEO. J. GLEASON, Lock Box 321, Elburn, Ill.

# BARRED ROCKS.

FELCH'S VERDICT was that my first prize cockerel at the Indiana Poultry Association Show was the best Barred Rock cockerel he scored last season. He reached the remarkable score of 94 points. I bred from many other birds just as good as he is. Some of these are now for sale at reasonable prices. I have youngsters bred from these winners that will win for you. I have lots of them and you can buy them at right prices.

EDW. McCULLOCH, New Albany, Ind.

Sec'y Indiana Poultry Assn.

## White Wyandottes.

Cockerels for sale after Nov. 1st, bred from our Cleveland and Chicago winners, many of them from our 1st prize Cleveland cockerel, winner of the $100 cup.

THE FRED E. PILE POULTRY FARM CO., Cleveland, Ohio.

First Ckl. Chicago.

# LeDUC'S S. L. WYANDOTTES

Are down to date and have won the leading prizes at the largest shows. I can furnish cockerels that are laced from beak to bottom of hock and fluff and with that elegant tripple wingbar. Birds that can go in the fastest company and win. Everything as represented or money back. Score cards with stock, by Russell, after Nov. 5th. Write me before you buy. Also some fine B. P. Rocks for sale.

A. C. LeDUC, Box 288, Chenoa, Ill.

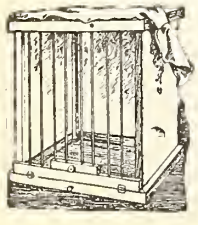
**Barred & Wh. Rocks, Houdans, Favorolles, Bronze Turkeys, Belgian Hares, and (Borzoi) Russian Wolf Hounds.**

Exhibition and breeding stock for sale. Send for illustrated catalogue. Address

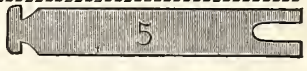
J. F. CRANGLE, Mgr.,

Box B, Simsbury, Conn.



**The Price**

of this splendid Exhibition Coop



**is Only $1.**

If you have not our catalogue, send for a copy at once. It describes and gives lowest prices on all articles used by poultrymen. We are printers of catalogues, stationery or anything you may wish. The use of a big line of poultry cuts free.

This is the new style Leg Band manufactured by us. It is unequalled. Price, post-paid, 17c per dozen. State breed of fowl. Write us your wants and we will make you estimates.

J. A. & W. S. HARRISON, Box C, Henry, Ill.

exceedingly valuable from an advertising standpoint. Breeders everywhere should place this show on their list. Mr. T. Farrer Rackham will superintend the poultry department. James Cheston, Jr., is secretary-treasurer and will reply promptly to all correspondence sent him.

The Akron Poultry and Pet Stock Club, of Akron, Ohio, are arranging for a large exhibition to be held January 6-11. This is one of the best shows in Ohio and each season attracts a large number of breeders with birds of the highest quality. Liberal cash prizes will be paid this season in addition to a large list of specials. The club is in excellent shape financially and its prosperous condition is due to the business-like management of its exhibitions. B. J. Hill is the secretary and will send premium list and other information to all who desire it.

The Cincinnati Poultry Association will hold its annual show January 13 to 18, 1902. They have a splendid hall in which to hold their exhibition, it being large and almost entirely covered with a glass roof. Frank Miller, F. C. Shepherd and Wick Hathaway will act as judges. The show will be uniformly cooped. The Cincinnati Belgian Hare Club will have charge of the Belgian hare display. Liberal premiums will be offered, and many special premiums and cups are being arranged for. Mr. A. E. Brooks. Seventh street and Freeman avenue, Cincinnati, Ohio, is secretary.

The combined show of the Michigan State Poultry and Pigeon Association and Michigan Fanciers' Association promises to be the largest ever held in the state. The uniting of these two large associations should be a sufficient guarantee of the quality and quantity of the stock that will be exhibited at Battle Creek, January 7-10. Much interest is being taken in this show and a large number of breeders from Ohio, Indiana and Illinois have signified their intention of sending exhibits. This will make the prizes valuable, as the competition will be strong. All premiums will be paid in full and every exhibitor is guaranteed a first class time. Full information and premium list may be had by addressing L. G. Nichols, secretary, Battle Creek, Mich.

The Dayton Fanciers' Club and the Miami Valley Belgian Hare Association have combined their interests and will hold a mammoth show of poultry and Belgian hares, beginning December 31, 1901, and ending January 4, 1902. The entire show will be cooped in uniform coops furnished by the Fanciers' Club. The judges selected are F. B. Zimmer, Ira C. Keller, James A. Brown, H. L. Keller and W. E. Kette. They are all judges of known ability and need no introduction to the fanciers. The regular cash prizes are most liberal, while the several hundred dollars' worth of cash specials and other valuable specials will make the premium list very attractive. It is now ready for distribution and a copy will be sent to any address by dropping a postal card to the secretary, Oliver L. Dosch, 108 Stillwater avenue, Dayton, Ohio.

The first annual exhibition of the Detroit Poultry, Pigeon and Pet Stock Club will be held December 23 to 27. Five thousand dollars in regular and special prizes are offered. There are also classes for novices who have never before exhibited. Messrs. Butterfield, Bridge, Shepherd and Hailey will place the awards in the poultry classes. W. H. Mercer, secretary, Detroit, will send premium list and full information to all who request it.

The second annual show of the Hennessey Poultry & Pet Stock Association will be held at Hennesey, Okla., December 19-21. The officers of the association are J. F. Hutchinson, president; J. M. Crist, secretary; W. C. Ball, assistant secretary. This is an enterprising association and is in a locality where an unusual interest is being taken in Standard-bred poultry. This is a good show for exhibitors who have stock to sell.

The Crawford County Poultry Association will hold their second annual show at Robinson, Ill., December 17 to 20. There is every indication that this show will be high-grade in every respect. There will be lots of birds and good competition. The secretary, C. H. Musgrave, Hutsonville, Ill., will send premium list to all interested.

Mr. E. Latham, secretary of the National Bantam Association, informs us that specials are coming in freely, to be offered at their next annual meeting at Madison Square Garden, New York, during the week of the New York show. The indications are

that this will be the most enthusiastic and most successful meeting of this association. Mr. Latham wishes us through the columns of the AMERICAN POULTRY JOURNAL to urge all the members to respond liberally to his request for special premiums and to ask all breeders of Bantams, who are not members of the club, to give the matter of joining their favorable consideration. Mr. Latham's address is Flatbush, Long Island, N. Y.

Mr. Theodore Faulstich, secretary of the Gem City Poultry Association, Dayton, Ohio, informs us that inqulries regarding their show are being received daily and many prominent breeders have signified their intention of exhlbiting with the association this season. Dates of the show are January 2-7. Judge Tucker will place the awards. A cordial invitation is extended to all Ohio breeders and adjoining states to send their birds to Dayton with a guarantee that they will receive fair and liberal treatment. Premium list will be ready for mailing December 10.

The next annual exhibition of the Wisconsin Feathered Stock Association will be held at Mllwaukee, January 8 to 12. There is every reason to believe that this show will be as much of a success as former ones and that means a great deal. They have quite a number of valuable special prizes, which make it worth while for any exhibitor to send his birds. Messrs. Drevenstedt, Pierce and Nieman will place the awards. Premium list and full information will be sent to all applicants by the secretary. Mr. Otto L. Kuehn, 115 Buffalo street, Milwaukee, Wis.

The Springfield Fanclers' Associatlon will hold their annual show at Springfield, Ill., December 9 to 14. They claim that it will be the best throughout the central and west states with the exception of Chicago. They have fifteen elegant silver cups which will be awarded on poultry, pigeons and Belgian hares. The entry fee is only 25c for each specimen. D. T. Heimlich will place the awards. L. M. Gietl, Springfield, Ill., is secretary.

The exhibition of the Grand Rapids (Mich.) Poultry, Pigeon and Pet Stock Association will be held December 17-20, 1901. Any one desiring to exhibit can obtain catalogue and entry blank from Secretary W. J. Demel, 30 East Bridge street. They will also have a display of Hemenway's famous Angora cats. Catalogues are now ready and any one interested in this show should send for one. All stock sent will receive the best possible attention at the hands of capable men.

The Fitchburg, Mass., show will be held December 31-January 3. A new plan for the payment of premiums was adopted at the last meeting, so that there will be much more cash divided among the exhibitors. The more single birds of the class that are entered, the larger will be the amount and greater the number of premiums to be awarded. We suggest that all poultrymen who can make it convenient to show at Fitchburg address J. Lee Frost, secretary, and obtain full information regarding the show.

The Northern Illinois Poultry Association will hold the largest show in its history at Belvidere, Ill., January 6-12. Large cash and special premiums will be offered in all classes. The association has an enviable reputation for fair and honorable dealing with its exhibitors. Judges McClave and Holden will place the awards. For premium lists, application blanks, etc., address Bert L. Lucas, Belvidere, Ill.

The Kentucky State Poultry Association will hold its annual show January 6 to 11. They expect to have a large display of pigeons and Belgian Hares in addition to poultry. On account of a change in dates, they have found it necessary to secure other judges. Mr. A. C. Hawkins, of Lancaster, Mass., and D. T. Heimlich, of Jacksonville, Ill., have been engaged. The special premiums offered amount to more than $1,000. J. H. Good, Louisville, Ky., is secretary.

The Oakland Poultry and Pet Stock Association will hold a three-day show at Oakland, Ill., December 19 to 21 inclusive. J. W. Alvis, of Indianapolis, will place the awards. Mr. T. A. McGuire, of Oakland, Ill., is secretary.

The next exhibition of the Walla Walla Poultry and Pet Stock Association will be held at Walla Walla, Wash., January 21-25, inclusive. F. W. Hitchcock will place the awards. C. B. Auker is president of the association and C. G. Gose is the secretary.

**White Rocks and Buff Cochin Bantams.**

Winners wherever exhibited. A flue lot of cockerels and pullets ready to win at the fall and winter shows. Some extra fine birds for sale at reasonable prices. Eggs $2 per sitting, reduction with large orders. Satisfactiou guaranteed. Correspondence a pleasure.

C. A. DeBOER, Goshen, Ind.

**WHEELER'S BARRED ROCKS ARE WINNERS.**

**Choice Exhibition and Breeding Birds that win in fast company.**

Send for circular. E. W. WHEELER, Box 378, Cedar Springs, Mich.

**JOHNSON'S LIGHT BRAHMAS WON**

1st and 3d Cock, 1st Pullet, 3d Cockerel and 2d Pen at the Great Indiana State Fair, Sept. 1901, with 134 Light Brahmas competing, and every prize offered on Light Brahmas at the St. Louis Fair, October 1899,

FRANK P. JOHNSON,

Howlands, Ind.

**Nuggets! Nuggets! Nuggets!**

The greatest prize-winning strain of Buff Plymouth Rocks in the world. Their record is sufficient proof. Stock from our yards won highest honors at the largest shows in America past season in hands of customers. Our matings produced the best lot of young birds we have ever seen. We have them up in size, fit to win in hot company. If you are looking for prize winners for the early shows, remember we never exhibit, so are not afraid to sell good stuff.

W. H. OVERBAUGH, Hanover, Pa.
Successor to H. S. BURDICK.

**WECKLER'S BUFF BLYMOUTH ROCKS**

Won highest honors again at the Indiana state fair Sept, 21, 1901. Won 1st and 3d cocks, 1st, 2d and 3d hens, 1st and 2d cockerels, 1st and 3d pullets and 1st pen. A record never before equalled by a Buff Rock breeder. If you are lookiug for Buff Rocks of the highest type in shape, size and color, I have 300 choice birds for sale. I can mate them to please you for best results in show room and breeding peu. Prices low for quality of birds. Write.

A. L. WECKLER, Bunker Hill, Ind.

**DOOLITTLE'S WYANDOTTES,**

**RELIABLE INCUBATOR & BROODER CO., Box A-1, Quincy, Ill.**

The Nuckolls County Poultry Association will hold their show this season at Superior, Neb., December 23 to 26. Judge Hitchcock will place the awards. Mr. Geo. Jackson, Cadams, Neb., is secretary.

The fourth annual show of the North Oklahoma Poultry Association will be held at Blackwell, Okla., January 15 to 18, 1902. Mr. George M. Carson, secretary.

The Appleton City (Mo.) Poultry and Pet Stock Association will hold their first annual show December 17 to 21. A premium list will be gladly mailed to all applicants who will address Elmer M. Brooks, Secretary.

The result of the vote for judges of Bantams other than game at the next Madison Square Garden show at New York is as follows: H. J. Quilhot, 26; F. B. Zimmer, 20; C. E. Rockenstyre, 13. Mr. Quilhot has, therefore, been selected as judge.

The next exhibition of the South Dakota Poultry and Pet Stock Association will be held at Mitchell, S. D., January 28 to 31. W. S. Russell, judge; H. S. Fletcher, Watertown, S. D., president. This association is under efficient management and breeders who can arrange to attend the show will find it to their advantage to do so. Premium list may be obtained from C. C. Bras, secretary, Mitchell, S. D.

The Fenton Poultry, Pigeon and Pet Stock Association will hold its second annual show December 10-13, 1901, with Jas. A. Tucker, of Concord, Mich., judge. The premium list contains both cash and special prizes in all principal classes. Write for one to C. A. Bloss, secretary, Fenton, Mich.

The Central Iowa Poultry Association will hold its second show at Newton, Iowa, December 17 to 19. Their last show was a success and they have every evidence that the coming show will surpass the former one. The secretary is Mr. David McAllister, Newton, Iowa.

The eleventh annual exhibition of the Wichita Poultry Association, Wichita, Kan., will be held in that city January 6 to 11, 1902. This is one of the most successful organizations in the west and exhibitors are assured of fair treatment and liberal premiums. Premium list may be had by addressing Mr. H. P. Schopf, Wichita, Kan.

The American Buff Wyandotte Club will hold its next annual meeting in Chicago during the week of the show, which is January 20 to 25, 1902. This organization is now one of the strongest specialty clubs in the country and is making heavy gains each season.

The second annual exhibition of the Douglas County Poultry Association will be held at Roseburg, Ore., December 26 to 28, with W. W. Browning, of Ogden, Utah, as judge. F. B. Hamlin, Roseburg, Ore., is secretary.

Mr. A. C. Carney, secretary of the Fort Black Poultry and Pet Stock Association, whose exhibition will be held at Eldorado, Ohio, December 17 to 20, informs us that active preparations are now being made, which will insure a grand success. An invitation is earnestly given to all breeders to send for a premium list.

The Kankakee Poultry and Pet Stock Association has been organized and will hold their first show at Kankakee, Ill., January 13 to 19, 1902. D. T. Heimlich has been engaged as judge. Fred Freeman, of Kankakee, is the energetic secretary of the association and will give full information to all applicants.

The sixth annual show of the Central Illinois Poultry Association will be held at Jacksonville, Ill., December 11 to 17. Entries close December 10. This show, as usual, will be a most successful one. Mr. Trueman P. Carter is secretary pro tem.

The Fostoria, Ohio, show dates are December 10 to 14, 1901. The association is making an effort to give one of the best shows that will be held in Ohio this season. Charles McClave will judge the show. Premium list may be obtained by addressing Charles Mann, secretary, Fostoria, Ohio.

The Nebraska State Poultry Association will hold their eleventh annual show at Lincoln, Neb., January 20-25. Extensive preparations are being made, which will, unmistakably, attract a large number of exhibitors. This show should be attended by all Nebraska breeders.

The second annual meeting of the Blue Andalusian Club of America will be held at Boston during the week of Boston show. The gain in membership during the past year has been very great. The club is in the most prosperous condition. All breeders of this variety should connect themselves with the organization. Full information may be had by addressing R. W. Lovett, 234 Marlborough street, Boston, Mass.

---

The Lynn Poultry Association, Lynn, Mass., will hold its fifth annual show January 7 to 10. In the prospectus, which they are sending out, they state that their cash prizes have been greater than at any other New England show except at Boston, and it is their purpose this year to add to the already large list. Premium list and any further information may be obtained by addressing Ira R. Elliott, 40 Bassett street, Lynn, Mass.

---

The outlook for a large and successful show is very promising for the management of the Michigan Poultry Breeders' Union, the exhibition of which will be held at Jackson, Mich., December 9 to 13. Mr. N. Schweinfurth, of Jackson, Mich., is secretary.

---

The Quaker City Fanciers' Club, Salem, Ohio, announces that their premium list is now ready for mailing and they will be glad to send a copy to any one making request of the secretary, Dr. H. E. Phillips, Salem, Ohio. Mr. B. N. Pierce will officiate as judge. The show will be held December 24 to 28, 1901, and a most liberal list of premiums are offered.

---

The annual meeting of the American Black Minorca Club will be held at Philadelphia, and the entries will be the largest in the history of the club. The following special prizes, amounting to $300, have been donated by the Keystone Poultry, Pigeon & P. S. Association, and the members of the club:

The Keystone Association offers the following cash specials open to all breeders of Single Comb Black Minorcas:

Twenty-five dollars for best display to consist of not less than ten entries, including one pen or exhibition yard.

Fifteen dollars for second best display to consist of not less than ten entries, including one pen or exhibition yard.

Ten dollars for third best display to consist of not less than ten entries, including one pen or exhibition yard.

Five dollars for best exhibition pen or yard.

Three dollars for second best exhibition pen or yard.

Two dollars for third best exhibition pen or yard.

Two dollars and fifty cents for male (cock or cockerel) having nearest to the ideal head.

Two dollars and fifty cents for female (hen or pullet) having nearest to the ideal head.

Two dollars and fifty cents for five best males (cocks or cockerels, or both) owned and exhibited by one person.

Two dollars and fifty cents for five best females (hens or pullets, or both) owned and exhibited by one person.

The members of the American Black Minorca Club offer the following specials to be competed for as specified in each case:

Romaine C. Nichols, Bernardsville, N. J., silver trophy cup for best display. Open to club members only.

F. Schroeder, Newark, N. J., $5 cash for best display. Open to club members only.

Geo. H. Northup, Raceville, N. Y., $15 silver cup for best S.C. B. Minorca cock, hen, cockerel and pullet exhibited by breeder who has not exhibited at a club meeting show before. Open to all.

Geo. H. Northup, Raceville, N. Y., $15 silver cup for best cock, hen, cockerel, pullet and pen, Single or Rose Comb Minorcas. Open to all.

Joseph P. Hilldorfer, Allegheny, Pa., silver trophy cup for best cock, hen, cockerel and pullet. Open to all.

Wm. J. Boyd, Glenville, Ohio, $5 cash for best cock, hen, cockerel and pullet, bred, owned and exhibited by club members.

Chas. L. Blanton Falls Church, Va., $5 cash for second best cock, hen, cockerel and pullet, bred, owned and exhibited by club member.

Chas. L. Blanton, Falls Church, Va., setting of Bl. Minorca eggs from best mating for third best cock, hen, cockerel and pullet, bred, owned and exhibited by club member.

Mrs. Geo. E. Monroe, Dryden, N. Y., $5 cash for four best pullets, bred, owned and

Master Bennie Hilldorfer, Allegheny, Pa., $2.50 cash for best Black Minorca cock. Open to all.

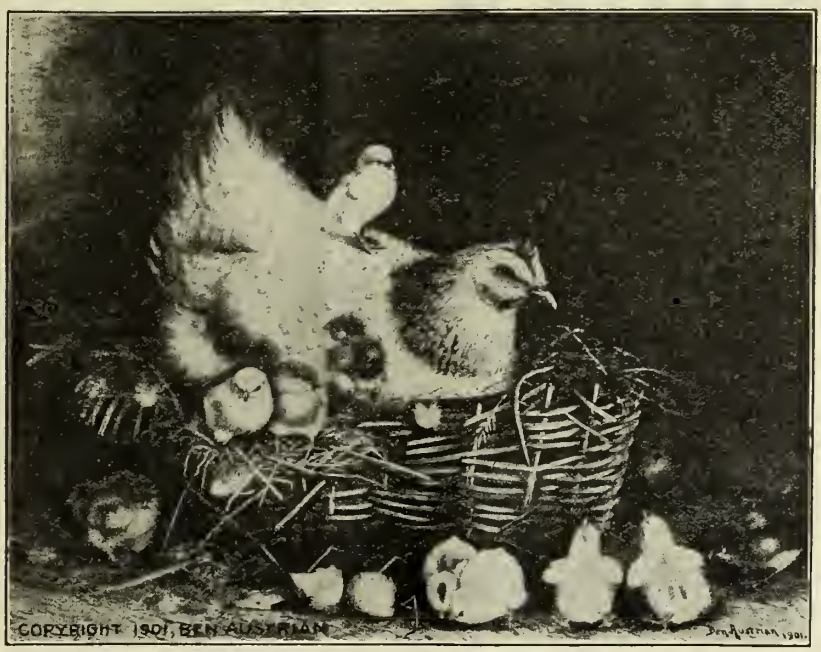
The Board of Directors offer a membership and dues to July 1, 1902, to every Black Minorca breeder, not already a member, that sends in as many as four entries to the club show to be held at Philadelphia, Pa., Dec. 28, 1901.

## KLONDIKE INCUBATOR.

The successful farmer utilizes every available means during the dull season to add to the assets of the farm. No better inducement can be offered than for the boys and girls to hatch a few hundred chickens during the winter months and be ready for the early spring market, thereby securing the best prices. The Klondike Incubator, advertised in another column, it is claimed by the manufacturers, has no superior, if an equal, on the market. Built on the latest and most scientific principles, it hatches a larger percentage of fertile eggs than any incubator made. No trouble and but little expense to operate it. Can be successfully used by any woman or child of ordinary intelligence. Write for a free catalogue, which gives full information and prices, as well as a large amount of valuable information for the experienced or amateur poultry raiser. Address Klondike Incubator Co., Box 929, Des Moines, Iowa, and place the unproductive members of the family in a position to earn a few hundred dollars.

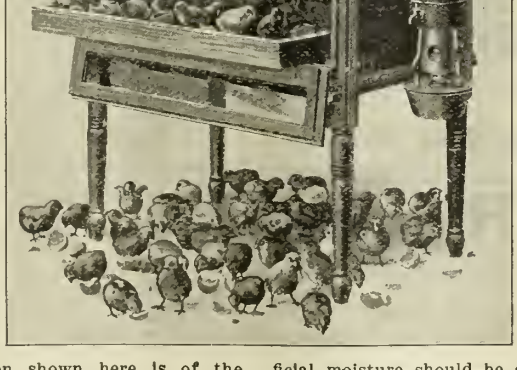
## "HEN AND CHICKS."

We reproduce in half-tone herewith an oil painting which many competent judges pronounce the greatest poultry painting which has appeared in the past decade. It is Mr. Ben Austrian's $2,500 "Hen and Chicks" picture, secured by Humphrey & Sons for reproduction on the cover of their new bone cutter catalogue. This picture when exhibited in the East, attracted universal attention, and is now on the way to Berlin, where it will be shown this winter in the German exhibitions. Humphrey & Sons may well consider themselves extremely fortunate in securing so valuable and so attractive a painting for their book. It is reproduced in the exact colors of the original and is a fitting setting for an extremely interesting catalogue.



Like the Humphrey book of last year, it contains in addition to much valuable matter on the care and treatment of fowls, for money-bringing results, a set of blanks for keeping a record for a year of every transaction in the poultry yard. Of course considerable space is devoted to the open-hopper Humphrey Green Bone and Vegetable Cutter, the machine which in so short a time has leaped to such great popularity among poultry keepers all over the country. We attribute the success of the Humphrey largely to its extreme simplicity; it has practically only three working parts—the cutter-head, which carries the knives, the pivot wing, which holds the bone in position, and the open hopper, in which the bone is placed for cutting. This hopper is really an "open hopper" (a term originated by Mr. Humphrey). There are no partitions nor screws nor apartments in it; consequently you don't have to chop the bone into little pieces before you begin cutting. The machine is ready to cut when you are ready and as the operator controls the feed, she can cut as fast or as slow as she likes. We say "she" because the Humphrey turns so easily that in a majority of cases it is used by the women of the family. It is backed by a guarantee to cut more bone, in better condition, in less time and with less labor than any other bone cutter, or the purchaser's money is refunded.

We know that every reader of the AMERICAN POULTRY JOURNAL will be interested in this catalogue, and we know it means money if you buy a Humphrey. Send for the book. Address Humphrey & Sons, Joliet, Ill.



The illustration shown here is of the famous Wooden Hen, now known the world over as the most successful of all small hatchers.

It is now six years since the Wooden Hen put in its appearance, and each season it has come forward with improvements that increased its popularity until the sales are nearing 40,000. For the coming season long legs have been added to make it more convenient; also a moisture diffuser, which overcomes the question of how much artificial moisture should be supplied. A few minor changes have been made in the general construction, and with the above improvements it is a most perfect little hatcher. Three sizes are offered for the coming season—50, 100 and 200 egg capacity, and the prices are surprisingly low.

Send at once to Geo. H. Stahl, Quincy, Ill., for his beautifully illustrated catalogue, which also contains a most interesting chart showing the "Development of the Chick" in natural colors.

## Reliable Breeders' Directory

**OF THOROUGHBRED POULTRY.**

We believe all breeders whose names appear below to be thoroughly reliable and honorable, and their stock to be of superior quality. Address will be inserted in the JOURNAL for such breeders as can satisfy us upon the above points, and that their stock is thoroughbred, for **$2.00** per year, payable strictly in advance. Those who breed more than one variety, can have address under other headings (after the first) for **$1** for each variety.

**The... Klondike Hot Air Incubator.**

THE BEST PROOF OF SUPERIORITY IS A PRACTICAL TEST. Those who have used the **KLONDIKE** pronounce it the best incubator on earth, and they know. It has the latest ideas in construction, is the most easily operated, and hatches the largest percentage of fertile eggs of any machine on the market. Write today for free catalogue, containing valuable information for the poultry raiser. Address,

**KLONDIKE INCUBATOR CO., Box 908, Des Moines, Iowa.**

## THE "SUCCESSFUL" BRANCHING OUT.

Perhaps one of the strongest arguments in favor of the use of the Incubator is the immense success and growth of some of the more successful firms. People would not buy Incubators as they have been buying them, by the thousand, if they were not as near perfect as it is possible to make them. One of the firms who are deservingly getting a large slice of this success is the Des Moines Incubator with their famous "Successful" Incubators and Brooders.

This business is growing so rapidly that they have found it necessary to open a branch office at 101 and 105 Erie St., Buffalo, N. Y., to enable them to take care of the large eastern business that is coming to them. Buffalo is chosen because of its central location, facilities for shipping, and low freight rates, all of which will materially benefit purchasers of Successful machines.

This office is in charge of Mr. William C. Denny, who needs very little introduction to most of our readers. A master mechanic in the hatching and raising of poultry, as well as Secretary and Treasurer and pioneer organizer of the Buff Rock Club, he is at the same time a broad "fourteen-carat" business man. You eastern fellows will be taken care of in a way that will warm the cockles of your hearts when you visit the Successful plant at Buffalo, and you are invited to make this your headquarters when in Buffalo. If you are not planning to be in Buffalo in the near future, write Mr. Denny a letter. He will gladly supply any information you may want on the artificial hatching and raising of poultry.

Finally, let us say that the Successful machines for 1901-1902 are up to the high standards always set by this house, and are backed up by an unqualified and unequivocal guarantee. Write and let them tell you their story.

## A NEW BOOK ON POULTRY.

We are pleased to announce to our readers that Mr. Frank Foy, proprietor of the famous Crescent Poultry Farm, of Des Moines, Ia., has just issued a new book on poultry, the advertisement of which appears in this issue. This book contains more reliable information on raising poultry for profit drawn from actual experience than any book of the kind published. It is a handsome book of 52 pages, size 6½x8 inches, profusely illustrated with pictures of thoroughbred fowls, poultry houses, incubators, brooders and many other matters pertaining to the poultry industry. The reader also gets a very good idea of the "Crescent Poultry Farm," its immense stock of poultry, buildings, yards and manner of breeding. Sixteen different varieties are minutely described and illustrated, with prices for same that are within the reach of everybody in the poultry business. Mailed for 4 cents in stamps if you mention AMERICAN POULTRY JOURNAL.

## SUMMER CHICKS.

Bunker Hill, Ill., Sept. 16, 1901.
Mr. Will Chamberlain, Kirkwood, Mo.

Dear Sir: While I am not in the habit of "tooting my horn" or lauding my praises, but in justice to yourself as the manufacturer of "Chamberlain's Chick Feed," I must relate to you my experience with your feed.

I have used your feed for the past three years, and during that time I have not had a single case of bowel trouble. This season I had a lot of Buff Rocks hatched in July, and until they were six weeks old I used nothing but your chick feed, and a healthier lot of chicks one could not wish for, and I have raised every one of them.

Summing up poultry raising in a nutshell, any one that will furnish the necessary labor, "Chamberlain's" chick feed will do the rest.

Wishing you every success, I remain, yours truly, Theodore Benner.

Minneapolis, Minn., Oct. 28, 1901.
Messrs. Porter Bros., Muscatine, Ia.

Gentlemen: You may remember that I bought one hundred pounds of your "Star Grit" some few months ago, as a trial. Well, I put your grit in a box with ground oyster shells and "mica grit." My poultry ate it with a relish. I soon found that they scratched out all the other grit and shells to get your "Star Grit." Since then they only take the old grit when forced to it.

As I have bred poultry for thirty-one years I have found out that an "old hen" knows just what kind of "mill stones" she needs. The shells of our eggs are now fine. I shall use your "Star Grit" hereafter. Yours truly, C. M. Emerson.

# Questions and Answers.

**Our Subscribers are invited to make use of this department whenever we can be of service to them. All questions are answered in the order in which they are received. If your question is not answered in this number, look for it next month.**

*Editor American Poultry Journal.*

DEAR SIR: I write you to ascertain if possible what is the matter with my geese. I have been breeding them for three years and have never had any trouble until now. I have lost four in the past four days. They seem to be all right at night, but in the morning they appear droopy and soon die. I will consider it a great favor if you can give me any information that will be of help to me. *W. H. W.*

*Trenton, N. J.*

We regret very much that we are unable to give you any information that would probably be of service to you. We cannot intelligently say what is the matter with your birds, as we do not know anything relative to their surroundings nor your manner of feeding. It may be that they have been drinking from some pool of stagnant water, or they have had access to some article of food which for some reason has proven injurious to them. We would suggest that you look over your premises carefully and ascertain if anything could be wrong along the lines suggested. Separate the well birds from the sick ones and see that the water supply is fresh and clean. A liberal feed of ground charcoal mixed with mash food would have a tendency to correct the trouble if indigestion is at the bottom of it.

---

*Editor American Poultry Journal.*

DEAR SIR: Will you please tell me something about Hungarian seed as a food for chickens? How does it compare with millet seed?

*Logansport, Ind.* *J. M. C.*

Hungarian seed is a species of millet, and is called Italian millet. It is of about the same value as barley screenings, and somewhat less valuable than wheat screenings.

---

*Editor American Poultry Journal.*

DEAR SIR: May I trouble you for the following information? Is California a favorable place for breeding poultry? Is the market good there? Is the temperate weather of the hills preferable, or the hot one as in the low valleys? What breed would be the most suitable for California? *B. P.*

*New York City.*

Some portions of California are as favorable for raising poultry as can be found anywhere. An exceedingly dry, hot climate is, of course, not so good for fowls as a more temperate one. This is equally true as regards all stock. Any of the American or Mediterranean breeds, such as Plymouth Rocks, Wyandottes, Leghorns, Minorcas, etc., will do well in California. We are unable to say in what section of the state the best market is located. Naturally, however, the larger towns would afford the best opportunity for disposing of poultry and eggs.

---

*Editor American Poultry Journal.*

DEAR SIR: Will you please tell me what is wrong with my Black Minorcas? The disease begins to show upon the eye and comb. Something similar to warts form on the eyelid. The head swells, and the warts grow until the head and comb are literally covered, and the eyes are swollen shut. The bird stands around drooping until it dies. I would be greatly obliged to you for any information you can give me relative to this disease.

Please tell me, also, if air-slacked lime on the dropping board will dull the plumage of Black Minorcas?

*Altoona, Pa.* *J. H. R.*

Your fowls are troubled with what is commonly known as sore head. As soon as the first sores appear, they should be anointed with carbolated vaseline. This should be applied two or three times a day until the sores heal.

Air-slacked lime on the dropping boards will not injure the plumage of Black Minorcas or any other variety, unless the lime comes in direct contact with the plumage.

---

*Editor American Poultry Journal.*

DEAR SIR: Is there any preparation that will make fowls' combs and wattles grow larger?

*Armour, Ind.* *E. M. L.*

We know of no preparation that will increase the size of the combs and wattles. The almost universal trouble is to get these parts small enough, and all investigation and study has been in this direction. Birds will temporarily develop large combs if confined in very warm quarters in the winter time and fed heavily of raw meat. In cases of this kind, however, the comb generally turns over from its natural upright position, if it is a single comb.

---

*Editor American Poultry Journal.*

DEAR SIR: I have a flock of White Wyandottes, and am at a loss to know how to properly feed them. Will you kindly give me some information through AMERICAN POULTRY JOURNAL in regard to what I should feed, and in what proportion it should be fed? I have been feeding a warm mash of one part bran, two parts chopped feed in the morning. At times I put a little red pepper and powdered charcoal in it. At night, I feed corn and sometimes wheat or oats. I would like to know if the above foods are proper, and, if not, please tell me what I should feed and how much I should give to each bird for best results in producing eggs.

*Pontiac, Ill.* *H. H.*

It is impossible to adopt an ironclad rule for the feeding of fowls either as regards the articles to be given or the quantity for each bird. There are times when any individual bird will eat more than it would at other times, and the keeper must be governed by the appetite of the fowls. They should never be overfed. They should be compelled to scratch for a portion of their feed and be kept in such condition that they are always willing to eat. The articles composing your ration are all good, but for best results you should add green food of some kind, also animal food. If the birds are not so situated that they can have access to growing vegetation, they should be fed green food of some kind, such as turnips, cabbage, potatoes, or other root vegetables. Scrap meat of some kind should be given occa-

Poultry remedies prepared by a practical poultryman. Hen tonic will prevent your hens from laying soft shell eggs, and protect them from liver trouble. Spongia is the soverign remedy for roup. Rigler's A. C. Gap Cure is the only remedy known that will positively prevent and cure gaps in little chicks. Price of all the remedies postpaid ½ oz. bottle 15c, 1 oz. 25c, 2 oz. 50c. Prepared by Lewis B. Rigler, 4924 Hawthorn st. Frankford, Philadelphia, Pa. (Please do not send stamps.)

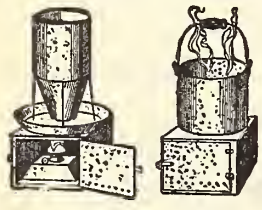
# "Fill the Egg Basket"

This is the title of a neat little booklet we have prepared for the use of poultrymen. It is full of many things every poultry lover and owner should know. Tells how to care for and feed fowls to produce the best results in actual money. It also tells incidentally all about

## Darling's Pure Poultry Foods.

They make hens lay, chicks and broilers grow rapidly and reach marketable age early, develop the pullet and make her an early layer. All this is because they contain **60 to 65 per cent of Protein.** That, you know, is the real back bone of the whole poultry industry. It's the stuff that the hen and all her products are composed of. It will pay you to read the booklet. We mail it free. Ask for it. Your name on a postal card will do it.

**DARLING & COMPANY,** Dept. C. Union Stock Yards, CHICAGO, ILLINOIS.



Patent applied for

***Of More Service than a Hired Man,***

## *The "All Right"*

## Drinking Fountain and Feed Cooker

Considering the amount of worry, time, labor and expense it saves. It always supplies the poultry with clean, fresh water, at the right temperature, no matter how cold it is. Costs less than one cent a day to run it. Cheap isn't it? An increase of one egg a day will pay the expense, the rest is profit. If you want **winter eggs** you must supply the hens with plenty of fresh water slightly warmed. The **"All Right"** is the only fountain that will do it. You cannot afford to be without one any longer. Send at once for full particulars and **special 30 day offer.** Address

sionally, but green bone is considered the best, if it can be easily obtained. Feed a variety of food and never allow the grit box to become empty.

---

*Editor American Poultry Journal.*

DEAR SIR: Last spring I bought a setting of eggs from one of the best breeders of Golden Wyandottes in the United States. I got fourteen nice chicks from them. The chicks are now matured, so that they begin to show quality, and I find that one of them has a very crooked beak. This cockerel is the largest and finest Golden Wyandotte I ever saw for his age. His color is perfect. He is extra fine in shape and all that I could desire. His eyes are the most beautiful red, and he is beak to his chicks either in the first or beating all the rest growing. He is so fine that I wish to breed him. Now the question comes up, will it be improper to breed him? Is there any danger of his transmitting that crooked second generation? I have quite often had crooked beak chicks hatched out, especially in incubators, seldom under hens, but always before have found that they did not grow as fast as chicks with straight beaks. I have never thought of raising one, and certainly not of breeding from one. Thinking that perhaps some of your readers might have tried this, or that you may be able to give me some light on the matter, I write you in regard to same. *J. W. M.*

*Epping, N. H.*

We doubt very much if this deformity is hereditary. We have never bred from a bird of this kind, and cannot call to mind a similar instance that has come to our notice. We would most assuredly use the bird as a breeder. Personally, we always abhor a crippled or deformed bird, and always dispose of them as soon as they are large enough to make good broilers. With this averse feeling we would, no doubt, dispose of the bird in question after the first breeding season, but we should certainly try him once. If any of our readers have had experience in breeding birds of this kind, we will be glad to hear from them.

---

*Editor American Poultry Journal.*

DEAR SIR: Do White Wyandottes forage as much as White Plymouth Rocks? My White Rocks go a quarter of a mile from home every day, but are always back at feeding time. My hens do not go quite this far, but they range farther than my Buff Leghorns.

Is the rose comb on the Wyandotte as easy to breed as the single comb on the Rocks? Do White Wyandottes ever have single combs when hatched from high grade stock? *E. L. C.*

*Pratt's Hollow, N. Y.*

There is practically no difference between the characteristics of Wyandottes and Plymouth Rocks as regards foraging. It depends largely upon how they have been bred. Fowls that have for generations been given a wide range will breed stock with strong tendencies in this direction, and birds raised in confinement will produce just the opposite results. This cannot be depended upon as an ironclad rule. The breeds in any flock differ in disposition. You will find some of them willing to remain close at home, if they can obtain sufficient feed by so doing. Others will naturally roam.

It is just about as easy to produce Rose combs on Wyandottes as single combs on Plymouth Rocks. Occasional-

ly, the Wyandotte will come with a single comb, even when bred from the very best stock. Instances of this kind are very rare, however, and are not worthy of mention, in a general answer, to this question.

*Editor American Poultry Journal.*

DEAR SIR: I have a Rose Comb Brown Leghorn cockerel very sick with chicken-pox. Can you give me a remedy for this disease? *Lieut. D. C.*

*Toluca, Mexico.*

See answer to J. H. R. elsewhere in this department. The two diseases are practically identical.

*Editor American Poultry Journal.*

DEAR SIR: Please inform me if a variation of two degrees in the temperature of an incubator has any effect upon the hatch. Would you consider a machine that did not vary more than one degree above or below 103 a good or ordinary incubator? About what per cent of eggs should prove fertile in October and November? What per cent of the fertile eggs should hatch? Are Black Minorcas as good layers as Brown Leghorns? What is the average of each?

*Malmo, N. C.* *J. W. M.*

An occasional variation such as you mention would not have a detrimental effect upon the hatch. It is practically impossible to hold the temperature at 103 during the entire hatch. A machine that will not vary more than one degree either way is an excellent one. The percentage of fertile eggs which may be obtained in October and November depends altogether upon the feed and care given the birds. They can be managed so as to have 75 per cent of the eggs fertile. Every fertile egg, if properly incubated, should hatch. You would probably do well to get 50 per cent fertile eggs and a 75 per cent hatch of those put in the machine. Black Minorcas are not considered as good layers as the Brown Leghorns, but the truth of the matter is, all things being equal, the difference is not worth mentioning. The Minorca lays a larger egg than the Leghorn. Good birds of either variety will lay 150 eggs each per year. The majority lay less.

## NOTICE OF TRANSFER.

This is to certify that I have disposed of my entire flock of Brown Leghorns to Mr. A. C. Ridge of Connersville, Ind., who will continue to breed them along the same lines as they have been bred by me for the past seven years. I believe Mr. Ridge to be an honest and conscientious man and recommend him and his birds to the readers of AMERICAN POULTRY JOURNAL. *E. C. Brattain.*

*Connersville, Ind.*

Mr. Ridge is a new advertiser in the AMERICAN POULTRY JOURNAL, but he has been breeding and showing for several years. He is president of the Fayette Fancier's Association at Connersville, Ind. He makes a specialty of the highest grade of exhibition stock and has a large number of birds for sale at the present time. He guarantees all stock sent out to be exactly as represented, or money will be refunded.

The premium list of the Big Rapids Poultry & Pet Stock Association is ready for mailing and a copy will be sent to all who write for same, addressing Mr. B. W. Fellows, secretary, Big Rapids, Mich.

# Shaw's Rocks,

## Barred, White and Buff,

## Light Brahmas & Toulouse Geese

### are Up-to-date.

**Barred Rocks. Ringlets.** Choicest from E. B. Thompson's yards. Also **Royal Blues** direct from A. C. Hawkins—both distinct and pure. Bred on standard matlug lines.

**White Rocks.** Choicest stock from W. C. Pierce & Co's. yards. Our breeding pen, last January, scored by B. N. Pierce as follows: Cockerel 95½, cut one on tail not fully developed, hen 95½, pullets 96, 95½, 95½.

**Buff Rocks.** Best from H. S. Burdick's yards. One breeding pen last season, headed by a brother to 2d Boston winner, 1901. Mr. Burdick told me that he was a much better and higher priced bird. Have also a number of youngsters sired by 1st cock, Madison Square Garden, N. Y., 1901. Same strain.

**Light Brahmas.** Many of them the progeny of Chicago 1901 winners, exhibited by Dr. N. E. Mighell. Strong in color points and grand in size and shape.

**Toulouse Geese.** Among my best breeders of last spring are a number of B. F. Hislop's show string at Chicago 1901. You know what they did.

I have a nice lot of March and April hatched chicks that will score high. If you want show birds for December shows I can supply you. Write for catalogue. Agent for Cyphers Incubators and Brooders.

**WABASH POULTRY FARM, DUANE SHAW, Prop., Palestine, Ill.**

# Silver Wyandottes.

In the yards of Jodrey & Gossard, are 20th century birds and have no equals in the U. S. Recent winnings as follows, Boston, 1901, 1st and 5th cock, 1st, 3d and 5th hen, 1st, 3d and 5th cockerel, 1st, 2d and 5th pullet. Specials—Best display. Best cock and two hens. Best cockerel and 4 pullets. Best pen. The only show made during 1901, but previous to this many prizes at all the leading shows besides furnishing winners for other breeders. All birds shown were produced by us and nothing bought for exhibition. Have concluded not to show during present season and will sell birds that otherwise would remain with us. How are you fixed? Do you lack a pullet or cockerel to make your exhibit complete? Or would you like a pen of birds that will make a reputation for you? We have just this kind—not to give away but to sell—and guarantee satisfaction or your money back. We are in earnest and do business on business principles. Mention A. P. J.

# A LITTLE OF EVERYTHING.

## TIME TO BUY.

Now is the time to buy your breeding stock for next season. Do not wait until next spring and be compelled to take just "any old thing" which the breeder may have left. Now is the time to get your birds in condition for the show. Do not wait until a week before you exhibit and expect to get all the prizes.

*Georgetown, Ohio.* *W. E. Ellison.*

## PROMPT CORRESPONDENCE.

Careful attention to correspondence is one of the secrets of success in the poultry business or any other kind of business. Be prompt in answering all inquiries regarding your stock. A good salesman always treats his customers kindly, with care and attention.

*Camp Point, Ill.* *Henry T. Reed.*

## WINTER QUARTERS.

Young stock should be in the winter quarters by this time, as most all of the chicks have outgrown their summer brood coops, causing them to be more or less crowded, which is very uncomfortable for them. They also get too warm during the night and after they get out in the morning they become chilled and catch cold, which often develops into roup. See that the winter quarters are in shape for them to spend the winter in. They should be thoroughly cleaned and whitewashed before putting birds in them. *J. W. Grier.*

*Cold Water, Ohio.*

## DO DARK BRAHMAS LAY?

There has been some discussion of late as regards the laying qualities of Dark Brahmas. I have bred over thirty varieties of poultry, and can say from experience that the Dark Brahmas will lay (for me) more dollars' worth of eggs (market price) in one year than any other breed that I know of, the same conditions existing. I feed whole oats in the morning, and wheat at night in summer, and wheat, oats and corn in the winter. I give plenty of grit at all times. *Clark E. Adams.*

*Racine, Wis.*

## GIVE PLENTY OF FRESH WATER.

Fresh water is essential to good health both winter and summer. This is no small matter. Fowls must have it and the best of care must be given in way. It is astonishing how neglectful some breeders are relative to this matter and it is for the careless ones that these lines are written. *John M. Wise.*

*Freeport, Ill.*

## YOUNG PEOPLE WITH POULTRY.

Whenever we see a boy or girl express a love for poultry, it does us good and we feel interested in them. How many useful lessons they can learn, how many happy hours they can spend in thought and work with fowls. The care of poultry teaches regularity, promptness, thoroughness and many other excellent traits, and we say to encourage the boys and girls who care for poultry. The work will be of great and lasting benefit to them. Golden and Silver Sebright Bantams are interesting pets. These with fancy pigeons make a pleasing acquisition to any place.

*Freeport, Ill.* *John M. Wise.*

## SHOWING YOUNG BIRDS.

The winter shows are now opening, and I do not know when I ever saw so few young birds up to weight. I wish to offer a few "nevers" through the columns of the AMERICAN POULTRY JOURNAL.

Never try to feed young birds to weight; better wait and grow them.

Never pluck an off colored feather to beat a brother fancier; better let the breed grow them out.

Never coop as many young birds in a coop as you would old ones, same size birds. Better take an extra coop along.

Never allow your birds to sleep in damp exhibition coops in a show room.

Never allow your birds to be handled to and from the show room without a cover.

Never allow any poultry association to place your birds in the show room where there is a draught or current of air.

Never feed too much. Always have your birds in a condition that they are willing to eat.

There are a thousand and one "nevers" as well as "don'ts" to bear in mind, but keep a few of each in your mind, and you will have better success in next year's work and more birds alive.

*Ira T. Matteson.*

*Upper Sandusky, Ohio.*

## CLEAN OUT FOR WINTER.

Thoroughly clean the poultry house, so that not a louse is left in it. Use plenty of whitewash, in order that the house may appear neat and the interior light and cheerful. Provide a dust bath for the hens in order that they may exercise by dusting, and at the same time drive away vermin from their bodies. Make every preparation for having the hens comfortable in winter, and do this before the snow flies. It is important to stop all cracks and crevices to keep out the cold winds. *James K. Page.*

*Indianola, Ill.*

## A POULTRY SCRAP BOOK.

For a number of years I have been a subscriber to one or more poultry journals, besides receiving many sample copies. I had made it a practice to preserve them all for future reference, but I found it quite a task to look them all over for any article which I wished to refer to, besides I had hardly shelf room for them all, and as I did not wish to destroy them I concluded to make a scrap book. I accordingly armed myself with

a pair of shears and began clipping out such articles as I considered worthy of preservation. I regret to say that some of the publications were not badly mutilated after I had clipped what I considered really valuable articles, still in each I found some article worthy of a place in my scrap book. The single comb White Leghorn being my hobby, I clipped out all good pictures of this breed and articles treating on their care and breeding besides illustrations and articles of general interest to a poultry breeder. For the scrap book I used a book with every alternate leaf removed, and pasted the clippings on each side of the leaf. After a few leaves are filled the book should be put under pressure until dry. My book is not yet complete but when I have finished and added an index (which I intend to do) I will have a book which I believe would tickle the heart of any "chicken crank." I might mention that the AMERICAN POULTRY JOURNAL has furnished a goodly share of illustrations and reading matter which have thus far gone into my scrap book. As the long winter evenings will soon be at hand I believe that many of the readers of AMERICAN POULTRY JOURNAL will find the making of a scrap book such as I have described both pleasant and profitable. *Frank Fell.*

*Mayville, Wis.*

## HOW TO ORDER FOWLS.

When writing for a price on a bird, pair, trio or pen, describe as near as possible what you want, or give the amount you expect to invest. Then the breeder will know just what you want, and if he can fill the order he will say so and if he can not he will also say so. Now, you may think not, but we will vouch for nine out of ten that our best and most reliable breeders will guarantee value received or return money paid. The way of sending out postal cards asking for prices on fowls simply leaves us in the dark, for we all have birds of different prices and still all be pure bred birds.

The writer received a letter once as follows: "I want a good Barred Rock cockerel with a five-point comb, clear yellow beak and legs, medium color, barred to the skin in every section, to weigh eight or nine pounds and score 92 to 93. Please price as reasonable as possible, as I can not pay over $1 to $1.50." I have often wondered if that man was some *profcssional* book agent who thought 92 to 93 point B. P. R. were common, everyday birds and were produced by the hundred, or what he did expect. However, we did not sell him a bird. A postal card received a few days later read as follows: "Please price me five or six Barred Plymouth cockerels, to turn out with a lot of scrub hens. I don't care for fancy points, but want good, big, pure-bred birds." To this we knew just what was wanted and had no trouble in pricing same.

Too many people nowadays want something for nothing and imagine they can get just as good a bird for $1 as for $5. Now, the writer wishes to say right here that they can not. It is a fact that all breeders have some cheap birds which are sold to improve market stock, which are as good in blood as the fancy fowls, but for the fancier to use in his own flock would degrade instead of improve. So we all price our birds according to quality. What a pleasure it is to have a man, or woman either, call on us who know what they want and when we catch

## North Side Poultry Yards.
### Silver and Buff WYANDOTTES.

Don't forget our Chicago winnings. On Silvers cock 3d and 4th, hen 2d and 3d, cockerel 3d and 5th, pullets 1st, 2d, 3d, 4th and 5th. Unparalled record by any breeder in such strong competition as there was at Chicago last winter, pen 1st. On Buffs, cockerel 3d, pullet 1st, in a class of about forty, pen 3d. We have a choice lot of yearlings and chicks for sale, of both breeds. Birds that will win for you. Prices right. Send for circular. Agents for Spratt's Patent Poultry Meal and Meat.

***A. & E. TARBOX, Box A 5, Yorkville, Ill.***

## MARK YOUR FOWLS

This has become a necessity for **show, judging, pedigree and breeding pen purposes.** There is no means of marking that gives the all around satisfaction of our

**RELIABLE COPPER PLATE LEG BANDS.**

Being exceedingly tough and pliable they may be used indefinitely. They will stay where they are put, and will not **chafe** or **canker** the fowl. Made in sizes from 2¼ to 4 inches long, with consecutive numbers on band. Assorted sizes in the same order if requested. **Our 20th Century Poultry Book** illustrates and describes full line of poultry supplies and tells all about our 116 yards of thoroughbred poultry. We mail it for 10c. Write while they last.

**Reliable Incubator and Brooder Co., Box A-1, Quincy, Ills.**

a bird will take hold of it and look it over, section by section, and realize its value; while others will pick the best bird in the flock and even get mad if they can not buy it for 75 cents to $1, using for argument, "some farmer who has good stock of grades *is selling* as good birds for that price."

Buy from breeders who guarantee their birds as represented and it will pay you every time. *John Watt,*
of Watt & Campbell.

### GOOD REMEDIES.

The best thing I have ever tried for scaly legs is Zenoleum, one tablespoonful to one quart of water. I find this solution to be much better than kerosene, or, in fact, anything else I have ever used before. For lice and mites I paint the roosts and dropping boards, also sides of the hen house 12 or 14 inches above the roost with carbolineum avenarius. I have tried moth balls in the nests, but find they do not prevent mites from thriving and multiplying rapidly. *Myron Kemdall.*
*Lind, Wis.*

### TURNING CHICKS OUT TOO YOUNG.

Do not turn the chicks out at too early an age. They do not need unlimited range until they are ten weeks old. More chicks are lost by being given too much range than are lost by confinement. Keep the chicks where they may be quickly cooped in case of a storm, and you will have more and better youngsters. *Fred E. Smith.*
*Westboro, Mo.*

### BUMBLE FOOT.

Chloronaptholeum is the finest remedy for bumble foot. I use it full strength, and find it a most successful remedy. Previous to trying this I tried everything I could hear of and had a doctor's bill of $4 on one bird. The treatment was unproductive of good results, but applications of the above mentioned remedy cured the trouble.
*Coldwater, Mich.* *Ben. H. Smith.*

### WINTER QUARTERS.

As we are now getting stock in the winter quarters, we should not close the house. Let in all the air possible, and as it gets colder close the house gradually. Feed lightly at first, or birds will be overfed. When just coming off the range keep them working, but do not overdo it. Keep them in good flesh. Feed cut green bone twice per week, about five pounds to 150 birds. Feed mostly oats and corn. *John M. Sontag.*
*St. Charles, Ill.*

Keyworth Bros., Sandy Hill, N. Y., have a change of ad elsewhere in this number, which should be referred to by all intending purchasers of Buff Rocks. This firm, by its record, has proven that the Keyworth Buff Plymouth Rocks are capable of winning in the strongest competition. The firm has a large flock of youngsters for sale at this time. They are from special matings, which have proven unusually successful. All stock sent out is guaranteed and is mated to produce best results when customers desire it. The long experience of Mr. J. D. Keyworth in mating Buff Rocks peculiarly fits him to render this service to his customers.

# Breeders Cards.

Under this heading ads will be inserted for five cents per word each month. Nnmbers and initials connt as words. Commencing with the January, 1902, issne, all ads will be inserted under this general heading of Breeders Cards. No ad accepted for less than $1.50 per insertion. Terms, cash with each ad. Conat the words carefully to avoia delay in publishing. Copy for Breeders Cards should reach us by 19th of month preceding date of issne. Write your copy plainly, as npon this the correctness of your ads largely depends. AMERICAN POULTRY JOURNAL is furnished every advertiser during the time his ad is running. **Thirty thousand per month.** We guarantee an average monthly circulation of 30,000 copies of AMERICAN POULTRY JOURNAL. When placing your ads remember the advertisers of Breeders Cards get better returns from AMERICAN POULTRY JOURNAL than from any other poultry jonrnal—none excepted.

***On writing any of these advertisers mention A. P. J. It helps you and doesn't hurt us.***

***All Copy for Breeders Cards Must Reach us by the 15th of the month.***

**BARRED, WHITE AND BUFF.**

## WYANDOTTES, SILVER WHITE AND BUFF.

**SHOW BIRDS**
**THAT CAN WIN IN ANY COMPETITION.**

Have won more prizes at New York, Boston, and America's greatest shows than all others. The product of my matings this season are the best I ever owned.

**At the Great National Show, WASHINGTON, D.C., in hot competition** with over **300 birds** of these varieties, the best that could be found regardless of price, I won **45 Regular and Special Prizes on 39 Entries,** including **First Prize on Breeding-Pen in each variety, Special for Best Display in the American Class, Special for Best Exhibit of Plymouth Rocks, Sweepstakes Special for Best Cockerel in the show** (Bantams excluded), and this on my **First Prize Barred P. Rock Cockerel.** My winning White Wyandotte cock was pronounced by the judges to be the **best they had ever seen.** I won twice as many first prizes as **all other exhibitors** of these varieties. My **BUFF ROCKS, at BOSTON,** 1899, in hot competition, won **more first and special prizes than all others.** My customers are winning all over the country. If you want the **BEST,** write me. Hundreds of **Choice Exhibition** and **Breeding Birds at Honest Prices.** Catalogue of America's finest **Plymouth Rocks** and **Wyandottes free.**

S. B. JOHNSTON, Poultry Judge. G. M. JOHNSTON.

# The National Bronze Turkeys

Are again victorious, at the great Pan-American show at Buffalo, N. Y., the largest ever held on the American Continent, winning almost as many premiums as all other competitors combined: 1st, 3d and 4th on cocks, 1st, 3d, 4th and 5th on hen, 2d and 3d on cockerels, 5th on pullet, 2d, 3d and 4th on pens. They stand unmoved, their world's record of four years in succession, winning highest honors at the Indianapolis big show.

## *The Mammoth Bronze Turkey Farm*

***Show Birds that win in the fastest pace.***

has won more first prizes during the past five years than all competitors combined. ***A Clean Sweep at the Great Indianapolis Show,*** 1st cock, 1st and 2d hen, 1st and 2d cockerel, 1st and 2d pullet, 1st and 2d pen. A record unrivalled by any breeder in America.

***Also White Wyandottes, Barred and White P. Rocks,***

as good as grows. In White Wyandottes we have some of the best winners in the East and West. We have a fine lot of stock to select from this season, brothers and sisters of the Pan-American winners. They are bred in the winning line and will produce winners, Can sell you any number and mate for best results. Have satisfied customers in every State and Territory in the United States, besides Canada, Mexico, Africa and Australia. Write for free circular, giving lowest prices on stock and eggs, quality considered. Get the best and win, it is the cheapest. Send 10 cents and get our 1902 catalogue with colored plate of a pair of our prize winners in their natural color. It gives the secret of successful rearing of the poult from the shell to the show coop, giving many valuable recipes for diseases, and is worth dollars to any one interested in Turkey and Wyandotte breeding, but our price is only 10 cents. It will be off the press about Dec. 15th.

***SAM B. JOHNSTON & CO., Box 345, Boggstown, Ind.***

# I WANT TO GIVE YOU

A beautiful souvenir, just to remind you that if its the very best and cheapest line-bred prize stock, from prize ancestors you want, we are the people for B. Rocks, S. Wyandottes, I. Games, Buff Cochins, Lt. Brahmas, Pit Games and Bronze Turkeys. So just drop us a line if you mean business and we

**WILL GIVE YOU,**

show you and tell you a few things that will do your very soul good and start you right. Just one trial is all we ask.
